中文学习译文

1. 从下列四个词语中选取两个填入空格：独资企业；普通合伙企业；有限合伙企业；公众有限公司（公司）。

_____通常拥有最广泛的融资渠道，而_____通常拥有最有限的融资渠道。

官方英文题目 · PDF 第12页

1. Fill in the two blanks below using the two of the following four possible terms:

   Sole proprietorship

   General partnership

   Limited partnership

   Public limited company (corporation)

   A _____ likely has the greatest access to financing, while a _____ likely has the least access to financing.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

公众有限公司（公司）通常拥有最广泛的融资渠道，而独资企业通常拥有最有限的融资渠道。不同组织形式的一个主要区别是能否获得为投资提供资金的融资。独资企业受制于唯一所有者投入个人资金的能力，以及其作为个人的借款能力。另一端，公众有限公司可以通过发行债务及 / 或权益证券，向广泛的外部投资者融资。

官方英文解析 · PDF 第12页

Solution:

A public limited company (corporation) likely has the greatest access to financing, while a sole proprietorship likely has the least access to financing.

A primary difference across organizational forms is access to financing to fund investments. The sole proprietorship is limited to its individual owner's ability to invest her own money and borrowing capacity as an individual. At

官方英文解析 · PDF 第13页 · 续

the other end of the spectrum, a public limited company can access a broad array of outside investors by issuing debt and/or equity securities.

补充解析 / **Supplementary explanation**

两个空格比较的是融资渠道的广度。公众有限公司能把资本需求分散给大量债权人和股东；独资企业主要依靠一个所有者的财富与借款能力。有限责任与可转让股权能扩大投资者基础，但不保证任何公司都能低成本融到资金。

The blanks compare breadth of financing access. A public corporation can distribute funding needs among many lenders and shareholders, whereas a sole proprietor relies heavily on one owner's wealth and borrowing capacity. Limited liability and transferable equity broaden the investor base without guaranteeing inexpensive funding.

相关知识点 / **Related concepts**

组织形式比较维度：融资渠道、责任承担、所有权转让、企业存续与税收。

Organizational-form dimensions: funding access, liability, transferability, continuity, and taxation.

题目与资料 / **Question and data**

中文学习译文

2. 下列哪种组织形式使所有者对企业债务承担的责任最小？

A. 普通合伙企业

B. 私人有限公司

C. 独资企业

官方英文题目 · PDF 第13页

2. Which of the following organizational forms provides for the *least* owner liability of business debts?

   A. General partnership
   B. Private limited company
   C. Sole proprietorship

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。独资企业和普通合伙企业的所有者对企业承担的全部债务负有个人责任。私人有限公司的所有者（股东）责任则以其所有权权益的价值为限。

官方英文解析 · PDF 第13页

Solution:

B is correct. In both the sole proprietorship and general partnership forms of organization, the owners are personally liable for all debts assumed by the company. In a private limited company, owner (shareholder) liability is limited to the value of their ownership stake.

补充解析 / **Supplementary explanation**

题干问所有者对企业债务的责任，而不是公司自身还债的义务。选择私人有限公司，是因为股东通常最多损失投入的股本；普通合伙人和独资经营者的个人财产可能用于清偿企业债务。公司为私人持有不妨碍其具有有限责任。

The question concerns owners' liability, not the company's own repayment obligation. Shareholders of a private limited company generally risk their invested equity; a sole proprietor's or general partner's personal assets may support business debts. Private ownership is compatible with limited liability.

相关知识点 / **Related concepts**

有限责任是所有者的法律风险边界；私人 / 公众是股权持有和交易方式的区别。

Limited liability defines owners' legal exposure; private/public status concerns ownership and trading arrangements.

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 13

题目与资料 / **Question and data**

中文学习译文

3. 公司发行人股东的投票权通常指下列哪一项？

A. 公司在政治选举中投票的权利

B. 直接选举公司首席执行官的权利

C. 选举公司董事会成员的权利

官方英文题目 · PDF 第13页

> 3. Voting rights of a corporate issuer's shareholders generally refer to which of the following?
>
> **A.** The ability of the corporation to vote in political elections
>
> **B.** The direct ability to elect a chief executive officer of the company
>
> **C.** The ability to elect members of the company's board of directors

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

C正确。股东投票权通常允许股东选举董事，并对公司章程规定的其他事项表决。董事会负责聘任（或续聘）首席执行官，因此股东投票权不赋予股东直接聘任CEO的能力。公司虽为独立法律主体，但这种身份不赋予其参加政治选举的投票权。

官方英文解析 · PDF 第13页

> **Solution:**
>
> C is correct. The voting rights of shareholders generally allow them to elect board members as well as vote on other matters outlined in the company's charter. The board of directors has the responsibility to hire (or retain) the company's chief executive officer (CEO); thus, voting rights do not give shareholders the *direct* ability to hire the CEO. Despite the status of a corporation as a distinct legal entity, this status does not provide voting rights in political elections.

补充解析 / **Supplementary explanation**

依次区分三个治理层次：股东选举董事会，董事会聘任并监督CEO，管理层负责日常经营。因此C对应股东通常拥有的直接表决权，B把董事会权限误归给股东。公司的法人身份与自然人的政治选举权也不是同一概念。

Separate governance layers: shareholders elect the board; the board appoints and oversees the CEO; management runs daily operations. Thus C describes the usual direct voting right. B incorrectly assigns the board's hiring authority to shareholders. Legal personality does not confer citizens' political voting rights.

相关知识点 / **Related concepts**

股东—董事会—管理层的授权与监督链条。

Delegation and oversight from shareholders to the board to management.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 13

题目与资料 / **Question and data**

中文学习译文

4. 解释以下情形如何体现公司组织形式的双重征税：公司对100百万美元的税前利润按21%的税率纳税；公司向股东分配10百万美元；个人对股利收入按20%的税率纳税。

官方英文题目 · PDF 第13页

> 4. Explain how the following situation reflects double taxation on the corporate organizational form: The corporation pays a 21% tax rate on pre-tax income of USD100 million. The corporation distributes USD10 million to its shareholders. Individuals pay a 20% tax on dividend income.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

公司在企业层面缴纳21百万美元所得税，股东合计对收到的股利缴纳2百万美元个人所得税。因此，100百万美元税前利润合计产生23百万美元所得税。实际上，作为股利支付的10百万美元受到两次征税：先作为企业所得，再作为个人所得。

官方英文解析 · PDF 第13页

> **Solution:**
>
> The corporation pays USD21 million in income taxes at the corporate level and, collectively, the shareholders pay USD2 million in individual income taxes on dividends received. In total, USD23 million in income taxes were paid on the pre-tax income of USD100 million. Effectively, the USD10 million paid as dividends was taxed twice, first as business income and again as personal income.

补充解析 / **Supplementary explanation**

先计算公司税：100×21%=21百万美元；再对实际派出的10百万美元股利计算个人税：10×20%=2百万美元，合计23百万美元。不能对全部税后利润79百万美元再次征税，因为本题只分配了其中10百万美元；也不能直接把21%与20%相加作为本题总有效税率。

Corporate tax is $100 \times 21\% = \text{USD}21$ million. Personal tax applies to the USD10 million actually distributed: $10 \times 20\% = \text{USD}2$ million. Total tax is USD23 million. Do not tax all USD79 million of after-tax earnings again when only USD10 million is distributed, or simply add 21% and 20%.

相关知识点 / **Related concepts**

本题总税负 / 税前利润=23%；留存收益不在本题股利税税基中。

Total tax divided by pretax profit is 23%; retained earnings are not included in this question's dividend-tax base.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / **Question and data**

中文学习译文

5. 判断正误：公众公司发行人中的"公众"，表示公司全部或部分由政府拥有。

A. 正确

B. 错误

官方英文题目 · PDF 第13页

5. True or false: The term "public" for a public corporate issuer means that the company is wholly or partially owned by a government.

   A. True
   B. False

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确，题干表述错误。公众公司发行人可以部分由政府持有，但这并不是必要条件。"公众"仅指公司的权益证券在交易所交易，从而可供公众投资。

官方英文解析 · PDF 第13页

Solution:

B is correct. The statement is false because while a public corporate issuer could be owned partly by a government, this condition is not necessary. The term "public" refers only to the fact that a company's equity securities are traded on an exchange and thus are available for investment by the public.

官方英文解析 · PDF 第14页 · 续

补充解析 / **Supplementary explanation**

这里的public描述公众能够参与股权投资，而不是政府所有权。政府持股与是否公众交易是两个独立维度：一家公众公司可以有政府股东，也可以完全没有政府股东。因此把政府持股当成必要条件会错误地选择A。

Here public describes public access to equity investment, not government ownership. Government shareholding and public trading are separate dimensions. A public company may or may not have a government shareholder, so treating state ownership as a necessary condition incorrectly leads to A.

相关知识点 / **Related concepts**

public company通常译为公众公司或上市公司；不能按字面误解为国有企业。

A public company should not be confused with a state-owned enterprise.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 14

题目与资料 / **Question and data**

中文学习译文

6. 填空：公众公司的股票可以在_____交易，而私人公司股票缺乏价格_____。

官方英文题目 · PDF 第14页

6. Fill in the blanks:

A public company's shares can be exchanged on a _____, while a private company's shares suffer from a lack of price _____.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

公众公司的股票可以在证券交易所交易，而私人公司股票缺乏价格透明度。

官方英文解析 · PDF 第14页

Solution:

A public company's shares can be exchanged on a stock exchange, while a private company's shares suffer from a lack of price transparency.

补充解析 / **Supplementary explanation**

交易所的连续报价和成交记录使公众股权较容易观察价格。私人股权仍可通过协商转让，但交易频率低、条款各异、信息有限，难以形成同样透明的可观察价格。缺少价格透明度不表示企业没有经济价值。

Exchange quotations and transaction records make public-equity prices more observable. Private shares can still trade by negotiation, but infrequent transactions, varying terms, and limited information weaken price transparency. An unobservable market price does not imply absence of economic value.

相关知识点 / **Related concepts**

价格透明度与流动性有关，但二者不完全相同；有报价也不保证可大额即时成交。

Price transparency and liquidity are related but distinct; a quote does not guarantee immediate large-volume execution.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM01-WORKED_CASE-001

西蒙地产集团（**Simon Property Group**）
Simon Property Group

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 18-19

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

西蒙地产集团（Simon Property Group）

Simon Property Group

官方答案与解析 / **Official answer and explanation**

西蒙地产集团（“西蒙”）是全球最大的零售房地产持有者之一，资产超过 330 亿美元。

Simon Property Group (“Simon”) is one of the largest owners of retail real estate in the world, with over $33 billion in assets.

其资产主要包括美国的购物中心，以及欧洲和亚洲的部分零售物业。

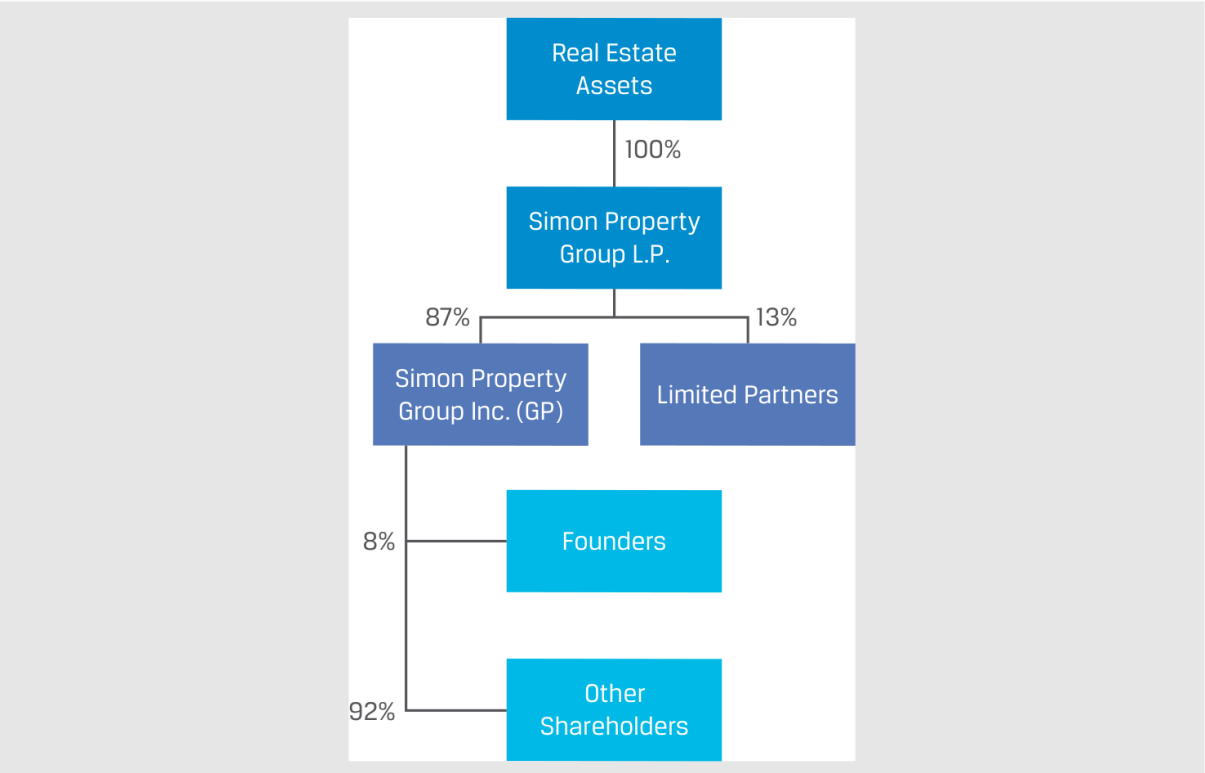

Its assets primarily include shopping centers in the United States and some retail properties in Europe and Asia.

西蒙采用两层组织架构，每层具有不同的组织形式。

Simon is organized in two layers, each with a distinct organizational form.

西蒙地产集团的所有权架构。

创始人及其他股东分别持有 Simon Property Group Inc. 的 8% 和 92%。该公司作为普通合伙人，持有 Simon Property Group L.P. 的 87%，有限合伙人持有其余 13%；合伙企业全资持有房地产资产。

原 PDF 第 19 页 · 完整图示 · 300 dpi

这些零售房地产资产由有限合伙企业 Simon Property Group L.P. 全资持有。

The retail real estate assets are wholly owned by Simon Property Group L.P., a limited partnership.

其合伙人包括普通合伙人 Simon Property Group Inc.，以及约 200 名有限合伙人。

Its partners include Simon Property Group Inc., the general partner, and approximately 200 limited partners.

普通合伙人承担全部管理责任和无限责任，并拥有该合伙企业 87% 的权益。

The general partner has full managerial responsibilities and unlimited liability and has an ownership interest of 87% in the partnership.

值得注意的是，普通合伙人 Simon Property Group Inc. 本身是一家公司。

Importantly, the general partner, Simon Property Group Inc., is itself a corporation.

它由数千名股东广泛持有，其中创始家族持有 8% 的股份。

It is broadly owned by thousands of shareholders, including the founding family, which owns 8% of shares.

Simon Property Group Inc. 只有一项资产：其在 Simon Property L.P. 中持有的合伙权益。

Simon Property Group Inc. has a single asset: its partnership interest in Simon Property L.P.

西蒙的架构使其能够与有限合伙人共同投资、保持完整的管理控制权，并取得资产产生的大部分收入，同时受益于广泛的融资渠道。这是因为，尽管普通合伙人承担无限责任，其股东却享有有限责任。由公司等有限责任实体组成的合伙企业十分常见：这种结构既使最终所有者（本例为 Simon Property Group Inc. 的股东）免于直接承担企业风险，又允许他们分享底层业务的利润和亏损。

Simon's structure allows co-investing with limited partners, full management control, and receiving most of the income from the assets, while benefiting from broad access to financing, because while the GP has unlimited liability, its shareholders have limited liability. Partnerships composed of entities with limited liability, such as corporations, are common because they shield the ultimate owners (in this case, shareholders of Simon Property Group Inc.) from business risk but allow for the sharing of profit and loss in the underlying business.

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

原教材为连贯讲解型案例，没有独立设问及答案分栏；保留官方案例与演示，未另造题目。

CI-LM01-WORKED_CASE-002

投资基金采用什么组织形式？
How Are Investment Funds Organized?

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 20-21

题目与资料 / **Question and data**

例题 2

EXAMPLE 2

投资基金采用什么组织形式？

How Are Investment Funds Organized?

官方答案与解析 / **Official answer and explanation**

投资基金是由一名或多名投资者投入资本形成的资金池，旨在获取回报和管理风险。

Investment funds are pools of capital contributed by one or more investors for earning returns and managing risks.

投资基金与市场经济中的其他公司类似：它们聘用专业管理人员，将资本（有时加上借入资金）投资于不同资产，在风险约束下实现收益目标。

Investment funds are like other companies in a market economy: They hire professional management to invest capital, sometimes with additional borrowed money, in various assets to achieve return objectives subject to risk constraints.

基金与其他公司的主要区别包括：直接雇用的人员较少；主要投资于金融工具而非经营性资产；资产配置具有分散性；以及设有具体而非笼统的目标（例如超过某一基准收益率）。

Major differences between funds and other companies include employing few people directly, primarily investing in financial instruments rather than operating assets, diversification of assets, and having specific rather than general objectives (e.g., exceed a benchmark rate of return).

投资基金常见的两种组织形式是公司和有限合伙企业，如下方两幅图所示。

Two common organizational forms for investment funds are corporations and limited partnerships, as illustrated in the following two diagrams.

采用公司形式时，基金投资者持有股份，股份代表其在底层资产池中的比例权益。

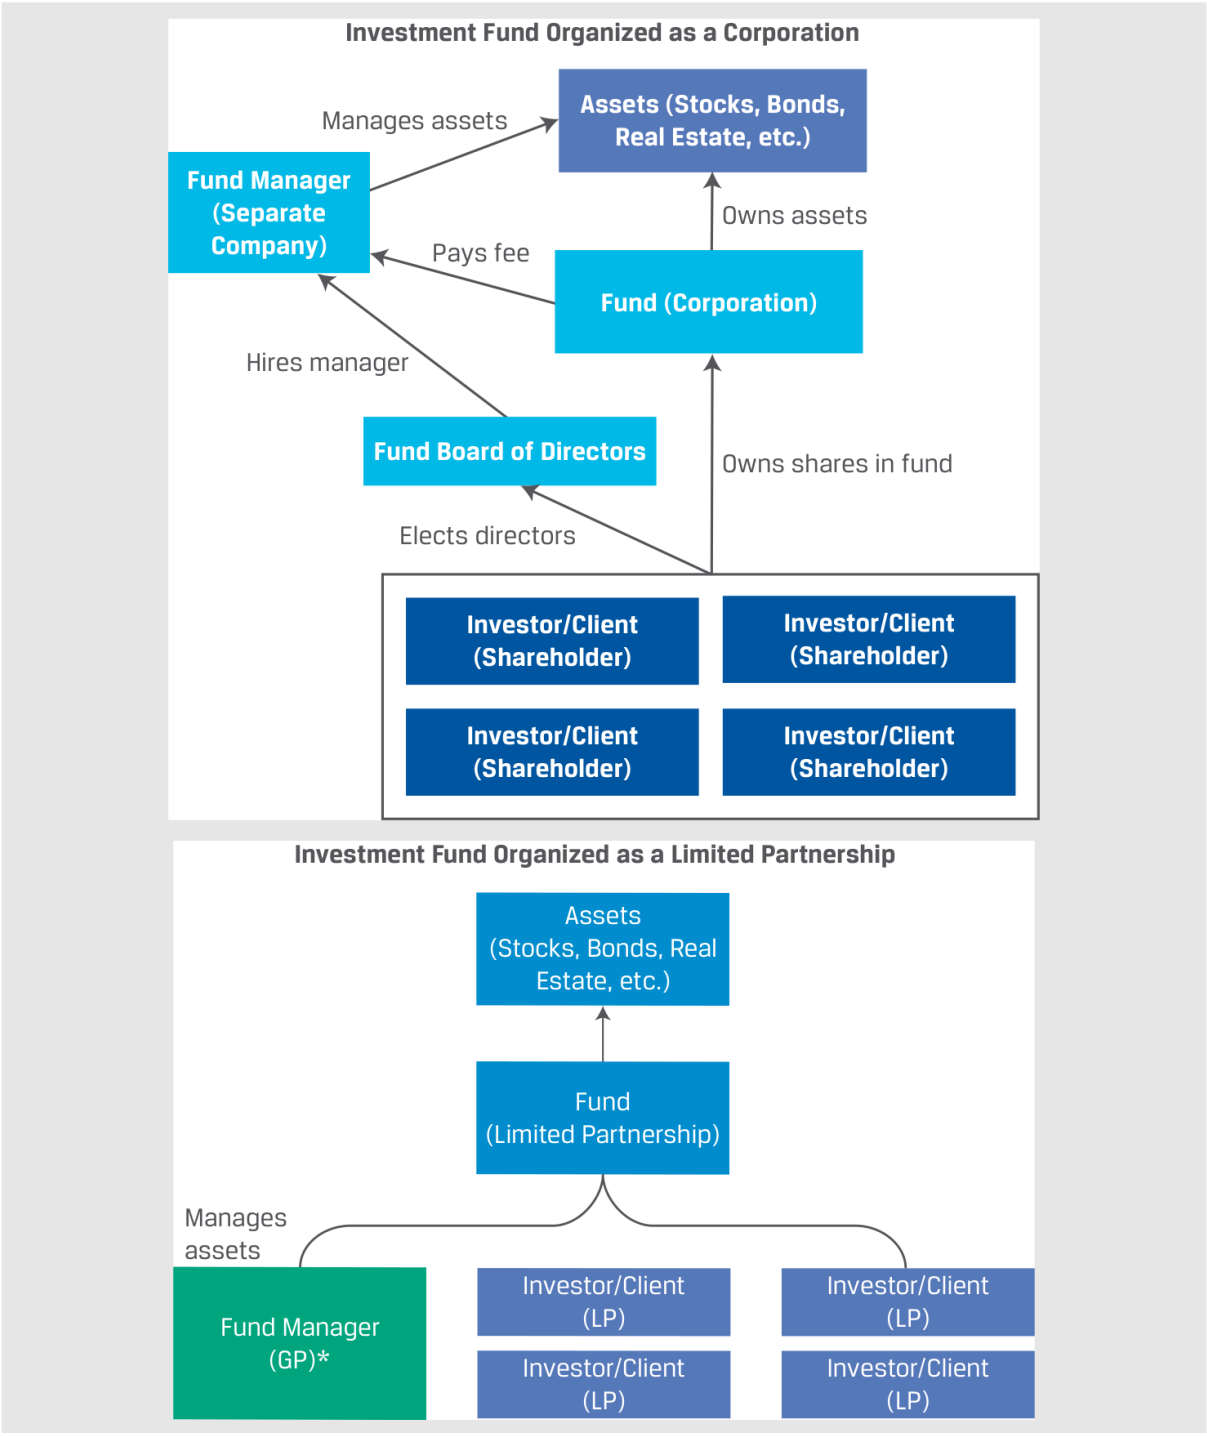

When organized as a corporation, fund investors hold shares that represent their proportionate interests in the pool of underlying assets.

采用有限合伙形式时，基金投资者持有合伙份额，份额代表其在底层资产池中的比例权益，或对特定资产具有不同比例的权益。

When organized as a limited partnership, fund investors hold partnership units that either represent their proportionate interests in the pool of underlying assets or varying interests of specific assets.

采用公司形式的投资基金：投资者 / 客户作为股东持有基金股份，并选举基金董事会。董事会聘请独立的基金管理公司；基金向管理人支付费用，管理人负责管理资产。基金拥有股票、债券、房地产等资产。

采用有限合伙形式的投资基金：投资者 / 客户是有限合伙人，基金管理人是普通合伙人并负责资产管理。有限合伙基金持有股票、债券、房地产等资产。星号说明见图后正文。

原 PDF 第 21 页 · 完整图示 · 300 dpi

* 对于这一架构，后续另类投资课程将作更详细讨论。基金管理人通常设立一家全资持有的私人有限公司作为普通合伙人，以保护基金管理人免于承担无限责任。

*In this structure, which will be discussed in greater detail later in the curriculum in lessons on alternative investment, fund managers typically create a wholly owned private limited company entity that serves as the GP to protect the fund manager from unlimited liability.

> 补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

QUESTION SET

1. 指出普通合伙企业与有限合伙企业之间的两个区别。

1. Identify two features that distinguish a general partnership from a limited partnership.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

所有者与管理者的关系：普通合伙企业的管理通常由普通合伙人共同承担；有限合伙企业则往往由普通合伙人承担大部分管理责任。

Owner–manager relationship: The management of a general partnership is typically shared by the general partners, while in a limited partnership, the general partner often exercises most managerial responsibilities.

所有者对企业债务和义务的责任：在普通合伙企业中，合伙人须以个人身份对企业债务及公司采取的行为承担法律责任。

Owner liability of business debts and obligations: In a general partnership, the partners are personally legally liable for business debt and actions undertaken by the company.

在有限合伙企业中，只有普通合伙人承担个人责任；有限合伙人的责任以其在合伙企业中的投资额为限。

In a limited partnership, only the general partner faces personal liability; limited partners' liability is limited to their investment in the partnership.

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

练习题组

QUESTION SET

2. 将以下企业特征与最适合的组织形式配对。

2. Match the following business attributes with the most appropriate organizational form.

配对题：企业特征与组织形式。

企业特征：A. 资本需求巨大；B. 单一所有者，希望形式简单；C. 公司提供专业服务。

可选组织形式：1. 有限责任合伙企业；2. 公司；3. 独资企业。

Business Attribute	Organizational Form
A. Significant capital needs	1. Limited liability partnership
B. Single owner, desires simplicity	2. Corporation
C. Company provides professional services	3. Sole proprietorship

原 PDF 第 22 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A. 2. 公司

A. 2. Corporation

B. 3. 独资企业

B. 3. Sole proprietorship

C. 1. 有限责任合伙企业

C. 1. Limited liability partnership

资本需求巨大的企业希望拥有广泛的融资渠道。

A company with significant capital needs will want broad access to financing.

在这种情况下，公司这一组织形式可能最合适。

In such a case, the corporate organizational form likely is most appropriate.

对于希望组织形式简单的单一所有者，独资企业是适合的选择。

For the single owner who desires simplicity, a sole proprietorship is a suitable mechanism.

在某些司法管辖区，它是无须注册的“默认”组织形式。

In some jurisdictions, it is the “default” organizational form and does not require registration.

律师事务所等专业服务公司要求所有者具备管理公司的专业技能。

Professional service companies, such as a law firm, require the owners to have the skill sets to manage the company.

合伙架构较为适合，而有限责任合伙架构使合伙人能够共同拥有管理控制权，同时不必由任何合伙人承担无限责任。

A partnership structure is suitable, and a limited liability partnership structure allows for the partners to share managerial control without any partner assuming unlimited liability.

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

练习题组

QUESTION SET

3. 如果企业所有者预计未来需要大量融资，以下哪种组织形式最不合适？

3. If a company owner expects to have a significant need for financing, which of the following organizational forms is the least appropriate choice?

A. 公司

A. Corporate

B. 合伙企业

B. Partnership

C. 独资企业。

C. Sole proprietorship

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

独资企业的融资受限于所有者的自有资金及其个人借款能力。

A sole proprietorship is limited in financing to the owner's funds and by the amount the owner can borrow personally.

合伙企业通过增加所有者、分散风险和提高借款能力，扩大融资渠道。

A partnership expands access to financing by adding owners, spreading risk, and adding borrowing capacity.

公司形式提供最广泛的融资渠道，因为股东人数不受限制；而且在有限责任保护下，股东相对更愿意接受公司借款。

The corporate form provides for the broadest access to financing because there are no limits to the number of shareholders and, with limited liability, shareholders are relatively more comfortable with the company borrowing.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is C. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

QUESTION SET

4. 填写下列句子中的空格：

4. Fill in the blanks in the following sentence:

_____ 责任是公司组织形式的一项优势，但由于已分配经营收入可能面临 _____ 征税，这种形式也存在潜在劣势。

_____ liability is a benefit to the corporate organizational form, but the form does face a possible disadvantage because of _____ taxation of distributed business income.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

有限责任是公司组织形式的一项优势，但由于已分配经营收入可能面临双重征税，这种形式也存在潜在劣势。

Limited liability is a benefit to the corporate organizational form, but the form does face a possible disadvantage because of double taxation of distributed business income.

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

QUESTION SET

5. 判断正误：合伙企业通常在实体层面征税，而非在各合伙人个人层面征税。

5. True or False: Partnerships are typically taxed at the entity level rather than at the individual partner level.

A. 正确

A. True

B. 错误。

B. False

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

合伙企业通常是穿透征税实体，即合伙企业取得的经营收入按合伙协议的条款归属于各合伙人，然后由各合伙人在个人层面缴税。

Partnerships are typically pass-through entities, meaning that business income earned by the partnership is passed through to the partners according to the terms of partnership agreement, and each partner is taxed at the personal level.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is B. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

题目与资料 / **Question and data**

例题 3

EXAMPLE 3

公司利润的双重征税

Double Taxation of Corporate Profits

1. 法国零售巨头欧尚控股（Auchan Holding）去年产生税前利润 8.38 亿欧元，并缴纳公司税 2.64 亿欧元。法国投资者收到股息后还须按 30% 缴税。假设欧尚将全部税后利润作为股息分配给投资者，而且所有投资者均位于法国，则总税款占欧尚税前利润的比例是多少？

1. The French retail giant Auchan Holding generated pre-tax income of €838 million last year and paid corporate taxes of €264 million. Investors in France also pay a 30% tax on dividends received. If Auchan had fully distributed its after-tax income to investors as a dividend and all its investors are in France, what is the total tax rate as a percentage of Auchan's pre-tax income?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

公司利润双重征税的计算表。

各行依次为税前利润、公司税（31.5%）、税后利润、分配的股息、投资者股息税（30%）及总税率。完整金额和计算式见下方共享原表。

Pre-Tax Income	€838
Corporate Taxes (31.5%)	€264
After-Tax Income	€838 − €264 = €574
Distributed Dividend	€574
Investor Dividend Tax (30%)	€574 × 0.30 = €172.2
Total Tax Rate	(€264 + €172.2)/€838 = 52.1%

原 PDF 第 27 页 · 完整表格 · 300 dpi

如果将 5.74 亿欧元的税后利润作为股息支付给投资者，投资者须就所收股息缴纳 1.722 亿欧元个人税。

If the after-tax income of €574 million were paid to investors as a dividend, investors would pay €172.2 million in personal taxes on the dividends received.

总税款为 4.362 亿欧元（公司层面 2.64 亿欧元，加上个人层面 1.722 亿欧元），总税率为 52.1%。

Total taxes paid would be €436.2 million (€264 million at the corporate level plus €172.2 million at the personal level), resulting in a total tax rate of 52.1%.

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

CI-LM01-QUESTION_SET-501

习题组 · 第 1 题
Question set · 1

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 27

题目与资料 / **Question and data**

练习题组

QUESTION SET

1. 说明为什么所有权与管理权分离能使公司发行人取得更广泛的资本来源。

1. Explain why the separation of ownership from management allows for corporate issuers to have greater access to capital.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

通过将所有权与管理责任分开，公司可以吸引广泛的所有者，尤其是不愿参与管理、但希望以投资者身份参与的个人和机构。

By separating ownership from management responsibilities, corporations can attract a broad range of owners, especially individuals and institutions, who do not want to be involved in management but would like to participate as investors.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

题目与资料 / **Question and data**

练习题组

QUESTION SET

3. 在以下哪种情况下，公司组织形式的双重征税影响最小？

3. In which of the following situations does the double taxation of the corporate organizational form matter the least?

A. 公司预计每年将全部税后利润作为股息支付给股东。

A. The company expects to pay all its after-tax income as a dividend to shareholders each year.

B. 公司股东居住地对股息收入适用较高的税率。

B. The company's shareholders reside in a tax jurisdiction with a high tax rate on dividend income.

C. 公司预计每年将全部税后利润再投资于企业增长。

C. The company is expecting to reinvest all its after-tax profits each year into growth of the business.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

将全部利润再投资意味着公司不向股东支付股息，因此不会发生双重征税。

Reinvestment of all profits implies that the company pays no dividend to shareholders, and thus, no double taxation occurs.

A 错误。

A is incorrect.

股息收入同时在公司层面和股东个人层面征税，因而发生双重征税。

Double taxation occurs because dividend income is taxed at both the corporate level and the shareholders' personal levels.

如果全部税后利润均被分配，股东所享有的经营收入就被征税两次。

If all after-tax profits are distributed, shareholders are taxed twice on the business's income.

B 错误，因为股东收到的股息适用较高税率，会强烈促使公司保留利润、寻找其他利润分配方式，或改变组织形式。

B is incorrect because a high tax rate on shareholders' dividend income received would be a strong impetus to retain profits, find alternative means of distributing profits, or change the organizational form.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is C. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

CI-LM01-QUESTION_SET-504

习题组 · 第 4 题
Question set · 4

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 27-28

题目与资料 / **Question and data**

练习题组

QUESTION SET

4. 参照本课欧尚控股的例子，计算欧尚采用公司形式相较于采用有限合伙企业形式所承担的额外税负（以欧元计）。已知欧尚税前利润为 8.38 亿欧元，公司税率为 31.5%，个人所得税率为 30%，且全部税后利润均已分配。

4. Referring to the Auchan Holding example in this lesson, calculate the amount of the tax disadvantage (in euros) Auchan has in its corporate form compared to if it were organized as a limited partnership. Recall that Auchan's pre-tax profit was €838 million, the corporate tax rate was 31.5%, the personal income tax rate was 30%, and all after-tax profits were distributed.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

如果欧尚采用有限合伙企业形式，其税前利润将穿透归属于所有者，只在个人层面缴税。因此，总税款为〔下方计算式 1〕，比公司组织形式下的总税款少 1.848 亿欧元。无论合伙企业是否向合伙人分配利润，均须缴纳这 2.514 亿欧元税款。

If Auchan were organized as a limited partnership, its pre-tax profit would be passed through to the owner(s) and taxes would only be paid at the personal level. Thus, total taxes paid would be〔calculation 1 below〕, or €184.8 million lower than total taxes paid under the corporate organizational form, and this tax of €251.4 million would be paid regardless of whether the partnership distributed the profit to partners.

$$€251.4 \text{ million } (= €838 \text{ million} \times 0.30)$$

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

QUESTION SET

5. 以下均为公司发行人的特征，除了：

5. Corporate issuers are characterized by all of the following except:

A. 公司收入在公司层面和个人层面均须征税。

A. Corporate income is taxed at both the corporate and personal levels.

B. 所有者无须参与公司管理。

B. Owners do not need to be involved in management of the company.

C. 公司的所有者在法律上并不独立于公司。

C. The owners of the corporation are not legally distinct from the corporation.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

公司是独立于其所有者的法律实体。

A corporation is a legally separate entity from its owners.

A 错误，因为除非公司完全不支付股息，否则公司收入会在公司层面和个人层面均被征税。

A is incorrect because corporate income is taxed at both the corporate and personal levels unless the company pays zero dividends.

B 错误，因为股东无须行使公司的管理控制权。

B is incorrect because shareholders are not required to exercise management control over the company.

虽然某些情况下大股东可能担任高级管理人员或董事会成员，但大多数股东并不承担管理责任。

While in some cases, a large shareholder may serve as senior management or be on the board of directors, most shareholders do not take on management responsibilities.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is C. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

本题要求选择“不成立、最不可能或例外”的项目。先判断各陈述在题设下是否成立，再按这一反向要求选出答案；正确选项可能本身描述的就是错误或不适用情形。

This item asks for a least-likely, inaccurate, or exception case. Evaluate each statement under the assumptions, then apply that reversed selection rule; the credited choice may itself describe the false or inapplicable case.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders’ loss to their investment. It neither prevents share-price declines nor removes the corporation’s debt obligations.

例题 4

EXAMPLE 4

官方答案与解析 / **Official answer and explanation**

全球最大的美容公司欧莱雅（L'Oréal S.A.）是一家法国 société anonyme，即公众有限公司。

L'Oréal S.A., the world's largest beauty company, is a French société anonyme, or public limited company.

该公司自 1963 年在巴黎证券交易所（现为泛欧交易所）上市以来，一直为公众持有。

It has been public since listing its shares on the Paris Stock Market (now Euronext) in 1963.

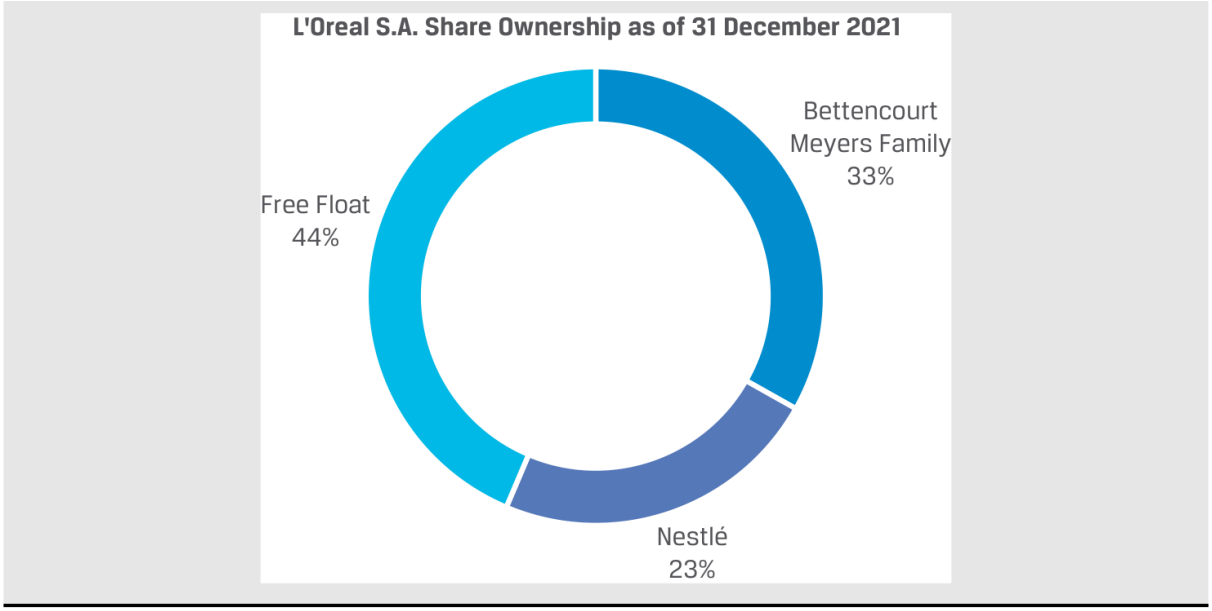

截至 2021 年 12 月 31 日，欧莱雅已发行股份约为 5.35 亿股。

As of 31 December 2021, L'Oréal had approximately 535 million shares outstanding.

欧莱雅的股份主要由弗朗索瓦丝·贝当古·梅耶斯（Francoise Bettencourt Meyers）、其家族及雀巢（一家大型瑞士上市消费品公司）持有。其余约 44% 的股份为自由流通股，由机构投资者、个人投资者及欧莱雅员工持有。

L'Oréal's shares are mostly owned by Francoise Bettencourt Meyers, her family, and Nestlé (a large, listed Swiss consumer goods company), and the remainder—the free float, approximately 44% of shares—is owned by institutional investors, individual investors, and L'Oréal employees.

截至 2021 年 12 月 31 日欧莱雅 S.A. 的股份持有情况：贝当古·梅耶斯家族持有 33%，雀巢持有 23%，自由流通股占 44%。

原 PDF 第 30 页 · 完整图示 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

KNOWLEDGE CHECK

1. 将左栏的公司特征，与右栏最合适的类别（公众持有、私人持有或两者）配对。

1. Match the applicable company characteristic in the left column with the category that best describes it (publicly held, privately held, both) on the right).

配对题：请为每项公司特征选择“公众持有”“私人持有”或“两者”。

特征依次为：在交易所上市；所有者与管理者身份重叠；已注册；股份具有流动性；须进行非财务披露；通过协商出售债务及权益。

Exchange listed	Publicly held/Privately held/Both
Owner/manager overlaps	Publicly held/Privately held/Both
Registered	Publicly held/Privately held/Both
Share liquidity	Publicly held/Privately held/Both
Non-financial disclosure required	Publicly held/Privately held/Both
Negotiated debt and equity sales	Publicly held/Privately held/Both

原 PDF 第 33 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solutions:

配对题答案：在交易所上市——公众持有；所有者与管理者身份重叠——私人持有；已注册——公众持有；股份具有流动性——公众持有；须进行非财务披露——两者；通过协商出售债务及权益——私人持有。

Exchange listed	Publicly held
Owner/manager overlaps	Privately held
Registered	Publicly held
Share liquidity	Publicly held
Non-financial disclosure required	Both
Negotiated debt and equity sales	Privately held

原 PDF 第 34 页 · 完整表格 · 300 dpi

公众持有的公司大多在交易所上市，并须注册股份。

Publicly held companies are most often listed on exchanges and required to register shares.

其股份通常具有流动性，管理层与股东的所有权身份重叠较少。

Their shares are typically liquid with minor ownership overlap between management and shareholders.

这些公司必须进行财务及非财务披露，其债务和权益通常在交易所交易。

These companies must make both financial and non-financial disclosures, and both their debt and equity are typically traded on exchanges.

私人持有的公司不在交易所上市，通常也不受相关注册要求约束。

Privately held companies are neither exchange listed nor usually subject to registration requirements.

其股份发行范围较窄，因此管理层与股东的所有权身份更可能重叠。

Share issuance is less widely distributed, creating a greater chance of ownership overlap between management and shareholders.

私人公司的股份缺乏流动性。

Private company shares are illiquid.

一般而言，这些公司只须进行非财务披露。

Generally, these companies are required to make only non-financial disclosures.

其权益和债务的出售由公司内部人士与资本提供者私下协商。

The sale of their equity and debt is privately negotiated between company insiders and capital providers.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

题目与资料 / **Question and data**

例题 5

EXAMPLE 5

特斯拉的故事

The Story of Tesla

官方答案与解析 / **Official answer and explanation**

1997 年，工程师马丁·埃伯哈德（Martin Eberhard）与计算机科学家马克·塔彭宁（Marc Tarpenning）创办了 NuvoMedia，生产名为 Rocket eBook 的电子书阅读器，它是亚马逊 Kindle 的前身。

In 1997, engineer Martin Eberhard and computer scientist Marc Tarpenning started a company called NuvoMedia to make an electronic book reader called the Rocket eBook, a precursor to Amazon's Kindle.

成立三年后，NuvoMedia 以 1.87 亿美元出售。

Three years after it was founded, NuvoMedia was sold for $187 million.

不久后，这两位创业者又成立一家专注于制造电动跑车的新公司。他们为纪念发明家尼古拉·特斯拉（Nikola Tesla），将公司命名为 Tesla Motors，并于 2003 年注册为公司。由于这项业务风险高、资本密集，两人投入了部分新获得的财富，并寻找具备电动车专业知识和筹资能力的其他共同创始人。企业家埃隆·马斯克（Elon Musk）与他们拥有将电动跑车商业化的共同愿景，因此加入团队；伊恩·赖特（Ian Wright）和公司首席技术官 J. B. 斯特劳贝尔（J. B. Straubel）也加入其中。

Soon after, the two entrepreneurs formed a new company focused on making electric sports cars. They named the company Tesla Motors in honor of the inventor Nikola Tesla, forming a corporation in 2003. As a high-risk, capital-intensive endeavor, they used some of their new-found wealth and sought other cofounders with expertise in electric vehicles and fundraising capabilities. Elon Musk, an entrepreneur with a shared vision in the commercialization of electric sports cars, joined the team, as did Ian Wright and J. B. Straubel, the company's chief technical officer.

马斯克于 2004 年向特斯拉投资 630 万美元，成为最大股东，同时帮助公司从风险投资家筹资。

In addition to investing $6.3 million in Tesla in 2004, making him the largest shareholder, Musk helped raise money from venture capitalists.

2008 年，特斯拉推出首款汽车 Roadster，马斯克也在这一年出任 CEO。

Musk became CEO in 2008, the year Tesla released its first vehicle, the Roadster.

2010 年，马斯克带领特斯拉完成首次公开发行，筹集 2.26 亿美元。

In 2010, Musk led Tesla's initial public offering, which raised $226 million.

随后数年，特斯拉从跑车转向乘用车，大幅扩大汽车产量和产品线，并于 2016 年进入光伏市场。

Over the next several years, Tesla shifted from sports cars to passenger vehicles, greatly expanding its vehicle production and product line, and in 2016, it also entered the photovoltaics market.

2017 年，公司从 Tesla Motors 更名为 Tesla, Inc.，以反映其向储能领域的多元化发展。

In 2017, it changed its name from Tesla Motors to Tesla, Inc., to reflect its diversification into energy storage.

公司继续在全球扩大汽车生产，并于 2020 年通过三次后续权益发行筹集数十亿美元。

The company continued global expansion of automobile production, issuing several billion dollars in three secondary equity offerings in 2020.

2021 年，特斯拉将总部从加利福尼亚州迁至得克萨斯州，市值达到 1 万亿美元。

Tesla moved its headquarters from California to Texas and reached a $1 trillion market capitalization in 2021.

在不到 20 年的时间内，特斯拉从初创企业成长为全球市值最大的公司之一，其公司组织形式所提供的灵活性发挥了作用。

The evolution of Tesla, Inc., over less than 20 years of existence from a startup to a firm among those with the largest market capitalization globally was assisted by the flexibility of its organizational form as a corporation.

特斯拉能够从债务和权益投资者取得大量融资，并通过股权薪酬留住包括马斯克在内的关键员工。

Tesla was able to obtain significant financing from both debt and equity investors and retain key employees, including Musk, with equity-based compensation.

补充解析 / **Supplementary explanation**

补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

官方案例
Example 6

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 35-36

题目与资料 / **Question and data**

例题 6

EXAMPLE 6

官方答案与解析 / **Official answer and explanation**

2018 年初，总部位于瑞典的音乐流媒体公司 Spotify Technology SA 成为首家通过直接上市方式在纽约证券交易所（NYSE）上市的外国发行人。

In early 2018, Sweden-based music streaming company Spotify Technology SA became the first foreign issuer to go public via direct listing on the New York Stock Exchange (NYSE).

Spotify 成立于 2006 年，上市前完成了多轮风险资本股权融资，也取得了债务融资。

Founded in 2006, Spotify secured multiple rounds of venture capital equity financing and also raised debt prior to going public.

与其他寻求上市的私人公司不同，Spotify 已是知名品牌和成熟企业，于 2011 年进入美国市场，上一年全球订阅用户超过

Unlike other private companies seeking to go public, Spotify was a well-known brand and an established company, having entered the US market in 2011, with over

7,000 万，收入超过 50 亿美元。

70 million global subscribers and over $5 billion in revenue during the prior year.

宣布直接上市时，Spotify 表示选择这一路径，是因为可以在不稀释现有股东权益的情况下上市，为现有股东提供流动性，并让买卖双方平等参与。

When announcing its direct listing, Spotify said it chose this financing route because it could list without diluting existing shareholders, offer liquidity to existing shareholders, and provide equal access to buyers and sellers.

> 补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

> 相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 36

题目与资料 / **Question and data**

知识检查

KNOWLEDGE CHECK

1. 将私人公司上市的方式与最密切相关的术语配对。

1. Match the method by which a private company can go public with the most closely related term.

上市方式：

Going Public Method:

配对题：为首次公开发行、直接上市及特殊目的收购公司（SPAC）分别选择最相关术语。每行的候选术语均为："空白支票"、现有股东、承销商。

IPO	"blank check," existing shareholder, underwriter
Direct listing	"blank check," existing shareholder, underwriter
SPAC	"blank check," existing shareholder, underwriter

原 PDF 第 36 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

配对答案：首次公开发行——承销商；直接上市——现有股东；特殊目的收购公司（SPAC）——"空白支票"。

IPO	underwriter
Direct listing	existing shareholder
SPAC	"blank check"

原 PDF 第 36 页 · 完整表格 · 300 dpi

IPO 由投资银行协助完成，投资银行承销或保证发行。直接上市不涉及承销商，也不筹集新资本；公司只是将股份在交易所挂牌，由现有股东出售股份。SPAC 是一种空壳公司，常被称为"空白支票"公司，因为其唯一目的，是在未来某个时间收购一家尚未确定的私人公司。

An IPO is facilitated by investment banks that underwrite, or guarantee, the offering. A direct listing does not involve an underwriter, and no new capital is raised. Instead, the company is simply listed on an exchange, and shares are sold by existing shareholders. A SPAC is a shell company often called a "blank check" company because it exists solely for the purpose of acquiring an unspecified private company sometime in the future.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

沙特阿美首次公开发行
Saudi Aramco IPO

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 38

题目与资料 / **Question and data**

例题 7

EXAMPLE 7

沙特阿美首次公开发行

Saudi Aramco IPO

官方答案与解析 / **Official answer and explanation**

沙特阿拉伯首次发现石油近 50 年后，政府颁布法令成立沙特阿拉伯石油公司（沙特阿美，Saudi Aramco），以控制并开展国内石油和天然气生产。

Nearly 50 years after oil was first discovered in Saudi Arabia, the government issued a decree creating the Saudi Arabian Oil Company (Saudi Aramco) to take control of and carry out petroleum and natural gas production in the country.

为部分筹措经济多元化、降低对石油依赖所需的资金，沙特政府于 2016 年宣布计划在全球交易所出售公司 5% 的股份，最多筹集 1,000 亿美元，对应沙特阿美估值 2 万亿美元。

To partially finance a plan to diversify the Saudi economy and reduce reliance on oil, the Saudi government announced its intention in 2016 to raise up to $100 billion on global exchanges by selling a 5% stake in the company, valuing Saudi Aramco at $2 trillion.

由于 IPO 延迟及估值降至 1.7 万亿美元，沙特政府在 2019 年决定缩减计划，改为在本国证券交易所出售 1.5% 股份，筹集 256 亿美元。

Given IPO delays and a lower, $1.7 trillion valuation, in 2019, the Saudi government opted to scale down its plans, selling a 1.5% stake on the domestic Saudi stock exchange for $25.6 billion instead.

尽管规模缩小，这仍是当时有史以来规模最大的 IPO，并使公司成为当时全球市值最高的上市公司。

Despite the smaller size, this transaction was the largest IPO to date and created the world's most valuable publicly traded corporation at the time.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行 IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

Public Power Corporation S.A.（公共电力公司）
Public Power Corporation S.A.

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 38

题目与资料 / **Question and data**

例题 8

EXAMPLE 8

Public Power Corporation S.A.（公共电力公司）

Public Power Corporation S.A.

官方答案与解析 / **Official answer and explanation**

希腊最大的电力公司公共电力公司（PPC），由希腊政府于 1950 年设立，为国有且由国家管理的公司。希腊加入欧盟后，PPC 失去了国内发电垄断地位。为响应将发电、输电和配电分离的欧洲电力指令，公司于 2001 年进行 IPO，出售 34% 的股份，并在随后数年通过进一步发行股份，将政府持股降至 51%。公司正在逐步淘汰燃煤电厂，转向可再生能源。2021 年，公司宣布进一步增资 7.5 亿欧元，同时将政府持股比例从 51% 降至 34%。

The largest electric power company in Greece, Public Power Corporation (PPC), was established as a state-owned and -managed corporation by the Greek government in 1950. Following Greece's entry into the EU, PPC lost its domestic power generation monopoly. In response to the European Electricity Directive separating power generation, transmission, and distribution, the company issued an IPO in 2001 for 34% of its shares and reduced government ownership further, to 51%, through subsequent share raises over the next few years. The company is phasing out coal-fired power plants and shifting to renewable energy sources, and in 2021, it announced a further share capital increase of EUR750 million combined with a reduction in government ownership, from 51% to 34%.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

例题 9

EXAMPLE 9

诺和诺德基金会与诺和诺德 A/S

Novo Nordisk Foundation and Novo Nordisk A/S

官方答案与解析 / **Official answer and explanation**

位于丹麦的诺和诺德基金会（Novo Nordisk Foundation）是全球最大的私人基金会。

The Denmark-based Novo Nordisk Foundation is the largest private foundation in the world.

它有双重目标：为旗下被投资公司的商业和研究活动提供稳定基础，以及支持科学和人道主义事业。

It has a dual objective: to provide a stable basis for the commercial and research activities conducted by investee companies within and to support scientific and humanitarian purposes.

该基金会通过其控股公司 Novo Holdings A/S，成为丹麦营利性上市生物制药公司诺和诺德 A/S 的最大股东和控股股东。

Through its holding company, Novo Holdings A/S, the foundation is the largest and controlling shareholder of the for-profit, listed Danish biopharmaceutical company Novo Nordisk A/S.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行 IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

习题组 · 第 1 题

Question set · 1

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 39

题目与资料 / **Question and data**

练习题组

QUESTION SET

1. 某公司发行人具有以下特征：不需要新增权益融资；现有银行授信额度已充分满足其债务融资需求；并有一名多数股东对公司行使管理控制权。该公司发行人更可能是公众公司还是私人公司？

1. A corporate issuer has the following attributes: It has no need for new equity financing, its debt needs are well satisfied through its existing credit facility with a bank, and it has a majority owner that exercises management control of the company. Is this corporate issuer more likely public or private?

A. 公众公司

A. Public

B. 私人公司。

B. Private

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

不需要新的权益资本，意味着在交易所上市股份的理由较少；现有授信额度下的债务融资能力已经足够经营业务，也支持这一判断。

The lack of need for new equity capital implies less reason to have exchange-listed stock, as does the ability to operate the business with the current debt capacity available under its existing credit facility.

多数股东行使管理控制权在公众或私人公司中都可能存在，但结合前两个特征来看，该公司不太可能是公众公司。

The majority owner exercising management control could possibly imply either public or private status, although combined with the first two attributes, it is doubtful that such a company would be public.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

The official choice for this item is B. Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

QUESTION SET

2. 以下哪一项不是首次公开发行（IPO）与直接上市之间的主要区别？

2. Which of the following does not reflect a primary difference between an initial public offering (IPO) and a direct listing?

A. 员工是否持有该私人公司的股份

A. Whether or not employees own shares in the private company

B. 是否筹集新资本

B. Whether or not new capital is raised

C. 是否聘用承销商。

C. Whether or not an underwriter is used

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

存在员工股东的公司，可以采用 IPO 或直接上市；员工持股并不因选择何种交易方式而不同。

A company with employee shareholders can go public with either an IPO or a direct listing; employee shareownership does not differ by the choice of transaction.

C 错误。

C is incorrect.

IPO 使用承销商管理流程并承销新股，而直接上市不使用承销商。

An IPO uses an underwriter to manage the process and underwrite the purchase of new shares, while a direct listing does not.

B 错误。

B is incorrect.

IPO 通过向公众发行新股为上市公司筹集新资本；直接上市则只将现有股份挂牌，不筹集新资本。

An IPO raises new capital for the listing company by issuing new shares to the public, while a direct listing does not; it lists only existing shares.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

The official choice for this item is A. Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

QUESTION SET

3. 描述成为公众公司的两个好处，以及发行人可能更愿意保持私人身份的两个原因。

3. Describe two benefits of being a public company and two reasons that an issuer may instead prefer to be private company.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

公众身份的好处：

Benefits of public status:

■ 公开上市使公司能够向更广泛的投资者取得资本，因此更有可能完成大规模筹资。

■ Public listing allows the company to access capital from a broader range of investors, thus making larger capital raises more feasible.

■ 在证券交易所上市能为投资者提供透明价格和便利交易。

■ Public listing allows for price transparency for investors and ease of trading because of stock exchange listing.

如果员工持有大量股份，这一点尤其有利，因为上市为这些股份创造了交易市场。

This may be especially beneficial if employees own significant stock, because listing creates a market for these shares.

私人身份的好处：

Benefits of private status:

■ 披露要求较少，从而降低合规成本；保持信息不公开还可能带来竞争优势。

■ Fewer disclosure requirements, thus reducing compliance costs and perhaps conferring competitive advantages because information can be kept private.

■ 利益相关者较少，使沟通渠道更容易畅通。

■ Fewer stakeholders, thus allowing for improved access to communication channels.

补充解析 / **Supplementary explanation**

补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

QUESTION SET

4. 指出国家政府全资持有一家公司的主要原因，并讨论可能促使政府减持国有公司股份的两个因素。

4. Identify a major reason why a national government would be a 100% shareholder in a corporate issuer, and discuss two factors that may cause a national government to reduce its ownership in a state-owned company.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

政府可能选择全资持有向国民经济提供基础设施或公共安全等公共产品的公司，因为这些产品可能无法由私人部门提供，或私人提供的方式可能不公平、效率低下。

A national government may choose to be the 100% owner of a company that provides public goods to the national economy, such as infrastructure and public safety, that would either not be provided by private means or be delivered inequitably or inefficiently.

在某些情况下，一国拥有原油等自然资源，政府可能通过全资公司开展生产，并将利润投入有利于本国的领域。

In some cases, a country may have natural resources, such as crude oil, and the national government may use a wholly owned corporation for production and to invest profits in ways that benefit its country.

政府可能减持国有公司股份的两个原因包括：（1）有机会引入外资并推动经济多元化，例如沙特阿美的案例；（2）推动私有化和放松监管，期望通过竞争降低成本并激励创新，例如邮政服务的案例。

Two possible reasons that a country may reduce its ownership in a state- owned company include (1) opportunities to bring in foreign capital and diversify the country's economy, such as the case highlighted by the Saudi Aramco example, and (2) a push for privatization and deregulation to potentially lower costs through competition and motivate innovation, as highlighted by the postal services examples.

补充解析 / **Supplementary explanation**

补充思路：区分"公众/私人"和"政府/私人所有"两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

题目与资料 / **Question and data**

练习题组

QUESTION SET

5. 一家公众公司收购一家私人公司。收购完成后，被收购公司属于公众公司还是私人公司？请说明理由。

5. A public company acquires a private company. Is the acquired company public or private after the acquisition? Explain the rationale for your choice.

A. 公众公司

A. Public

B. 私人公司。

B. Private

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

虽然被收购公司不再拥有独立公开交易的股份，收购方的股东已拥有这家原私人公司，尽管合并后公司的资产中归属于被收购公司的比例可能很小。

Even though the acquired company will not have its own shares, the shareholders of the acquirer own the formerly private company, though the percentage of assets of the combined company attributable to the acquired company may be small.

收购方的董事会和管理层现在负责经营新收购的公司。

The acquirer’s board of directors and management now operate the newly acquired company.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：区分“公众/私人”和“政府/私人所有”两个维度。公众公司股份可以面向广泛投资者交易，通常承担较多持续披露义务；私人公司所有权转让和投资者范围较受限制。所有权集中可能加强监督，也可能损害少数股东；基金会、政府或家族等控制股东还可能带来非财务目标。

The official choice for this item is A. Additional reasoning: Distinguish public versus private trading status from government versus private ownership. Public shares are broadly tradable and generally require continuing disclosure. Private ownership is more restricted. Concentration can strengthen monitoring but also harm minority holders; controlling foundations, governments, or families may pursue nonfinancial objectives.

相关知识点 / **Related concepts**

所有权结构与公众公司特征：上市并不等于政府所有；股份自由转让、持续经营与法人独立性是不同属性。集团层级越复杂，控制权与经济利益的偏离可能越大。

Ownership structure and public-company features: Listing is not government ownership. Transferability, continuity, and legal personality are distinct attributes. Complex group structures may separate control from economic ownership.

题目与资料 / **Question and data**

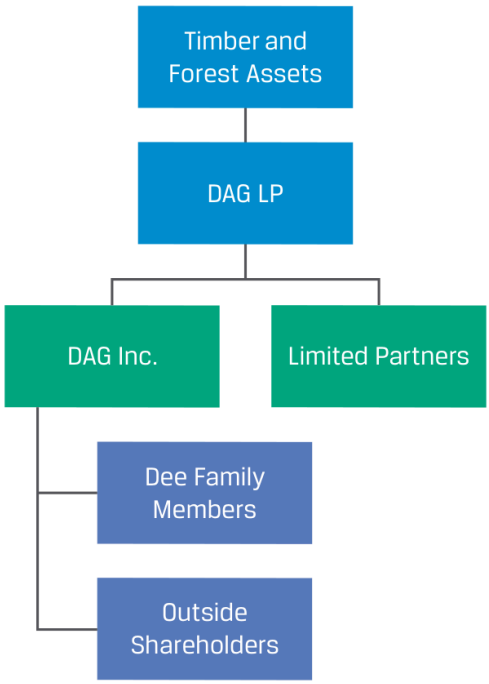

以下资料适用于第 1—5 题。

The following information relates to questions 1-5

Dee's Arbor Group Inc.（DAG Inc.）是一家大型国际投资公司，投资于位于北美洲及南美洲的林木和森林资产。DAG Inc. 是有限合伙企业 DAG LP 的普通合伙人，而 DAG LP 全资拥有这些林木和森林资产。DAG LP 由 DAG Inc. 及其有限合伙人控制；有限合伙人持有合伙企业 20% 的权益，DAG Inc. 则持有其余多数权益。DAG Inc. 的股份在美国和加拿大证券交易所上市。DAG Inc. 采用其所在司法管辖区允许的一种特殊公司形式，只要将全部净利润作为股息分配给股东，并符合其他条件，就无须缴纳公司所得税。本财政年度及过去年度，DAG Inc. 均满足这些条件。DAG Inc. 的股份由 Dee 家族的多名成员持有，他们在 DAG Inc. 和 DAG LP 担任若干重要高级管理职位，并合计拥有 DAG Inc. 30% 的股份。其余股份由不同个人和机构投资者持有，其中没有任何单一投资者持股超过 5%。下图展示 DAG Inc. 与 DAG LP 的组织架构。

Dee's Arbor Group Inc. (DAG Inc.) is a large international investor in timber and forest assets located on the North and South American continents. DAG Inc. is the general partner of DAG LP, a limited partnership that is the 100% owner of the timber and forest assets. DAG LP is controlled by DAG Inc. and its limited partners; the limited partners own a 20% stake in the partnership, while DAG Inc. holds the remaining majority stake. DAG Inc.'s shares are listed on stock exchanges in the United States and Canada. DAG Inc. is organized as a special corporate form available in its jurisdiction in which it does not pay corporate income taxes so long as it distributes all of its net income as dividends to its shareholders and complies with other conditions. In the current and past fiscal years, DAG Inc. has complied with all of these conditions. DAG Inc.'s shares are owned by various members of the Dee family, who hold several key senior management positions at DAG Inc. and DAG LP, and collectively they own 30% of the shares of DAG Inc. The remainder of DAG Inc.'s shares are owned by a variety of individual and institutional investors, none of whom own more than 5%. The following diagram shows the organizational structure of DAG Inc. and DAG LP.

DAG 的组织架构：Dee 家族成员及外部股东持有 DAG Inc.；DAG Inc. 与有限合伙人持有 DAG LP；DAG LP 持有林木和森林资产。

原 PDF 第 42 页 · 完整图示 · 300 dpi

1. 在此情形下，Dee 家族成员实际拥有多少比例的林木和森林资产？

1. What percentage of the timber and forest assets are effectively owned by the Dee family members in this scenario?

A. 24%

A. 24%

B. 30%

B. 30%

C. 80%

C. 80%

官方答案与解析 / **Official answer and explanation**

1. A 正确。Dee 家族实际拥有林木和森林资产的 24%。

1. A is correct. The Dee family effectively owns 24% of the timber and forest assets.

该家族持有 DAG（上市公司）30% 的股份，DAG 则持有拥有相关资产的有限合伙企业 80% 的权益：〔下方计算式 1〕。

They own 30% of the shares of DAG (the publicly traded corporation), and they own 80% of the limited partnership (which owns the assets): 〔calculation 1 below〕.

$$24\% = 30\% \times 80\%$$

原 PDF 第 44 页 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is A. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

公开有限公司的法律组织形式和股票已经上市交易是两个不同状态；符合该法律形式并不意味着公司必然已进行 IPO。

The public-limited legal form and having shares traded on an exchange are distinct statuses. The legal form does not imply that an IPO has occurred.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

DAG 的组织架构：Dee 家族成员及外部股东持有 DAG Inc.；DAG Inc. 与有限合伙人持有 DAG LP；DAG LP 持有林木和森林资产。

原 PDF 第 42 页 · 完整图示 · 300 dpi

2. 以下哪项最准确描述 DAG Inc. 和 DAG LP 的税务处理？

2. Which of the following best describes the taxation of DAG Inc. and DAG LP?

A. DAG LP 按税前利润缴税。

A. DAG LP pays tax based on its pre-tax income.

B. DAG Inc. 的股东按股息收入缴税。

B. Shareholders of DAG Inc. pay tax based on dividend income.

C. DAG Inc. 按税前利润缴税。

C. DAG Inc. pays tax based on its pre-tax income.

官方答案与解析 / **Official answer and explanation**

2. B 正确。DAG Inc. 采用所在司法管辖区允许的一种特殊公司形式，无须缴纳公司所得税。DAG LP 作为有限合伙企业，是穿透征税实体。DAG Inc. 的股东就股息收入缴税。A 错误。DAG LP 是有限合伙企业，合伙收入穿透归属于各合伙人，由合伙人在个人层面缴税。C 错误。DAG Inc. 采用所在司法管辖区允许的一种特殊公司形式，无须缴纳公司所得税。

2. B is correct. DAG Inc. is organized as a special corporate form available in its jurisdiction in which it does not pay corporate income taxes. DAG LP, as a limited partnership, is a pass-through entity. DAG Inc. shareholders pay tax on dividend income. A is incorrect. DAG LP is a limited partnership. Partnership income is passed through to each partner, and the partners pay tax at the personal level. C is incorrect. DAG Inc. is organized as a special corporate form available in its jurisdiction in which it does not pay corporate income taxes.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is B. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

3. 以下哪项最准确描述 DAG LP 和 DAG Inc.？

3. Which of the following best describes DAG LP and DAG Inc.?

A. DAG LP 和 DAG Inc. 均不由多数所有者管理。

A. Neither DAG LP nor DAG Inc. is managed by a majority owner.

B. DAG Inc. 所采用公司形式的股息分配要求，限制了其筹集新资本的能力。

B. DAG Inc. has limits to its ability to raise new capital because of the dividend requirement on its corporate form.

C. DAG Inc. 作为普通合伙人承担无限责任，而其公司身份意味着其股东承担有限责任。

C. DAG Inc. faces unlimited liability as the general partner, while DAG Inc.'s status as a corporation implies that its shareholders face limited liability.

官方答案与解析 / **Official answer and explanation**

3. C 正确。DAG Inc. 是 DAG LP 的普通合伙人，因此对合伙企业承担无限责任。不过，DAG Inc. 本身是公司，其股东对公司的亏损和义务承担有限责任。A 错误。DAG LP 由负责管理合伙企业的普通合伙人 DAG Inc. 持有 80% 权益。Dee 家族持有 DAG Inc. 30% 股份，并担任若干关键管理职位。B 错误。作为公众公司，DAG Inc. 可通过在交易所发行股份筹集新的权益资本。股息要求并不构成对融资能力的约束，反而可能吸引潜在投资者。

3. C is correct. DAG Inc. is the general partner of DAG LP and thus has unlimited liability in the partnership. However, as a corporation, DAG Inc.'s shareholders have limited liability for its losses and obligations. A is incorrect. DAG LP is 80% owned by DAG Inc., the general partner that manages the partnership. DAG Inc. is 30% owned by the Dee family, who holds several key managerial positions. B is incorrect. As a public company, DAG Inc. can raise new equity by issuing shares on an exchange. The dividend requirement is not a binding limit on its ability to raise capital but, rather, might be an attractive feature to prospective investors.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is C. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

DAG 的组织架构：Dee 家族成员及外部股东持有 DAG Inc.；DAG Inc. 与有限合伙人持有 DAG LP；DAG LP 持有林木和森林资产。

原 PDF 第 42 页 · 完整图示 · 300 dpi

4. DAG LP 的有限合伙人与 DAG Inc. 的外部股东之间有何重大区别？

4. What is a significant difference between the limited partners of DAG LP and the outside shareholders of DAG Inc.?

A. 管理责任

A. Managerial responsibilities

B. 合伙企业收入的税务处理

B. Taxation of income from the partnership

C. 投票及更换 DAG Inc. 董事会成员的权力

C. The ability to vote and replace members of the DAG Inc. board of directors

官方答案与解析 / **Official answer and explanation**

4. C 正确。DAG LP 的有限合伙人并非 DAG Inc. 的股东，因此没有该公司的投票权。此外，有限合伙人只持有合伙企业 20% 的权益，所以也很难撤换 DAG Inc. 这一普通合伙人。相反，外部股东持有 DAG Inc. 70% 的股份并享有投票权，可以利用其合计所有权推动 DAG Inc. 管理层变更。A 错误。DAG LP 的有限合伙人和 DAG Inc. 的外部股东都不承担管理责任。合伙企业由普通合伙人管理，公司则由 DAG Inc. 的董事会负责管理。B 错误。由于 DAG Inc. 采用特殊公司形式，公司和有限合伙企业均为穿透征税实体。因此，两者都无须在实体层面缴纳所得税，但有限合伙人及股东都须承担个人所得税。

4. C is correct. The limited partners of DAG LP are not shareholders of DAG Inc., so they do not have voting rights in the corporation. Additionally, because the limited partners own only 20% of the partnership, they also have little ability to remove DAG Inc. as the general partner. In contrast, outside shareholders own 70% of DAG Inc. and have voting rights. They could use their collective ownership to effect change in the management of DAG Inc. A is incorrect. Neither the DAG LP limited partners nor the outside shareholders of DAG Inc. have managerial responsibilities. The general partner has managerial responsibilities of the partnership, and the board of DAG Inc. has managerial responsibilities of the corporation. B is incorrect. Owing to the special corporate form of DAG Inc., both the corporation and the limited partnership are pass-through entities. Therefore, neither the partnership nor the corporation pays entity-level income taxes, but both the limited partners and shareholders are responsible for personal income taxes.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is C. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

Dee's Arbor Group Inc.（DAG Inc.）是一家大型国际投资公司，投资于位于北美洲及南美洲的林木和森林资产。DAG Inc. 是有限合伙企业 DAG LP 的普通合伙人，而 DAG LP 全资拥有这些林木和森林资产。DAG LP 由 DAG Inc. 及其有限合伙人控制；有限合伙人持有合伙企业 20% 的权益，DAG Inc. 则持有其余多数权益。DAG Inc. 的股份在美国和加拿大证券交易所上市。DAG Inc. 采用其所在司法管辖区允许的一种特殊公司形式，只要将全部净利润作为股息分配给股东，并符合其他条件，就无须缴纳公司所得税。本财政年度及过去年度，DAG Inc. 均满足这些条件。DAG Inc. 的股份由 Dee 家族的多名成员持有，他们在 DAG Inc. 和 DAG LP 担任若干重要高级管理职位，并合计拥有 DAG Inc. 30% 的股份。其余股份由不同个人和机构投资者持有，其中没有任何单一投资者持股超过 5%。下图展示 DAG Inc. 与 DAG LP 的组织架构。

Dee's Arbor Group Inc. (DAG Inc.) is a large international investor in timber and forest assets located on the North and South American continents. DAG Inc. is the general partner of DAG LP, a limited partnership that is the 100% owner of the timber and forest assets. DAG LP is controlled by DAG Inc. and its limited partners; the limited partners own a 20% stake in the partnership, while DAG Inc. holds the remaining majority stake. DAG Inc.'s shares are listed on stock exchanges in the United States and Canada. DAG Inc. is organized as a special corporate form available in its jurisdiction in which it does not pay corporate income taxes so long as it distributes all of its net income as dividends to its shareholders and complies with other conditions. In the current and past fiscal years, DAG Inc. has complied with all of these conditions. DAG Inc.'s shares are owned by various members of the Dee family, who hold several key senior management positions at DAG Inc. and DAG LP, and collectively they own 30% of the shares of DAG Inc. The remainder of DAG Inc.'s shares are owned by a variety of individual and institutional investors, none of whom own more than 5%. The following diagram shows the organizational structure of DAG Inc. and DAG LP.

DAG 的组织架构：Dee 家族成员及外部股东持有 DAG Inc.；DAG Inc. 与有限合伙人持有 DAG LP；DAG LP 持有林木和森林资产。

原 PDF 第 42 页 · 完整图示 · 300 dpi

5. 以下哪项理由最符合 Dee 家族选择这种复杂组织架构，而非简单采用有限合伙企业形式的原因？

5. Which of the following rationales would be most consistent with the Dee family's choice to create this complex organizational structure instead of simply organizing as a limited partnership?

A. 这一架构使家族无须持有多数所有权即可拥有管理控制权，同时保留有限责任。

A. It provides management control without the need for majority ownership by the family, while maintaining limited liability.

B. 复杂架构消除了双重征税的可能性。

B. The complex structure eliminates the potential for double taxation.

C. 复杂架构避免了外部投资者行使投票权可能带来的问题。

C. The complex structure avoids potential problems associated with outside investors exercising voting rights.

官方答案与解析 / **Official answer and explanation**

5. A 正确。Dee 家族只需持有合伙企业 24% 的实际权益，就能有效控制林木和森林资产的管理。如果家族只采用有限合伙企业形式，通常需要更高的所有权比例才能确保管理控制权，还须承担无限个人责任。B 错误。复杂架构与单纯合伙架构都不存在双重征税问题，因为两者均采用穿透征税。C 错误。复杂架构反而可能产生问题，因为外部股东拥有多数投票权。

5. A is correct. The Dee family can effectively control management of the timber and forest assets with only a 24% effective ownership stake in the partnership. If the family had opted for a limited partnership as the organizational form, they likely would need a much higher ownership stake to assert management control and would have unlimited personal liability. B is incorrect. The double taxation problem is not an issue in the more complex structure, nor is it a problem in the partnership structure, because both are pass-throughs. C is incorrect. The complex structure potentially creates problems because of the existence of outside shareholders constituting a majority of votes.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：组织形式的取舍要同时比较控制权、债务责任、税负和资本来源。独资结构简单但融资与风险集中于一人；合伙扩大资源，但一般合伙人可能承担无限责任；公司制通过有限责任与所有权和经营权分离扩大投资者范围。双重征税通常发生在公司利润先纳企业税，再以股息分配给股东时；留存利润的当期处理不同。

The official choice for this item is A. Additional reasoning: Compare control, liability, taxation, and access to capital together. Sole proprietorship is simple but concentrates funding and risk. Partnerships broaden resources, though general partners may bear unlimited liability. Corporations attract a wider investor pool through limited liability and separation of ownership and management. Double taxation typically arises when taxed corporate earnings are distributed as taxable dividends.

相关知识点 / **Related concepts**

组织形式、责任与融资能力：有限责任限定股东通常最多损失其投入；它不保证股价不跌，也不消除公司的偿债义务。

Organizational form, liability, and financing: Limited liability generally limits shareholders' loss to their investment. It neither prevents share-price declines nor removes the corporation's debt obligations.

中文学习译文

1. _____为发行人提供永久性资本。（债权持有人、股东）

官方英文题目 · PDF 第46页

> 1. _____ make permanent capital available to issuers. (debtholders, shareholders)

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

股东为发行人提供永久性资本。债权持有人这一答案不正确，因为债务有确定的到期日，即使该日期可能在很久以后。

官方英文解析 · PDF 第46页

> **Solution:**
> Shareholders make permanent capital available to issuers.
> Debtholders is incorrect. Debt has a finite maturity, though it can be far in the future.

补充解析 / **Supplementary explanation**

永久性资本的关键是不附带预定偿还本金的到期日。普通股东通常通过出售股票给其他投资者退出，而不是要求发行人按到期日还本。上市后二级市场交易改变持有人，却通常不抽走发行人原先收到的资本。

Permanent capital lacks a scheduled principal repayment date. Ordinary shareholders usually exit by selling to another investor, rather than demanding maturity repayment from the issuer. Secondary-market trading changes the holder without normally withdrawing the capital originally raised by the company.

相关知识点 / **Related concepts**

权益资本的永久性描述发行人的资金来源，不表示股价不会变化或股东无法退出。

Equity permanence describes issuer funding, not a fixed share price or an investor's inability to exit.

2. _____对公司的现金流拥有剩余索取权。（债权持有人、股东）

官方英文题目 · PDF 第46页

> 2. _____ have a residual claim against a firm's cash flows. (debtholders, shareholders)

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

股东对公司的现金流拥有剩余索取权。债权持有人这一答案不正确，因为相对于股东，债权持有人对公司现金流和资产拥有优先索取权。

官方英文解析 · PDF 第46页

> **Solution:**
> Shareholders have a residual claim against a firm's cash flows.
> Debtholders is incorrect. Debtholders have a *priority* claim over shareholders to a firm's cash flows and assets.

补充解析 / **Supplementary explanation**

剩余索取权意味着先满足员工、供应商、税务机关和债权人等优先或契约性要求，剩余价值才归股东。因此股东的上行收益通常更开放，但亏损与现金流不足也先侵蚀其利益。债权人合同金额较确定且优先级较高。

A residual claim receives what remains after prior or contractual claims are met. Shareholders therefore have more open-ended upside but absorb losses and cash shortfalls before senior claimants. Debt generally promises more specified payments and enjoys higher priority.

相关知识点 / **Related concepts**

剩余索取权、清偿顺序与权益风险溢价相互关联。

Residual claims, repayment priority, and the equity risk premium are related.

3. 公司治理的股东理论比利益相关者理论的范围更_____。（狭窄、广泛）

官方英文题目 · PDF 第46页

> 3. The shareholder theory of corporate governance is _____ than the stakeholder theory. (narrower, broader)

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

公司治理的股东理论比利益相关者理论的范围更狭窄。利益相关者是与公司成功有切身利益的群体和个人，包括但不限于股东。

官方英文解析 · PDF 第46页

> **Solution:**
>
> The shareholder theory of corporate governance is narrower than the stakeholder theory.
>
> Stakeholders are groups and individuals with a vested interest in a firm's success and include, but are not limited to, shareholders.

官方英文解析 · PDF 第47页 · 续

补充解析 / **Supplementary explanation**

可把股东看作利益相关者集合中的一个子集。股东理论集中于股东利益；利益相关者理论还明确考虑员工、客户、供应商、社区等群体。因此这里选择“狭窄”是目标覆盖面的判断，不是在比较哪一种治理制度必然更有效。

Shareholders form a subset of stakeholders. Shareholder theory focuses on owners, while stakeholder theory explicitly includes employees, customers, suppliers, communities, and other affected parties. Narrower describes the scope of objectives, not a claim that one governance system must always perform better.

相关知识点 / **Related concepts**

Stakeholders包含shareholders；两者不能互译。

Stakeholders include shareholders; the terms are not interchangeable.

4. ESG考虑因素是公司治理_____理论的明确目标。（股东、利益相关者）

官方英文题目 · PDF 第47页

> 4. ESG considerations are an explicit objective in the _____ theory of corporate governance. (shareholder, stakeholder)

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

ESG考虑因素是利益相关者公司治理理论的明确目标。利益相关者理论试图平衡股东利益与涉及ESG因素的更广泛群体的利益。

官方英文解析 · PDF 第47页

> **Solution:**
>
> ESG considerations are an explicit objective in the stakeholder theory of corporate governance.
>
> The stakeholder theory seeks to balance the interests of shareholders with the interests of a broader group that relate to ESG considerations.

补充解析 / **Supplementary explanation**

题目关键词是"明确目标"。利益相关者理论直接把更广泛群体的环境、社会和治理利益纳入目标。即使采用股东价值框架，具有财务重要性的ESG因素仍可能影响长期股东价值；这并不改变本题对理论目标范围的区分。

The key is explicit objective. Stakeholder theory directly incorporates broader environmental, social, and governance interests. Financially material ESG issues can also affect long-term shareholder value under a shareholder framework; that does not erase the distinction in stated objectives tested here.

相关知识点 / **Related concepts**

理论目标的覆盖面与某一因素是否具有财务重要性，是两个不同问题。

The breadth of a theory's objectives differs from whether a factor is financially material.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

中文学习译文

5. 随着时间推移，ESG因素对公司发行人财务表现和股价表现的估计影响已_____。（减小、保持不变、增大）

官方英文题目 · PDF 第47页

> 5. The estimated impact of ESG factors on corporate issuers' financial and share price performance has _____ over time. (decreased, remained the same, increased)

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

随着时间推移，ESG因素对公司发行人财务表现和股价表现的估计影响已增大。这来自消费者与投资者偏好的变化、与ESG因素有关的监管及税收增加，以及气候变化威胁的上升。

官方英文解析 · PDF 第47页

> **Solution:**
> The estimated impact of ESG factors on corporate issuers' financial and share price performance has increased over time. This impact is the result of changing consumer and investor preferences, increased regulations and taxes related to ESG factors, and the rising threat of climate change.

补充解析 / **Supplementary explanation**

原解描述影响估计随时间增强的方向，并列出偏好、监管税收和气候威胁等传导渠道。分析具体发行人时，还要判断行业暴露、地区制度、现金流时点和成本转嫁能力；不能把该概括机械地解释为所有公司都受到相同幅度或同一方向的股价影响。

The source describes a growing estimated impact and identifies preferences, regulation/tax, and climate exposure as channels. For a particular issuer, assess industry exposure, jurisdiction, timing, and cost pass-through. The general statement does not imply identical magnitudes or directions of share-price effects for every company.

相关知识点 / **Related concepts**

ESG重要性取决于行业、公司与时间范围；历史概括不能代替发行人分析。

ESG materiality varies by industry, company, and horizon; broad trends do not replace issuer analysis.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

6. 分析师越来越认识到，ESG因素是_____的。（可量化、定性）

官方英文题目 · PDF 第47页

> 6. ESG factors are increasingly recognized as _____ by analysts. (quantifiable, qualitative)

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

分析师越来越认识到ESG因素是可量化的。历史上，ESG因素被视为对公司财务报表没有直接影响的负外部性。分析师正越来越多地量化ESG因素的影响，并将其纳入公司估值和投资决策。

官方英文解析 · PDF 第47页

> **Solution:**
> ESG factors are increasingly recognized as quantifiable by analysts. Historically, ESG factors were considered negative externalities with no direct effect on firms' financial statements. Increasingly, analysts are quantifying the effects of ESG factors and including them in firm valuation and investment decision-making.

补充解析 / **Supplementary explanation**

"可量化"可以表现为收入、成本、资本支出、罚款概率或折现率的情景变化。例如环境成本一旦由企业承担，就可能进入现金流预测。可量化也不等于完全精确：分析应保留假设、概率和敏感性，避免把估计值当成确定事实。

Quantification may enter revenue, costs, capital expenditure, penalty probabilities, or discount-rate scenarios. An environmental cost borne by the issuer can affect forecast cash flows. Quantifiable does not mean perfectly measurable: retain assumptions, probabilities, and sensitivities rather than treating estimates as certainties.

相关知识点 / **Related concepts**

估值传导渠道：预期现金流、增长率、风险与资本成本。

Valuation channels: expected cash flows, growth, risk, and cost of capital.

KNOWLEDGE CHECK

1. 判断左侧特征属于债务还是权益。

1. Identify whether the attribute on the left is a feature of debt or equity.

配对题：判断各项特征属于债务还是权益。

各行依次为：法定偿还义务、资产剩余索取权、酌情支付、可税前扣除的费用、期限有限、投票权。

Legal repayment obligation	Debt, Equity
Residual asset claim	Debt, Equity
Discretionary payments	Debt, Equity
Tax-deductible expense	Debt, Equity
Finite term	Debt, Equity
Voting rights	Debt, Equity

原 PDF 第 49 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

配对答案：法定偿还义务——债务；资产剩余索取权——权益；酌情支付——权益；可税前扣除的费用——债务；期限有限——债务；投票权——权益。

Legal repayment obligation	Debt
Residual asset claim	Equity
Discretionary payments	Equity
Tax-deductible expense	Debt
Finite term	Debt
Voting rights	Equity

原 PDF 第 49 页 · 完整表格 · 300 dpi

无论采用贷款还是债券形式，债务都涉及合同义务，并赋予优先的利息和本金索取权。

Whether offered in the form of a loan or a bond, debt involves a contractual obligation with priority interest and principal claims.

权益投资者获得酌情分配，并对资产拥有剩余索取权。

Equity investors receive discretionary distributions and have a residual claim to assets.

权益股息不能税前扣除。

Equity dividend payments are not tax deductible.

债务要求按合同支付利息和本金，其中利息费用可由发行人在税前扣除。

Debt requires contractual interest and principal payments, with interest expense being tax deductible for the issuer.

债务期限有限，不赋予决策权；权益期限无限，并附带投票权。

Debt has a finite term and confers no decision-making power, while equity has an unlimited term and includes voting rights.

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

例题 1 · 第 1 题：资产负债表中的权益融资与债务融资
Example 1 · 1 — Equity- versus Debt-Based Balance Sheet Financing

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 50

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

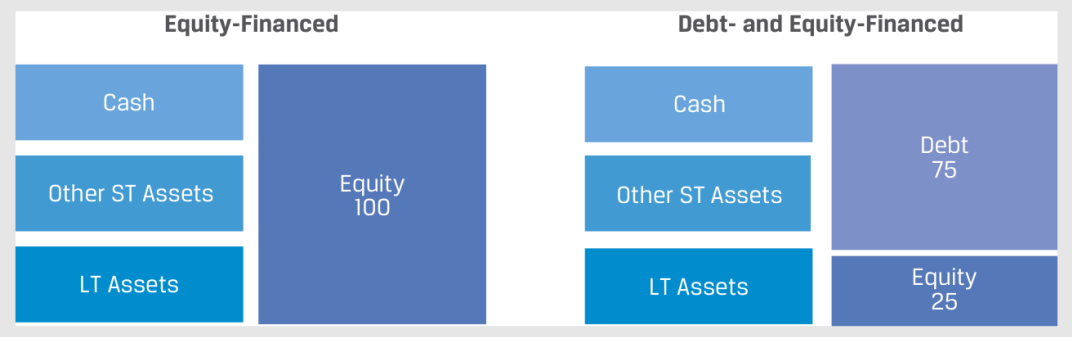

资产负债表中的权益融资与债务融资

Equity- versus Debt-Based Balance Sheet Financing

考虑一家资产完全由权益融资的企业，以及一家其他条件完全相同、但以 75% 债务和 25% 权益融资的企业。

Consider a firm with assets 100% fully financed by equity and an identical firm financed with 75% debt and 25% equity.

资产融资方式比较。两家公司的资产均包括现金、其他短期资产和长期资产；一家完全采用权益融资，另一家采用债务与权益共同融资。各融资金额见原图。

原 PDF 第 50 页 · 完整图示 · 300 dpi

假设两家公司某一期的收入均为 100，经营费用均为 70。

Assume that both firms have revenue, over a period, of 100 and operating expenses of 70.

不考虑所得税。

Ignore income taxes.

1. 假设该期利息费用为 15，计算各公司的净利润，并比较该期股东权益回报率（ROE）。解释为什么使用债务融资时 ROE 更高。

1. If we assume interest expense of 15 for the period, calculate net income for each firm and compare their returns on equity (ROE) for the period. Explain why ROE is higher when debt financing is used.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

从收入中减去费用得到净利润，再将净利润除以权益总额，得到单期股东权益回报率：

Solve for net income by subtracting expenses from revenue, and divide net income by total equity to solve for the one-period return on equity:

权益融资与债务、权益共同融资的比较表。

两列方案的行项目依次为：收入；减去经营费用；减去利息费用；净利润；权益总额；股东权益回报率。

Equity-Financed		Debt- and Equity-Financed	
Revenue	100	Revenue	100
Less: Operating Expenses	−70	Less: Operating Expenses	−70
		Less: Interest Expense	−15
Net Income	30	Net Income	15
Total Equity	100	Total Equity	25
Return on Equity	**30%**	**Return on Equity**	**60%**

原 PDF 第 50 页 · 完整表格 · 300 dpi

使用债务时，股东权益回报率更高，因为债务利息成本低于公司的资产回报率。债务利率 = 〔下方计算式 1〕，而资产回报率 = 〔下方计算式 2〕。

Return on equity is higher when debt is used, because the interest cost of debt is lower than the firm's return on assets. Interest rate on debt = 〔calculation 1 below〕 versus return on assets = 〔calculation 2 below〕.

$$15/75 = 20\%$$

原 PDF 第 50 页 · 300 dpi

$$30/100 = 30\%$$

原 PDF 第 50 页 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

CI-LM02-EXAMPLE-202

Example 1 · 2 — Equity- versus Debt-Based Balance Sheet Financing

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 50-51

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

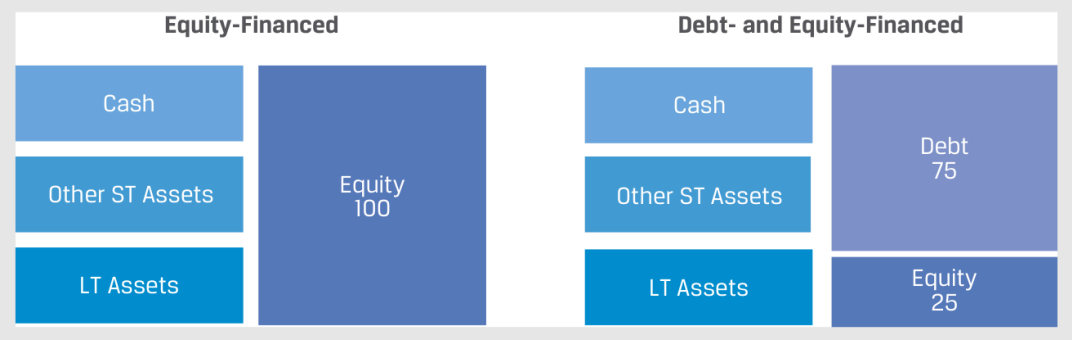

资产负债表中的权益融资与债务融资

Equity- versus Debt-Based Balance Sheet Financing

考虑一家资产完全由权益融资的企业，以及一家其他条件完全相同、但以 75% 债务和 25% 权益融资的企业。

Consider a firm with assets 100% fully financed by equity and an identical firm financed with 75% debt and 25% equity.

资产融资方式比较。两家公司的资产均包括现金、其他短期资产和长期资产；一家完全采用权益融资，另一家采用债务与权益共同融资。各融资金额见原图。

原 PDF 第 50 页 · 完整图示 · 300 dpi

假设两家公司某一期的收入均为 100，经营费用均为 70。

Assume that both firms have revenue, over a period, of 100 and operating expenses of 70.

不考虑所得税。

Ignore income taxes.

2. 假设费用不变，计算两家公司收入较第 1 题分别增加 20% 和减少 20% 时，该期的股东权益回报率。

2. Calculate returns on equity for the period if the firms experience a 20% increase and a 20% decrease in revenue (from Question 1), assuming expenses remain unchanged.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

收入增加及减少时，净利润和股东权益回报率计算如下：

Solve for net income and return on equity given the increase and decrease in revenue as follows:

收入增加 20% 时的比较表。

比较完全权益融资与债务、权益共同融资。行项目包括收入、减去经营费用、减去利息费用、净利润、权益总额及股东权益回报率。

20% *Increase* in Revenue

Equity-Financed		**Debt- and Equity-Financed**	
Revenue	120	Revenue	120
Less: Operating Expenses	−70	Less: Operating Expenses	−70
		Less: Interest Expense	−15
Net Income	50	Net Income	35
Total Equity	100	Total Equity	25
Return on Equity	**50%**	**Return on Equity**	**140%**

原 PDF 第 51 页 · 完整表格 · 300 dpi

收入减少 20% 时的比较表。

比较完全权益融资与债务、权益共同融资。行项目包括收入、减去经营费用、减去利息费用、净利润、权益总额及股东权益回报率；括号内数值表示负数。

20% *Decrease* in Revenue

Equity-Financed		**Debt- and Equity-Financed**	
Revenue	80	Revenue	80
Less: Operating Expenses	−70	Less: Operating Expenses	−70
		Less: Interest Expense	−15
Net Income	10	Net Income	**(5)**
Total Equity	100	Total Equity	25
Return on Equity	**10%**	**Return on Equity**	**(20%)**

原 PDF 第 51 页 · 完整表格 · 300 dpi

本例展示使用债务融资能提高股东的潜在回报，同时也增加风险。

This example demonstrates the greater potential shareholder return when debt financing is used—but also the greater risk.

尤其是在收入下降的情形下，债务与权益共同融资的发行人出现净亏损，说明其未来可能无法履行债务支付义务。

In particular, the net loss in the downside case for the issuer financed with debt and equity raises the possibility that it may be unable to meet future debt payments.

该公司的 ROE 波动明显高于完全采用权益融资的公司。

The variation in ROE for the company financed with debt and equity is significantly higher than the ROE variation for the all-equity-financed company.

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

CI-LM02-EXAMPLE-301

例题 2 · 第 1 题：使用债务、权益或现有现金为投资融资
Example 2 · 1 — Financing an Investment with Debt, Equity, or Cash on Hand

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 52-53

题目与资料 / **Question and data**

例题 2

EXAMPLE 2

使用债务、权益或现有现金为投资融资

Financing an Investment with Debt, Equity, or Cash on Hand

考虑例题 1 中完全采用权益融资的公司，它需要为一项金额为 20 的新增长期资产投资选择融资方式。

Consider the same equity-financed firm as in Example 1 and its choices for financing a new investment in long-term assets of 20.

该公司的初始资产负债表相关信息如下。

The pertinent details in the firm's initial balance sheet are shown below.

投资前收入为 100，费用为 70 且预计保持不变；新增债务融资利率为 20%，新投资回报率为 30%。

Revenue before the investment is 100, expenses are 70 and are expected to remain unchanged, interest on new debt financing is 20%, and the return on the new investment is 30%.

不考虑所得税。

Ignore income taxes.

初始资产负债表：资产包括现金、其他资产和长期资产；资金来源为权益。各项金额见原表。

Initial Balance Sheet			
Cash	30		
Other assets	20		
LT assets	50	Equity	100

原 PDF 第 52 页 · 完整表格 · 300 dpi

1. 比较公司分别使用债务、发行股份或现有现金为投资融资时的股东权益回报率，并讨论比较结果。

1. Compare the firm's returns on equity if it finances the investment with debt, shares, or cash on hand. Discuss the results of the comparison.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

新投资的三种融资方案：发行股份、借款、使用现有现金。

上半部分为融资后的资产负债表，项目包括现金、其他资产、长期资产、债务及权益。下半部分比较收入、减去经营费用、减去利息、净利润、权益总额及股东权益回报率。

Issue Shares		Borrow		Cash on Hand	
Cash 30		Cash 30		Cash 10	
Other 20		Other 20	Debt 20	Other 20	
LT assets 70	Equity 120	LT assets 70	Equity 100	LT assets 70	Equity 100

	Issue Shares	Borrow	Cash on Hand
Revenue	106	106	106
Less: Operating Expenses	70	70	70
Less: Interest		4	
Net Income	36	32	36
Equity	120	100	100
ROE	30%	32%	36%

原 PDF 第 52 页 · 完整表格 · 300 dpi

通过发行股份为投资融资，因新增权益造成稀释，所得 ROE 最低。

Financing the investment by issuing shares produces the lowest ROE due to the dilution from additional equity.

由于投资回报率等于初始 ROE，因此 ROE 不变。

Because the investment produces a return equal to the beginning ROE, there is no change in ROE.

债务融资产生更高的 ROE，因为债务利率低于新投资回报率，而且没有发行新股，权益总额不增加。

Financing with debt produces a higher ROE, because the interest rate on debt is lower than the return on the new investment and no new shares are issued, so equity does not increase.

使用现有现金产生最高的 ROE，因为既避免增加权益，又避免新增债务的利息成本。

The highest ROE is produced by using cash on hand, which avoids both the increase in equity and the interest cost of new debt.

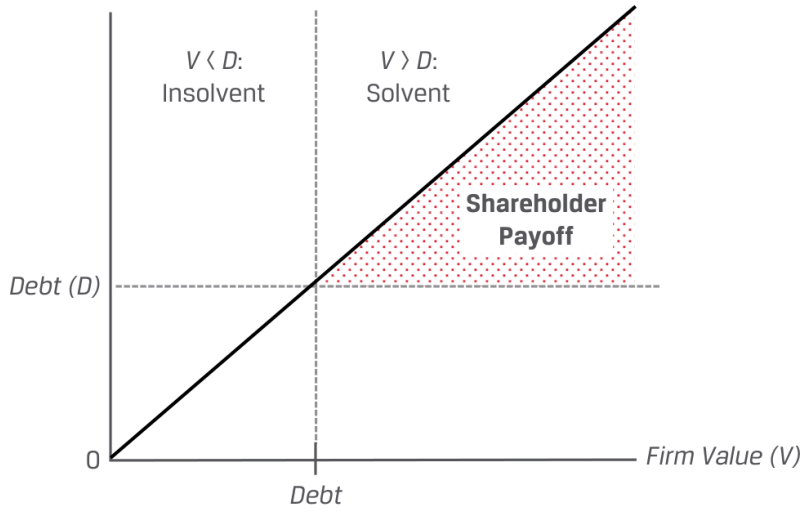

图表 3 将股东回报表示为企业价值的函数，展示其随企业价值变化而呈现的不对称性。

Exhibit 3 shows this shareholder payoff asymmetry over time as a function of firm value.

图表 3：企业价值与股东回报。

横轴为企业价值，纵轴为股东回报；债务价值为分界点。企业价值低于债务时为资不抵债，高于债务时具有偿付能力。

Exhibit 3: Firm Value and Shareholder Payoff

原 PDF 第 53 页 · 完整图示 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 54

题目与资料 / **Question and data**

知识检查

KNOWLEDGE CHECK

1. 公司权益持有人与债务持有人在以下哪方面具有相同的投资者视角？

1. Corporate equity and debt holders share the same investor perspective with respect to:

A. 最大损失。

A. maximum loss.

B. 投资风险。

B. investment risk.

C. 回报潜力。

C. return potential.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

无论权益持有人还是债务持有人，初始投资都是其最大可能损失。

For both equity and debt holders, their initial investment represents their maximum possible loss.

权益持有人的回报潜力在理论上没有上限，而债权人的回报有上限。

The return potential is theoretically unlimited for equity holders, while it is capped for debtholders.

权益持有人承担更高投资风险，因为其对企业现金流拥有的是剩余索取权，优先级低于债权人的索取权。

Equity holders are exposed to a higher level of investment risk, as they hold a residual claim on the firm's cash flows that is lower in priority to the debtholders' claim.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

The official choice for this item is A. Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

知识检查

KNOWLEDGE CHECK

2. 判断正误：与权益持有人不同，债权人的潜在下行损失与上行收益是对称的。

2. True or False: Debtholders, unlike equity holders, have symmetric potential downside losses and upside gains.

A. 正确。

A. True.

B. 错误。

B. False.

官方答案与解析 / Official answer and explanation

答案：

Solution:

B 正确，这一说法错误。

B is correct; the statement is false.

债权人和权益持有人的潜在回报均不对称。

Both debtholders and equity holders have asymmetric potential payoffs.

对债权人而言，无论企业价值涨得多高，潜在上行收益均限于利息和本金偿还。

For debtholders, potential upside gains are limited to interest and principal repayments, regardless of how high the value of the firm rises.

相反，如果企业价值跌至债务价值以下，债权人可能损失全部初始投资。

In contrast, if the value of the firm falls below the value of its debt, debtholders can lose up to their initial investment.

对权益持有人而言，权益价值等于企业价值减去债务价值。

For equity holders, equity value is determined as the value of the firm less the value of its debt.

股东的潜在上行收益仅受企业未来价值约束；但与债权人一样，股东的损失以初始投资为限。

Potential upside gains to shareholders are limited only by the future value of the firm, while shareholder losses, like those of debtholders, are limited to their initial investment.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

The official choice for this item is B. Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

QUESTION SET

1. 以下哪个群体对发行人的现金流拥有剩余索取权？

1. Which of the following groups has a residual claim on an issuer's cash flows?

A. 员工

A. Employees

B. 债权人

B. Debtholders

C. 股东。

C. Shareholders

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

股东对企业现金流拥有剩余索取权，在员工薪酬、供应商款项、利息费用和税款等优先索取权得到满足后，才可能获得酌情分配。

Shareholders are residual claimants to a firm's cash flows and receive discretionary distributions after priority claims (e.g., employee compensation, supplier payments, interest expenses, and taxes) are met.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

The official choice for this item is C. Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

QUESTION SET

2. 债务和权益中，哪一种对企业价值变化更敏感？请解释。

2. Which is more sensitive to changes in firm value: debt or equity? Explain your answer.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

权益对企业价值变化更敏感，因为债权人拥有固定、优先的索取权，而权益持有人拥有剩余索取权，其价值取决于公司未来利润。

Equity is more sensitive to changes in firm value, because debtholders have fixed, priority claims while equity holders have residual claims whose value is contingent on future firm profits.

一方面，企业价值增加时，新增剩余价值归股东所有，债权人收到的款项不变。

On the one hand, if firm value increases, residual value accrues to shareholders while debtholder payments do not change.

另一方面，企业价值下降时，首先由权益持有人承担损失。

On the other hand, reductions in firm value fall first on equity holders.

如果企业价值低于债务价值，并被认定为资不抵债，权益持有人通常一无所获，债权人则接管公司，并往往寻求清算资产。

If firm value falls below debt value and the firm is declared insolvent, equity holders typically receive nothing and debtholders take control of the firm and often seek to liquidate its assets.

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

QUESTION SET

3. 向债权人支付的利息：

3. Interest payments to debtholders are:

A. 属于剩余支付。

A. residual payments.

B. 由董事会酌情决定。

B. at the discretion of the board.

C. 可在计算公司所得税时扣除。

C. deductible for corporate income tax purposes.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

债务利息支付可由公司在税前扣除。

Interest payments on debt are tax deductible for the firm.

A 错误。

A is incorrect.

债权人对公司现金流的索取权优先于股东。

Debtholders have priority claims on the cash flows of the firm over shareholders.

B 错误。

B is incorrect.

利息支付属于合同义务，不像股东股息那样可酌情决定。

Interest payments are contractual, not discretionary like shareholder dividends.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

The official choice for this item is C. Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

4. 以下均属于债务的特征，除了：

4. All of the following are characteristics of debt except:

A. 有限责任。

A. limited liability.

B. 无限回报。

B. unlimited return.

C. 优先获得支付。

C. priority in payment.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

可能获得无限回报的是股东，而非债权人。

Shareholders, not debtholders, have the potential for unlimited return.

A 错误。

A is incorrect.

债权人和股东都承担有限责任。

Debtholders and shareholders both have limited liability.

C 错误。

C is incorrect.

债权人对公司现金流的索取权优先于股东。

Debtholders have a priority claim over shareholders to a firm's cash flows.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

The official choice for this item is B. Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

本题要求选择"不成立、最不可能或例外"的项目。先判断各陈述在题设下是否成立，再按这一反向要求选出答案；正确选项可能本身描述的就是错误或不适用情形。

This item asks for a least-likely, inaccurate, or exception case. Evaluate each statement under the assumptions, then apply that reversed selection rule; the credited choice may itself describe the false or inapplicable case.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

题目与资料 / **Question and data**

练习题组

QUESTION SET

5. 其他条件相同，一个司法管辖区提高公司所得税率，最可能使发行人对债务融资的使用程度 _____。（降低 / 提高 / 不变）

5. All else being equal, a jurisdiction increasing its corporate income tax rate would most likely lead to _____ (lower/higher/the same) use of debt financing by issuers.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

提高。公司所得税率上升，可能使债务融资比例提高。债务利息可以税前扣除，因此在其他条件相同的情况下，税率提高会降低债务融资的税后成本，从而使债务融资相对于权益融资更具吸引力。

Higher. An increase in the corporate income tax rate would likely result in a higher mix of debt. Interest payments on debt are tax deductible, so an increase in the tax rate would reduce the after-tax cost of debt financing, all else being equal, thus making debt financing relatively more attractive than equity financing.

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

KNOWLEDGE CHECK

1. 公司市场价值显著上升时，哪类利益相关者最可能获得最大好处？

1. Which stakeholders would most likely realize the greatest benefit from a significant increase in the market value of the company?

A. 债权人

A. Creditors

B. 客户

B. Customers

C. 股东。

C. Shareholders

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

股东对公司拥有剩余索取权，其财富与公司市场价值直接相关。

Shareholders have residual claims on the company, and their wealth is directly related to the market value of the company.

A 错误，因为公司价值上升时，债权人通常无权获得利息及债务偿还之外的额外现金流。

A is incorrect because creditors are usually not entitled to any additional cash flows (beyond interest and debt repayment) if the company's value increases.

B 错误，因为客户虽然可能关注公司的稳定性和长期存续能力，但不会直接受益于公司价值提高。

B is incorrect because, though customers may have an interest in the company's stability and long-term viability, they do not benefit directly from a higher company value.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

The official choice for this item is C. Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

QUESTION SET

1. 简要讨论公司治理的股东理论与利益相关者理论实际上可能如何保持一致。

1. Briefly discuss how the shareholder and stakeholder theories of corporate governance may in fact be aligned with each other.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

利益相关者理论考虑平衡股东、债权人及其他与企业成功密切相关群体的目标。

The stakeholder theory considers balancing the objectives of shareholders, debtholders, and the broader set of stakeholders that have a vested interest in the success of the firm.

从长期来看，在这一更广泛框架内决策，可能符合股东的最佳利益。

It may be in the shareholders' best interests in the long run to make decisions within this broader framework.

例如，较高工资和良好工作条件能够提高员工生产率、降低员工流失率，从而提高利润。

For example, high wages and good working conditions can lead to productive employees and low employee turnover, which boosts profits.

补充解析 / **Supplementary explanation**

补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

Additional reasoning: Assess exposure through dependence on the firm and available alternatives. QUESTION SET

3. 指出并解释一种使股东、管理人员和员工利益保持一致的方法。

3. Identify and explain a method of aligning the interests of shareholders, managers, and employees.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

通过与业绩和 / 或股权挂钩的薪酬，可以使管理人员和员工的利益与股东利益保持一致。

Aligning manager and employee interests with those of shareholders can be accomplished with performance- and/or share-based compensation.

股东希望利润和企业价值增加；以利润或股东回报指标为基础的奖金，或与员工分享利润等业绩薪酬，可以使双方利益一致。

Shareholders seek an increase in profits and firm value, and performance-based compensation—such as bonuses based on profit or shareholder return measures, or profit sharing with employees—would align manager and employee interests with shareholder interests.

向员工和管理人员授予股份或股票期权，会使他们本身成为股东，进一步增强利益一致性。

Awarding shares or stock options to employees and managers increases alignment, as employees and managers become shareholders themselves.

补充解析 / **Supplementary explanation**

补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

管理层控制日常决策但未必承担全部经济后果。薪酬、职位安全和私人利益可能与股东价值冲突，因此需要激励设计、监督和问责。

Managers control daily decisions without necessarily bearing all economic consequences. Pay, job security, and private benefits can conflict with shareholder value, motivating incentives, oversight, and accountability.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

题目与资料 / **Question and data**

练习题组

QUESTION SET

4. 与公开债务持有人（如债券持有人）相比，私人债权人（如银行、出租人）：

4. Compared with public debtholders (e.g., bondholders), private debtholders (e.g., banks, lessors):

A. 对公司管理层的影响较小。

A. have less influence over company management.

B. 可以取得公司的非公开信息。

B. have access to non-public information about the company.

C. 较不可能同意修改债务合同。

C. are less likely to consent to changes in the debt contract.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

银行及其他直接贷款人等私人债权人，通常可以直接接触管理层并取得非公开信息，从而降低信息不对称。

Private debtholders, including banks and other direct lenders, typically have direct access to management and non-public information, which lowers information asymmetry.

A 错误。

A is incorrect.

私人债权人对公司管理层的影响通常大于债券持有人。

Private debtholders typically have more influence over company management than bondholders do.

C 错误。

C is incorrect.

私人债权人与借款人的关系比债券持有人更紧密、更具定制性，因此更可能允许修改债务合同，例如调整契约限制。

Private debtholders have closer and more bespoke relationships with borrowers than bondholders do and thus are more likely to allow changes in the debt contract, such as changing covenants.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

The official choice for this item is B. Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

管理层控制日常决策但未必承担全部经济后果。薪酬、职位安全和私人利益可能与股东价值冲突，因此需要激励设计、监督和问责。

Managers control daily decisions without necessarily bearing all economic consequences. Pay, job security, and private benefits can conflict with shareholder value, motivating incentives, oversight, and accountability.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

CI-LM02-QUESTION_SET-705

习题组 · 第 5 题
Question set · 5

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 62-63

题目与资料 / **Question and data**

练习题组

QUESTION SET

5. 以下哪种董事会架构最会限制股东推动公司管理层重大变更的能力？

5. Which of the following board structures would most limit shareholders' ability to effect a major change in the management of a firm?

A. 内部董事占多数，采用交错任期。

A. Majority inside, staggered

B. 独立董事占多数，采用交错任期。

B. Majority independent, staggered

C. 独立董事占多数，不采用交错任期。

C. Majority independent, non-staggered

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

内部董事占多数的董事会，比多数成员独立于管理层的董事会更容易抵制外部变革。

A board with a majority of inside directors could more easily resist outside change than one with a majority of directors who were independent of management.

此外，交错任期董事会每年只能通过投票更换部分董事，因此需要数年才能更换多数董事。

Also, a staggered board would allow only a portion of the directors to be voted out each year, so it would take several years to replace a majority of directors.

补充解析 / **Supplementary explanation**

内部董事占多数使管理层更易影响董事会；交错任期又使股东无法在一次年度选举中替换全部董事。两种特征合并，最能限制股东迅速改变控制权。独立性与任期安排属于不同维度，应分别判断。

A majority of insiders increases management influence, while staggered terms prevent replacement of the entire board in one annual vote. Together they most restrict rapid shareholder-driven change. Board independence and election timing are separate governance dimensions.

相关知识点 / **Related concepts**

董事独立性与交错任期对控制权的影响。

Board independence and staggered terms affect control.

1. ESG 考量越来越重要，是由于以下哪些原因（最多选择三项）？

1. ESG considerations are increasingly relevant for which of the following reasons (select up to three options)?

A. 新一代投资者中，许多人要求投资策略纳入 ESG 因素。

A. Many in the new generation of investors are demanding that investment strategies incorporate ESG factors.

B. ESG 问题对公司估值的重大影响正在增加。

B. ESG issues are having more material impacts on companies' valuations.

C. 环境和社会问题被视为负外部性。答案：

C. Environmental and social issues are being treated as negative externalities. Solution:

官方答案与解析 / **Official answer and explanation**

A 和 B 正确。

A and B are correct.

A 正确。

A is correct.

新一代投资者中，越来越多人要求在管理继承财富或养老金缴款时，采用系统考虑投资组合重大 ESG 风险，以及环境和社会负面影响的投资策略。

A growing number among the new generation of investors increasingly demand that their inherited wealth or pension contributions be managed using investment strategies that systematically consider material ESG risks, as well as negative environmental and societal impacts, of their portfolio investments.

B 正确。

B is correct.

ESG 问题对公司估值的重大影响正在增加。

ESG issues are having more material impacts on companies' valuations.

公司对 ESG 问题管理不善，造成环境灾难、社会争议和治理缺陷，已使许多投资者遭受重大损失。

Many investors have suffered substantial losses due to corporate mismanagement of ESG issues, resulting in environmental disasters, social controversies, and governance deficiencies.

C 错误。

C is incorrect.

与过去相比，环境和社会问题较少被视为负外部性。

Environmental and social issues are less frequently treated as negative externalities than in the past.

随着利益相关者意识增强及监管趋严，公司不得不将环境和社会成本以明确或隐含的方式内部化，反映在利润表中，以供负责任的投资者评估。

Increased stakeholder awareness and stronger regulations are forcing companies to internalize environmental and societal costs in their income statements, either explicitly or implicitly, for responsible investors.

补充解析 / **Supplementary explanation**

补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

管理层控制日常决策但未必承担全部经济后果。薪酬、职位安全和私人利益可能与股东价值冲突，因此需要激励设计、监督和问责。

Managers control daily decisions without necessarily bearing all economic consequences. Pay, job security, and private benefits can conflict with shareholder value, motivating incentives, oversight, and accountability.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

QUESTION SET

1. 从历史上看，分析师最擅长评估公司的：

1. Historically, analysts have best been able to evaluate a company's:

A. 社会实践。

A. social practices.

B. 治理实践。

B. governance practices.

C. 环境实践。

C. environmental practices.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

分析师对公司治理因素及不良治理的后果有较深入理解，并能够量化。

Corporate governance factors are well understood and quantifiable by analysts, including the consequences of poor corporate governance.

相比之下，将环境和社会因素纳入投资决策的过程发展较慢。

In contrast, the inclusion of environmental and social factors in investment decision-making has evolved more slowly.

评估环境和社会因素对企业表现的影响时，结果往往不够明确。

The results of evaluating the effects of environmental and social factors on firm performance are often less clear.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

The official choice for this item is B. Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

QUESTION SET

2. 从历史上看，环境和社会问题被视为

2. Historically, environmental and social issues have been treated as

_____。

_____.

不过，如今它们越来越被视为 _____。

However, they are increasingly being recognized as _____.

（负外部性、内部化成本）

(negative externalities, internalized costs).

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

从历史上看，环境和社会问题被视为负外部性。

Historically, environmental and social issues have been treated as negative externalities.

不过，如今它们越来越被视为内部化成本。

However, they are increasingly being recognized as internalized costs.

过去，人们认为企业不当决策的负面后果由社会承担，而非由企业的资本提供者承担。

It was previously assumed that the negative consequences of poor firm decisions did not fall on the firm's capital suppliers but, rather, on society.

如今，分析师会估计这些日益内部化的成本对企业财务表现的影响，将其纳入折现率和风险评估，并对 ESG 实践较差的公司进行筛选，或调整其持仓规模。

Now, analysts consider these increasingly internalized company costs by estimating their effects on firm financial performance, by incorporating them into discount rates and risk assessments, and by screening or adjusting position sizes of companies that have poor ESG practices.

补充解析 / **Supplementary explanation**

补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

题目与资料 / **Question and data**

练习题组

QUESTION SET

3. 搁浅资产最能代表 _____。（实体风险、转型风险）

3. Stranded assets best represent _____. (physical risk, transition risk)

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

搁浅资产最能代表转型风险。

Stranded assets best represent transition risk.

转型风险是转向低碳经济所产生的损失。

Transition risks are losses related to the transition to a lower-carbon economy.

油井可能因政府监管或消费者偏好变化而成为搁浅资产；这些变化可能影响油价，或以其他方式损害发行人充分实现资产价值的能力。

An oil well may become a stranded asset due to government regulations or changes in consumer preferences that affect the price of oil or otherwise impair an issuer's ability to fully realize the asset value.

实体风险包括极端天气造成的财产损坏，而气候变化预计会使极端天气的频率和严重程度上升。

Physical risks include damage to property stemming from extreme weather, which is expected to increase in both frequency and severity due to climate change.

补充解析 / **Supplementary explanation**

搁浅资产可能因减碳政策、技术替代或需求变化而失去原先预期的经济价值，所以在本题中归为转型风险。实体风险则涉及洪水、风暴、热浪等气候事件对资产和运营的直接损害。分类应依据损失的传导原因。

Stranded assets can lose expected economic value through decarbonization policies, technological substitution, or demand shifts, so they represent transition risk here. Physical risks arise from direct impacts such as floods, storms, or heat. Classify by the causal loss channel.

相关知识点 / **Related concepts**

气候风险：实体风险与转型风险；搁浅资产通常与后者相关。

Climate risk includes physical and transition risk; stranded assets commonly relate to the latter.

QUESTION SET

4. 解释 ESG 因素的重大性对金融分析师为何重要。

4. Explain the importance of materiality of ESG factors for a financial analyst.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

当某项 ESG 因素会对公司经营成果或商业模式产生显著影响时，该因素即具有重大性。

An ESG factor is considered material when it has a significant impact on a company's results or business model.

分析师尝试评估重大 ESG 因素的潜在正面或负面影响，例如将其纳入公司预测现金流和 / 或折现率，或用于筛选投资对象。

An analyst attempts to evaluate potential positive or negative effects of material ESG-related factors—for example, by incorporating them into a company's projected cash flows and/or discount rates or through an investment candidate screening process.

虽然发行人可能面对许多 ESG 因素，但考虑到分析师时间的机会成本，他们会优先关注具有重大性的因素。

While an issuer may have many ESG factors to consider, analysts prioritize those that are material given the opportunity cost of analysts' time.

补充解析 / **Supplementary explanation**

补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

QUESTION SET

5. 公司管理长期风险和可持续发展问题的有效性，最适合归类为：

5. A company’s effectiveness in managing long-term risks and sustainability is best classified as a:

A. 社会因素。

A. social factor.

B. 治理因素。

B. governance factor.

C. 环境因素。

C. environmental factor.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

公司治理和利益相关者管理涉及公司管理长期风险与可持续发展问题的有效性。

Corporate governance and stakeholder management address issues that include a company's effectiveness in managing long-term risks and sustainability.

可以通过评估公司长期财务及非财务表现，并与行业同行比较以识别可控变量，来判断管理是否有效。

Management effectiveness can be assessed through an evaluation of the company's financial and non-financial performance over the long run, along with a comparison against industry peers to isolate controllable variables.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

The official choice for this item is B. Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

管理层控制日常决策但未必承担全部经济后果。薪酬、职位安全和私人利益可能与股东价值冲突，因此需要激励设计、监督和问责。

Managers control daily decisions without necessarily bearing all economic consequences. Pay, job security, and private benefits can conflict with shareholder value, motivating incentives, oversight, and accountability.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

CI-LM02-PRACTICE-001

章末习题 1
Practice problem 1

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 70, 72

题目与资料 / **Question and data**

以下资料适用于第 1—3 题。

The following information relates to questions 1-3

考虑一家资产为 200、完全采用权益融资的公司，以及一家其他条件完全相同、但以 80% 债务和 20% 权益融资的公司。

Consider a firm with assets of 200 fully financed by equity and an identical firm financed with 80% debt and 20% equity.

假设两家公司某一期的收入均为 200，不含债务成本的经营费用均为 140。

Assume both firms have revenue over a period of 200 and non-debt operating expenses of 140.

1. 假设该期利率为 20%，不考虑所得税，计算各公司的净利润，并比较该期的股东权益回报率。

1. If we assume an interest rate of 20% for the period, calculate net income for each firm and compare their returns on equity for the period, ignoring income taxes.

官方答案与解析 / **Official answer and explanation**

1. 从收入中减去费用得到净利润，再将净利润除以权益总额，得到单期股东权益回报率：

1. Solve for net income by subtracting expenses from revenue, and divide net income by total equity to solve for the one-period return on equity:

完全权益融资与债务、权益共同融资的比较表。行项目为收入、减去经营费用、减去利息费用、净利润、权益总额及股东权益回报率。星号利息费用计算见表后正文。

Equity-Financed		**Debt- and Equity-Financed**	
Revenue	200	Revenue	200
Less: Operating Expenses	−140	Less: Operating Expenses	−140
		Less: Interest Expense*	−32
Net Income	60	Net Income	28
Total Equity	200	Total Equity	40
Return on Equity	**30%**	**Return on Equity**	**70%**

原 PDF 第 72 页 · 完整表格 · 300 dpi

* 债务融资比例为 80% 时，利息费用 = 〔下方计算式 1〕。

*Interest expense with 80% debt financing = 〔calculation 1 below〕.

$$160 \times 0.20 = 32$$

原 PDF 第 72 页 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

CI-LM02-PRACTICE-002

章末习题 2
Practice problem 2

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 70, 72

题目与资料 / **Question and data**

以下资料适用于第 1—3 题。

The following information relates to questions 1-3

考虑一家资产为 200、完全采用权益融资的公司，以及一家其他条件完全相同、但以 80% 债务和 20% 权益融资的公司。

Consider a firm with assets of 200 fully financed by equity and an identical firm financed with 80% debt and 20% equity.

假设两家公司某一期的收入均为 200，不含债务成本的经营费用均为 140。

Assume both firms have revenue over a period of 200 and non-debt operating expenses of 140.

2. 假设经营费用不变，计算两家公司收入较第 1 题分别增加及减少 20% 时，该期的股东权益回报率。

2. Calculate the return on equity for the period if the firms experience a 20% increase and decrease in revenue (from Question 1), assuming operating expenses remain unchanged.

官方答案与解析 / **Official answer and explanation**

2.

2.

收入增加 20% 时，完全权益融资与债务、权益共同融资的比较。行项目为收入、减去经营费用、减去利息费用、净利润、权益总额及股东权益回报率。

20% *Increase* in Revenue			
Equity-Financed		**Debt- and Equity-Financed**	
Revenue	240	Revenue	240
Less: Operating Expenses	−140	Less: Operating Expenses	−140
		Less: Interest Expense	−32
Net Income	100	Net Income	68
Total Equity	200	Total Equity	40
Return on Equity	**50%**	**Return on Equity**	**170%**

原 PDF 第 72 页 · 完整表格 · 300 dpi

收入减少 20% 时，完全权益融资与债务、权益共同融资的比较。行项目为收入、减去经营费用、减去利息费用、净利润、权益总额及股东权益回报率。括号内数值表示负数。

20% *Decrease* in Revenue			
Equity-Financed		**Debt- and Equity-Financed**	
Revenue	160	Revenue	160
Less: Operating Expenses	−140	Less: Operating Expenses	−140
		Less: Interest Expense	−32
Net Income	20	Net Income	**(12)**
Total Equity	200	Total Equity	40
Return on Equity	**10%**	**Return on Equity**	**(30%)**

原 PDF 第 72 页 · 完整表格 · 300 dpi

与本课示例一样，使用债务会增大股东权益回报率的波动。

Like the example in the lesson, the use of debt increases the variance in return on equity.

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

CI-LM02-PRACTICE-003

章末习题 3
Practice problem 3

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 70, 72

题目与资料 / **Question and data**

以下资料适用于第 1—3 题。

The following information relates to questions 1-3

考虑一家资产为 200、完全采用权益融资的公司，以及一家其他条件完全相同、但以 80% 债务和 20% 权益融资的公司。

Consider a firm with assets of 200 fully financed by equity and an identical firm financed with 80% debt and 20% equity.

假设两家公司某一期的收入均为 200，不含债务成本的经营费用均为 140。

Assume both firms have revenue over a period of 200 and non-debt operating expenses of 140.

3. 考虑第 1 题中完全采用权益融资的公司，它需要为一项金额为 40 的新增长期资产投资选择融资方式。该公司的初始资产负债表相关信息如下。投资前收入为 200，经营费用为 140 且预计保持不变；新增债务融资利率为 20%，新投资回报率为 30%。计算公司分别使用债务、发行新股或现有现金融资时的 ROE，比较并讨论结果。

3. Consider the same all-equity-financed firm as in Question 1 and its choices for financing a new investment in LT assets of 40. The pertinent details in the firm's initial balance sheet are shown below. Revenue before the investment is 200, operating expenses are 140 and are expected to remain unchanged, interest on new debt financing is 20%, and the return on the new investment is 30%. Calculate the ROE for the firm if it finances the investment with debt, the issuance of new shares, or cash on hand and compare the results. Discuss the results of the comparison.

初始资产负债表及新投资融资方案。

初始项目包括现金、其他资产、长期资产及权益。随后比较发行股份、发行债务、使用现有现金三种方案；各方案资产负债表列示现金、其他资产、长期资产、债务和权益。

业绩比较行依次为收入、减去经营费用、减去利息、净利润、权益总额及股东权益回报率。

Initial Balance Sheet			
Cash	60		
Other assets	40		
LT assets	100	Equity	200

Share Issuance		Debt Issuance		Cash on Hand	
Cash 60		Cash 60		Cash 20	
Other 40		Other 40	Debt 40	Other 40	
LT assets 140	Equity 240	LT assets 140	Equity 200	LT assets 140	Equity 200

Revenue	212	212	212
Less: Operating Expenses	140	140	140
Less: Interest		8	
Net Income	72	64	72
Total Equity	240	200	200
ROE	30%	32%	36%

原 PDF 第 70 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

3. 在三种融资方式中，发行新股为投资融资所得 ROE 最低。不过，由于新投资的回报率等于初始 ROE，因此相较初始情形，ROE 没有变化。债务融资产生更高的 ROE，因为债务利率低于新投资回报率，而且没有发行新股，避免了稀释。使用多余现有现金产生最高的 ROE，因为既避免了稀释，又避免了债务利息成本。

3. Financing the investment with new shares produces the lowest ROE among the three financing options. However, since the investment produced a return equal to the beginning ROE, there was no change in ROE from the initial case. Financing with debt produced a higher ROE, because the interest rate on debt was lower than the return on the new investment and no new shares were issued, avoiding dilution. The highest ROE was produced by using excess cash on hand, which avoids both dilution and the interest cost of debt.

补充解析 / **Supplementary explanation**

补充思路：债权人拥有合同约定的偿付请求，股东享有剩余收益与相应控制权。经营成功时，债权人的收益通常封顶而股东分享上行；经营失败时，股东先吸收损失。增加杠杆或提高项目风险可能使股东受益却损害债权人，因此不能把企业总价值、股权价值和债权价值的变化混为一谈。

Additional reasoning: Lenders hold contractual claims while shareholders receive residual returns and control rights. Debt returns are generally capped, whereas equity shares upside and absorbs losses first. More leverage or risk can benefit equity at creditors' expense. Distinguish changes in total firm, equity, and debt values.

相关知识点 / **Related concepts**

债权人与股东的权利和风险：资本结构决定请求权顺序；有限责任可产生风险转移动机；债务契约限制某些投资、融资与分配行为。

Claims of lenders and shareholders: Capital structure determines priority. Limited liability can create risk-shifting incentives, and covenants constrain investment, financing, or distributions.

CI-LM02-PRACTICE-004

章末习题 4
Practice problem 4

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 70, 73

题目与资料 / **Question and data**

4. 一家公司与其主要供应商建立了长期关系。供应商开发了一套与该公司系统相互整合的复杂系统，并约定在交货后 30 天内收款。讨论供应商作为公司利益相关者的关系。为什么高财务杠杆不符合供应商利益？

4. A company has developed a long-term relationship with its major supplier. The supplier has developed complex systems that integrate with those of the compa ny and has an agreement to receive payment within 30 days for goods delivered. Discuss the supplier's stakeholder relationship with the firm. Why would high financial leverage be inconsistent with the supplier's interests?

官方答案与解析 / **Official answer and explanation**

4. 供应商与公司的成功和存续存在明确的切身利益关系，因此属于利益相关者。供应商向公司提供短期信用；由于已经投资于相互整合的复杂系统，也对公司的长期成功具有利益关系。高财务杠杆不符合供应商的最佳利益，因为它既带来公司无法支付已交付货物款项的短期风险，也使供应商为与公司系统整合而进行的投资面临长期风险。

4. The supplier has a clear vested interest in the success and survival of the company, so it is considered a stakeholder. The supplier extends short-term credit to the company and has a long-term interest in the success of the company because it has invested in integrated complex systems. High financial leverage would not be in the best interest of the supplier, because it presents both short-term risk that the company may be unable to make payments for goods delivered and long-term risk for the investment made to integrate the supplier's complex systems with those of the company.

补充解析 / **Supplementary explanation**

补充思路：判断利益相关者受到多大影响，关键是对企业的依赖程度和替代选择。专门技能员工、单一客户供应商或依赖售后服务的客户，可能比高度分散的投资者更难转移风险。ESG 因素应沿着收入、成本、资产价值、融资成本或法律责任进入分析，避免只把它们当成抽象声誉问题。

Additional reasoning: Assess exposure through dependence on the firm and available alternatives. Specialized employees, concentrated suppliers, or customers reliant on after-sales support may have less ability to diversify than investors. Translate ESG issues into revenues, costs, asset values, financing costs, or liabilities instead of treating them only as abstract reputation concerns.

相关知识点 / **Related concepts**

利益相关者及其约束：利益相关者包括投资者、员工、客户、供应商、政府与社会；重要性取决于具体业务模式和合同安排。

Stakeholders and their economic claims: Stakeholders include investors, employees, customers, suppliers, governments, and society. Materiality depends on the business model and contractual relationships.

CI-LM02-PRACTICE-005

章末习题 5
Practice problem 5

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 71, 73

题目与资料 / **Question and data**

5. 解释为什么公司管理层可能不会以股东的最佳利益行事。

5. Explain why a company's management might not act in the best interests of shareholders.

官方答案与解析 / **Official answer and explanation**

5. 管理人员与公司股东之间存在委托代理关系。

5. Managers are in a principal-agent relationship with a company's shareholders.

管理人员作为代理人，在董事会监督下，应以公司股东的最佳利益行事。

Managers, overseen by the board of directors, serve as agents who should act in the best interests of the company's shareholders.

但某些情况下，管理人员可能将自身利益置于股东利益之前。

However, in some cases, managers may put their own interests ahead of shareholders' interests.

例如，投入努力不足、过度享用额外福利（如公司专机或豪华办公室），以及为保住职位而不愿承担适当风险或进行投资。

Examples include insufficient effort, excessive perquisite consumption (e.g., corporate jets, elaborate offices), and failure to take appropriate risks or make investments in an effort to safeguard their jobs.

由独立董事占多数的董事会实施监督，以及采用业绩薪酬和股权薪酬等安排使管理人员与股东利益一致，都是缓解此类利益冲突的机制。

Oversight by a majority independent board and compensation to align managers' interests with shareholders', such as performance-based and equity-based compensation schemes, are mechanisms to mitigate these conflicts of interest.

补充解析 / **Supplementary explanation**

先识别谁委托谁、谁掌握信息、谁承担后果。经理与股东之间可能存在努力不足、固守职位或私人利益交易；控股与少数股东之间可能存在利益输送；股东与债权人之间可能存在风险转移。不同冲突需要不同机制：激励合同、独立监督、投票权或契约限制并非相互替代。

Identify the principal, agent, information advantage, and risk bearer. Manager–shareholder conflicts include insufficient effort, entrenchment, and self-dealing. Controlling shareholders may divert value from minorities, and equity may shift risk to lenders. Tailor incentives, monitoring, voting rights, and covenants to the specific conflict rather than treating all controls as interchangeable.

> 相关知识点 / **Related concepts**

代理冲突与信息不对称：信息不对称提高外部资本提供者所要求的风险补偿；治理机制的收益应与成本和潜在新激励问题一起评估。

Agency conflicts and information asymmetry: Information asymmetry raises required compensation for outside capital. Evaluate governance benefits alongside costs and new incentives it may create.

LM 3 · 公司治理：冲突、机制、风险与收益

在公司中，董事会被选举出来担任_____。

在公司中，股东是_____。

客户与公司发行人之间具有_____关系。

官方英文题目 · PDF 第76页

1. The following statements relate to the ecosystem of stakeholders in a corporation. Complete each statement by selecting one of the following: agent, principal, contractual, principal-agent, employer-employee.

   In a corporation, the board of directors is elected to act as a(n) _____.

   In a corporation, shareholders are a(n) _____.

   Customers have a(n) _____ relationship with a corporate issuer.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

在公司中，董事会被选举出来担任代理人。股东是委托人。客户与公司发行人之间具有合同关系。

官方英文解析 · PDF 第76页

Solution:

In a corporation, the board of directors is elected to act as an agent.

In a corporation, shareholders are a principal.

Customers have a contractual relationship with a corporate issuer.

补充解析 / Supplementary explanation

委托人把部分决策权交给代理人。在股东与董事会的关系中，股东是委托人，董事会受托行使监督职能；客户购买产品或服务主要通过合同形成权利义务。因此不能仅因客户也是利益相关者，就把其与公司的关系都称为委托—代理。

A principal delegates authority to an agent. In the shareholder–board relationship, shareholders are principals and directors act on their behalf. Customers chiefly establish rights and obligations through contracts. Being a stakeholder does not make every relationship a principal–agent arrangement.

相关知识点 / Related concepts

代理关系的识别要明确谁授权、谁代表谁作出决定。

Identify who delegates authority and who makes decisions on whose behalf.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / Question and data

中文学习译文

2. 当委托人与代理人的利益不一致时，就会产生冲突和代理成本。请举出并解释公司发行人的一种代理成本。

官方英文题目 · PDF 第76页

2. Conflicts arise where the interests of a principal and an agent diverge, resulting in agency costs. Identify and explain an example of an agency cost for a corporate issuer.

官方答案与解析 / Official answer and explanation

官方英文解析的中文学习译文

公众公司的一个代理成本实例是聘请外部独立审计师审计财务报表和内部控制的成本。审计费用由发行人支付，最终由股东承担，用于降低财务报告出现重大错报或偏离公认会计原则的风险。

官方英文解析 · PDF 第76页

Solution:

An example of an agency cost for public companies is the cost of hiring an external independent auditor for the financial statements and internal controls. Audit fees are paid by the issuer, a cost borne by the shareholders,

官方英文解析 · PDF 第77页 · 续

to mitigate the risk that financial reports are materially misstated or deviate from generally accepted accounting principles.

补充解析 / **Supplementary explanation**

外部审计费属于为降低代理冲突付出的监督成本。它与管理层错误决策造成的残余损失不同：前者是治理机制的支出，后者是即使有治理机制仍存在的利益损失。审计可能降低总代理成本，但不会使信息不对称和舞弊风险自动归零。

External audit fees are monitoring costs incurred to reduce agency conflict. They differ from residual losses caused by decisions that still diverge from owners' interests. Auditing may reduce total agency costs without eliminating information asymmetry or fraud risk.

相关知识点 / **Related concepts**

代理成本可包括监督成本、约束保证成本与残余损失。

Agency costs can include monitoring, bonding, and residual losses.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / **Question and data**

中文学习译文

3. 将管理关系或解决争议的机制与适用的利益相关者配对。

1. 股东；2. 债权人；3. 管理层。

A. 特设委员会；B. 代理权争夺；C. 股份薪酬。

官方英文题目 · PDF 第77页

3. Match the mechanism to manage relationships or settle disputes with the applicable stakeholder.

1. Shareholders	A. Ad hoc committee
2. Creditors	B. Proxy contest
3. Management	C. Stock-based compensation

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

1—B：代理权争夺是股东寻求改变公司控制权的一种机制。

2—A：公司难以履行债务义务时，一组债券持有人可能组成特设委员会，与公司接洽并提出债券重组方案。

3—C：股份薪酬旨在使管理层与股东的利益保持一致。

官方英文解析 · PDF 第77页

Solution:

1. B is correct. Proxy contests are one mechanism for shareholders to pursue changes in corporate control.

2. A is correct. When a company is struggling to meet its debt obligations, an ad hoc committee may be formed by a group of bondholders to approach the company with potential options to restructure their bonds.

3. C is correct. Stock-based compensation seeks to align the interests of management and shareholders.

补充解析 / **Supplementary explanation**

按每类主体能够使用的工具匹配：股东争取表决权以改变控制权，对应代理权争夺；债权人就债务重组联合谈判，对应临时委员会；管理层报酬与股价或长期业绩挂钩，对应股份薪酬。三种机制分别处理控制权、偿债安排与激励一致性。

Match tools to stakeholders: shareholders seek voting support through proxy contests; creditors coordinate restructuring through an ad hoc committee; management incentives are aligned through share-based compensation. The mechanisms address control, debt terms, and incentive alignment, respectively.

相关知识点 / **Related concepts**

匹配结果：1—B，2—A，3—C；注意proxy contest是股东表决权机制。

Matching: 1–B, 2–A, 3–C; a proxy contest is a shareholder-voting mechanism.

4. 当公司细则或章程规定的最低数量的召集股东提出要求时，可以召开_____。

官方英文题目 · PDF 第77页

> 4. A(n) _____ may be called when requested by a specific minimum number of calling shareholders, as detailed in the company's bylaws or charter.

官方答案与解析 / Official answer and explanation

官方英文解析的中文学习译文

当公司细则或章程规定的最低数量的召集股东提出要求时，可以召开临时股东大会（EGM）。

官方英文解析 · PDF 第77页

> **Solution**:
> An extraordinary general meeting (EGM) may be called when requested by a specific minimum number of calling shareholders, as detailed in the company's bylaws or charter.

补充解析 / Supplementary explanation

临时股东大会用于在例行年度股东大会之外处理需要股东表决的事项。题目强调达到章程规定的最低召集门槛，因此填EGM；门槛取决于公司章程及适用法律，不能从本题推导一个所有公司的固定百分比。

An extraordinary general meeting addresses shareholder matters outside the regular annual meeting. The specified charter threshold points to EGM. The calling threshold depends on governing documents and applicable law; this question does not establish a universal ownership percentage.

相关知识点 / Related concepts

AGM为年度股东大会；EGM为临时 / 特别股东大会。

AGM is the annual general meeting; EGM is an extraordinary general meeting.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM03-SELF_ASSESSMENT-005

模块自测 · 第5题
Learning Module Self-Assessment · 5

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 77

题目与资料 / Question and data

中文学习译文

5. 研究表明，公司治理实践的改善会_____（提高 / 降低）信用评级_____（上调 / 下调）的可能性，这通常会_____（提高 / 降低）债务成本。

官方英文题目 · PDF 第77页

> 5. Studies have shown that improvements in corporate governance practices _____ (increase/decrease) the likelihood of a credit rating _____ (upgrade/downgrade), which tends to _____ (increase/decrease) the cost of debt.

官方答案与解析 / Official answer and explanation

官方英文解析的中文学习译文

公司治理实践的改善会提高信用评级上调的可能性，这通常会降低债务成本。

官方英文解析 · PDF 第77页

> **Solution**:
> Studies have shown that improvements in corporate governance practices increase the likelihood of a credit rating upgrade, which tends to decrease the cost of debt.

补充解析 / Supplementary explanation

逻辑链条是治理改善→风险控制和信息可靠性增强→信用评级更可能上调→投资者要求的信用利差可能下降。因此三个空格依次为增加、上调、降低。该链条是倾向性关系，实际债务成本还受市场利率、期限、担保及其他信用风险影响。

The directional chain is better governance, stronger controls and reporting, a higher likelihood of upgrade, and potentially a lower required credit spread. Thus the blanks are increase, upgrade, decrease. Actual borrowing cost also depends on market rates, maturity, collateral, and other credit risks.

相关知识点 / Related concepts

债务成本通常由无风险基准利率和信用等风险补偿共同决定。

Debt cost reflects a benchmark rate plus compensation for credit and other risks.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM03-SELF_ASSESSMENT-006

模块自测 · 第6题
Learning Module Self-Assessment · 6

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 77-78

题目与资料 / **Question and data**

中文学习译文

6. 分析师应围绕公司的治理和利益相关者管理考虑哪些类型的问题？

官方英文题目 · PDF 第77页

> 6. What types of questions should analysts consider about a company's corporate governance and stakeholder management?

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

应考虑的关键问题包括：

- 公司的所有权和投票结构如何？
- 董事的技能和经验与公司目前及未来需求的匹配程度如何？
- 管理团队的薪酬和激励结构与预期驱动公司整体业绩的因素有多紧密的联系？
- 公司有哪些重要投资者？
- 与同行相比，公司的股东权利有多强？
- 管理层在从长期角度审视风险与可持续性方面做得如何？

官方英文解析 · PDF 第77页

> **Solution:**
> Key questions analysts should consider about a company's corporate governance and stakeholder management include the following:
>
> - What is the company's ownership and voting structure?
> - How well do board members' skills and experience match the current and future needs of the company?
> - How closely does the management team's compensation and incentive structure align with factors expected to drive overall company results?
> - Who are the significant investors in the company?
> - How strong are company shareholder rights versus its peers?

- How effective has management been in taking a long-term perspective on risks and sustainability?

补充解析 / **Supplementary explanation**

这些问题应形成相互衔接的检查：先识别控制权和投票权，再判断董事会能否独立而有效地监督，随后检查薪酬是否鼓励长期价值，最后分析少数股东保护与重大利益相关者风险。仅核对是否有某项制度，不能代替评估其实际运行效果。

Connect the questions: identify control and voting rights; assess effective board oversight; examine whether compensation rewards long-term value; then evaluate minority-owner protection and stakeholder risks. Merely observing that a policy exists does not demonstrate that it works in practice.

相关知识点 / **Related concepts**

治理分析关注结构、激励、权利、执行效果与长期风险。

Governance analysis covers structure, incentives, rights, implementation, and long-term risk.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM03-KNOWLEDGE_CHECK-101

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 80

题目与资料 / **Question and data**

知识检查：股东与管理者 / 董事之间的关系

KNOWLEDGE CHECK: SHAREHOLDER AND MANAGER/ DIRECTOR RELATIONSHIPS

1. 一家建筑公司有机会投资一项高风险、高回报的资本基础设施项目。下列哪项可能是公司决定不开展该项目的原因？

1. A construction firm has the opportunity to invest in a high-risk, high-reward capital infrastructure project. Which of the following could be a reason why the company decides not to pursue the project?

A. 管理者薪酬与公司业务规模密切相关。

A. The compensation of managers is closely tied to the size of the company's business.

B. 管理层获得过高的纯现金薪酬。

B. Management receives excessive all-cash compensation.

C. 管理层最近获得了丰厚的期权奖励，标的为公司股票。

C. Management has recently received a generous options reward in the company's shares.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

当薪酬全部以现金支付，尤其当薪酬过高时，管理者的风险承受能力可能过低，因为他们倾向于保护自己的现金薪酬。

When compensation—particularly if it is excessive—is entirely in cash, the risk tolerance of managers may be too low, as they are inclined to protect their cash compensation.

此外，即使项目表现良好，他们可能也几乎没有额外收益。

Additionally, there may be little upside for them if the project performs well.

A 不正确，因为它描述的是“帝国扩张”现象，管理层很可能为了获得更高薪酬而决定不惜代价扩大公司规模。

A is incorrect, as it describes the "empire building" phenomenon that would likely result in the decision to grow the company at any cost in an attempt to secure higher compensation.

C 不正确，因为这种情况很可能使管理者与股东的利益趋于一致。

C is incorrect, as it would likely lead to an alignment of managers' interests with those of shareholders.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is B. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

CI-LM03-KNOWLEDGE_CHECK-201

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 81

题目与资料 / Question and data

知识检查：双重股权结构

KNOWLEDGE CHECK: DUAL-CLASS SHARE STRUCTURE

1. 下列哪项最恰当地描述了双重股权结构？

1. Which of the following best describes dual-class share structures?

A. 双重股权结构可以随着时间推移轻易改变。

A. Dual-class share structures can be easily changed over time.

B. 公司创始人能够维持对组织的重大权力。

B. Company founders can maintain significant power over the organization.

C. 与单一股权结构相比，管理层与利益相关者群体之间的利益冲突更不容易发生。

C. Conflicts of interest between management and stakeholder groups are less likely than with single-class share structures.

官方答案与解析 / Official answer and explanation

答案：

Solution:

B 正确。

B is correct.

在双重股权制度下，公司创始人可能控制董事会选举、战略决策及其他重大事项。

Under dual-class share systems, company founders may control board elections, strategic decisions, and other significant matters.

A 不正确，因为双重股权制度一旦采用就很难取消，其投票控制权完全掌握在公司内部人士或创始人手中。

A is incorrect, because dual-class share systems are difficult to dismantle once adopted as the voting control within dual-class systems is held exclusively by company insiders or founders.

C 不正确，因为双重股权制度中潜在的控制权因素，使管理层与利益相关者之间的利益冲突比单一股权结构下更容易发生。

C is incorrect, because conflicts of interest between management and stakeholders are more likely than with single-class share structures owing to the potential control element in dual-class systems.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

The official choice for this item is B. Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

CI-LM03-KNOWLEDGE_CHECK-301

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 82

题目与资料 / **Question and data**

知识检查：利益相关者关系

KNOWLEDGE CHECK: STAKEHOLDER RELATIONSHIPS

1. Stillcreek Corporation 的一名控股股东持有Stillcreek 55% 的股份，其余股份分散在大量股东手中。在这种情况下，最可能产生利益冲突的是：

1. A controlling shareholder of Stillcreek Corporation owns 55% of Stillcreek’s shares, and the remaining shares are spread among a large group of shareholders. In this situation, conflicts of interest are most likely to arise between:

A. 股东与债券持有人。

A. shareholders and bondholders.

B. 控股股东与管理者。

B. the controlling shareholder and managers.

C. 控股股东与少数股东。

C. the controlling shareholder and minority shareholders.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

在这种所有权结构下，控股股东的权力很可能比少数股东更具影响力。

In this ownership structure, the controlling shareholder's power is likely more influential than that of minority shareholders.

因此，控股股东可能利用其地位，损害其余股东的利益。

Thus, the controlling shareholder may be able to exploit its position to the detriment of the interests of the remaining shareholders.

A 和 B 不正确，因为这种所有权结构本身不太可能在股东与债券持有人之间，或股东与管理者之间，产生重大冲突。

A and B are incorrect, because the ownership structure in and of itself is unlikely to create material conflicts between shareholders and bondholders or shareholders and managers.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：先识别谁委托谁、谁掌握信息、谁承担后果。经理与股东之间可能存在努力不足、固守职位或私人利益交易；控股与少数股东之间可能存在利益输送；股东与债权人之间可能存在风险转移。不同冲突需要不同机制：激励合同、独立监督、投票权或契约限制并非相互替代。

The official choice for this item is C. Additional reasoning: Identify the principal, agent, information advantage, and risk bearer. Manager–shareholder conflicts include insufficient effort, entrenchment, and self-dealing. Controlling shareholders may divert value from minorities, and equity may shift risk to lenders. Tailor incentives, monitoring, voting rights, and covenants to the specific conflict rather than treating all controls as interchangeable.

相关知识点 / **Related concepts**

代理冲突与信息不对称：信息不对称提高外部资本提供者所要求的风险补偿；治理机制的收益应与成本和潜在新激励问题一起评估。

Agency conflicts and information asymmetry: Information asymmetry raises required compensation for outside capital. Evaluate governance benefits alongside costs and new incentives it may create.

CI-LM03-EXAMPLE-401

例题 1 · 第 1 题：杠杆与其他利益相关者：KLD Marine Ltd.
Example 1 · 1 — Leverage and Other Stakeholders: KLD Marine Ltd.

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 82

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

杠杆与其他利益相关者：KLD Marine Ltd.

Leverage and Other Stakeholders: KLD Marine Ltd.

KLD Marine Ltd.（KLD）是一家没有债务的小型焊接金属船制造商，在竞争激烈且具有周期性的市场中开展国内和国际销售。

KLD Marine Ltd. (KLD) is a small, debt-free manufacturer of welded metal boats with domestic and international sales in a highly competitive and cyclical market.

KLD 是一座偏远小镇的主要雇主。

KLD is the primary employer in a small, remote town.

公司通过经销商网络销售产品，这些经销商通常销售三到四个不同品牌的船只。

Sales are through a network of dealers, who typically sell three or four different boat brands.

公司共有 50 名员工，约一半是专业铝焊工，其余大多从事销售和管理工作。

Of the company's 50 employees, about half are specialized aluminum welders, with most others in sales and management.

KLD 造船所购买的主要投入品是铝板。

The primary purchased input for KLD's boat production is sheet aluminum.

KLD 唯一的铝材供应商是一家拥有众多客户的大型跨国公司。

KLD's sole aluminum supplier is a large, multi-national company with many clients.

KLD 从未派发股息，但累积了大量留存收益，为公司资产提供资金。

KLD has never paid dividends but has substantial retained earnings that finance the company's assets.

KLD 最近决定大规模举债，以便向股东支付一笔金额巨大的特别股息。

KLD has recently decided to borrow heavily so it can pay a large, one-time dividend to shareholders.

1. 以下哪类利益相关者将受到杠杆上升最严重的负面影响？

1. Which of the following stakeholder groups will be most negatively affected by the increase in leverage?

A. 公司雇用的焊工

A. The welders employed by the company

B. 公司的经销商

B. The company's dealers

C. 向公司供应铝材的供应商。

C. The supplier of aluminum to the business

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

如果公司因提高杠杆而陷入财务困境，焊工可能面临失业。

As employees, the welders could face loss of employment if the company were to become financially distressed with the increase in leverage.

由于他们的技能非常专门化，很可能难以在当地找到其他工作。

And since their skills are very specialized, they would probably have difficulty finding another job locally.

在偏远小镇，专业工人的就业机会往往有限。

In a small and remote town, employment opportunities are likely to be limited for specialized workers.

B 不正确。

B is incorrect.

如果 KLD 倒闭，经销商可能损失销售额，但很可能可以用竞争品牌替代 KLD。

The dealers might suffer lost sales if KLD were to fail, but they could likely replace KLD with a competing brand.

C 不正确。

C is incorrect.

铝材供应商受到的影响可能最小，因为其规模很大，KLD 很可能仅占其销售额的一小部分。

The aluminum supplier would probably suffer the least impact, since it is large and KLD is likely not a sizable proportion of its sales.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

The official choice for this item is A. Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

Example 1 · 2 — Leverage and Other Stakeholders: KLD Marine Ltd.

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 82-83

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

杠杆与其他利益相关者：KLD Marine Ltd.

Leverage and Other Stakeholders: KLD Marine Ltd.

KLD Marine Ltd.（KLD）是一家没有债务的小型焊接金属船制造商，在竞争激烈且具有周期性的市场中开展国内和国际销售。

KLD Marine Ltd. (KLD) is a small, debt-free manufacturer of welded metal boats with domestic and international sales in a highly competitive and cyclical market.

KLD 是一座偏远小镇的主要雇主。

KLD is the primary employer in a small, remote town.

公司通过经销商网络销售产品，这些经销商通常销售三到四个不同品牌的船只。

Sales are through a network of dealers, who typically sell three or four different boat brands.

公司共有 50 名员工，约一半是专业铝焊工，其余大多从事销售和管理工作。

Of the company's 50 employees, about half are specialized aluminum welders, with most others in sales and management.

KLD 造船所购买的主要投入品是铝板。

The primary purchased input for KLD's boat production is sheet aluminum.

KLD 唯一的铝材供应商是一家拥有众多客户的大型跨国公司。

KLD's sole aluminum supplier is a large, multi-national company with many clients.

KLD 从未派发股息，但累积了大量留存收益，为公司资产提供资金。

KLD has never paid dividends but has substantial retained earnings that finance the company's assets.

KLD 最近决定大规模举债，以便向股东支付一笔金额巨大的特别股息。

KLD has recently decided to borrow heavily so it can pay a large, one-time dividend to shareholders.

2. 这些群体中是否有任何一类可能受到正面影响？

2. Is it likely that any of these groups would be affected positively?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

对所有这些群体而言，影响都是负面的。

In all cases, impacts are negative.

请注意，如果借款规模适度，这些影响会较小。

Note that for modest borrowing, these effects would be minor.

补充解析 / **Supplementary explanation**

补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

CI-LM03-QUESTION_SET-501

Question set · 1

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 83

题目与资料 / **Question and data**

习题组

QUESTION SET

1. 当信息不对称加剧、潜在利益冲突增加时，以下哪类利益相关者最可能要求更高的回报和风险溢价？

1. Which of the following stakeholders are most likely to demand higher returns and risk premiums when faced with greater information asymmetry due to the greater potential conflicts of interest?

A. 董事和管理者

A. Directors and managers

B. 供应商和客户

B. Suppliers and customers

C. 股东和贷款人。

C. Shareholders and lenders

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

更严重的信息不对称会增加股东和贷款人的风险，因此他们会要求通过较低的股价或估值倍数，以及较高的债务投资收益率，获得承担这些风险的补偿。

Greater information asymmetry increases risk for shareholders and lenders, who will seek to be compensated for taking that risk with a lower share price or multiple and a higher yield on debt investments.

A 不正确，因为董事和管理者掌握的公司业绩、风险和投资机会信息，比股东和贷款人等外部人士更多。

A is incorrect, because directors and managers have more information about a company's performance, risks, and investment opportunities than outsiders, such as shareholders and lenders.

B 不正确，因为虽然供应商和客户也是面临信息不对称的外部人士，但他们与公司的关系以合同为基础，并非以投资回报为基础。

B is incorrect, because while suppliers and customers are outsiders with information asymmetry, their relationship is contractual and not based on investment return.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：先识别谁委托谁、谁掌握信息、谁承担后果。经理与股东之间可能存在努力不足、固守职位或私人利益交易；控股与少数股东之间可能存在利益输送；股东与债权人之间可能存在风险转移。不同冲突需要不同机制：激励合同、独立监督、投票权或契约限制并非相互替代。

The official choice for this item is C. Additional reasoning: Identify the principal, agent, information advantage, and risk bearer. Manager–shareholder conflicts include insufficient effort, entrenchment, and self-dealing. Controlling shareholders may divert value from minorities, and equity may shift risk to lenders. Tailor incentives, monitoring, voting rights, and covenants to the specific conflict rather than treating all controls as interchangeable.

相关知识点 / **Related concepts**

代理冲突与信息不对称：信息不对称提高外部资本提供者所要求的风险补偿；治理机制的收益应与成本和潜在新激励问题一起评估。

Agency conflicts and information asymmetry: Information asymmetry raises required compensation for outside capital. Evaluate governance benefits alongside costs and new incentives it may create.

习题组 · 第 2 题
Question set · 2

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 83

题目与资料 / **Question and data**

习题组

QUESTION SET

2. 一位分析师正在评估其覆盖范围内多家公司的治理情况，发现其中一位首席执行官高度参与政治和慈善活动。这些活动可能导致管理层与股东之间出现以下哪种利益不一致？

2. An analyst is examining the governance of several companies in her coverage area and learns that one of the CEOs is highly involved in political and charitable activities. These activities may result in which one of the following misalignments of interests between management and shareholders?

A. 自利交易

A. Self-dealing

B. 固守职位

B. Entrenchment

C. 努力不足。

C. Insufficient effort

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

首席执行官的外部活动可能导致努力不足。

The CEO’s outside activities could result in insufficient effort.

管理者可能因投入政治或慈善活动、个人投资，或兼任其他公司的董事或管理者，而在本职工作上投入过少时间。

Managers may allocate too little time to their role because they are committed to political or charitable activities, personal investments, or serving as directors or managers of other companies.

A 和 B 不正确。虽然两者都是管理层与股东利益不一致的例子，但它们并非管理层参与慈善和政治活动所引发的首要担忧。这些活动通常会分散管理层的注意力，而不是直接引发利益冲突或不符合股东利益的交易。

A and B are incorrect, because while they are both examples of misalignments between management and shareholders, they are not the primary concern about management involvement in charitable and political activities, which tend to distract management rather than cause a direct conflict of interest or transaction that is not in shareholders' interests.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is C. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

QUESTION SET

3. _____型公司所有权结构包含众多股东，没有任何一位股东能够控制公司。

3. A _____ corporate ownership structure involves many shareholders, none of whom can exercise control over the corporation.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

分散型公司所有权结构包含众多股东，没有任何一位股东能够控制公司。

A dispersed corporate ownership structure involves many shareholders, none of whom can exercise control over the corporation.

补充解析 / **Supplementary explanation**

补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

QUESTION SET

4. 一家公司的管理团队正在推进一项主要由债务融资的大规模收购，管理团队的薪酬中包含大量股票奖励和期权。团队讨论了这项收购可能不符合所有利益相关者利益的问题，并有人建议增加该收购的股权融资。提高这项交易的股权融资比例，将增强哪类利益相关者的支持？

4. A company's management team, whose compensation includes significant stock grants and options, is pursuing a large debt-financed acquisition. The management team discusses how this acquisition may not align with the interests of all stakeholders, and it is proposed that they increase equity financing for the acquisition. Increasing equity financing for the transaction would increase support by which stakeholder?

A. 债务持有人

A. Debtholders

B. 管理层

B. Management

C. 股东。

C. Shareholders

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

拥有固定索取权的债务持有人通常厌恶风险，希望公司采取措施，确保有足够现金流履行债务义务。

Debtholders with a fixed claim tend to be risk averse and prefer that the corporation take actions to ensure sufficient cash flow to meet its debt obligations.

因此，债务持有人通常更希望公司筹集股本，而不是将债务增加到可能提高违约风险的水平。

For this reason, debtholders tend to prefer that a company raise more equity as opposed to increasing debt to a level that may increase default risk.

B 和 C 不正确，因为股票奖励和期权使管理层与股东的利益保持一致，而股东通常更偏好提高杠杆，而非发行具有摊薄作用的新股。

B and C are incorrect, because management is aligned with shareholders through stock grants and options, and shareholders tend to prefer greater leverage rather than dilutive equity issuance.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

The official choice for this item is A. Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

QUESTION SET

5. 讨论双重股权结构下控股股东与少数股东之间的潜在冲突。

5. Discuss the potential conflicts between controlling shareholders and minority shareholders in a dual-class structure.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

双重股权结构允许利益相关者凭借持有具有优越投票权的一类股份，实际控制公司。

A dual-class structure allows stakeholders to effectively control the company by virtue of their ownership of a share class with superior voting rights.

虽然少数股东可能设法以有利于自己的方式改变投票权，但这样做可能很困难且成本高昂，麦格纳国际的例子就说明了这一点。

While it is possible for minority shareholders to change voting rights in their favor, it can be difficult and expensive to do so, as illustrated by the Magna International example.

补充解析 / **Supplementary explanation**

补充思路：先识别谁委托谁、谁掌握信息、谁承担后果。经理与股东之间可能存在努力不足、固守职位或私人利益交易；控股与少数股东之间可能存在利益输送；股东与债权人之间可能存在风险转移。不同冲突需要不同机制：激励合同、独立监督、投票权或契约限制并非相互替代。

Additional reasoning: Identify the principal, agent, information advantage, and risk bearer. Manager–shareholder conflicts include insufficient effort, entrenchment, and self-dealing. Controlling shareholders may divert value from minorities, and equity may shift risk to lenders. Tailor incentives, monitoring, voting rights, and covenants to the specific conflict rather than treating all controls as interchangeable.

相关知识点 / **Related concepts**

代理冲突与信息不对称：信息不对称提高外部资本提供者所要求的风险补偿；治理机制的收益应与成本和潜在新激励问题一起评估。

题目与资料 / Question and data

知识检查

KNOWLEDGE CHECK

1. 以下有关临时股东大会（EGM）的陈述，哪项正确？

1. Which of the following statements about extraordinary general meetings (EGMs) of shareholders is true?

A. 外部审计师在临时股东大会上任命。

A. The appointment of external auditors occurs during an EGM.

B. 公司在临时股东大会上

B. A corporation provides an overview of corporate performance at an

概述公司业绩。

EGM.

C. 公司细则的修订通常在临时股东大会上进行。

C. An amendment to a corporation’s bylaws typically occurs during an EGM.

官方答案与解析 / Official answer and explanation

答案：

Solution:

C 正确。

C is correct.

修订公司细则通常在临时股东大会上进行，这类会议处理公司重大变更，如修订细则。

An amendment to corporate bylaws would normally take place during an EGM, which concerns significant changes to a company, such as bylaw amendments.

A 和 B 不正确，因为任命外部审计师及概述公司业绩通常在年度股东大会上进行。

A and B are incorrect, because the appointment of external auditors and a corporate performance overview would typically take place during the AGM.

股东积极主义

Shareholder Activism

股东积极主义是指投资者采用策略，促使公司按照其期望采取行动。

Shareholder activism involves investor strategies to compel a company to act in a desired manner.

积极股东的主要动机是在较短时间内提高股东价值，尽管部分行动也涉及社会、政治或环境因素。

The primary motivation of shareholder activists is to increase shareholder value relatively quickly, although some activism involves social, political, or environmental considerations.

积极股东经常通过发起委托投票权争夺、提出股东决议，以及公开争议事项等手段，向管理层施压，要求其采取行动。

Shareholder activists often pressure management to act using tactics such as initiating proxy fights, proposing shareholder resolutions, and publicizing issues of contention.

对冲基金是主要的积极股东之一。

Hedge funds are among the predominant shareholder activists.

与大多数机构投资者不同，对冲基金的大部分收费以回报为基础，因此它们与积极股东行动在财务上的成功具有重大利益关联。

Unlike most institutional investors, hedge funds base the majority of their fees on returns, granting them a significant stake in the financial success of an activist campaign.

此外，对冲基金面临的投资限制较少，因此能够借入资金并建立大量股份头寸。

Also, hedge funds face fewer investment restrictions and are therefore able to take on large share positions using borrowed funds.

相比之下，共同基金等受监管投资实体受到投资限制（例如对最大持仓规模、杠杆，以及持有困境证券或流动性差证券的限制），因此这类活动受到约束；不过，部分大型基金仍会利用其影响力鼓励公司采取积极行动。

Regulated investment entities such as mutual funds, however, are subject to investment restrictions (e.g., limitations on maximum position size, leverage, and ownership of distressed or illiquid securities) that limit these activities, although some large funds use their influence to encourage positive corporate action.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

The official choice for this item is C. Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

CI-LM03-KNOWLEDGE_CHECK-701

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 87

题目与资料 / **Question and data**

知识检查

KNOWLEDGE CHECK

1. 以下哪项最恰当地描述了积极股东？积极股东：

1. Which of the following best describes shareholder activists? Shareholder activists:

A. 有助于稳定公司的战略方向。

A. help stabilize a company’s strategic direction.

B. 对公司的长期投资者影响很小。

B. have little effect on the company’s long-term investors.

C. 不太可能改变公司股东群体的构成。

C. are unlikely to alter the composition of a company’s shareholder base.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

积极股东通常会收窄公司的战略方向，使其专注于历史上擅长的少数业务，并常在此过程中出售资产、关闭部门。

Shareholder activists often narrow a company’s strategic direction to focus on the few things that the company has historically done well, often shedding assets and closing divisions in the process.

B 不正确，因为公司的长期投资者需要考虑积极股东对公司的影响，尤其是公司进行重组和更换管理层时。

B is incorrect, because long-term investors in a company need to consider how shareholder activists affect the company, especially if the company is restructured and management is replaced.

C 不正确，因为积极股东很可能使公司的投资逻辑转向重组，从而促使股东群体发生变化。

C is incorrect, because an activist is likely to change the investment thesis for a company toward restructuring, which may prompt a change in the shareholder base.

股东诉讼

Shareholder Litigation

积极股东还可能采取诉讼等其他策略。

Shareholder activists may pursue additional tactics, such as litigation or lawsuits.

其中一种重要形式是股东派生诉讼（与金融衍生品合同无关）：当董事和高级管理人员未能充分维护公司利益时，某位被视为代公司行事的股东，替代他们对董事会、管理层和 / 或控股股东提起法律诉讼。

One prominent type is shareholder derivative lawsuits (unrelated to financial derivative contracts), which are legal proceedings initiated against the board of directors, management, and/or controlling shareholders by a shareholder deemed to be acting on behalf of the company in place of its directors and officers, who have failed to adequately act for the benefit of the company.

许多国家的法律会限制股东提起诉讼，做法包括设定最低持股权益门槛，或完全禁止此类诉讼。

In many countries, laws restrict shareholders from pursuing legal action by either imposing minimum shareholder interest thresholds for such lawsuits or prohibiting them altogether.

公司接管

Corporate Takeovers

股东或收购方可以通过多种方式实施接管，从而改变公司控制权。

Changes in corporate control via a takeover by shareholders or an acquirer may be pursued in several ways.

一种机制是委托投票权争夺（或代理权之争）。

One mechanism is the proxy contest (or proxy fight).

在委托投票权争夺中，一个寻求在公司董事会取得控制地位的群体，试图说服股东投票支持该群体。

In a proxy contest, a group seeking a controlling position on a company’s board of directors attempts to persuade shareholders to vote for the group.

管理团队也可能因要约收购或敌意收购而被替换，这些行动通过控制董事会，进而控制管理层，实现对公司的接管。

Managerial teams can also be displaced through tender offers and hostile takeovers, which seek to take over a company through control of the board and thus management.

要约收购是向股东发出邀请，请其将权益直接出售给寻求控制权的群体。

A tender offer involves an invitation to shareholders to sell their interests directly to a group seeking to gain control.

公司控制权之争可能吸引套利者和收购专家，他们从目标公司的现有股东手中购买股份，随后卖给出价最高者，从而促进控制权转移。

A contest for corporate control may attract arbitrageurs and takeover specialists, who facilitate transfers of control by purchasing shares from existing shareholders in the target company and later selling shares to the highest bidder.

敌意收购是指在未获得目标公司管理层同意的情况下，试图收购该公司。

A hostile takeover is an attempt to acquire a company without the consent of the company's management.

保住职位的动机，会激励董事会成员和管理者专注于股东财富最大化。

Preservation of employment serves as an incentive for board members and managers to focus on shareholder wealth maximization.

然而，如果公司为了降低不受欢迎的接管发生的可能性，采取交错任期董事会选举或股东权利计划（通常称为毒丸计划）等反收购措施，被撤职的威胁也可能对公司治理实践产生负面影响。

The threat of removal, however, can also have negative implications for a company's corporate governance practices if the company adopts anti-takeover measures, such as staggered board elections or a shareholder rights plan (commonly known as a poison pill), to reduce the likelihood of an unwanted takeover.

交错任期董事会选举阻止股东在任何一次选举中更换整个董事会，因此可能削弱股东投票权。

Staggered board elections can dilute shareholder voting rights by preventing shareholders from replacing the entire board at any given election.

股东权利计划允许股东在另一位股东购入公司一定比例的股份时，以折扣价格购买额外股份。

A shareholder rights plan enables shareholders to buy additional shares at a discount if another shareholder purchases a certain percentage of the company's shares.

此类计划会提高任何潜在竞购者的收购成本。

Such plans increase takeover costs to any potential bidder.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

The official choice for this item is A. Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

QUESTION SET

1. 下列哪项通常用于代表债权人的利益？

1. Which of the following is typically used to represent creditors' interests?

A. 特设委员会

A. Ad hoc committee

B. 毒丸计划

B. Poison pill

C. 要约收购。

C. Tender offer

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

特设委员会是由债权人组成的群体，向陷入财务困境的发行人提出债务重组方案。

An ad hoc committee is a group of creditors who approach an issuer in financial distress with options for debt restructuring.

B 不正确。

B is incorrect.

毒丸计划用于保护股东、管理层和董事会，使其免受可能低估公司价值或其他不受欢迎的接管。

A poison pill is used to protect shareholders, management, and the board from takeovers that could potentially undervalue the company or are otherwise unwanted.

C 不正确。

C is incorrect.

要约收购是向股东发出邀请，请其将权益直接出售给寻求控制权的群体。

A tender offer involves an invitation to shareholders to sell their interests directly to a group seeking to gain control.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is A. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

2. 董事会审计委员会的主要职责不包括：

2. A primary responsibility of a board’s audit committee does not include:

A. 监督会计政策。

A. oversight of accounting policies.

B. 采用适当的公司治理。

B. adoption of proper corporate governance.

C. 建议外部审计师的报酬。

C. recommending remuneration for the external auditor.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

采用适当的公司治理属于公司治理委员会的职责。

The adoption of proper corporate governance is the responsibility of a corporation’s governance committee.

A 和 C 不正确，因为监督会计政策及建议外部审计师报酬都属于审计委员会的职责。

A and C are incorrect, because oversight of accounting policies and recommending remuneration for the external auditor are responsibilities of the audit committee.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

3. 以下关于股东积极主义的陈述，哪项正确？

3. Which of the following is true of shareholder activism?

A. 积极股东很少包括对冲基金。

A. Shareholder activists rarely include hedge funds.

B. 监管机构在股东积极主义中发挥重要作用。

B. Regulators play a prominent role in shareholder activism.

C. 股东积极主义的主要目标之一是提高股东价值。

C. A primary goal of shareholder activism is to increase shareholder value.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

虽然股东积极主义可能涉及社会和政治问题，但积极股东的主要动机是提高股东价值。

Although shareholder activism may involve social and political issues, shareholder activists' primary motivation is to increase shareholder value.

A 不正确，因为对冲基金经常扮演积极股东的角色。

A is incorrect, because hedge funds commonly serve as shareholder activists.

B 不正确，因为监管机构在制定标准方面发挥重要作用，而非在股东积极主义方面。

B is incorrect, because regulators play a prominent role in standard setting, not shareholder activism.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

The official choice for this item is C. Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

QUESTION SET

4. 判断正误：投资者从非上市公司和上市公司获得的信息，其内容和形式相似，包括经审计的披露资料。

4. True or False: Investors receive information similar in content and form, including audited disclosures, from both private and public companies.

A. 正确

A. True

B. 错误。

B. False

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

错误。非上市公司向投资者保密披露信息，但信息的内容和形式由协商决定，而不像上市公司的报告那样标准化并受到监管。大多数司法管辖区不要求非上市公司的披露资料接受审计，但非上市公司可自行选择审计。

False. Private companies disclose information confidentially to their investors, but the content and form of that information are subject to negotiation rather than standardized and regulated like the reporting by public companies. Most jurisdictions do not require that private companies' disclosures be audited, though they are free to obtain an audit.

补充解析 / **Supplementary explanation**

补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. QUESTION SET

5. 解释为何交错任期董事会选举会削弱公司治理。

5. Explain why staggered board elections weaken corporate governance.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

交错任期董事会选举阻止股东在任何一次选举中更换整个董事会，因此可能削弱股东投票权。

Staggered board elections can dilute shareholder voting rights by preventing shareholders from replacing the entire board at any given election.

例如，如果每年只选举 25% 的董事，积极股东可能需要三年才能更换董事会多数成员。

For example, if only 25% of the board is elected per year, it can take an activist three years to replace a majority of the board.

补充解析 / **Supplementary explanation**

补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

题目与资料 / **Question and data**

习题组

QUESTION SET

6. 一家公司的薪酬委员会希望抑制管理者过度冒险，最可能设计以下哪种激励薪酬计划？

6. A company's compensation committee seeking to discourage excessive risk-taking by managers is most likely to design an incentive compensation plan that:

A. 允许董事和管理者对自己的薪酬拥有更大的自由裁量权。

A. allows directors and managers to have greater discretion over their remuneration.

B. 包含由股票期权构成、与短期股价表现挂钩的可变部分。

B. includes a variable component comprising stock options contingent on near-term stock performance.

C. 授予股票而非期权，股票在数年内逐步归属，并且受到最低持有期要求的限制。

C. grants shares, rather than options, that vest over several years and are subject to minimum holding requirements.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

授予股票而非期权，并要求股票在数年内归属且必须持有，有助于抑制管理者的“短期主义”或过度冒险。

Granting shares, rather than options, that vest over several years and must be held discourages “short-termism” or excessive risk-taking by managers.

A 不正确。

A is incorrect.

允许股东表达对薪酬事项的意见，可以限制董事和管理者向自己授予过高（或不足）薪酬的自由裁量权，因此并非让管理者对自身薪酬拥有更大裁量权。

By allowing shareholders to express their views on remuneration matters, companies can limit the discretion of directors and managers in granting themselves excessive (or inadequate) remuneration, thus not allowing managers to have greater discretion over their own pay.

B 不正确，因为由股票期权构成并与短期股价表现挂钩的可变薪酬部分，可能鼓励管理者过度冒险。

B is incorrect, because a variable component comprising stock options contingent on near-term stock performance may encourage excessive risk-taking by managers.

如果管理者可以牺牲公司利益以增加个人收益，同时限制自己承受股价低迷的影响，股权薪酬就无法实现其目的。

Stock-based remuneration does not serve its purpose if managers can improve their personal gains at the expense of the company while limiting their exposure to weak stock performance.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is C. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

QUESTION SET

1. 下列哪项不是有效公司治理结构带来的收益？

1. Which of the following is not a benefit of an effective corporate governance structure?

A. 可以改善经营业绩。

A. Operating performance can be improved.

B. 可以降低公司的债务成本。

B. A corporation's cost of debt can be reduced.

C. 公司决策和活动所需的控制减少。

C. Corporate decisions and activities require less control.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

有效公司治理结构的一项收益，是使经营活动受到充分审查和控制。

A benefit of an effective corporate governance structure is to enable adequate scrutiny and control over operations.

A 不正确，因为经营效率改善确实可能是有效公司治理结构带来的收益。

A is incorrect, because improved operating efficiency may indeed be a benefit of an effective corporate governance structure.

B 不正确，因为有效的治理结构可以降低投资者感知的公司信用风险，从而可能降低公司的债务成本。

B is incorrect, because an effective governance structure can reduce investors' perceived credit risk of a corporation, thus potentially lowering the corporation's cost of debt.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is C. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

治理丑闻可通过预期现金流下降和要求回报率上升同时压低证券价格；债券价格下降通常对应融资成本上升，不能把股债共同下跌仅解释为股票风险。

A governance scandal can lower security prices through weaker expected cash flows and higher required returns. Lower bond prices generally imply higher financing costs; joint declines are not purely equity risk.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

QUESTION SET

2. 投资分析师最可能对以下哪种高管薪酬计划感到担忧？

2. An investment analyst would likely be most concerned about an executive compensation plan that:

A. 每年都会变化。

A. varies each year.

B. 与公司竞争对手的薪酬计划保持一致。

B. is consistent with the compensation plans of a company’s competitors.

C. 仅以现金支付，不包含股权部分。

C. is cash-based only, without an equity component.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

如果高管薪酬计划只提供现金，管理层与投资者（及其他利益相关者）的利益可能不一致。

If an executive remuneration plan offers cash only, the interests of management and investors (and other stakeholders) may be misaligned.

股权薪酬计划通常用于使管理层与股东的利益一致。

An equity-based compensation plan is commonly used to align management interests with those of shareholders.

A 不正确，因为与一成不变的计划相比，随时间变化的计划通常较少令分析师担忧。

A is incorrect, because a plan that varies over time would typically be of less concern to an analyst compared with one that did not change.

B 不正确，因为如果公司高管相对于竞争对手的薪酬过低或过高，分析师才更可能担忧。

B is incorrect, because an analyst would likely be concerned if a company’s executives were under- or overcompensated relative to competitors.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is C. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

QUESTION SET

3. 有效公司治理的收益包括以下各项，但哪项除外？

3. Benefits of effective corporate governance include all of the following except:

A. 避免欺诈。

A. avoidance of fraud.

B. 提高投资者信心。

B. higher investor confidence.

C. 降低股权成本。

C. reduced cost of equity.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

有效公司治理能够减轻欺诈等风险因素，至少也能在早期识别并控制它们，但不能完全避免这些风险。

Effective corporate governance allows for the mitigation, not the avoidance, of risk factors such as fraud, or at least their identification and control at early stages.

B 和 C 不正确，因为二者都是有效公司治理的收益。

B and C are incorrect, as these are both benefits of effective corporate governance.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is A. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

本题要求选择“不成立、最不可能或例外”的项目。先判断各陈述在题设下是否成立，再按这一反向要求选出答案；正确选项可能本身描述的就是错误或不适用情形。

This item asks for a least-likely, inaccurate, or exception case. Evaluate each statement under the assumptions, then apply that reversed selection rule; the credited choice may itself describe the false or inapplicable case.

QUESTION SET

4. 你的同事认为，公司治理和控制措施官僚化，会拖慢公司的决策与价值创造。请讨论。

4. Your colleague suggests that governance and controls are bureaucratic and slow down decision-making and value creation at companies. Discuss.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

健全的治理实践及利益相关者之间适当的利益平衡，通常体现为更强的竞争力、更高的经营效率、更完善的控制流程和更好的业绩。

Strong governance practices and a proper balance among stakeholders' interests are often reflected in increased competitiveness and operational efficiency, better control processes, and improved performance.

研究表明，拥有经验丰富、具备财务专业知识的审计委员会的上市公司，在危机期间往往有更好的市场表现；董事会独立性和多元化似乎是公司估值的关键因素，尤其在首次公开募股中，并且在公司创造和保护价值方面发挥重要作用。

Studies have shown that listed companies with experienced audit committees possessing financial expertise tend to have stronger market performance during a crisis, and board independence and diversity appear to be key factors in firm valuation—particularly for initial public offerings—and play an important role in value creation and value protection for firms.

然而，当董事会规模过大、管理层级过多、管理者缺乏与其岗位相关的经验，或控制措施流于打勾式形式主义、不能产生相关且可付诸行动的信息时，治理和控制就可能失效，并拖慢决策。

However, governance and controls can be ineffective and slow down decision-making when the board is too big, there are too many managerial layers, managers lack relevant experience for their role, or the controls consist of a check-the-box approach that fails to produce relevant and actionable information.

补充解析 / **Supplementary explanation**

补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

QUESTION SET

5. 判断正误：只要员工没有工会或集体谈判协议作为代表，管理层和董事会就可以忽视员工关系。

5. True or False: So long as employees are not represented by labor unions or collective bargaining agreements, management and the board can ignore employee relations.

A. 正确

A. True

B. 错误。

B. False

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

错误。对于许多公司，员工（人力资本）是成功的关键投入，也是最大的成本类别。无论员工是否由工会或集体谈判协议代表，员工关系都很重要，因为其工作质量直接影响客户体验及产品或服务质量。员工流失、生产率损失、重复培训的需要，以及新闻媒体或社交媒体讨论的不良做法，都会带来成本，并可能引发监管行动。与员工建立并维持积极、长期关系的公司，可以形成竞争优势。

False. For many companies, employees (human capital) are a crucial input to success and the largest category of cost. Employee relations are important whether or not employees are represented by labor unions or collective bargaining agreements, as the quality of their work directly affects customer experience and product or service quality. Employee attrition, productivity losses, the need for repeat training, and poor practices discussed in the press or social media are costly and could result in regulatory action. Companies that build and maintain positive, long-term relationships with employees can develop a competitive advantage.

补充解析 / **Supplementary explanation**

补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

CI-LM03-PRACTICE-001

章末习题 1
Practice problem 1

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 100, 102

题目与资料 / Question and data

以下资料适用于第 1—5 题。

The following information relates to questions 1-5

神户制钢所（Kobe Steel Ltd.）是一家成立于 1905 年的日本大型钢铁制造商，向全球汽车、飞机和火车制造商供货。2018 年 3 月，公司发布报告，就伪造铝、铜、钢制品及铁矿粉的强度与耐久性数据致歉。丑闻曝光后，其股价跌至五年低点，债务成本跃升至历史最高水平。独立调查委员会（IIC）调查了这些不当行为并撰写报告，认为不当行为源于：（1）公司治理不足背景下过度强调盈利能力的管理方式；（2）工厂运营失衡，导致员工质量合规意识下降；（3）质量控制程序不足，使不当行为得以发生。报告还强调，公司存在“将赢得采购订单和按时交付置于确保质量之上”的文化。公司承诺实施多项措施，防止不当行为再次发生。在治理方面，措施包括：

Kobe Steel Ltd. is a major Japanese steel manufacturer formed in 1905 that supplies global manufacturers of cars, planes, and trains. The company issued a report in March 2018 apologizing for falsifying data on the strength and durability of its aluminum, copper, steel products, and iron ore powder. Following the scandal, its stock sank to a five-year low and its cost of debt jumped to record levels. An Independent Investigation Committee (IIC) investigated the misconduct and authored the report, which concluded that the misconduct resulted from (1) a management style that overemphasized profitability amid inadequate corporate governance, (2) the imbalanced operation of plants that resulted in reduced awareness of quality compliance among employees, and (3) insufficient quality control procedures that allowed the misconduct to take place. The report also emphasized that the company had “a culture that prioritized winning purchase orders and meeting delivery deadlines over ensuring quality.” The company committed to implementing various measures to prevent a recurrence of the misconduct. Regarding governance, measures included the following:

- 任命独立董事长

- Appointing an independent chairman of the board of directors

- 确保至少三分之一的董事为独立董事

- Having at least one-third of the board of directors be independent

- 设立由多数独立董事组成的提名和薪酬委员会，作为董事会自愿设立的咨询机构

- Creating a nominating and compensation committee, consisting of a majority of independent directors, to serve as a voluntary advisory body to the board of directors

- 设立由外部专家组成的独立质量监督委员会

- Creating an independent quality supervision committee consisting of external experts

- 设立由五人组成的审计与监督委员会，包括两名内部董事，以及三名具有法律、财务和工业领域背景的独立董事

- Creating an audit and supervisory committee consisting of five members: two internal directors and three independent directors with backgrounds in legal, financial, and industrial fields

1. 识别神户制钢所的三项关键利益相关者关系，并讨论这些关系在不当行为中发挥的作用，或受到的影响。

1. Identify three key stakeholder relationships for Kobe Steel and discuss their role in the misconduct or how they were affected.

官方答案与解析 / **Official answer and explanation**

1.

1.

利益相关者关系分析。各列为利益相关者 1、利益相关者 2、关系类型，以及作用或影响。

神户公司与客户（汽车、飞机及火车制造商）：合同关系。公司交付了质量不达标的产品，可能伤害公众。

董事会与神户公司：代理关系。董事会未能监督公司活动，导致声誉损害、民事投诉及法律行动。

管理人员与员工：合同关系。公司文化更重视赢得订单及按时交货，而非确保质量。

Stakeholder 1	Stakeholder 2	Relationship Type	Role or Impact
Kobe Corporation	Customers (manufacturers of cars, planes, and trains)	Contractual	The company delivered an inferior-quality product that could have resulted in harm to the public.
Board of Directors	Kobe Corporation	Agent	The board failed to monitor the activities of the corporation, resulting in reputational damage, civil complaints, and legal action.
Managers	Employees	Contractual	The culture prioritized winning purchase orders and meeting delivery deadlines over ensuring quality.

原 PDF 第 102 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：治理分析需要指出谁承担风险以及通过什么机制承担。负债增加可能把财务困境成本传导给员工、供应商和客户；技能高度专用且替代就业有限的员工可能尤其脆弱。分散股权弱化单个股东监督的激励，股东积极主义则通过投票、对话或治理变革推动价值改善。

Additional reasoning: Governance analysis should identify who bears risk and through which mechanism. More debt can transmit distress costs to employees, suppliers, and customers; workers with specialized skills and few alternatives may be particularly exposed. Dispersed ownership weakens individual monitoring incentives, while activism uses voting, engagement, or governance change to improve value.

相关知识点 / **Related concepts**

治理与利益相关者的具体影响：风险暴露不只取决于债权顺序，还取决于关系专用投资和替代机会；监管制定规则与股东积极主义不是同一机制。

Governance and stakeholder consequences: Exposure depends on relationship-specific investment and alternatives as well as claim priority. Regulatory standard-setting differs from shareholder activism.

神户制钢所（Kobe Steel Ltd.）是一家成立于 1905 年的日本大型钢铁制造商，向全球汽车、飞机和火车制造商供货。2018 年 3 月，公司发布报告，就伪造铝、铜、钢制品及铁矿粉的强度与耐久性数据致歉。丑闻曝光后，其股价跌至五年低点，债务成本跃升至历史最高水平。独立调查委员会（IIC）调查了这些不当行为并撰写报告，认为不当行为源于：（1）公司治理不足背景下过度强调盈利能力的管理方式；（2）工厂运营失衡，导致员工质量合规意识下降；（3）质量控制程序不足，使不当行为得以发生。报告还强调，公司存在“将赢得采购订单和按时交付置于确保质量之上”的文化。公司承诺实施多项措施，防止不当行为再次发生。在治理方面，措施包括：

Kobe Steel Ltd. is a major Japanese steel manufacturer formed in 1905 that supplies global manufacturers of cars, planes, and trains. The company issued a report in March 2018 apologizing for falsifying data on the strength and durability of its aluminum, copper, steel products, and iron ore powder. Following the scandal, its stock sank to a five-year low and its cost of debt jumped to record levels. An Independent Investigation Committee (IIC) investigated the misconduct and authored the report, which concluded that the misconduct resulted from (1) a management style that overemphasized profitability amid inadequate corporate governance, (2) the imbalanced operation of plants that resulted in reduced awareness of quality compliance among employees, and (3) insufficient quality control procedures that allowed the misconduct to take place. The report also emphasized that the company had “a culture that prioritized winning purchase orders and meeting delivery deadlines over ensuring quality.” The company committed to implementing various measures to prevent a recurrence of the misconduct. Regarding governance, measures included the following:

- 任命独立董事长

- Appointing an independent chairman of the board of directors

- 确保至少三分之一的董事为独立董事

- Having at least one-third of the board of directors be independent

- 设立由多数独立董事组成的提名和薪酬委员会，作为董事会自愿设立的咨询机构

- Creating a nominating and compensation committee, consisting of a majority of independent directors, to serve as a voluntary advisory body to the board of directors

■ 设立由外部专家组成的独立质量监督委员会

■ Creating an independent quality supervision committee consisting of external experts

■ 设立由五人组成的审计与监督委员会，包括两名内部董事，以及三名具有法律、财务和工业领域背景的独立董事

■ Creating an audit and supervisory committee consisting of five members: two internal directors and three independent directors with backgrounds in legal, financial, and industrial fields

2. 讨论利益相关者的激励，以及神户制钢所管理层与公司客户之间产生的冲突。

2. Discuss the stakeholder incentives and the conflicts that arose between Kobe's management and the company's customers.

官方答案与解析 / **Official answer and explanation**

2. 公司向汽车、飞机和火车制造商提供了可能存在缺陷的钢材及其他材料投入品。客户受到宣传中的产品质量吸引，而管理层受到赢得采购订单和按时交付的激励。明确的质量标准本应使双方利益一致，但盈利潜力反而导致董事与客户之间产生冲突。

2. The company supplied potentially faulty steel and other material inputs to manufacturers of cars, planes, and trains. The customers were incentivized by the advertised quality of the products, while management was incentivized by winning purchase orders and meeting delivery deadlines. A certain quality standard should have aligned interests, but instead the potential for profits created a conflict between the directors and customers.

补充解析 / **Supplementary explanation**

补充思路：先识别谁委托谁、谁掌握信息、谁承担后果。经理与股东之间可能存在努力不足、固守职位或私人利益交易；控股与少数股东之间可能存在利益输送；股东与债权人之间可能存在风险转移。不同冲突需要不同机制：激励合同、独立监督、投票权或契约限制并非相互替代。

Additional reasoning: Identify the principal, agent, information advantage, and risk bearer. Manager–shareholder conflicts include insufficient effort, entrenchment, and self-dealing. Controlling shareholders may divert value from minorities, and equity may shift risk to lenders. Tailor incentives, monitoring, voting rights, and covenants to the specific conflict rather than treating all controls as interchangeable.

相关知识点 / **Related concepts**

代理冲突与信息不对称：信息不对称提高外部资本提供者所要求的风险补偿；治理机制的收益应与成本和潜在新激励问题一起评估。

Agency conflicts and information asymmetry: Information asymmetry raises required compensation for outside capital. Evaluate governance benefits alongside costs and new incentives it may create.

神户制钢所（Kobe Steel Ltd.）是一家成立于 1905 年的日本大型钢铁制造商，向全球汽车、飞机和火车制造商供货。2018 年 3 月，公司发布报告，就伪造铝、铜、钢制品及铁矿粉的强度与耐久性数据致歉。丑闻曝光后，其股价跌至五年低点，债务成本跃升至历史最高水平。独立调查委员会（IIC）调查了这些不当行为并撰写报告，认为不当行为源于：（1）公司治理不足背景下过度强调盈利能力的管理方式；（2）工厂运营失衡，导致员工质量合规意识下降；（3）质量控制程序不足，使不当行为得以发生。报告还强调，公司存在“将赢得采购订单和按时交付置于确保质量之上”的文化。公司承诺实施多项措施，防止不当行为再次发生。在治理方面，措施包括：

Kobe Steel Ltd. is a major Japanese steel manufacturer formed in 1905 that supplies global manufacturers of cars, planes, and trains. The company issued a report in March 2018 apologizing for falsifying data on the strength and durability of its aluminum, copper, steel products, and iron ore powder. Following the scandal, its stock sank to a five-year low and its cost of debt jumped to record levels. An Independent Investigation Committee (IIC) investigated the misconduct and authored the report, which concluded that the misconduct resulted from (1) a management style that overemphasized profitability amid inadequate corporate governance, (2) the imbalanced operation of plants that resulted in reduced awareness of quality compliance among employees, and (3) insufficient quality control procedures that allowed the misconduct to take place. The report also emphasized that the company had “a culture that prioritized winning purchase orders and meeting delivery deadlines over ensuring quality.” The company committed to implementing various measures to prevent a recurrence of the misconduct. Regarding governance, measures included the following:

- 任命独立董事长

- Appointing an independent chairman of the board of directors

- 确保至少三分之一的董事为独立董事

- Having at least one-third of the board of directors be independent

- 设立由多数独立董事组成的提名和薪酬委员会，作为董事会自愿设立的咨询机构

- Creating a nominating and compensation committee, consisting of a majority of independent directors, to serve as a voluntary advisory body to the board of directors

- 设立由外部专家组成的独立质量监督委员会

- Creating an independent quality supervision committee consisting of external experts

- 设立由五人组成的审计与监督委员会，包括两名内部董事，以及三名具有法律、财务和工业领域背景的独立董事

- Creating an audit and supervisory committee consisting of five members: two internal directors and three independent directors with backgrounds in legal, financial, and industrial fields

3. 以下哪项被视为最佳实践，可加强上述措施，防止不当行为再次发生？

3. Which of the following is considered a best practice that would strengthen the measures discussed to prevent a recurrence of the misconduct?

A. 股东权利计划

A. A shareholder rights plan

B. 股权薪酬计划

B. A stock-based compensation plan

C. 完全由独立董事组成的审计委员会

C. An audit committee composed solely of independent board members

官方答案与解析 / **Official answer and explanation**

3. C 正确。公司成立的审计与监督委员会中，多数成员为独立董事；但最佳实践建议审计委员会全部由独立成员组成，且至少一名董事具有会计或相关财务管理经验。A 不正确。股东权利计划又称毒丸计划，用于抵御可能低估公司价值的不受欢迎接管，却不能保护公司或股东免受管理层或员工不当行为的损害。B 不正确。股权薪酬计划用于使管理层与股东利益一致，但它也可能进一步鼓励冒险和不当行为，而这正是本案例的问题所在。

3. C is correct. The company formed an audit and supervisory committee that included a majority of independent directors, but best practices would recommend an audit committee composed solely of independent members, with at least one director with accounting or related financial management experience. A is incorrect. A shareholder rights plan, also known as a poison pill, is used to defend against unwanted takeovers that could potentially undervalue the company, but it does not defend the company or shareholders against management or employee misconduct. B is incorrect. A stock-based compensation plan is used to align the interests of management with those of shareholders, though it might further incentivize risk-taking and misconduct, which is the issue in this case.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is C. Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

How governance mechanisms reduce agency costs: Governance risk can increase capital costs and damage efficiency and reputation. Strong governance reduces but does not eliminate agency problems.

■ Creating an audit and supervisory committee consisting of five members: two internal directors and three independent directors with backgrounds in legal, financial, and industrial fields

4. 结合丑闻发生后的股票和债券价格，讨论财务风险对投资者信心的含义。

4. Discuss the financial risk implications of the post-scandal stock and bond prices with regard to investor confidence.

官方答案与解析 / **Official answer and explanation**

4. 股价下跌、债务成本上升，说明投资者和债权人对公司的信心下降。投资者必须评估公司过去的财务业绩在多大程度上受益于不当行为，并估计以下因素的影响：（1）公司不再伪造数据；（2）即使公司纠正问题，客户信心仍然流失。加强治理、采用最佳实践，是恢复投资者信心的第一步；但对未来销售和盈利能力的影响，才是决定今后股价和债务成本的关键。

4. The stock price fell and the cost of debt increased, indicating that investor and creditor confidence in the company declined. Investors will have to assess how much the company's financial results benefited from the past misconduct and estimate the impact from (1) the company no longer falsifying data and (2) the loss of customer confidence even if the company fixes the issues. Strengthening governance to include best practices is a first step toward restoring investor confidence, but the impact on future sales and profitability is key to the stock price and cost of debt going forward.

补充解析 / **Supplementary explanation**

补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

Additional reasoning: Separate decision authority, monitoring, and incentives. Boards oversee management, audits improve information credibility, and compensation shapes horizons and risk appetite. Formal independence alone does not prove effective oversight; expertise, real authority, and conflicts matter. After a failure, assess whether remedies improve information flow and accountability.

治理丑闻可通过预期现金流下降和要求回报率上升同时压低证券价格；债券价格下降通常对应融资成本上升，不能把股债共同下跌仅解释为股票风险。

A governance scandal can lower security prices through weaker expected cash flows and higher required returns. Lower bond prices generally imply higher financing costs; joint declines are not purely equity risk.

相关知识点 / **Related concepts**

治理机制如何降低代理成本：治理风险可提高资本成本、损害经营效率和声誉；良好治理通常降低但不能消除代理问题。

- Creating a nominating and compensation committee, consisting of a majority of independent directors, to serve as a voluntary advisory body to the board of directors

- 设立由外部专家组成的独立质量监督委员会

- Creating an independent quality supervision committee consisting of external experts

- 设立由五人组成的审计与监督委员会，包括两名内部董事，以及三名具有法律、财务和工业领域背景的独立董事

- Creating an audit and supervisory committee consisting of five members: two internal directors and three independent directors with backgrounds in legal, financial, and industrial fields

5. 神户制钢所的治理失误最可能导致以下哪项下降？

5. Kobe Steel’s governance failures most likely resulted in reduced:

A. 债务成本。

A. cost of debt.

B. 代理成本。

B. agency costs.

C. 增长机会。

C. growth opportunities.

官方答案与解析 / **Official answer and explanation**

5. C 正确。不当行为很可能损害神户制钢所在现有和潜在客户中的声誉，从而减少增长机会。A 不正确，因为丑闻公布后不久，债券收益率跃升至历史最高水平，表明市场认为其违约风险上升。较高的违约风险通常对应较高债务成本，因为当资金保障和权利保护减弱时，债权人通常要求更高回报。B 不正确，因为治理失败后，神户制钢所聘请独立调查委员会、独立董事和外部质量保证专家，承担了更高的代理成本。

5. C is correct. The misconduct likely caused reputational damage to Kobe among current and prospective customers, which reduces growth opportunities. A is incorrect, because bond yields jumped to record levels soon after the scandal was announced, suggesting a higher perceived default risk. Higher default risks are associated with a higher cost of debt, as creditors typically require a higher return when their funds are less secured and their rights less protected. B is incorrect, because Kobe is incurring higher agency costs in the wake of the governance failure by hiring an independent investigative committee, independent directors, and external quality assurance experts.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：有效治理把决策、监督和激励分开考虑。董事会监督经理，审计与独立核验提高信息可信度，薪酬设计影响经理的时间跨度和风险偏好。仅有形式上的独立性不足以证明监督有效，还要看专业能力、实际权力和利益冲突。出现治理失败后，应判断补救是否改变根本的信息流与问责，而不仅是更换名称。

The official choice for this item is C. Additional reasoning: Separate decision authority, monitoring, and incentives. 课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 106

题目与资料 / **Question and data**

中文学习译文

1. 下列哪项行为或事件最可能缩短发行人的现金转换周期？

A. 使用手头现金购买短期有价证券

B. 向在10天内付款的客户提供折扣

C. 由于款式偏好改变，某些商品销售放缓

官方英文题目 · PDF 第106页

1. Which of the following actions or events will most likely decrease an issuer's cash conversion cycle?

   A. Buying short-term marketable securities using cash on hand

   B. Offering customers a discount for payment received within 10 days

   C. Slowing of sales of certain goods due to changing preferences in styles

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。提前付款折扣可能缩短应收账款周转天数，从而缩短现金转换周期。

A不正确，因为减少现金、增加有价证券不会影响现金转换周期。

C不正确，因为销售放缓可能增加存货周转天数，从而延长现金转换周期。

官方英文解析 · PDF 第106页

Solution:

B is correct. A prompt-payment discount would likely reduce days sales outstanding and, in turn, decrease the issuer's cash conversion cycle.

A is incorrect, because increasing marketable securities by reducing cash does not affect the issuer's cash conversion cycle.

C is incorrect, because the slowing of sales of certain goods would likely increase days of inventory on hand and, in turn, increase the issuer's cash conversion cycle.

补充解析 / **Supplementary explanation**

CCC=存货天数+应收账款天数−应付账款天数。B鼓励客户提前付款，使应收账款天数下降；A只改变现金与有价证券的构成，不直接改变三项周转天数；C存货销售放慢，使存货天数上升。

CCC equals inventory days plus receivable days minus payable days. B encourages earlier collection, reducing receivable days. A only changes the composition of liquid assets. Slower sales in C increase inventory days.

相关知识点 / **Related concepts**

CCC缩短表示从支付供应商到收回客户现金的净占用时间缩短。

A shorter CCC reduces the net time cash is tied up between paying suppliers and collecting from customers.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / **Question and data**

中文学习译文

2. 下列哪项行为最可能提高发行人的流动性？

A. 放弃供应商提供的提前付款折扣

B. 通过延长付款期限放宽对客户的信用条件

C. 用手头现金购买短期有价证券

官方英文题目 · PDF 第106页

2. Which of the following actions will most likely increase an issuer's liquidity?

A. Forgoing a supplier's discount for prompt payments

B. Relaxing terms for customers by lengthening the payment period

C. Purchasing short-term marketable securities with cash on hand

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。放弃折扣相当于利用供应商融资，会延后应付账款支付，从而减少短期内的流动性消耗。官方原解随后写道："这一行为增加发行人的现金转换周期。"

B不正确，因为放宽信用条件使客户付款更慢，从而延长现金转换周期。

C不正确，因为有价证券通常不如现金流动性高，购买它们会降低流动性。即使有价证券与现金一样易变现（例如短期国债），该行为也不会实质性改变流动性。

Solution:

A is correct. Forgoing the discount is using the supplier's financing and will result in the issuer stretching out payments on accounts payable, putting less drain on liquidity in the short run. This action increases the issuer's cash conversion cycle.

B is incorrect, because by relaxing credit terms, customers will take longer to pay, so this action increases the cash conversion cycle.

C is incorrect, because marketable securities are generally *less* liquid than cash, so this action would reduce liquidity. Even if the marketable securities are as liquid as cash (e.g., short-term Treasuries), this action would not materially affect liquidity.

补充解析 / **Supplementary explanation**

原文保留官方选择A，但其中"increases the issuer's cash conversion cycle"与CCC公式方向相反。延迟支付供应商提高DPO，在其他条件不变时应使CCC下降，短期现金流出压力减轻。放弃折扣仍有融资成本，应比较隐含年化成本与其他资金来源。

The official choice A is retained, but the statement that this increases the cash conversion cycle conflicts with its formula. Delaying supplier payments increases DPO and, all else equal, decreases CCC, easing short-term cash outflow. Forgone discounts still carry financing costs that should be compared with alternatives.

相关知识点 / **Related concepts**

原文方向勘误：CCC=DIO+DSO−DPO，DPO上升使CCC下降。

Source direction correction: $CCC = DIO + DSO - DPO$; higher DPO lowers CCC.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.
官方原文将延迟支付供应商的效果写为增加CCC；按CCC=DIO+DSO−DPO，此时DPO上升应使CCC下降。原文与官方选项A均保留，方向修正在补充解析中说明。 / The official source says delayed supplier payment increases CCC; the formula implies a decrease when DPO rises. The source and official choice A are preserved, with the correction explained separately.

CI-LM04-SELF_ASSESSMENT-003

模块自测 · 第3题
Learning Module Self-Assessment · 3

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 107

题目与资料 / **Question and data**

中文学习译文

3. Plough Corporation最近两期资产负债表如下（金额单位：百万）。

项目	**20X2年12月31日**	**20X1年12月31日**
现金	10	15
短期有价证券	20	15
应收账款	100	80
存货	200	150
预付费用	5	5
应付账款	100	120
应计费用	50	60

根据现金比率，该公司的流动性：

A. 降低了

B. 提高了

C. 没有改变

官方英文题目 · PDF 第107页

3. The Plough Corporation reports the following items on its two most recent balance sheets (in millions)

	Fiscal Year-End	
	31 December 20X2	31 December 20X1
Cash	10	15
Short-term marketable securities	20	15
Accounts receivable	100	80
Inventory	200	150
Prepaid expenses	5	5
Accounts payable	100	120
Accrued expenses	50	60

Based on the cash ratio, the company has:

A. become less liquid.
B. become more liquid.
C. not changed regarding liquidity.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。官方原解列出的两年现金比率为：

20X1：(15 + 15)/(120 + 60) = 30/180 = 0.1667。

20X2：(10 + 20)/(100 + 50) = 30/150 = 0.20。

官方据此认为现金比率由0.1667增至0.20，说明流动性提高。

官方英文解析 · PDF 第107页

Solution:

B is correct. The cash ratios for the two fiscal year-ends are:

$$\textit{Cash ratio}, 20X1 = \frac{15 + 15}{120 + 60} = \frac{30}{180} = 0.1667$$

$$\textit{Cash ratio}, 20X2 = \frac{10 + 20}{100 + 50} = \frac{30}{150} = 0.20$$

The cash ratio has increased from 0.1667 to 0.20, indicating an increase in liquidity.

补充解析 / **Supplementary explanation**

两年的现金与短期证券合计都为30百万。20X1流动负债=120+60=180，现金比率=30/180≈0.1667；20X2流动负债=100+50=150，现金比率=30/150=0.20。分子不变、分母下降，因此现金比率提高，选择B；应收账款和存货不进入现金比率分子。

Cash plus short-term securities is USD30 million in both years. Current liabilities are 120 + 60 = 180 in 20X1 and 100 + 50 = 150 in 20X2, producing 0.1667 and 0.20. The unchanged numerator and lower denominator raise the ratio, so B is correct. Receivables and inventory are excluded from its numerator.

相关知识点 / **Related concepts**

现金比率=(现金+短期有价证券)/流动负债；本表20X2应计费用为50，20X1为60。

Cash ratio = (cash + short-term marketable securities)/current liabilities; accrued expenses are 50 in 20X2 and 60 in 20X1.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

中文学习译文

4. 下列哪项事件或行为最可能拖慢现金流入，形成流动性拖累（drag）？

A. 存货过时

B. 更早向供应商付款

C. 向在10天内付款的客户提供折扣

官方英文题目 · PDF 第107页

4. Which of the following events or activities is most likely to be a drag on liquidity?

A. Inventory that becomes obsolete

B. Making payments to suppliers earlier

官方英文题目 · PDF 第108页 · 续

C. Offering a discount to customers who pay within 10 days

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。存货过时后更难出售，存货水平会增加；这会拖慢现金流，形成流动性拖累。

B不正确，更早向供应商付款属于流动性挤压（pull）。

C不正确，提前付款折扣可能加快客户现金收款，从而改善流动性。

官方英文解析 · PDF 第108页

Solution:

A is correct. As inventory becomes obsolete, it becomes more challenging to sell and inventory levels increase. This event is a drag on liquidity, because it slows cash flows.

B is incorrect, because making payments to suppliers earlier is a pull on liquidity.

C is incorrect, because offering a prompt-payment discount is likely to result in cash receipts sooner, which would improve liquidity.

补充解析 / **Supplementary explanation**

drag侧重现金流入变慢，例如存货滞销、应收账款收回困难；pull侧重现金流出加快或融资被收回。A过时存货变现困难属于drag；B提前支付供应商属于pull；C早付折扣有助于加快收款。两类压力都可能降低流动性，但分类视角不同。

A drag slows cash inflow, such as obsolete inventory or difficult collections. A pull accelerates outflow or withdraws financing. A is a drag; paying suppliers sooner in B is a pull; C can speed collections. Both drags and pulls can impair liquidity through different mechanisms.

相关知识点 / **Related concepts**

Drag=流入受阻；pull=流出提前或融资收缩。

Drag: impaired inflow. Pull: accelerated outflow or reduced financing.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

5. 下列哪项行为提供次级流动性来源？

A. 发行权益证券

B. 收回应收账款

C. 利用供应商融资，在净付款日即第40天付款

官方英文题目 · PDF 第108页

5. Which of the following actions provides a secondary source of liquidity?

   A. Issuance of equity securities

   B. Collecting accounts receivable

   C. Taking advantage of a supplier's financing and paying on the net day, day 40

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。主要流动性来源包括手头现金、借款和经营现金流。主要来源不足时，次级来源会以更大成本筹集现金，例如发行权益。

B不正确，收回应收账款是主要流动性来源。

C不正确，供应商融资是主要流动性来源。

官方英文解析 · PDF 第108页

Solution:

A is correct. Primary sources of liquidity include cash on hand, borrowings, and cash flow from operations. Secondary sources of liquidity generate cash at a greater cost when primary sources are insufficient, such as issuing equity.

B is incorrect, because collection of accounts receivable is a primary source of liquidity.

C is incorrect, because supplier financing is a primary source of liquidity.

补充解析 / **Supplementary explanation**

应收账款正常回收和利用供应商信用属于日常经营融资来源。题目把发行新股视为次级来源，是因为它可能在常规资金不足时使用，且涉及发行成本、时间和所有权稀释。这里"次级"描述流动性来源的使用层次，不是债权清偿顺序。

Routine receivable collections and supplier credit are primary operating financing sources. New equity is a secondary source here because it may be used when regular funds are insufficient and can entail issuance costs, delay, and dilution. Secondary refers to liquidity-source classification, not creditor payment seniority.

相关知识点 / **Related concepts**

主要流动性来源：现有现金、日常经营现金流和常规借款；次级来源常伴随较高代价。

Primary sources include existing cash, operating cash flow, and regular borrowing; secondary sources often involve greater costs.

题目与资料 / Question and data

中文学习译文

6. 将以下行为归类为保守型或激进型营运资本管理方法：

• 尽量降低存货水平

• 更依赖长期债务和权益融资

• 维持较低水平的短期资产

• 更依赖短期债务

官方英文题目 · PDF 第108页

6. Classify each of the following actions as either a conservative or an aggressive approach to working capital management:

	Conservative	Aggressive
Minimize inventory levels		
Greater reliance on long-term debt and equity financing		
Lower level of short-term assets		
Greater reliance on short-term debt		

官方答案与解析 / Official answer and explanation

官方英文解析的中文学习译文

保守型：更依赖长期债务和权益融资。

激进型：尽量降低存货水平；维持较低水平的短期资产；更依赖短期债务。

官方英文解析 · PDF 第108页

Solution:

	Conservative	Aggressive
Minimize inventory levels		✓
Greater reliance on long-term debt and equity financing	✓	
Lower level of short-term assets		✓
Greater reliance on short-term debt		✓

补充解析 / **Supplementary explanation**

减少存货与短期资产会压缩流动性缓冲，更多依赖短债会增加展期和利率风险，均属激进策略。更多采用长期债务和权益融资降低短期再融资压力，属于保守策略。策略选择是在资金成本、收益与流动性韧性之间权衡。

Reducing inventories and short-term assets narrows liquidity buffers, while greater short-term borrowing raises rollover and rate risk; these are aggressive choices. Long-term debt and equity reduce near-term refinancing pressure and are conservative. The decision balances funding cost, returns, and resilience.

相关知识点 / **Related concepts**

激进策略通常以较小流动性缓冲追求更高收益；保守策略承担较高持有或融资成本以降低风险。

Aggressive policies seek returns with thinner buffers; conservative policies accept carrying or funding costs to reduce risk.

CI-LM04-EXAMPLE-101

例题 1 · 第 1 题：Keown Corporation——内部融资与外部融资
Example 1 · 1 — Keown Corporation—Internal versus External Financing

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 113

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

Keown Corporation——内部融资与外部融资

Keown Corporation—Internal versus External Financing

Keown Corporation 是一家在北美市场经营的成熟定制桨板制造商。

Keown Corporation is an established manufacturer of custom paddleboards operating in the North American market.

Keown 在加拿大运营自己的制造工厂，并完全通过其网站销售桨板，以避免实体零售门店成本。

Keown operates its own manufacturing plant in Canada and sells its paddleboards exclusively through its website to avoid the cost of retail locations.

Keown 的大部分销售发生在北美 5 月至 8 月的夏季。

Most of Keown's sales take place during the North American summer season from May to August.

客户期望订单立即得到履行，因此公司必须在夏季开始时保持充足存货，否则可能将销售机会让给竞争对手。

Keown's customers expect orders to be filled immediately, so it must maintain substantial inventory to start the summer season or risk losing sales to competitors.

由于业务具有季节性，Keown 尤其重视满足客户需求。

Given the seasonality of the business, Keown is particularly focused on meeting customers' needs.

由于 Keown 缺乏在 10 天内向供应商付款所需的现金，首席财务官必须决定：是以 7.7% 的有效年利率（EAR）向银行借款，取得材料供应商提供的及时付款折扣，还是在第 30 天付款。

Since Keown lacks the necessary cash to pay its suppliers within 10 days, the CFO must decide whether to borrow from its bank at an effective annual rate (EAR) of 7.7% to take the prompt-payment discount offered by its supplier of materials or pay in 30 days.

供应商条款为"2/10，net 30"。

The terms from the supplier are 2/10, net 30.

1. Keown 应使用银行贷款，在 10 天内向供应商付款以获得 2% 折扣，还是直接放弃折扣，在第 30 天付款？

1. Should Keown use the bank loan and pay the supplier within 10 days to receive the 2% discount, or simply forgo the discount and pay the supplier in 30 days?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

为比较银行贷款与商业信用的相对成本，可以计算商业信用的有效年利率。本质上，这是计算一笔贷款的利率：其利息成本是放弃的折扣，期限是 Keown 获得的额外付款时间，本例为〔下方计算式 1〕天。

To compare the relative cost of the bank loan with that of the trade credit, we can calculate the effective annual rate on the trade credit. Essentially, we are calculating the interest rate on a loan for which the interest cost is the forgone discount and the term is the additional time Keown gets to pay; in this case, 〔calculation 1 below〕 days.

$$30 - 10 = 20$$

原 PDF 第 113 页 · 300 dpi

供应商融资的有效年利率（EAR）。Discount % 表示提前付款折扣率；Days in Year 表示一年天数；Payment Period 表示付款期限；Discount Period 表示折扣期限。以下代入本例信用条款进行计算。

$$\text{EAR of Supplier Financing} = \left(\left(1 + \frac{\text{Discount \%}}{100\% - \text{Discount \%}}\right)^{\frac{\text{Days in Year}}{\text{Payment Period} - \text{Discount Period}}}\right) - 1$$

$$\text{Effective Annual Rate of Supplier Financing} = \left(\left(1 + \frac{2\%}{100\% - 2\%}\right)^{\frac{365}{30-10}}\right) - 1$$

$$\text{Effective Annual Rate of Supplier Financing} = 0.446 \text{ or } 44.6\%$$

原 PDF 第 113 页 · 共享公式 · 300 dpi

由于供应商融资的有效年利率为 44.6%，显著高于银行贷款 7.7% 的利率，Keown 应向银行借款。

Since the effective annual rate of 44.6% on the supplier financing is significantly higher than the 7.7% interest rate on the bank loan, Keown should borrow from its bank.

这样既能保留现金，又能以低得多的利率融资。

That way, it will still be able to preserve cash but will pay a far lower interest rate on the financing.

补充解析 / **Supplementary explanation**

补充思路：先把折扣期内付款看作基准。放弃折扣等于为额外付款天数借入“折扣后应付金额”，融资费用是被放弃的折扣。期间利率为 d/(1−d)，额外借款天数为净付款期减折扣期，再按题目约定换算年化有效利率。供应商折扣看似很小，但对应期限很短，年化成本可能显著高于银行贷款。

Additional reasoning: Treat payment during the discount period as the baseline. Forgoing the discount borrows the discounted invoice amount for extra days, at a cost equal to the lost discount. The periodic rate is $d/(1-d)$, and extra days equal net days minus discount days. Annualize under the question's convention. A small invoice discount can imply a high annual borrowing cost.

相关知识点 / **Related concepts**

放弃现金折扣的隐含融资成本：EAR = [1 + d/(1−d)]^(年天数/额外天数)−1；比较贷款时必须使用同一有效利率口径。

Implicit financing cost of forgone discounts: EAR $=[1+d/(1-d)]$^(days per year/extra days) -1. Compare financing choices on the same effective-rate basis.

CI-LM04-EXAMPLE-201

例题 2 · 第 1 题：美国折扣零售商的现金转换
Example 2 · 1 — Cash Conversion for US Discount Retailers

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 114

题目与资料 / **Question and data**

例题 2

EXAMPLE 2

美国折扣零售商的现金转换

Cash Conversion for US Discount Retailers

考虑下表所示的美国大型折扣零售商 Walmart Inc.、Target Corporation、Costco Wholesale Corporation、The TJX Companies 和 Ross Stores 在 2021 公历年的营运效率比率。

Consider the following activity ratios for large US discount retailers Walmart Inc., Target Corporation, Costco Wholesale Corporation, The TJX Companies, and Ross Stores for the 2021 calendar year, as shown below.

零售企业比较：沃尔玛、塔吉特（Target）、好市多（Costco）、TJX 及 Ross。

各行指标依次为应收账款周转天数、存货周转天数和应付账款周转天数。

	Walmart	Target	Costco	TJX	Ross
Days sales outstanding	5	2	3	7	2
Days of inventory on hand	48	68	29	63	61
Days payable outstanding	47	75	34	47	63

原 PDF 第 114 页 · 完整表格 · 300 dpi

1. 哪家公司的现金转换周期最短？哪家最长？

1. Which company has the shortest cash conversion cycle? The longest?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

现金转换周期公式。DSO 为应收账款周转天数，DOH 为存货周转天数，DPO 为应付账款周转天数。

$$\text{Cash conversion cycle} = \text{DSO} + \text{DOH} - \text{DPO}$$

原 PDF 第 114 页 · 300 dpi

依次计算沃尔玛、塔吉特、好市多、TJX 和罗斯百货的现金转换周期；days 表示天数。

$$\text{Cash conversion cycle for Walmart} = 5 \text{ days} + 48 \text{ days} - 47 \text{ days} = 6 \text{ days}$$

$$\text{Cash conversion cycle for Target} = 2 \text{ days} + 68 \text{ days} - 75 \text{ days} = -5 \text{ days}$$

$$\text{Cash conversion cycle for Costco} = 3 \text{ days} + 29 \text{ days} - 34 \text{ days} = -2 \text{ days}$$

$$\text{Cash conversion cycle for TJX} = 7 \text{ days} + 63 \text{ days} - 47 \text{ days} = 23 \text{ days}$$

$$\text{Cash conversion cycle for Ross} = 2 \text{ days} + 61 \text{ days} - 63 \text{ days} = 0 \text{ days}$$

原 PDF 第 114 页 · 共享公式 · 300 dpi

在这五家公司中，Target 的现金转换周期最短。

Target has the shortest cash conversion cycle of the five companies.

补充解析 / **Supplementary explanation**

补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. Excessive payment delays can harm supplier access and credit, and overly lean inventory can cause stockouts. Use consistent average balances and day counts; payables turnover should not use revenue as its activity base.

相关知识点 / **Related concepts**

现金转换周期：CCC = DOH + DSO–DPO；DSO≈平均应收/销售×天数；DOH≈平均存货/销售成本×天数；DPO≈平均应付/采购或相应成本×天数。

Cash conversion cycle: CCC = DOH + DSO − DPO. DSO uses average receivables/revenue; DOH uses average inventory/COGS; DPO uses average payables/purchases or the specified cost proxy, each multiplied by days.

题目与资料 / **Question and data**

例题 2

EXAMPLE 2

美国折扣零售商的现金转换

Cash Conversion for US Discount Retailers

考虑下表所示的美国大型折扣零售商 Walmart Inc.、Target Corporation、Costco Wholesale Corporation、The TJX Companies 和 Ross Stores 在 2021 公历年的营运效率比率。

Consider the following activity ratios for large US discount retailers Walmart Inc., Target Corporation, Costco Wholesale Corporation, The TJX Companies, and Ross Stores for the 2021 calendar year, as shown below.

零售企业比较：沃尔玛、塔吉特（Target）、好市多（Costco）、TJX 及 Ross。

各行指标依次为应收账款周转天数、存货周转天数和应付账款周转天数。

	Walmart	Target	Costco	TJX	Ross
Days sales outstanding	5	2	3	7	2
Days of inventory on hand	48	68	29	63	61
Days payable outstanding	47	75	34	47	63

原 PDF 第 114 页 · 完整表格 · 300 dpi

2. 这些公司在销售时点收取客户的现金、借记卡或信用卡付款。这一事实是否与所列营运效率比率一致？

2. These companies accept payment from customers at the point of sale in either cash or a debit or credit card. Does this fact align with the activity ratios presented?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

是，因为应收账款周转天数很短。

Yes, because days sales outstanding is small.

借记卡和信用卡付款通常在几天内结算，而现金销售即时结算。

Debit and credit card payments typically settle in a couple of days, and cash sales are settled immediately.

补充解析 / **Supplementary explanation**

补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. Excessive payment delays can harm supplier access and credit, and overly lean inventory can cause stockouts. Use consistent average balances and day counts; payables turnover should not use revenue as its activity base.

相关知识点 / **Related concepts**

现金转换周期：CCC = DOH + DSO–DPO；DSO≈平均应收/销售×天数；DOH≈平均存货/销售成本×天数；DPO≈平均应付/采购或相应成本×天数。

Cash conversion cycle: CCC = DOH + DSO − DPO. DSO uses average receivables/revenue; DOH uses average inventory/COGS; DPO uses average payables/purchases or the specified cost proxy, each multiplied by days.

	Walmart	Target	Costco	TJX	Ross
Days sales outstanding	5	2	3	7	2
Days of inventory on hand	48	68	29	63	61
Days payable outstanding	47	75	34	47	63

原 PDF 第 114 页 · 完整表格 · 300 dpi

3. 查阅年报后，你发现 Costco 约 54% 的销售来自食品或食品相关商品，其比例高于其他公司；其他公司销售的服装和非食品商品占比较高。这一事实是否与所列营运效率比率一致？

3. In examining annual reports, you find that approximately 54% of Costco's sales are food or food-related items, a larger percentage than that of the other companies, which sell a greater percentage of apparel and non-food items. Does this fact align with the activity ratios presented?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

是。Costco 这类销售易腐商品的公司，存货周转天数通常较短，因为从供应商收到存货后必须迅速售出，否则就会腐坏。

Yes. Companies like Costco that sell perishable goods tend to have a lower number of days of inventory on hand, because inventory must be sold soon after receiving it from suppliers or else it spoils.

补充解析 / **Supplementary explanation**

补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. 1. 根据对现金转换周期的可能影响，将发行人的以下行动分类：

1. Classify each of the following actions by an issuer based on the likely effect on its cash conversion cycle:

判断各项措施会缩短还是延长现金转换周期。

措施：为提前付款的客户提供更大折扣；更早向供应商付款；减少对及时制存货管理的依赖并增加安全库存；与供应商协商更长付款期限；收紧客户信用标准。

	Effect on the Cash Conversion Cycle	
Action	**Shorten**	**Lengthen**
Offering larger discounts to its customers for payments received before the due date		
Paying suppliers sooner		
Lowering reliance on just-in-time inventory methods while increasing safety stocks of inventory		
Negotiating longer payment periods with its suppliers		
Tightening credit standards for its customers		

原 PDF 第 116 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

现金转换周期影响的答案。

缩短周期：为提前付款的客户提供更大折扣；与供应商协商更长付款期限；收紧客户信用标准。

延长周期：更早向供应商付款；减少对及时制存货管理的依赖并增加安全库存。

Action	Effect on the Cash Conversion Cycle: Shorten	Effect on the Cash Conversion Cycle: Lengthen
Offering larger discounts to its customers for payments received before the due date	✓	
Paying suppliers sooner		✓
Lowering reliance on just-in-time inventory methods while increasing safety stocks of inventory		✓
Negotiating longer payment periods with its suppliers	✓	
Tightening credit standards for its customers	✓	

原 PDF 第 117 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

习题组

QUESTION SET

2. 找出现金转换周期最长的发行人，并解释相对于其他发行人，这一周期长度对其有何影响。

2. Identify the issuer with the longest cash conversion cycle and explain the effects of that length on that issuer relative to the other issuers.

发行人 A、B、C 的经营周期资料。各行依次为存货周转天数、应付账款周转天数及应收账款周转天数。

	Issuer A	Issuer B	Issuer C
Days of inventory on hand	20	35	15
Days payable outstanding	15	10	5
Days sales outstanding	30	25	30

原 PDF 第 117 页 · 完整表格 · 300 dpi

> 官方答案与解析 / **Official answer and explanation**

答案：

Solution:

使用以下公式：

Using:

现金转换周期的计算，涉及存货周转天数、应收账款周转天数和应付账款周转天数。

$$\text{Cash conversion cycle} = \text{Days of inventory on hand} + \text{Days sales outstanding} - \text{Days payable outstanding}$$

原 PDF 第 117 页 · 共享公式 · 300 dpi

发行人 A、B、C 的现金转换周期计算。各行依次为存货周转天数，加应收账款周转天数，减应付账款周转天数，最后得到现金转换周期。

	Issuer A	Issuer B	Issuer C
Days of inventory on hand	20	35	15
Plus: Days sales outstanding	30	25	30
Minus: Days payable outstanding	15	10	5
Cash conversion cycle	35	50	40

原 PDF 第 117 页 · 完整表格 · 300 dpi

发行人 B 的现金转换周期最长，为 50 天。

Issuer B has the longest cash conversion cycle, 50 days.

由于周期最长，发行人 B 相比其他发行人，更依赖其他融资来源支持经营活动。

By having the longest cycle, Issuer B is more reliant on alternative financing to support its operations relative to the other issuers.

补充解析 / **Supplementary explanation**

补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. Excessive payment delays can harm supplier access and credit, and overly lean inventory can cause stockouts. Use consistent average balances and day counts; payables turnover should not use revenue as its activity base.

相关知识点 / **Related concepts**

现金转换周期：CCC = DOH + DSO–DPO；DSO≈平均应收/销售×天数；DOH≈平均存货/销售成本×天数；DPO≈平均应付/采购或相应成本×天数。

Cash conversion cycle: CCC = DOH + DSO − DPO. DSO uses average receivables/revenue; DOH uses average inventory/COGS; DPO uses average payables/purchases or the specified cost proxy, each multiplied by days.

习题组

QUESTION SET

3. 假设应收账款周转天数和存货周转天数不变，一家需要现金流的发行人放弃供应商提供的 10 天内付款折扣，选择在第 30 天到期日付款。这将：

3. Assuming no change in days sales outstanding and days of inventory on hand, an issuer in need of cash flow that forgoes the discount offered by its vendor for payments within 10 days and chooses to pay on the due date in 30 days is:

A. 缩短其现金转换周期。

A. shortening its cash conversion cycle.

B. 延长其现金转换周期。

B. lengthening its cash conversion cycle.

C. 不影响其现金转换周期。

C. not affecting its cash conversion cycle.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

发行人通过延迟付款使用供应商融资，增加了应付账款周转天数，因此缩短现金转换周期。

The issuer that uses the vendor financing by delaying payments is increasing its days payable outstanding and thus shortening its cash conversion cycle.

发行人以放弃折扣为代价，利用供应商融资，减少对流动性的需求。

The issuer is reducing its need for liquidity by taking advantage of the vendor financing at the cost of the forgone discount.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

The official choice for this item is A. Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. Excessive payment delays can harm supplier access and credit, and overly lean inventory can cause stockouts. Use consistent average balances and day counts; payables turnover should not use revenue as its activity base.

相关知识点 / **Related concepts**

现金转换周期：CCC = DOH + DSO–DPO；DSO≈平均应收/销售×天数；DOH≈平均存货/销售成本×天数；DPO≈平均应付/采购或相应成本×天数。

Cash conversion cycle: CCC = DOH + DSO − DPO. DSO uses average receivables/revenue; DOH uses average inventory/COGS; DPO uses average payables/purchases or the specified cost proxy, each multiplied by days.

题目与资料 / **Question and data**

习题组

QUESTION SET

4. 一家现金流有限的发行人正在判断哪家供应商的信用条款成本最低。以下供应商提供的信用条款，哪项具有最低的有效利率？

4. An issuer with limited cash flow is deciding which of its suppliers' credit terms are least costly. Which of the following credit terms offered to the issuer by its suppliers have the lowest effective interest rate?

A. 1/10，net 50

A. 1/10, net 50

B. 2/15，net 40

B. 2/15, net 40

C. 3/15，net 60。

C. 3/15, net 60

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。发行人放弃供应商或卖方提供的折扣时，承担的隐含融资成本，取决于放弃的折扣金额，以及超过折扣期后的付款期限长度。“1/10，net 50”允许发行人借款〔下方计算式 1〕天，而成本仅为采购价的 1%（即放弃的折扣）。各组信用条款的融资成本，以有效年利率表示，计算如下：

A is correct. The implicit financing cost that the issuer faces when forgoing a discount that the supplier or vendor offers is based on the amount of the forgone discount and length of the payment period beyond the discount period; 1/10, net 50 would permit the issuer to borrow for 〔calculation 1 below〕 days at a cost of only 1% of the purchase price (the forgone discount). The calculations for the cost of financing for each set of credit terms, expressed as an effective annual rate, are as follows:

$$50 - 10 = 40$$

原 PDF 第 118 页 · 300 dpi

供应商融资有效年利率的通式，以及三组信用条款的计算：1/10、net 50；2/15、net 40；3/15、net 60。折扣率、全年天数、付款期和折扣期共同决定融资成本。

$$\text{EAR of Supplier Financing} = \left(\left(1 + \frac{\text{Discount \%}}{100\% - \text{Discount \%}}\right)^{\frac{\text{Days in Year}}{\text{Payment Period}-\text{Discount Period}}}\right) - 1$$

$$\text{EAR of 1/10, net 50} = \left(\left(1 + \frac{1\%}{100\% - 1\%}\right)^{\frac{365}{50-10}}\right) - 1$$

$$\text{EAR of 1/10, net 50} = 0.096 \text{ or } 9.6\%$$

$$\text{EAR of 2/15, net 40} = \left(\left(1 + \frac{2\%}{100\% - 2\%}\right)^{\frac{365}{40-15}}\right) - 1$$

$$\text{EAR of 2/15, net 40} = 0.343 \text{ or } 34.3\%$$

$$\text{EAR of 3/15, net 60} = \left(\left(1 + \frac{3\%}{100\% - 3\%}\right)^{\frac{365}{60-15}}\right) - 1$$

$$\text{EAR of 3/15, net 60} = 0.280 \text{ or } 28.0\%$$

原 PDF 第 118 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先把折扣期内付款看作基准。放弃折扣等于为额外付款天数借入“折扣后应付金额”，融资费用是被放弃的折扣。期间利率为 d/(1–d)，额外借款天数为净付款期减折扣期，再按题目约定换算年化有效利率。供应商折扣看似很小，但对应期限很短，年化成本可能显著高于银行贷款。

The official choice for this item is A. Additional reasoning: Treat payment during the discount period as the baseline. Forgoing the discount borrows the discounted invoice amount for extra days, at a cost equal to the lost discount. The periodic rate is $d/(1-d)$, and extra days equal net days minus discount days. Annualize under the question's convention. A small invoice discount can imply a high annual borrowing cost.

相关知识点 / **Related concepts**

放弃现金折扣的隐含融资成本：EAR = [1 + d/(1–d)]^(年天数/额外天数)–1；比较贷款时必须使用同一有效利率口径。

Implicit financing cost of forgone discounts: $\text{EAR} = [1 + d/(1-d)]\text{^(days per year/extra days)} - 1$. Compare financing choices on the same effective-rate basis.

题目与资料 / **Question and data**

习题组

QUESTION SET

5. 一家发行人正在比较利率 15% 的银行贷款与供应商“1/14，net 30”的条款，并考虑在第 14 天付款。从降低融资成本的角度，最佳决定是：

5. An issuer is comparing a bank loan at a rate of 15% with taking advantage of a supplier's terms of 1/14, net 30, paying on day 14. The best decision in terms of the lower cost of financing is to:

A. 放弃折扣，使用供应商融资，在第 30 天付款。

A. forgo the discount and use the supplier's financing to pay on day 30.

B. 向银行借款，以利用商业信用条款中的折扣。

B. borrow from the bank to take advantage of the trade credit terms.

C. 两种方式都可以，因为银行贷款与商业信用的成本相同。

C. use either option because the cost of the bank loan and the cost of the trade credit are identical.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

供应商商业信用的有效年利率为 25.769%，高于银行贷款 15% 的利率。

The cost of the supplier's trade credit, expressed as an effective annual rate, is 25.769%, which is higher than the 15% interest rate on the bank loan.

供应商融资有效年利率通式，以及信用条款 1/14、net 30 的代入计算。

$$\text{EAR of Supplier Financing} = \left(\left(1 + \frac{\text{Discount \%}}{100\% - \text{Discount \%}}\right)^{\frac{\text{Days in Year}}{\text{Payment Period} - \text{Discount Period}}}\right) - 1$$

$$\text{EAR of 1/14, net 30} = \left(\left(1 + \frac{1\%}{100\% - 1\%}\right)^{\frac{365}{30-14}}\right) - 1$$

原 PDF 第 118 页 · 共享公式 · 300 dpi

信用条款 1/14、net 30 的供应商融资有效年利率计算结果。

EAR of 1/14, net 30 = 0.25769 or 25.769%

原 PDF 第 119 页 · 共享公式 · 300 dpi

A 和 C 不正确，因为银行贷款利率 15% 低于供应商商业信用的有效年利率 25.769%。

A and C are incorrect, because the bank loan rate of 15% is lower than the effective annual rate, 25.769%, on the supplier's trade credit.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：先把折扣期内付款看作基准。放弃折扣等于为额外付款天数借入"折扣后应付金额"，融资费用是被放弃的折扣。期间利率为 d/(1–d)，额外借款天数为净付款期减折扣期，再按题目约定换算年化有效利率。供应商折扣看似很小，但对应期限很短，年化成本可能显著高于银行贷款。

The official choice for this item is B. Additional reasoning: Treat payment during the discount period as the baseline. Forgoing the discount borrows the discounted invoice amount for extra days, at a cost equal to the lost discount. The periodic rate is $d/(1-d)$, and extra days equal net days minus discount days. Annualize under the question's convention. A small invoice discount can imply a high annual borrowing cost.

相关知识点 / **Related concepts**

放弃现金折扣的隐含融资成本：EAR = [1 + d/(1–d)]^(年天数/额外天数)–1；比较贷款时必须使用同一有效利率口径。

Implicit financing cost of forgone discounts: $\text{EAR} = [1 + d/(1-d)]^{(\text{days per year/extra days})} - 1$. Compare financing choices on the same effective-rate basis.

QUESTION SET

6. 考虑某发行人的以下资产负债表：

6. Consider the following balance sheet for an issuer:

资产负债表。

资产项目：现金、有价证券、应收账款、存货、预付费用、物业厂房及设备、无形资产，以及资产总额。

负债和权益项目：应付账款、应计费用、短期债务、长期债务、股东权益，以及负债和权益总额。

Cash	100
Marketable securities	20
Accounts receivable	600
Inventory	800
Prepaid expenses	30
Property, plant, and equipment	10,000
Intangibles	500
Total assets	12,050
Accounts payable	980
Accrued expenses	70
Short-term debt	1,000
Long-term debt	2,000
Shareholders' equity	8,000
Total liabilities and equity	12,050

原 PDF 第 119 页 · 完整表格 · 300 dpi

7. 发行人的净营运资本最接近：

7. The issuer's net working capital is closest to:

A. –500。

A. −500.

B. 380。

B. 380.

C. 500。

C. 500.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

净营运资本的定义为：

Net working capital is defined as:

净营运资本：流动资产剔除现金和有价证券后，再减去不含短期债务及一年内到期债务的流动负债。

Current assets, excluding cash and marketable securities
Minus: Current liabilities, excluding short-term and current debt
Net Working Capital

原 PDF 第 119 页 · 共享公式 · 300 dpi

剔除现金和有价证券后的流动资产：

Current assets, excluding cash and marketable securities:

净营运资本计算的经营性短期资产部分：应收账款、存货、预付费用及合计。

Accounts receivable	600
Inventory	800
Prepaid expenses	30
Sum	1,430

原 PDF 第 119 页 · 完整表格 · 300 dpi

剔除短期债务及流动债务后的流动负债：

Current liabilities, excluding short-term and current debt:

净营运资本计算的经营性短期负债部分：应付账款、应计费用及合计；表末列示净营运资本。

Accounts payable	980
Accrued expenses	70
Sum	1,050
Net working capital	380

原 PDF 第 119 页 · 完整表格 · 300 dpi

A 不正确，因为错误地将现金、有价证券和短期债务纳入计算，得到的是总营运资本，而非净营运资本。

A is incorrect, because cash, marketable securities, and short-term debt are mistakenly included in the calculation, resulting in the calculation of total working capital instead of net working capital.

C 不正确，因为错误地将现金和有价证券纳入计算。

C is incorrect, because cash and marketable securities are mistakenly included in the calculation.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：先确认教材在该题使用的口径。总营运资本通常是流动资产减流动负债；经营性净营运资本可剔除现金、短期投资及有息债务。流动、速动和现金比率具有相同的流动负债分母，但分子逐步缩小。高比率不一定代表管理优秀：应收可能难以回收、存货可能积压，过多闲置现金也有机会成本。

The official choice for this item is B. Additional reasoning: Verify the definition used in the question. Total working capital commonly means current assets minus current liabilities, while operating net working capital excludes cash, short-term investments, and interest-bearing debt. Current, quick, and cash ratios share a current-liability denominator but progressively narrower numerators. High ratios can conceal poor collections, stale inventory, or costly idle cash.

相关知识点 / **Related concepts**

营运资本口径和流动性比率：流动比率 = 流动资产/流动负债；速动比率主要含现金、短期投资、应收；现金比率主要含现金及短期投资。

Working-capital definitions and liquidity ratios: Current ratio = current assets/current liabilities. The quick numerator chiefly includes cash, short-term investments, and receivables; the cash ratio chiefly includes cash and short-term investments.

原书把资料引入段单独编号；此处将资料编号与紧接的实际设问并列保留，避免把资料段误计为无答案习题。

CI-LM04-EXAMPLE-401

例题 3 · 第 1 题：估计 Keown Corporation 的流动性成本
Example 3 · 1 — Estimating Keown Corporation’s Cost of Liquidity

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 123

题目与资料 / **Question and data**

例题 3

EXAMPLE 3

估计 Keown Corporation 的流动性成本

Estimating Keown Corporation’s Cost of Liquidity

1. Keown Corporation 正面临流动性危机。作为分析师，你识别出 Keown 可以采取的四项潜在筹资行动。你对 Keown 资产公允价值和变现成本的估计如下。

1. Keown Corporation is facing a liquidity crisis. As an analyst, you have identified four potential actions that Keown could take to raise funds. Your estimates of fair value for Keown’s assets and liquidation costs are shown below.

资金来源与变现成本。列示公允价值（百万加元）及变现成本百分比。

资金来源依次为出售短期有价证券、出售部分存货和应收账款、出售多余房地产，以及出售公司的一家子公司。

Source of Funds	Fair Value (millions of CAD)	Liquidation Costs (%)
Sell short-term marketable securities	10	0
Sell select inventories and receivables	20	10
Sell excess real estate property	50	15
Sell a subsidiary of the firm	30	20

原 PDF 第 123 页 · 完整表格 · 300 dpi

变现成本包括出售资产的费用和佣金，以及因流动性不足而产生的任何价值折损。

The liquidation costs include the fees and commissions for selling an asset as well as any reduction in value due to its illiquidity.

在本例中，有价证券的变现成本为零。

In this case, liquidation costs for marketable securities are zero.

扣除变现成本后，若利用全部四项资金来源，Keown 能筹集多少流动资金？其变现成本总额是多少？

Net of liquidation costs, how much liquidity can Keown raise if all four sources of funds are used, and what are Keown's total liquidation costs?

A. 1.10 亿；950 万

A. 110 million, 9.5 million

B. 9,450 万；1,550 万

B. 94.5 million, 15.5 million

C. 1.255 亿；1,550 万。

C. 125.5 million, 15.5 million

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

筹集流动资金的总额和净额汇总于下表：

The gross and net amounts of liquidity raised are summarized in this table:

资产变现净收入计算表。

各列依次为资金来源、公允价值（百万加元）、变现成本百分比及金额（百万加元）、净收入（百万加元）。

各行依次为有价证券、存货和应收账款、房地产、子公司，以及合计。

Source of Funds	Fair Value (millions of CAD)	Liquidation Costs		Net Proceeds (millions of CAD)
		%	(millions of CAD)	
Marketable securities	10	0	0	10
Inventories and receivables	20	10	2	18
Real estate property	50	15	7.5	42.5
Subsidiary of the firm	30	20	6	24
Total			15.5	94.5

原 PDF 第 123 页 · 完整表格 · 300 dpi

B 正确。

B is correct.

出售资产的总净收入为 9,450 万加元，变现成本总额为 1,550 万加元。

Total net proceeds from the sales are CAD94.5 million, and the total liquidation costs incurred are CAD15.5 million.

补充解析 / **Supplementary explanation**

补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

CI-LM04-EXAMPLE-501

例题 4 · 第 1 题：Keown Corporation 流动性的阻滞与拉动
Example 4 · 1 — Drags and Pulls on Keown Corporation's Liquidity

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 124-125

题目与资料 / **Question and data**

例题 4

EXAMPLE 4

Keown Corporation 流动性的阻滞与拉动

Drags and Pulls on Keown Corporation’s Liquidity

1. Keown Corporation 正面临流动性挑战。作为分析师，你注意到最近与 Keown 营运资本有关的三种趋势：

1. Keown Corporation is experiencing liquidity challenges. As an analyst, you note three recent trends related to Keown’s working capital:

1. 平均应收账款周转天数增加，属于流动性阻滞。

1. An increase in average days sales outstanding is a drag on liquidity.

2. 存货周转天数增加，属于流动性阻滞。

2. An increase in days of inventory on hand is a drag on liquidity.

3. 贷款人提高信用额度，属于流动性拉动。

3. An increase in credit limits by lenders is a pull on liquidity.

哪项趋势不会加剧公司的流动性挑战？

Which trend does not contribute to the firm’s liquidity challenges?

A. 平均应收账款周转天数的变化

A. The change in average days sales outstanding

B. 存货周转天数的变化

B. The change in days of inventory on hand

C. 信用额度的变化。

C. The change in credit limits

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

提高信用额度并非流动性拉动，恰恰相反，它提供了流动性。

The increase in credit limits is not a pull on liquidity but is in fact the opposite: it provides liquidity.

A 不正确，因为应收账款周转天数增加，会使现金流入变慢或延迟，因此属于流动性阻滞。

A is incorrect, because an increase in days sales outstanding is a drag on liquidity as it results in slower or delayed cash inflows.

B 不正确，因为存货周转天数增加会延长现金转换周期，属于流动性阻滞。

B is incorrect, because higher days of inventory on hand is a drag on liquidity as it extends the cash conversion cycle.

补充解析 / **Supplementary explanation**

流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

考虑 Licht Vernieuwend N.V. 在 20X2 财政年度及上一年度 20X1 的以下资产负债表资料：

Consider the following balance sheet information for Licht Vernieuwend N.V. for the fiscal year 20X2 and the previous year, 20X1:

20X2 年与 20X1 年资产负债表，单位为百万欧元。

资产包括现金、有价证券、应收账款、存货、预付账款、物业厂房及设备净额、无形资产，以及资产总额。

负债和权益包括应付账款、应计费用、短期银行贷款、长期债务、权益，以及负债和权益总额。

(in millions of EUR)	20X2	20X1
Cash	40	45
Marketable securities	70	90
Accounts receivable	85	90
Inventory	130	66
Prepaid accounts	10	15
Net plant, property, and equipment	1,000	950
Intangibles	90	75
Total assets	1,425	1,331
Accounts payable	130	140
Accrued expenses	30	15
Short-term bank loan	60	70
Long-term debt	400	400
Equity	805	706
Total liabilities and equity	1,425	1,331

原 PDF 第 126 页 · 完整表格 · 300 dpi

1. 从 20X1 年到 20X2 年，净营运资本是否发生变化？若有，变化的主要驱动因素是什么？

1. Has net working capital changed from 20X1 to 20X2? If so, what was the primary driver of the change?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

净营运资本的定义为：

Net working capital is defined as:

净营运资本计算口径：排除现金、有价证券以及短期和一年内到期债务。

Current assets, excluding cash and marketable securities
Minus: Current liabilities, excluding short-term and current debt
Net Working Capital

原 PDF 第 127 页 · 共享公式 · 300 dpi

Licht Vernieuwend N.V. 每年的净营运资本分别为：

Licht Vernieuwend N.V.'s net working capital each year is equal to:

20X2 年与 20X1 年净营运资本计算，单位为百万欧元。

从应收账款开始，加存货和预付账款，减应付账款和应计费用，得到净营运资本。

(in millions of EUR)	20X2	20X1
Accounts receivable	85	90
Plus: Inventory	130	66
Plus: Prepaid accounts	10	15
Minus: Accounts payable	(130)	(140)
Minus: Accrued expenses	(30)	(15)
Net working capital	65	16

原 PDF 第 127 页 · 完整表格 · 300 dpi

Licht Vernieuwend N.V. 的净营运资本从 20X1 年的 1,600 万欧元上升到 20X2 年的 6,500 万欧元，主要原因是存货投资从 6,600 万欧元增加到 1.30 亿欧元。

Licht Vernieuwend N.V.'s net working capital has increased from EUR16 million in 20X1 to EUR65 million in 20X2, largely owing to the increased investment in inventory from EUR66 million to EUR130 million.

补充解析 / **Supplementary explanation**

补充思路：先确认教材在该题使用的口径。总营运资本通常是流动资产减流动负债；经营性净营运资本可剔除现金、短期投资及有息债务。流动、速动和现金比率具有相同的流动负债分母，但分子逐步缩小。高比率不一定代表管理优秀：应收可能难以回收、存货可能积压，过多闲置现金也有机会成本。

Additional reasoning: Verify the definition used in the question. Total working capital commonly means current assets minus current liabilities, while operating net working capital excludes cash, short-term investments, and interest-bearing debt. Current, quick, and cash ratios share a current-liability denominator but progressively narrower numerators. High ratios can conceal poor collections, stale inventory, or costly idle cash.

相关知识点 / **Related concepts**

营运资本口径和流动性比率：流动比率 = 流动资产/流动负债；速动比率主要含现金、短期投资、应收；现金比率主要含现金及短期投资。

Working-capital definitions and liquidity ratios: Current ratio = current assets/current liabilities. The quick numerator chiefly includes cash, short-term investments, and receivables; the cash ratio chiefly includes cash and short-term investments.

2. 根据以下指标，从 20X1 年到 20X2 年，流动性是否发生变化？

2. Has the liquidity changed from 20X1 to 20X2 based on the:

i. 现金比率？

i. cash ratio?

ii. 速动比率？

ii. quick ratio?

iii. 流动比率？

iii. current ratio?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

i. 现金比率的定义为：

i. The cash ratio is defined as:

现金比率通式，以及 Licht 公司 20X1、20X2 两年的现金比率计算。

$$\text{Cash ratio} = \frac{\text{Cash} + \text{Short-term marketable instruments}}{\text{Current liabilities}}$$

$$\text{Licht's cash ratio, 20X1} = \frac{45 + 90}{140 + 15 + 70} = 0.60$$

$$\text{Licht's cash ratio, 20X2} = \frac{40 + 70}{130 + 30 + 60} = 0.50$$

原 PDF 第 127 页 · 共享公式 · 300 dpi

根据现金比率，Licht Vernieuwend N.V. 的流动性从 20X1 年到 20X2 年下降。

Based on the cash ratio, Licht Vernieuwend N.V.'s liquidity has declined from 20X1 to 20X2.

ii. 速动比率的定义为：

ii. The quick ratio is defined as:

速动比率通式，以及 Licht 公司 20X1、20X2 两年的速动比率计算。

$$\text{Quick ratio} = \frac{\text{Cash} + \text{Short-term marketable instruments} + \text{Receivables}}{\text{Current liabilities}}$$

$$\text{Licht's quick ratio, 20X1} = \frac{45 + 90 + 90}{140 + 15 + 70} = 1.00$$

$$\text{Licht's quick ratio, 20X2} = \frac{40 + 70 + 85}{130 + 30 + 60} = 0.89$$

原 PDF 第 127 页 · 共享公式 · 300 dpi

根据速动比率，Licht Vernieuwend N.V. 的流动性从 20X1 年到 20X2 年下降。

Based on the quick ratio, Licht Vernieuwend N.V.'s liquidity has declined from 20X1 to 20X2.

iii. 流动比率的定义为：

iii. The current ratio is defined as:

流动比率通式，以及 Licht 公司 20X1、20X2 两年的流动比率计算。

$$\text{Current ratio} = \frac{\text{Current assets}}{\text{Current liabilities}}$$

$$\text{Licht's current ratio, 20X1} = \frac{45 + 90 + 90 + 66 + 15}{140 + 15 + 70} = 1.36$$

$$\text{Licht's current ratio, 20X2} = \frac{40 + 70 + 85 + 130 + 10}{130 + 30 + 60} = 1.52$$

原 PDF 第 128 页 · 共享公式 · 300 dpi

根据流动比率，Licht Vernieuwend N.V. 的流动性从 20X1 年到 20X2 年上升。

Based on the current ratio, Licht Vernieuwend N.V.'s liquidity has increased from 20X1 to 20X2.

补充解析 / **Supplementary explanation**

补充思路：先确认教材在该题使用的口径。总营运资本通常是流动资产减流动负债；经营性净营运资本可剔除现金、短期投资及有息债务。流动、速动和现金比率具有相同的流动负债分母，但分子逐步缩小。高比率不一定代表管理优秀：应收可能难以回收、存货可能积压，过多闲置现金也有机会成本。

Additional reasoning: Verify the definition used in the question. Total working capital commonly means current assets minus current liabilities, while operating net working capital excludes cash, short-term investments, and interest-bearing debt. Current, quick, and cash ratios share a current-liability denominator but progressively narrower numerators. High ratios can conceal poor collections, stale inventory, or costly idle cash.

速动比率将现金、短期投资和应收账款与流动负债比较，通常排除存货。判断最强流动性时应比较该比率，而不是只比较现金绝对额或流动资产规模。

The quick ratio compares cash, short-term investments, and receivables with current liabilities, generally excluding inventory. Compare the ratio, not just absolute cash or current-asset size.

相关知识点 / **Related concepts**

营运资本口径和流动性比率：流动比率 = 流动资产/流动负债；速动比率主要含现金、短期投资、应收；现金比率主要含现金及短期投资。

Working-capital definitions and liquidity ratios: Current ratio = current assets/current liabilities. The quick numerator chiefly includes cash, short-term investments, and receivables; the cash ratio chiefly includes cash and short-term investments.

知识检查

KNOWLEDGE CHECK

考虑 Licht Vernieuwend N.V. 在 20X2 财政年度及上一年度 20X1 的以下资产负债表资料：

Consider the following balance sheet information for Licht Vernieuwend N.V. for the fiscal year 20X2 and the previous year, 20X1:

20X2 年与 20X1 年资产负债表，单位为百万欧元。

资产包括现金、有价证券、应收账款、存货、预付账款、物业厂房及设备净额、无形资产，以及资产总额。

负债和权益包括应付账款、应计费用、短期银行贷款、长期债务、权益，以及负债和权益总额。

(in millions of EUR)	**20X2**	**20X1**
Cash	40	45
Marketable securities	70	90
Accounts receivable	85	90
Inventory	130	66
Prepaid accounts	10	15
Net plant, property, and equipment	1,000	950
Intangibles	90	75
Total assets	1,425	1,331
Accounts payable	130	140
Accrued expenses	30	15
Short-term bank loan	60	70
Long-term debt	400	400
Equity	805	706
Total liabilities and equity	1,425	1,331

原 PDF 第 126 页 · 完整表格 · 300 dpi

3. 根据第 2 题中流动性比率的变化，以最保守的流动性比率衡量，发行人的流动性提高了还是下降了？

3. Given the changes in liquidity ratios in Question 2, did the issuer become more or less liquid based on the most conservative liquidity ratio?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

最保守的流动性比率是现金比率，因为它衡量发行人仅利用流动性最高的资产——现金和短期有价证券——清偿近期义务的能力。

The most conservative liquidity ratio is the cash ratio, as it measures the ability of an issuer to settle near-term obligations using only the most liquid assets: cash and short-term marketable instruments.

根据现金比率，Licht Vernieuwend N.V. 的流动性从 20X1 年到 20X2 年下降。

Based on the cash ratio, Licht Vernieuwend N.V.'s liquidity has declined from 20X1 to 20X2.

补充解析 / **Supplementary explanation**

最保守的是现金比率，因为只计入现金与短期有价证券，不依赖应收账款回收或存货出售。原解指出该比率从20X1到20X2下降，因此按这一最严格口径，流动性下降；其他较宽口径改善并不能推翻这个限定结论。

The cash ratio is most conservative because it excludes dependence on collecting receivables or selling inventory. The source states that this ratio fell from 20X1 to 20X2, so liquidity deteriorated under that strict measure even if a broader ratio improved.

相关知识点 / **Related concepts**

现金比率=(现金+短期有价证券)/流动负债。

Cash ratio = (cash + short-term marketable securities)/current liabilities.

QUESTION SET

1. 将下列各项分别归类为流动性阻滞或流动性拉动：

1. Classify each of the following as either a drag on liquidity or a pull on liquidity:

判断各项措施属于流动性拖累因素还是流动性抽走因素。

项目依次为客户延迟付款、存货过时、在没有折扣激励下提前向供应商付款、贷款人削减授信额度，以及供货商减少商业信用。

	Effect on Liquidity	
Action	**Drag**	**Pull**
Customers delaying payments		
Inventory becoming obsolete		
Paying suppliers before due dates without a discount incentive		
Lender reducing a line of credit		
Vendors reducing trade credits		

原 PDF 第 128 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

流动性影响的分类答案。

拖累因素：客户延迟付款、存货过时。

抽走因素：在没有折扣激励下提前向供应商付款、贷款人削减授信额度，以及供货商减少商业信用。

	Effect on Liquidity	
Action	**Drag**	**Pull**
Customers delaying payments	✓	
Inventory becoming obsolete	✓	
Paying suppliers before due dates without a discount incentive		✓
Lender reducing a line of credit		✓
Vendors reducing trade credits		✓

原 PDF 第 128 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

习题组 · 第 2 题
Question set · 2

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 128-129

题目与资料 / **Question and data**

习题组

QUESTION SET

2. 考虑 Lucor Corporation 现金流量表中的以下资料：

2. Consider the following information from the Statement of Cash Flows for the Lucor Corporation:

利润与现金流资料。各行依次为净利润、经营活动现金流、投资活动现金流、长期资产投资、融资活动现金流、发行债务取得的资金，以及本期现金流净额。括号表示现金流出。

Net income	1,000
Cash flow from operations	1,400
Cash flow from investing	(700)
Investment in long-term assets	(800)
Cash flow from financing	500
Funds from debt issue	600
Total net cash flow for the period	1,200

原 PDF 第 129 页 · 完整表格 · 300 dpi

Lucor 本期自由现金流最接近：

Lucor's free cash flow for this period is closest to:

A. 200。

A. 200.

B. 600。

B. 600.

C. 700。

C. 700.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

自由现金流等于经营活动现金流减去长期资产投资，即：

Free cash flow is the difference between cash flow from operations and the investment in long-term assets, or

自由现金流

$$Free\ cash\ flow = 1,400 - 800 = 600$$

原 PDF 第 129 页 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：此题使用“经营现金流减长期资产投资”的自由现金流口径。经营活动产生的全部现金并非都可自由分配，公司可能需要资本支出维持或扩张经营。先在原表中识别经营现金流及长期资产购置现金流，再做同单位相减；不要把新借款或发行股票计作经营创造的现金。

The official choice for this item is B. Additional reasoning: This question defines free cash flow as operating cash flow less investment in long-lived assets. Not all operating cash is freely distributable because capital expenditure may sustain or expand the business. Identify CFO and long-term asset investment in the exhibit and subtract in consistent units. Borrowing and equity issuance are financing, not operating cash generation.

相关知识点 / **Related concepts**

自由现金流与持续投资：本题 FCF = CFO−长期资产投资；不同文献的自由现金流口径可能不同，须以题目定义为准。

Free cash flow and continuing investment: Here FCF = CFO − investment in long-lived assets. Free-cash-flow definitions vary, so use the one specified in the question.

QUESTION SET

3. 一家发行人正面临流动性危机。根据这些估计，完成下表：

3. An issuer is facing a liquidity crisis. Based on these estimations, complete the following table:

资产变现计算题。各列为公允价值（百万美元）、变现成本占公允价值的百分比、变现成本金额（百万美元）及净收入（百万美元）。

各行分别为出售生产工厂、出售短期有价证券、出售应收账款、出售存货，以及合计。

	Fair Value (millions of USD)	Liquidation Cost (% of fair value)	Liquidation Cost (millions of USD)	Net Proceeds (millions of USD)
Selling a production plant	1,000	20		
Selling short-term marketable securities	100	0		
Selling receivables	900	10		
Selling inventory	600	12		
Total				

原 PDF 第 129 页 · 完整表格 · 300 dpi

官方答案与解析 / Official answer and explanation

答案：

Solution:

资产变现计算结果。第 1—4 列依次为公允价值（百万美元）、变现成本百分比、变现成本金额（百万美元）及净收入（百万美元）。

各行分别为出售生产工厂、短期有价证券、应收账款及存货；表末为净收入合计。

	(1) Fair Value (millions of USD)	(2) Liquidation Cost (% of fair value)	(3) Liquidation Cost (millions of USD)	(4) Net Proceeds (millions of USD)
Selling a production plant	1,000	20	200	800
Selling short-term marketable securities	100	0	0	100
Selling receivables	900	10	90	810
Selling inventory	600	12	72	528
Total				2,238

原 PDF 第 130 页 · 完整表格 · 300 dpi

第（3）列的变现成本，等于第（1）列与第（2）列相乘。

The liquidation cost in column (3) is the result of multiplying the column (1) and (2) entries.

第（4）列的净收入，等于第（1）列公允价值减去变现成本。

The net proceeds in column (4) are the result of subtracting the liquidation cost from the fair value, column (1).

净收入总额等于第（4）列各项来源净收入之和。

The total net proceeds is the sum of the net proceeds from each source in column (4).

补充解析 / **Supplementary explanation**

补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

习题组

QUESTION SET

4. 对于一家拥有存货、应收账款和应付账款的公司，将以下比率由小（第 1）到大（第 3）排序：

4. Rank the following ratios from smallest (rank 1) to largest (rank 3) for a company that has inventory, accounts receivable, and payables:

流动性比率排序题。请为现金比率、流动比率和速动比率填写排序。

Ratio	**Rank**
Cash ratio	
Current ratio	
Quick ratio	

原 PDF 第 130 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

这些比率的分母相同，均为流动负债，因此它们的差异来自分子。现金比率的分子仅包含现金和短期有价证券；速动比率的分子在现金和短期有价证券之外，加上应收账款；流动比率的分子则包含全部流动资产。

The denominator is the same for each of these ratios (current liabilities), so the differences among these ratios are attributable to the numerator. In the case of the cash ratio, the numerator is simply cash and short-term marketable securities. In the case of the quick ratio, receivables are added to cash and short-term marketable securities in the numerator. Finally, the current ratio has all current assets in the numerator.

流动性比率排序答案：现金比率第 1，速动比率第 2，流动比率第 3。

Ratio	Rank
Cash ratio	1
Current ratio	3
Quick ratio	2

原 PDF 第 130 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

三项比率的分母相同，均为流动负债；分子逐步纳入更多资产。现金比率仅含现金与短期证券，速动比率加上应收账款，流动比率再加入存货等流动资产。因此按题设正余额条件，从小到大为现金、速动、流动比率。

The ratios share current liabilities as denominator. Their numerators progressively include more assets: cash and securities, then receivables, then inventory and other current assets. With the stated positive balances, the ascending order is cash ratio, quick ratio, current ratio.

相关知识点 / **Related concepts**

比较同分母比率时，先比较分子的资产覆盖范围。

With the same denominator, compare the assets included in each numerator.

Question set · 5

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 128, 130-131

题目与资料 / **Question and data**

习题组

QUESTION SET

5. 某发行人的资产负债表列示以下流动资产和流动负债：

5. An issuer has the following current assets and current liabilities on its balance sheet:

资产负债资料：现金、有价证券、应收账款、存货、预付费用及应付账款。

Cash	200
Marketable securities	40
Accounts receivable	600
Inventory	800
Prepaid expenses	60
Accounts payable	500

原 PDF 第 130 页 · 完整表格 · 300 dpi

资产负债资料（续）：应计费用及短期债务。

Accrued expenses	50
Short-term debt	600

原 PDF 第 131 页 · 完整表格 · 300 dpi

发行人的现金比率和速动比率分别最接近：

The issuer's cash and quick ratios, respectively, are closest to:

A. 0.2087；0.7304。

A. 0.2087; 0.7304.

B. 0.4363；1.5273。

B. 0.4363; 1.5273.

C. 0.5455；1.6364。

C. 0.5455; 1.6364.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

现金比率为：

The cash ratio is:

现金比率计算。

$$\text{Cash ratio} = \frac{200 + 40}{1,150} = 0.2087$$

原 PDF 第 131 页 · 共享公式 · 300 dpi

速动比率为：

The quick ratio is:

速动比率计算。

$$\text{Quick ratio} = \frac{200 + 40 + 600}{1,150} = 0.7304$$

原 PDF 第 131 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先确认教材在该题使用的口径。总营运资本通常是流动资产减流动负债；经营性净营运资本可剔除现金、短期投资及有息债务。流动、速动和现金比率具有相同的流动负债分母，但分子逐步缩小。高比率不一定代表管理优秀：应收可能难以回收、存货可能积压，过多闲置现金也有机会成本。

The official choice for this item is A. Additional reasoning: Verify the definition used in the question. Total working capital commonly means current assets minus current liabilities, while operating net working capital excludes cash, short-term investments, and interest-bearing debt. Current, quick, and cash ratios share a current-liability denominator but progressively narrower numerators. High ratios can conceal poor collections, stale inventory, or costly idle cash.

速动比率将现金、短期投资和应收账款与流动负债比较，通常排除存货。判断最强流动性时应比较该比率，而不是只比较现金绝对额或流动资产规模。

The quick ratio compares cash, short-term investments, and receivables with current liabilities, generally excluding inventory. Compare the ratio, not just absolute cash or current-asset size.

相关知识点 / **Related concepts**

营运资本口径和流动性比率：流动比率 = 流动资产/流动负债；速动比率主要含现金、短期投资、应收；现金比率主要含现金及短期投资。

Working-capital definitions and liquidity ratios: Current ratio = current assets/current liabilities. The quick numerator chiefly includes cash, short-term investments, and receivables; the cash ratio chiefly includes cash and short-term investments.

CI-LM04-EXAMPLE-801

例题 5 · 第 1 题：Keown Corporation 信用政策的变化
Example 5 · 1 — Changes to Keown Corporation’s Credit Policy

题目与资料 / **Question and data**

例题 5

EXAMPLE 5

Keown Corporation 信用政策的变化

Changes to Keown Corporation's Credit Policy

1. Keown Corporation 正考虑提高向新客户提供的信用额度，因为销售经理认为这会促进销售增长。如果实施这一变更，预计会对 Keown 的短期资金需求产生什么影响？

1. Keown Corporation is considering an increase in the line of credit it offers to new customers as its sales manager believes doing so will lead to increased sales. What would be the expected impact on Keown's short-term funding needs if this change were made?

A. 公司将降低存货水平。

A. The company would reduce its inventory levels.

B. 公司很可能更快收款，从而减少应收账款。

B. The company would likely collect faster, reducing its receivables.

C. 公司对营运资本的需求将增加。

C. The company would have an increased need for working capital.

D. 公司能够更早向供应商付款，从而减少应付账款。

D. The company could pay its suppliers sooner, reducing its accounts payable.

E. 这一变更不会使公司的营运资本需求发生任何变化。

E. The company would not see any change in working capital needs as a result of the change.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

销售增长预计会增加所需存货和应收账款，因此公司很可能需要更多短期融资来支持这些增长。

The company would likely need more short-term funding to support the expected increase in required inventory and accounts receivable resulting from an increase in sales.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

The official choice for this item is C. Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

题目与资料 / **Question and data**

知识检查：评估短期融资选择

KNOWLEDGE CHECK: EVALUATING SHORT-TERM FINANCING CHOICES

1. 公司评估短期融资选择时，应考虑以下哪些因素？

1. Which of the following factors should a company consider when evaluating short-term financing choices?

A. 借入资金的成本

A. The cost of the funds borrowed

B. 该来源提供的灵活性

B. The flexibility offered by the source

C. 获得资金的便利程度

C. The ease with which the funds can be accessed

D. 可能使某一来源优于另一来源的法律或监管约束

D. Legal or regulatory constraints that might favor one source over another

E. 以上全部。

E. All of the above

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

E 正确。

E is correct.

公司最明显应考虑的是资金成本，但在考虑所有其他因素后，它可能选择以略高成本借款。

The cost of funds for a company is the most obvious item to consider, but it may choose to borrow at a slightly higher cost after taking all the other items into consideration.

补充解析 / **Supplementary explanation**

补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

CI-LM04-KNOWLEDGE_CHECK-1001

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 137

题目与资料 / **Question and data**

知识检查：满足 Keown Corporation 的短期融资需求

KNOWLEDGE CHECK: MEETING KEOWN CORPORATION'S SHORT-TERM FINANCING NEEDS

1. Keown Corporation 有 200 万加元应付账款，其条款为"2/10，net 30"，另有 200 万加元应收账款。此外，公司持有 500 万加元有价证券。Keown 短期内需要 20 万加元支付工资。以下哪种筹集这 20 万加元的选择最合理？

1. Keown Corporation has accounts payable of CAD2 million with terms of 2/10, net 30 and accounts receivable of CAD2 million. In addition, the company holds CAD5 million in marketable securities. Keown has a short-term need of CAD200,000 to meet payroll. Which of the following choices makes the most sense for raising the CAD200,000?

A. 公司应发行长期债务。

A. The company should issue long-term debt.

B. 公司应发行普通股。

B. The company should issue common stock.

C. 公司应延迟支付应付账款，并放弃 2% 折扣。

C. The company should delay paying accounts payable and forgo the 2% discount.

D. 公司应以 10% 折扣出售应收账款。

D. The company should sell accounts receivable at a 10% discount.

E. 公司应出售有价证券，支付 0.5% 的经纪费用（忽略资本利得税）。

E. The company should sell marketable securities at a 0.5% brokerage cost (ignore capital gains tax).

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

E 正确。

E is correct.

筹集 20 万加元的方案汇总于下表。

The options for raising CAD200,000 are summarized in this table.

资金来源、行动与变现成本比较。成本分别以百分比及加元金额列示。

C. 应付账款，条款为“10 天内付款享受 2% 折扣，否则 30 天内付清”：延后支付 200,000 加元，放弃 2% 折扣。

D. 应收账款：将价值 222,222 加元的应收账款以 10% 折价出售，筹集 200,000 加元。

E. 有价证券：出售价值 200,000 加元的证券。各项变现成本见原表。

		Liquidation Cost	
Source of Funds	**Action**	**%**	**CAD**
C. Accounts payable (2/10, net 30)	Delay CAD200,000 in payment and forgo 2% discount	2.0	4,000
D. Accounts receivable	Sell CAD222,222 in value at 10% discount to raise CAD200,000	10.0	22,222
E. Marketable securities	Sell CAD200,000 in value	0.5	1,000

原 PDF 第 137 页 · 完整表格 · 300 dpi

选择 C 意味着放弃 2% 折扣，对 20 万加元而言，成本为 4,000 加元。

Choosing C involves forgoing a 2% discount, which on CAD200,000 amounts to a cost of CAD4,000.

若采用 D，为获得净额 20 万加元，公司必须出售 222,222 加元的应收账款，承担 22,222 加元成本。

To net CAD200,000 using option D, the company would have to sell CAD222,222 of accounts receivable at a cost of CAD22,222.

E 看来是最佳选择。

E appears to be the best choice.

有价证券流动性强，可以轻易按市场价值出售，只需扣除相对很小的 1,000 加元经纪费用。

Marketable securities are liquid and can be easily sold for market value, less the relatively minor brokerage cost of CAD1,000.

补充解析 / **Supplementary explanation**

补充思路：先把折扣期内付款看作基准。放弃折扣等于为额外付款天数借入“折扣后应付金额”，融资费用是被放弃的折扣。期间利率为 d/(1−d)，额外借款天数为净付款期减折扣期，再按题目约定换算年化有效利率。供应商折扣看似很小，但对应期限很短，年化成本可能显著高于银行贷款。

Additional reasoning: Treat payment during the discount period as the baseline. Forgoing the discount borrows the discounted invoice amount for extra days, at a cost equal to the lost discount. The periodic rate is $d/(1-d)$, and extra days equal net days minus discount days. Annualize under the question's convention. A small invoice discount can imply a high annual borrowing cost.

相关知识点 / **Related concepts**

放弃现金折扣的隐含融资成本：EAR = [1 + d/(1−d)]^(年天数/额外天数)−1；比较贷款时必须使用同一有效利率口径。

Implicit financing cost of forgone discounts: EAR $= [1+d/(1-d)]$^(days per year/extra days) $-$ 1. Compare financing choices on the same effective-rate basis.

QUESTION SET

1. 按营运资本管理方法，对以下各项分类：

1. Classify each of the following in terms of approaches to working capital management:

营运资本策略分类题：判断各项特征属于保守型还是激进型。

项目包括存货相对于销售收入较高、更依赖长期融资、持有更多现金、持有更多有价证券，以及更依赖短期银行贷款。

	Conservative	Aggressive
Greater level of inventory relative to sales		
Greater reliance on long-term financing		
Greater level of cash on hand		
Greater level of marketable securities		
Greater reliance on short-term bank loans		

原 PDF 第 138 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

营运资本策略分类答案：存货相对于销售收入较高、更依赖长期融资、持有更多现金及有价证券，属于保守型；更依赖短期银行贷款，属于激进型。

	Conservative	Aggressive
Greater level of inventory relative to sales	✓	
Greater reliance on long-term financing	✓	
Greater level of cash on hand	✓	
Greater level of marketable securities	✓	
Greater reliance on short-term bank loans		✓

原 PDF 第 138 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：先确认教材在该题使用的口径。总营运资本通常是流动资产减流动负债；经营性净营运资本可剔除现金、短期投资及有息债务。流动、速动和现金比率具有相同的流动负债分母，但分子逐步缩小。高比率不一定代表管理优秀：应收可能难以回收、存货可能积压，过多闲置现金也有机会成本。

Additional reasoning: Verify the definition used in the question. Total working capital commonly means current assets minus current liabilities, while operating net working capital excludes cash, short-term investments, and interest-bearing debt. Current, quick, and cash ratios share a current-liability denominator but progressively narrower numerators. High ratios can conceal poor collections, stale inventory, or costly idle cash.

相关知识点 / **Related concepts**

营运资本口径和流动性比率：流动比率 = 流动资产/流动负债；速动比率主要含现金、短期投资、应收；现金比率主要含现金及短期投资。

Working-capital definitions and liquidity ratios: Current ratio = current assets/current liabilities. The quick numerator chiefly includes cash, short-term investments, and receivables; the cash ratio chiefly includes cash and short-term investments.

题目与资料 / **Question and data**

习题组

QUESTION SET

2. 某公司有 3,000 万美元应付账款，可以将付款推迟至第 14 天，代价是放弃 10 天内付款可取得的 2% 折扣。变现成本以百万美元计，最接近：

2. A company has USD30 million of accounts payable, for which it could delay payment to day 14, forgoing the 2% discount it would receive for paying within ten days. The liquidation cost in millions of USD is closest to:

A. 0.6。

A. 0.6.

B. 6.1。

B. 6.1.

C. 8.4。

C. 8.4.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

变现成本是对 3,000 万美元应付账款放弃的 2% 折扣。

The liquidation cost is the forgone 2% discount applied to the USD30 million value of the accounts payable.

变现成本的计算；金额以美元计。

$$\text{Liquidation cost} = \text{USD } 30 \text{ million} \times 0.02 = \text{USD } 0.6 \text{ million}$$

原 PDF 第 138 页 · 共享公式 · 300 dpi

B 和 C 不正确，因为它们将放弃折扣所对应的有效年利率，应用于应付账款金额。

B and C are incorrect, because they represent effective annual rates of the forgone interest applied to the value of the accounts payable.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先把折扣期内付款看作基准。放弃折扣等于为额外付款天数借入“折扣后应付金额”，融资费用是被放弃的折扣。期间利率为 d/(1−d)，额外借款天数为净付款期减折扣期，再按题目约定换算年化有效利率。供应商折扣看似很小，但对应期限很短，年化成本可能显著高于银行贷款。

The official choice for this item is A. Additional reasoning: Treat payment during the discount period as the baseline. Forgoing the discount borrows the discounted invoice amount for extra days, at a cost equal to the lost discount. The periodic rate is d/(1 − d), and extra days equal net days minus discount days. Annualize under the question’s convention. A small invoice discount can imply a high annual borrowing cost.

相关知识点 / **Related concepts**

放弃现金折扣的隐含融资成本：EAR = [1 + d/(1−d)]^(年天数/额外天数)−1；比较贷款时必须使用同一有效利率口径。

Implicit financing cost of forgone discounts: EAR = [1 + d/(1 − d)]^(days per year/extra days) − 1. Compare financing choices on the same effective-rate basis.

QUESTION SET

3. 公司将提供给客户的信用条款，从“1/10，net

3. A company changed the credit terms it offers its customers from 1/10, net

30”改为“1/15，net 30”。

30 to 1/15, net 30.

这一变化最可能导致：

The most likely effect of this change is:

A. 应收账款增加。

A. an increase in accounts receivable.

B. 应收账款不变。

B. no change in accounts receivable.

C. 应收账款减少。

C. a decrease in accounts receivable.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

公司将折扣期延长了 5 天，而折扣占售价的比例仍为 1%。

The company extended the discount period by 5 days and did not change the discount amount as a percentage of the sale price (1%).

更宽松的客户信用条款很可能增加应收账款，因为即使客户享受折扣，也可以更晚付款。

More generous credit terms for its customers will likely increase accounts receivable, because customers will take longer to pay even if they take the discount.

此外，更有吸引力的信用条款可能提高销售，从而增加应收账款。

In addition, the more attractive credit terms may result in increased accounts receivable due to increased sales.

B 和 C 不正确，因为更宽松的折扣期会使享受折扣的客户更晚付款，从而增加应收账款。

B and C are incorrect, because a more generous discount period will result in increased accounts receivable as customers will take longer to pay if they take advantage of the discount.

补充解析 / **Supplementary explanation**

1/10改为1/15仍给1%折扣，但允许享受折扣的付款日推迟5天。客户可更晚付款，因此应收账款余额通常上升；更宽松条件也可能增加销售及应收账款。这与企业自己放弃供应商折扣的融资成本问题不同。

Changing 1/10 to 1/15 preserves the 1% discount but lets customers delay discounted payment by five days. Receivables therefore typically increase; more attractive terms may also raise sales. This is a customer-credit policy question, rather than the issuer's cost of foregoing a supplier discount.

相关知识点 / **Related concepts**

客户信用条款影响收款速度、DSO、应收账款和流动性。

Customer terms affect collection speed, DSO, receivables, and liquidity.

CI-LM04-QUESTION_SET-1104

QUESTION SET

4. 公司调整应收账款政策，向信用质量较低的客户提供信用，最可能导致：

4. Changing its accounts receivable policy to extend credit to customers with lower creditworthiness will most likely result in:

A. 流动性拉动。

A. a pull on liquidity.

B. 流动性阻滞。

B. a drag on liquidity.

C. 对流动性没有影响。

C. no effect on liquidity.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

向信用质量较低的客户提供信用，可能增加逾期或无法收回的账款，并提高应收账款周转天数，从而造成流动性阻滞。

By extending credit to customers with lower creditworthiness, the company is likely to experience more delinquent or uncollectible accounts and an increase in days sales outstanding, resulting in a drag on liquidity.

A 不正确，因为流动性拉动源于现金流出加快；本例中，公司信用政策变化的影响是减缓现金流入。

A is incorrect, because a pull on liquidity would result from an acceleration of cash outflows. In this case, the change to the company's credit policy has the effect of slowing cash inflows.

C 不正确，因为应收账款政策的变化很可能增加应收账款，从而提高营运资本需求。

C is incorrect, because the change in the company's accounts receivable policy would likely increase its working capital needs due to having higher accounts receivable.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

The official choice for this item is B. Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

QUESTION SET

5. Lucor Corporation 希望提高流动性，正在评估两项潜在行动。

5. The Lucor Corporation is seeking to raise liquidity and is evaluating two potential actions.

方案 1：以低于账面价值 5% 的折扣，向金融中介出售应收账款。

Option 1 Selling accounts receivable to a financial intermediary at a 5% discount off their carrying value

方案 2：提前向供应商付款，以取得 5% 折扣。

Option 2 Accelerating payments to suppliers to receive a 5% discount

哪项方案能够实现 Lucor 的目标？

Which of the options would achieve Lucor's objective?

A. 方案 1

A. Option 1

B. 方案 2

B. Option 2

C. 两者都不能，因为都会发生变现成本。

C. Neither, because they both incur liquidation costs

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

方案 1 将流动性较低的资产（应收账款）立即转化为现金，虽然需要付出成本，但能够提高流动性。

Option 1 would increase liquidity by converting a less liquid asset (accounts receivable) into cash immediately, albeit at a cost.

B 不正确，因为方案 2 会加快现金流出，从而降低流动性。

B is incorrect, because Option 2 would decrease liquidity by accelerating cash outflows.

C 不正确，因为方案 2 会加快现金流出、降低流动性，而且不会发生变现成本。

C is incorrect, because Option 2 would decrease liquidity by accelerating cash outflows and would not incur liquidation costs.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先把折扣期内付款看作基准。放弃折扣等于为额外付款天数借入“折扣后应付金额”，融资费用是被放弃的折扣。期间利率为 d/(1–d)，额外借款天数为净付款期减折扣期，再按题目约定换算年化有效利率。供应商折扣看似很小，但对应期限很短，年化成本可能显著高于银行贷款。

The official choice for this item is A. Additional reasoning: Treat payment during the discount period as the baseline. Forgoing the discount borrows the discounted invoice amount for extra days, at a cost equal to the lost discount. The periodic rate is $d/(1-d)$, and extra days equal net days minus discount days. Annualize under the question's convention. A small invoice discount can imply a high annual borrowing cost.

相关知识点 / **Related concepts**

放弃现金折扣的隐含融资成本：EAR = [1 + d/(1–d)]^(年天数/额外天数)–1；比较贷款时必须使用同一有效利率口径。

Implicit financing cost of forgone discounts: $\text{EAR} = [1 + d/(1-d)]^{(\text{days per year/extra days})} - 1$. Compare financing choices on the same effective-rate basis.

CI-LM04-PRACTICE-001

章末习题 1
Practice problem 1

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 140, 142

题目与资料 / **Question and data**

1. 某发行人将客户信用条款从“2/10，net 30”改为“2/10，net

1. An issuer changing its credit terms for customers from 2/10, net 30 to 2/10, net

40”，最可能出现：

40 will most likely experience:

A. 流动性拉动。

A. a pull on its liquidity.

B. 流动性阻滞。

B. a drag on its liquidity.

C. 流动性不变。

C. no change in its liquidity.

官方答案与解析 / **Official answer and explanation**

1. B 正确。延长净付款期限，很可能使发行人的应收账款增加，延长现金转换周期，并造成流动性阻滞。A 不正确，因为这一变化会减缓客户付款（现金流入），而不是通过现金流出形成流动性拉动。C 不正确，因为延长净付款期限会减缓客户付款，并造成流动性阻滞。

1. B is correct. By extending the net period, the issuer will likely see its accounts receivable increase, lengthening its cash conversion cycle and producing a drag on its liquidity. A is incorrect, because the change will slow payments from customers (inflows) rather than pull on liquidity in terms of outflows. C is incorrect, because extending the net period will slow payments from customers and produce a drag on liquidity.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：流动性拖累通常延缓现金流入，例如应收回款慢或存货难变现；流动性挤压通常加快现金流出或缩减融资来源，例如付款条件收紧。新增授信提高可用流动性，与削减授信方向相反。常规经营现金、持有现金和融资属于主要来源；出售长期资产、谈判延期或重组等次级来源通常更具代价。

The official choice for this item is B. Additional reasoning: A drag delays inflows, such as slow receivables or difficult-to-sell inventory. A pull accelerates outflows or restricts finance, such as tighter payment terms or a reduced credit line. Increased borrowing capacity improves liquidity. Cash holdings, operating cash, and routine financing are primary sources; asset sales, payment renegotiation, or restructuring are more costly secondary sources.

相关知识点 / **Related concepts**

流动性来源、拖累与挤压：资产流动性与企业偿债流动性不同；融资策略应匹配资产期限、季节性和可接受的再融资风险。

Liquidity sources, drags, and pulls: Asset liquidity differs from the firm's ability to meet obligations. Financing policy should match asset maturity, seasonality, and acceptable refinancing risk.

CI-LM04-PRACTICE-002

章末习题 **2**
Practice problem 2

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 140, 142

题目与资料 / **Question and data**

2. 以下哪项最可能缩短发行人的现金转换周期？

2. Which of the following will most likely decrease an issuer's cash conversion cycle?

增加以下哪项天数：

An increase in its days:

A. 应收账款周转天数。

A. sales outstanding.

B. 存货周转天数。

B. of inventory on hand.

C. 应付账款周转天数。

C. payable outstanding.

官方答案与解析 / **Official answer and explanation**

2. C 正确。增加应付账款周转天数意味着延迟向供应商付款，因此缩短现金转换周期。计算现金转换周期时，要从应收账款周转天数与存货周转天数之和中减去应付账款周转天数。A 不正确，因为应收账款周转天数增加会延长发行人的现金转换周期。B 不正确，因为存货周转天数增加也会延长发行人的现金转换周期。

2. C is correct. Increasing days payable outstanding would reduce the cash conversion cycle, because payments to suppliers are delayed. Days payable outstanding is subtracted from the sum of days sales outstanding and days of inventory on hand to compute the cash conversion cycle. A is incorrect, because an increase in days sales outstanding will increase the issuer's cash conversion cycle. B is incorrect, because an increase in days of inventory on hand will increase the issuer's cash conversion cycle.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

The official choice for this item is C. Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. Excessive payment delays can harm supplier access and credit, and overly lean inventory can cause stockouts. Use consistent average balances and day counts; payables turnover should not use revenue as its activity base.

相关知识点 / **Related concepts**

现金转换周期：CCC = DOH + DSO–DPO；DSO≈平均应收/销售×天数；DOH≈平均存货/销售成本×天数；DPO≈平均应付/采购或相应成本×天数。

Cash conversion cycle: CCC = DOH + DSO − DPO. DSO uses average receivables/revenue; DOH uses average inventory/COGS; DPO uses average payables/purchases or the specified cost proxy, each multiplied by days.

CI-LM04-PRACTICE-003

章末习题 3
Practice problem 3

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 140, 142

题目与资料 / **Question and data**

3. 一位分析师收集了三家发行人最近一个财政年度的资产负债表资料。

3. An analyst gathers balance sheet information for the most recent fiscal year for three issuers.

发行人 A、B、C 的财务资料。各行依次为现金、有价证券、应收账款、存货、预付费用、应付账款及应计费用。

	Issuer A	Issuer B	Issuer C
Cash	100	120	50
Marketable securities	20	10	20
Accounts receivable	300	300	200
Inventory	500	600	300
Prepaid expenses	50	0	10
Accounts payable	400	500	300
Accrued expenses	40	20	0

原 PDF 第 140 页 · 完整表格 · 300 dpi

根据速动比率，哪家发行人的流动性最高？

Which issuer is most liquid based on the quick ratio?

A. 发行人 A

A. Issuer A

B. 发行人 B

B. Issuer B

C. 发行人 C

C. Issuer C

官方答案与解析 / **Official answer and explanation**

3. A 正确。速动比率的定义为：

3. A is correct. The quick ratio is defined as:

速动比率：以现金、短期有价金融工具及应收款为分子，以流动负债为分母。

$$\text{Quick ratio} = \frac{\text{Cash + Short-term marketable instruments + Receivables}}{\text{Current liabilities}}$$

原 PDF 第 142 页 · 共享公式 · 300 dpi

各发行人的速动比率为：

The quick ratio for each issuer is:

依次计算发行人 A、B、C 的速动比率。

$$\text{Issuer A quick ratio} = \frac{100 + 20 + 300}{400 + 40} = \frac{420}{440} = 0.9545$$

$$\text{Issuer B quick ratio} = \frac{120 + 10 + 300}{500 + 20} = \frac{430}{520} = 0.8269$$

$$\text{Issuer C quick ratio} = \frac{50 + 20 + 200}{300 + 0} = \frac{270}{300} = 0.9000$$

原 PDF 第 142 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先确认教材在该题使用的口径。总营运资本通常是流动资产减流动负债；经营性净营运资本可剔除现金、短期投资及有息债务。流动、速动和现金比率具有相同的流动负债分母，但分子逐步缩小。高比率不一定代表管理优秀：应收可能难以回收、存货可能积压，过多闲置现金也有机会成本。

The official choice for this item is A. Additional reasoning: Verify the definition used in the question. Total working capital commonly means current assets minus current liabilities, while operating net working capital excludes cash, short-term investments, and interest-bearing debt. Current, quick, and cash ratios share a current-liability denominator but progressively narrower numerators. High ratios can conceal poor collections, stale inventory, or costly idle cash.

速动比率将现金、短期投资和应收账款与流动负债比较，通常排除存货。判断最强流动性时应比较该比率，而不是只比较现金绝对额或流动资产规模。

The quick ratio compares cash, short-term investments, and receivables with current liabilities, generally excluding inventory. Compare the ratio, not just absolute cash or current-asset size.

相关知识点 / **Related concepts**

营运资本口径和流动性比率：流动比率 = 流动资产/流动负债；速动比率主要含现金、短期投资、应收；现金比率主要含现金及短期投资。

Working-capital definitions and liquidity ratios: Current ratio = current assets/current liabilities. The quick numerator chiefly includes cash, short-term investments, and receivables; the cash ratio chiefly includes cash and short-term investments.

CI-LM04-PRACTICE-004

章末习题 4
Practice problem 4

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 140, 142

题目与资料 / **Question and data**

4. 一位分析师评估某发行人的流动性，计算发现其最近一个财政年度的现金转换周期为负。这一结果：

4. An analyst is evaluating an issuer's liquidity and calculates a negative cash conversion cycle for the issuer in the most recent fiscal year. This result is:

A. 不可能出现。

A. not feasible.

B. 可能出现，因为发行人持有足够现金和有价证券来满足短期需求。

B. possible, because the issuer has sufficient cash and marketable securities on hand to support short-term needs.

C. 可能出现，因为存货投资迅速收回，且发行人利用了供应商融资。

C. possible, because the investment in inventory is returned quickly and the issuer takes advantage of vendor financing.

官方答案与解析 / **Official answer and explanation**

4. C 正确。如果存货周转天数较低、应收账款回收期较短，而且发行人利用供应商融资，就可能出现负现金转换周期。A 不正确，因为当应付账款周转天数大于存货周转天数与应收账款周转天数之和时，发行人的现金转换周期可以为负。B 不正确，因为持有现金和有价证券的金额，不影响公司的现金转换周期。

4. C is correct. If days of inventory on hand is low, the accounts receivable collection period is short, and the issuer takes advantage of its vendors' financing, a negative cash conversion cycle is a possible result. A is incorrect, because issuers may have a negative cash conversion cycle if days payable outstanding is larger than the sum of days of inventory on hand and days sales outstanding. B is incorrect, because the amount of cash and marketable securities on hand does not affect the company's cash conversion cycle.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：现金转换周期衡量从支付供应商到收回客户款项的净时间。销售回款天数或库存天数增加会占用更多资金；应付天数增加则延后现金流出。但无限延迟付款会损害供应关系和信用，过度压缩库存也可能缺货。计算时使用一致的平均余额与年度天数，不把销售额用作应付账款周转率的分母。

The official choice for this item is C. Additional reasoning: CCC measures the net interval between supplier payment and customer collection. Longer receivable or inventory periods tie up cash; longer payable periods defer outflows. Excessive payment delays can harm supplier access and credit, and overly lean inventory can cause stockouts. Use consistent average balances and day counts; payables turnover should not use revenue as its activity base.

负现金转换周期表示公司可能在向供应商付款之前先收回客户现金，因此可以获得经营性资金支持；它并不等于所有流动性风险都消失。

A negative cash conversion cycle can mean customers pay before suppliers must be paid, providing operating funding. It does not eliminate every liquidity risk.

相关知识点 / **Related concepts**

现金转换周期：CCC = DOH + DSO−DPO；DSO≈平均应收/销售×天数；DOH≈平均存货/销售成本×天数；DPO≈平均应付/采购或相应成本×天数。

Cash conversion cycle: CCC = DOH + DSO − DPO. DSO uses average receivables/revenue; DOH uses average inventory/COGS; DPO uses average payables/purchases or the specified cost proxy, each multiplied by days.

CI-LM04-PRACTICE-005

章末习题 5
Practice problem 5

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 140-142

题目与资料 / Question and data

5. 某发行人取消了向客户提供的及时付款折扣。

5. An issuer eliminated the prompt-payment discount it had offered to customers.

这一行动最可能：

This action most likely will:

A. 提高发行人的流动性。

A. increase the issuer’s liquidity.

B. 降低发行人的流动性。

B. decrease the issuer’s liquidity.

C. 不影响发行人的流动性。

C. not affect the issuer’s liquidity.

官方答案与解析 / Official answer and explanation

5. B 正确，因为取消折扣后，客户不再有提前付款的激励，很可能推迟付款。客户付款更晚，会造成流动性阻滞。A 和 C 不正确，因为客户很可能更晚付款，从而降低发行人的流动性。

5. B is correct, because the elimination of the discount will likely result in customers paying later as there is no incentive to pay early without the discount. With customers paying later, this action becomes a drag on liquidity. A and C are incorrect, because customers likely paying later will reduce the issuer’s liquidity.

补充解析 / Supplementary explanation

取消早付折扣削弱客户提前付款的动力，通常使收款变慢、应收账款天数上升。即使公司不再承担折扣造成的收入让利，也不能因此断言流动性改善；盈利影响与现金回收时点必须分开分析。

Removing a prompt-payment discount weakens customers’ incentive to pay early, typically slowing collection and raising DSO. Avoiding the discount does not automatically improve liquidity; profitability effects and cash timing must be analyzed separately.

相关知识点 / Related concepts

现金流入延迟构成流动性拖累；利润提高不必然伴随现金流改善。

Delayed inflow is a liquidity drag; higher profit need not mean better cash flow.

1. 以下清单中的每项均为资本投资项目的实例或特征。将各项归入维护性投资或成长性投资：

• 收购

• 扩大业务范围

• 研究与开发

• 替换过时设施

• 高投资风险和不确定性

• 有限的下行风险和不确定性

• 为满足安全、合规或监管标准所必需

官方英文题目 · PDF 第144页

1. The following list contains either an example or an attribute of a capital investment project. Assign each item to either *maintenance* or *growth*.
   - Acquisition
   - Expand business scope

官方英文题目 · PDF 第145页 · 续

- Research and development
- Replace outdated facilities
- High-risk investment and uncertainty
- Limited downside risk and uncertainty
- Needed to meet safety, compliance, regulatory standards

Maintenance	Growth

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

维护性投资：替换过时设施；满足安全、合规或监管标准所必需的投入；有限的下行风险和不确定性。

成长性投资：收购；扩大业务范围；研究与开发；高投资风险和不确定性。

官方英文解析 · PDF 第145页

Solution:

Maintenance	Growth
Replace outdated facilities	Acquisition
Needed to meet safety, compliance, regulatory standards	Expand business scope
Limited downside risk and uncertainty	Research and development
	High-risk investment and uncertainty

补充解析 / **Supplementary explanation**

维持性投资保护既有运营能力和合规基础，例如替换过时设施、满足安全标准；增长性投资扩展业务范围和未来机会，例如收购和研发。原题还用相对较低 / 较高不确定性区分两组，但“维持性”并不表示所有实际项目都没有风险。

Maintenance protects existing capacity and compliance, such as replacing outdated facilities or meeting safety standards. Growth expands scope and opportunities through acquisitions or R&D. The source associates the groups with lower versus higher uncertainty; maintenance does not mean every real project is riskless.

相关知识点 / **Related concepts**

先根据项目目的分类，再评估增量现金流和风险；分类本身不能替代NPV分析。

Classify by purpose, then assess incremental cash flows and risk; the label does not replace NPV analysis.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

模块自测 · 第2题
Learning Module Self-Assessment · 2

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 145

题目与资料 / **Question and data**

中文学习译文

2. 计算IRR时，假定期间现金流被再投资，并获得怎样的回报率？

A. 低于IRR

B. 等于IRR

C. 高于IRR

官方英文题目 · PDF 第145页

2. When calculating IRR, the interim cash flows are assumed to be reinvested and earn a rate of return rate that is:

   A. lower than IRR.

   B. the same as IRR.

   C. higher than IRR.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。IRR的一个重要假设是：只有期间现金流以IRR再投资时，IRR才代表该投资的几何回报率。

A不正确，因为如果再投资回报率低于IRR，投资的回报率就会低于IRR。

C不正确，因为如果再投资回报率高于IRR，投资的回报率就会高于IRR。

官方英文解析 · PDF 第145页

Solution:

B is correct. An important assumption of IRR is that it represents only the (geometric) rate of return on the investment if interim cash flows are reinvested at the IRR.

A is incorrect because if reinvestment rates are lower compared to IRR, the rate of return on the investment will be lower than the IRR.

C is incorrect because if reinvestment rates are higher compared to IRR, the rate of return on the investment will be higher than the IRR.

补充解析 / **Supplementary explanation**

按教材对实际复合收益率的解释，期中现金流须按IRR再投资才能达到所述几何收益率，因此选择B。进一步区分：IRR作为使NPV等于零的折现率，其数学求根本身不要求实际再投资；再投资条件涉及把IRR解释为最终实现的复合收益率。

Under the curriculum's realized compound-return interpretation, interim cash flows must be reinvested at IRR, so B is correct. Distinguish this from the mathematical definition: solving the discount rate that sets NPV to zero does not itself require actual reinvestment. The condition concerns interpretation as a realized compound return.

相关知识点 / **Related concepts**

IRR满足ΣCFt/(1+IRR)^t=0；最终复合收益还取决于期中现金流的再投资收益。

IRR solves $\Sigma CFt/(1+IRR)^t=0$; realized compound return also depends on reinvestment of interim cash flows.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / **Question and data**

中文学习译文

3. 使用所给词语填空。计算ROIC时，独立分析师应将_____和_____相加以计算平均投入资本。ROIC与项目NPV和IRR_____，可以使用独立投资分析师能够取得的数据来计算。

备选词：相同；不同；权益；短期资产；长期资产；长期负债。

官方英文题目 · PDF 第145页

3. Complete the following sentences by filling in the blanks using the terms provided.

When calculating ROIC, an independent analyst should add _____ and _____ to calculating average invested capital. ROIC, _____ project NPV and IRR, can be calculated using data available to independent investment analysts.

like

unlike

equity

官方英文题目 · PDF 第146页 · 续

short-term assets

long-term assets

long-term liabilities

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

计算ROIC时，独立分析师应将权益和长期负债相加，以计算平均投入资本。ROIC与项目NPV和IRR不同，可以使用独立投资分析师能够取得的数据计算。

官方英文解析 · PDF 第146页

Solution:

When calculating ROIC, an independent analyst should add *equity* and *long-term liabilities* to calculate average invested capital. ROIC, *unlike* project NPV and IRR, can be calculated using data available to independent investment analysts.

补充解析 / **Supplementary explanation**

按本题采用的外部分析口径，以权益加长期负债估计投入资本，并使用期初与期末的平均值。ROIC由公开财务数据计算，而单个项目的完整未来现金流、风险与初始投资通常不对外披露，因此第二空选择unlike。实际分析中应说明投入资本调整口径。

Under the source's external-analysis convention, invested capital is estimated from equity plus long-term liabilities and averaged over beginning and ending balances. ROIC is observable from financial reports, whereas detailed project cash flows, risk, and investment costs are usually unavailable, so unlike completes the comparison. State any analytical adjustments explicitly.

相关知识点 / **Related concepts**

ROIC=税后净营业利润/平均投入资本；分子应与分母的资金范围保持一致。

ROIC＝net operating profit after tax/average invested capital; the numerator and funding scope must be consistent.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 146

题目与资料 / **Question and data**

中文学习译文

4. 解释为什么资本配置决策不应以每股收益（EPS）等会计指标为基础。

官方英文题目 · PDF 第146页

> 4. Explain why capital allocation decisions should *not* be based on accounting measures such as earnings per share (EPS).

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

具有正NPV的资本投资在短期内可能降低而非提高会计指标；相反，削减成本和回购股票可能改善这些指标。如果根据短期会计数字作投资决策，公司可能选择不符合股东长期利益的项目。资本配置还应考虑机会成本，例如在计算NPV时使用必要回报率，并对IRR采用适当的门槛回报率。会计利润不考虑机会成本。

官方英文解析 · PDF 第146页

> **Solution:**
>
> Capital investments with a positive NPV can reduce rather than increase accounting measures in the near term, while cost cutting and share buybacks, in contrast, may have a positive effect on such measures. Basing investment decisions on short-term accounting numbers can lead a company to choose investments that are not in the long-run interests of its shareholders. Additionally, capital allocation should consider opportunity costs, such as by using a required rate of return for calculating NPV and an appropriate hurdle rate for an IRR. Accounting profits do not consider opportunity costs.

补充解析 / **Supplementary explanation**

EPS的短期升降可能受折旧、费用确认和回购减少股数影响，并不直接等于项目创造的经济价值。正NPV项目可能先增加费用、后产生现金流；股数下降也能提高EPS而不必然创造等额价值。因此资本配置应考虑增量现金流、时点、风险和机会成本。

Near-term EPS reflects depreciation, expense timing, and changes in shares after buybacks, not simply economic value created. A positive-NPV investment may incur expenses before benefits arrive, while fewer shares can raise EPS without equivalent value creation. Evaluate incremental cash flows, timing, risk, and opportunity cost.

相关知识点 / **Related concepts**

会计利润缺少对所有资本机会成本的直接扣除；NPV将风险调整后的要求收益率纳入分析。

Accounting profit does not directly deduct all capital opportunity costs; NPV incorporates a risk-adjusted required return.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM05-SELF_ASSESSMENT-005

模块自测 · 第5题
Learning Module Self-Assessment · 5

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 146-147

题目与资料 / **Question and data**

中文学习译文

5. XYZ公司的年报包含以下披露：

披露1："XYZ管理层薪酬取决于是否超过目标EPS增长率。"

披露2："在评价资本项目时，XYZ管理层不会根据资金来自内部还是外部而改变必要回报率。"

披露3："评价投资项目时，XYZ使用经通胀调整的现金流编制预测，并使用实际利率折现。"

哪项披露的政策不符合资本配置最佳实践？

A. 披露1

B. 披露2

C. 披露3

官方英文题目 · PDF 第146页

5. The annual report of company XYZ contains the following disclosures:

Disclosure 1: "XYZ's management compensation is based on exceeding a target EPS growth rate."

Disclosure 2: "XYZ's management does not change the required rate of return when evaluating capital projects based on whether they are financed by internal or external sources."

Disclosure 3: "When evaluating investment projects, XYZ prepares cash-flow projections based on inflation-adjusted cash flows and discounts them using real rates."

Which of the disclosed policies does *not* conform to best practices regarding capital allocation?

A. Disclosure 1
B. Disclosure 2
C. Disclosure 3

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。正NPV项目虽然增加股东价值，却可能在短期内降低EPS。管理层薪酬应纳入长期视角，并使用更能考虑必要回报率的指标，例如ROIC。

B不正确，因为经营现金流等内部产生的资本属于权益融资，也可以作为股利返还权益投资者。无论资金来源如何，管理层都应使用适当的、经风险调整的必要回报率评价资本投资。

C不正确，因为分析可以按名义口径或实际口径进行，但现金流与折现率必须一致：名义现金流以名义折现率折现，实际（经通胀调整的）现金流以实际利率折现。

官方英文解析 · PDF 第146页

Solution:

A is correct. Positive-NPV investment projects can reduce, rather than increase, EPS in the near term, even though they increase shareholder value. Management compensation should incorporate a longer-term perspective and a measure that better considers required rates of return, such as ROIC.

B is incorrect because internally generated capital, such as cash flow from operations, is equity financing and it could be returned to equity investors as a dividend. Regardless of the financing source, management should use appropriate risk-adjusted required rates of return to evaluate capital investments.

官方英文解析 · PDF 第147页 · 续

C is incorrect because companies may perform analysis in either nominal or real terms, but the approach to cash flows and the discount rate should be consistent. That is, nominal cash flows should be discounted at a nominal discount rate, and real (inflation-adjusted) cash flows should be discounted at a real rate.

补充解析 / **Supplementary explanation**

A的问题是把薪酬绑定短期EPS增长，可能诱发牺牲长期正NPV投资。内部资金同样属于股东可获得的资本，不能视为免费，因此B符合原则。C把实际现金流与实际利率配对也一致；只有把名义与实际口径混用才会扭曲估值。

A can reward near-term EPS at the expense of long-term positive-NPV investment. Internal funds also belong economically to shareholders and are not free, so B is appropriate. C consistently pairs real cash flows with a real discount rate; mixing nominal and real conventions would distort valuation.

相关知识点 / **Related concepts**

名义现金流配名义折现率；实际现金流配实际折现率。融资来源不消除机会成本。

Discount nominal cash flows at nominal rates and real cash flows at real rates. Funding source does not remove opportunity cost.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / Question and data

中文学习译文

6. 解释什么是实物期权，以及它们如何影响公司价值。

官方英文题目 · PDF 第147页

> 6. Explain what real options are and how they influence company value.

官方答案与解析 / Official answer and explanation

官方英文解析的中文学习译文

实物期权类似金融期权，但涉及的是实物资产而非金融资产。实物期权赋予公司未来作出某项决定的权利，而非义务；该决定会改变今天所作资本投资决策的价值。实物期权提供未来决策灵活性，因而可能构成许多资本投资价值的重要部分。

官方英文解析 · PDF 第147页

> **Solution:**
> Real options are similar to financial options, except that they deal with real, instead of financial, assets. Real options grant companies the right to make a decision (but do not impose an obligation) in the future that alters the value of capital investment decisions made today. Real options, by providing future decision-making flexibility to companies, can be an important piece of the value in many capital investments.

补充解析 / Supplementary explanation

实物期权的价值来自未来获得信息后仍可调整决策，例如延迟、扩大、缩小或放弃。它给予权利而非强制义务，因此不应把所有可选后续支出一律当成必然支出。不过取得和保留灵活性可能有成本，项目总价值须考虑这些成本。

Real-option value comes from adapting after learning more, for example by waiting, expanding, scaling down, or abandoning. A right is not an obligation, so optional future outlays should not automatically be treated as mandatory. Obtaining and preserving flexibility can itself cost money, which belongs in total project value.

相关知识点 / Related concepts

实物期权关联真实资产和管理灵活性；评估依赖不确定性、决策期限、执行成本与可替代选择。

Real options concern real assets and managerial flexibility; value depends on uncertainty, decision horizons, exercise costs, and alternatives.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM05-WORKED_CASE-001

遵守反洗钱法规
Complying with Anti-Money-Laundering Regulations

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 150

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

遵守反洗钱法规

Complying with Anti-Money-Laundering Regulations

官方答案与解析 / **Official answer and explanation**

丹麦最大的金融机构丹斯克银行（Danske Bank A/S，简称 Danske）在收到举报人的报告和集团内部审计部门的审计函后，面临大规模反洗钱调查。

Danske Bank A/S ("Danske"), the largest financial institution in Denmark, is subject to a large anti-money-laundering investigation after a report from a whistle blower and audit letters from Group Internal Audit.

丹斯克在新闻稿中承认："控制和治理方面的重大缺陷，使犯罪分子得以利用丹斯克银行的爱沙尼亚分行从事洗钱等犯罪活动。"

Danske acknowledged in a press release that "major deficiencies in controls and governance made it possible to use Danske Bank's branch in Estonia for criminal activities, such as money laundering."

对丹斯克反洗钱政策的审查导致其首席执行官辞职、爱沙尼亚分行关闭，以及多名员工被捕。

The examination of Danske's anti-money-laundering policies resulted in the resignation of its CEO, the closure of the Estonian branch, and the arrests of multiple employees.

丹斯克还预计将向美国、丹麦及其他欧洲国家的金融监管机构支付最高数十亿美元的罚款。

Danske is also expected to pay fines of up to several billion dollars to financial regulators in the United States, Denmark, and other European countries.

这一丑闻不仅影响了丹斯克，也促使丹麦提高了对洗钱行为的处罚力度。

The scandal not only had an impact on Danske but also resulted in increasing penalties for money laundering in Denmark.

监管合规项目虽然可能成本高昂，却能防止丑闻，避免罚款和诉讼所造成的损失及声誉损害。

While regulatory compliance projects can be costly, they can prevent scandals and losses from fines and legal proceedings that damage firms' reputations.

补充解析 / **Supplementary explanation**

补充思路：项目分类取决于主要目的：满足监管要求属于合规投入，降低现有业务成本属于维护或效率改进，拓展现有业务与进入新产品或新市场的风险不同。分类先于估值，可以帮助确定现金流范围、风险和替代方案。合规项目的必要性不等于可跳过成本比较，应在满足要求的可行方案中评价。

Additional reasoning: Classify a project by its principal purpose. Regulatory requirements motivate compliance, efficiency spending improves existing operations, and expansion differs from entering a new product or market. Classification helps frame cash flows, risk, and alternatives before valuation. Mandatory compliance still permits cost comparison among feasible compliant approaches.

相关知识点 / **Related concepts**

资本项目的目的与分类：资本预算以增量现金流为基础；项目类型影响不确定性和替代方案，但不改变现金流应按风险和时间价值折现的原则。

Purpose and classification of capital projects: Capital budgeting uses incremental cash flows. Project type changes uncertainty and alternatives, not the need to discount for risk and time value.

索尼扩张游戏业务
Sony Grows Gaming Business

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 151

题目与资料 / **Question and data**

例题 2

EXAMPLE 2

索尼扩张游戏业务

Sony Grows Gaming Business

官方答案与解析 / **Official answer and explanation**

索尼互动娱乐（Sony Interactive Entertainment，SIE）是一家全球领先的电子游戏和数字娱乐公司，隶属于日本跨国综合企业索尼。

Sony Interactive Entertainment (“SIE”) is a global, leading video game and digital entertainment company owned by Japanese multinational conglomerate Sony.

SIE 从事 PlayStation 游戏机硬件和软件的研发、生产和销售。

SIE conducts the research and development, production, and sales of both hardware and software for the PlayStation console.

2022 年 1 月，SIE 宣布将以 36 亿美元收购 Bungie Inc.。

In January 2022, SIE announced it would acquire Bungie Inc. (“Bungie”) for $3.6 billion.

Bungie 是一家美国独立电子游戏开发商，也是 SIE 的长期合作伙伴，开发了《光环》《神话》和《命运》等电子游戏行业备受赞誉的系列作品。

Bungie is a US-based independent videogame developer and long- time partner of SIE that has created some of the videogame industry’s most highly acclaimed franchises, including Halo, Myth, and Destiny.

SIE 在新闻稿中概括了这项收购如何拓展其业务：“此次收购将使 SIE 获得 Bungie 在持续运营游戏服务方面的世界级方法及技术专长，进一步推动 SIE 触达数十亿玩家的愿景。”

In the press release, SIE summarized how the acquisition would expand its business: “This acquisition will give SIE access to Bungie’s world-class approach to live game services and technology expertise, furthering SIE’s vision to reach billions of players.”

补充解析 / **Supplementary explanation**

项目分类取决于主要目的：满足监管要求属于合规投入，降低现有业务成本属于维护或效率改进，拓展现有业务与进入新产品或新市场的风险不同。分类先于估值，可以帮助确定现金流范围、风险和替代方案。合规项目的必要性不等于可跳过成本比较，应在满足要求的可行方案中评价。

Classify a project by its principal purpose. Regulatory requirements motivate compliance, efficiency spending improves existing operations, and expansion differs from entering a new product or market. Classification helps frame cash flows, risk, and alternatives before valuation. Mandatory compliance still permits cost comparison among feasible compliant approaches.

相关知识点 / **Related concepts**

资本项目的目的与分类：资本预算以增量现金流为基础；项目类型影响不确定性和替代方案，但不改变现金流应按风险和时间价值折现的原则。

Purpose and classification of capital projects: Capital budgeting uses incremental cash flows. Project type changes uncertainty and alternatives, not the need to discount for risk and time value.

CI-LM05-WORKED_CASE-003

麒麟进入新市场
Kirin Enters New Market

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 152

题目与资料 / **Question and data**

例题 3

EXAMPLE 3

麒麟进入新市场

Kirin Enters New Market

官方答案与解析 / **Official answer and explanation**

麒麟控股（Kirin Holding，简称麒麟）是一家综合饮料生产商，也是日本第二大啤酒酿造商。

Kirin Holding (“Kirin”) is an integrated beverage producer and the second largest brewer in Japan.

其主要品牌包括麒麟一番榨、本麒麟等酒精饮料，以及麒麟午后红茶和生茶等软饮料。

Kirin’s top brands include both alcoholic beverages, such as Kirin Ichiban and Honkirin, and soft drinks, such as Kirin Gogo-no-Kocha and Nama-cha.

2019 年 9 月，麒麟投资 1,290 亿日元，成为日本化妆品和膳食补充剂生产商 Fancl Corp.（芳珂）的主要股东。

In September 2019, Kirin invested ¥129 billion to become a top shareholder of Fancl Corp. (“Fancl”), a Japanese cosmetics and dietary supplement maker.

芳珂作为补充剂市场的先行者，拥有超过 25 年的经验，并在功能声称食品领域处于市场领先地位。

Fancl has more than 25 years of experience as a pioneer in the supplement market and is a market leader in foods with functional claims.

双方希望将各自的研发能力与强势品牌相结合，提供广泛的产品。

Both companies want to combine their research and development capabilities with their strong brands to offer a wide range of products.

补充解析 / **Supplementary explanation**

补充思路：项目分类取决于主要目的：满足监管要求属于合规投入，降低现有业务成本属于维护或效率改进，拓展现有业务与进入新产品或新市场的风险不同。分类先于估值，可以帮助确定现金流范围、风险和替代方案。合规项目的必要性不等于可跳过成本比较，应在满足要求的可行方案中评价。

Additional reasoning: Classify a project by its principal purpose. Regulatory requirements motivate compliance, efficiency spending improves existing operations, and expansion differs from entering a new product or market. Classification helps frame cash flows, risk, and alternatives before valuation. Mandatory compliance still permits cost comparison among feasible compliant approaches.

已经发生且不可收回的研究费用是沉没成本；新项目挤占现有产品收入则是增量机会成本。把前者排除、后者纳入，才能得到与决策有关的现金流。

Already-incurred, unrecoverable research is sunk; cannibalization of existing sales is an incremental opportunity cost. Exclude the former and include the latter to measure decision-relevant cash flows.

相关知识点 / **Related concepts**

资本项目的目的与分类：资本预算以增量现金流为基础；项目类型影响不确定性和替代方案，但不改变现金流应按风险和时间价值折现的原则。

Purpose and classification of capital projects: Capital budgeting uses incremental cash flows. Project type changes uncertainty and alternatives, not the need to discount for risk and time value.

原教材为连贯讲解型案例，没有独立设问及答案分栏；保留官方案例与演示，未另造题目。

QUESTION SET

1. 将以下资本项目实例与项目类型配对。

1. Match the following examples of capital projects with type of the project.

■ 项目 1：一家办公设备生产商决定开发面向游戏玩家的新电脑外设产品线。

■ Project 1: An office equipment producer decides to develop a new line of computer peripherals intended for gamers.

■ 项目 2：一家轮胎生产商决定投资太阳能电池板生产，以获得政府补贴。

■ Project 2: A tire producer decides to invest in solar panel production to benefit from government subsidies.

■ 项目 3：一家全球性银行将本地数据存储迁移至云存储，以提高成本效率。

■ Project 3: A global bank migrates its on-site data storage to cloud computing data storage to improve its cost efficiency.

■ 项目 4：一家物业管理公司开展新资本项目，在所有办公楼安装先进通风系统，以满足更严格的空气污染法规。

■ Project 4: A property management company undertakes a new capital project intended to install an advanced ventilation system in all its office buildings to meet stricter air pollution regulations.

资本项目分类填写表。项目类型依次为扩张现有业务、持续经营 / 维护、监管或合规，以及新业务及其他。请填写对应资本项目。

Project Type	Capital Project
Expansion of existing business	
Going concern/maintenance	
Regulatory or compliance	
New lines of business and other	

原 PDF 第 152 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

资本项目分类答案。

扩张现有业务：项目 1，旨在扩大公司现有经营规模并获取新客户。

持续经营 / 维护：项目 3，使银行能够使用效率更高的技术继续现有经营。

Project Type	Capital Project
Expansion of existing business	Project 1, because it aims to increase the size of a firm's existing operations and acquire new customers
Going concern/maintenance	Project 3, which allows the bank to continue its current operations using more efficient technology

原 PDF 第 152 页 · 完整表格 · 300 dpi

资本项目分类答案（续）。

监管或合规：项目 4。与管理层自主决定的项目不同，该项目是为了遵守空气污染法规。

新业务及其他：项目 2，投资进入与公司现有业务无关的新市场。

Project Type	Capital Project
Regulatory or compliance	Project 4, because unlike projects based on management discretion, this project is to comply with air pollution regulations.
New lines of business and other	Project 2, which is an investment into a new market not related to the company's existing business

原 PDF 第 153 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：项目分类取决于主要目的：满足监管要求属于合规投入，降低现有业务成本属于维护或效率改进，拓展现有业务与进入新产品或新市场的风险不同。分类先于估值，可以帮助确定现金流范围、风险和替代方案。合规项目的必要性不等于可跳过成本比较，应在满足要求的可行方案中评价。

Additional reasoning: Classify a project by its principal purpose. Classification helps frame cash flows, risk, and alternatives before valuation. Mandatory compliance still permits cost comparison among feasible compliant approaches.

相关知识点 / **Related concepts**

资本项目的目的与分类：资本预算以增量现金流为基础；项目类型影响不确定性和替代方案，但不改变现金流应按风险和时间价值折现的原则。

Purpose and classification of capital projects: Capital budgeting uses incremental cash flows. Project type changes uncertainty and alternatives, not the need to discount for risk and time value.

CI-LM05-QUESTION_SET-402

习题组 · 第 2 题
Question set · 2

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 152-153

题目与资料 / **Question and data**

练习题组

QUESTION SET

2. 关于资本配置流程，以下哪项说法正确？

2. It is true that the capital allocation process:

A. 涉及使用大量公司专有的非公开信息。

A. involves the use of significant proprietary, non-public information about a company.

B. 旨在识别未经风险调整的绝对收益率最高的项目。

B. aims at identifying projects with the highest absolute non-risk-adjusted rate of returns.

C. 与构建投资管理组合的流程相比，使用的信息更少。

C. uses less information compared to the process used to construct investment management portfolios.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

资本配置流程是企业管理层和董事会同时根据内部非公开信息及公开信息进行资本投资的过程。

The capital allocation process is the process used by a firm’s management and board to make capital investment based on both internal, non-public and public information.

这一流程与投资者和分析师构建投资管理组合的流程大体相似，但细节更加具体，也更接近实时，因为内部人员不必等待季度业绩报告。

The process is substantially similar to those used by investors and analysts constructing investment management portfolios but occurs at a more granular level of detail and more in “real time” because insiders do not need to wait for quarterly earnings reports.

B 错误，因为资本配置流程的目的是让企业管理层实现优于其他同等风险投资的风险调整后回报。

B is incorrect because the capital allocation process is used by a firm’s management to deliver superior risk-adjusted returns, when compared to similarly risky investments.

C 错误，因为资本配置流程比构建投资管理组合的流程更加细致。

C is incorrect because the capital allocation process is more granular compared to the process used to construct investment management portfolios.

资本配置侧重识别有利可图的项目，并利用专有信息。

The capital allocation process focuses on identifying profitable projects and utilizes proprietary information.

构建投资组合的流程则使用公开信息及非重大非公开信息，通常停留在公司和业务分部层面。

The process used to construct investment portfolios involves public information and non-material, non-public information, often at the company and segment level.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

The official choice for this item is A. Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

练习题组

QUESTION SET

3. 哪类资本配置项目即使估计 NPV 为负，也最可能实施？

3. What type of capital allocation project will most likely be implemented even if it has a negative estimated NPV?

A. 新业务及其他

A. New lines of business and other

B. 扩张现有业务

B. Expansion of existing business

C. 监管或合规。

C. Regulatory or compliance

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

监管合规项目由政府监管机构等第三方要求实施，目的是满足规则和标准，并避免罚款或其他法律后果。

Regulatory compliance projects are required by third parties, such as government regulatory bodies, to meet rules and standards and to avoid fines or other legal consequences.

A 和 B 错误，因为新业务及其他项目、以及扩张现有业务的项目，均由管理层自主决定；如果估计 NPV 为负，通常不会实施。

A and B are incorrect because new lines of business and other as well as expansion of existing business projects are done at management's discretion and would generally not be pursued if they were estimated to have a negative NPV.

补充解析 / **Supplementary explanation**

合规投资可能因法律或监管要求必须实施，即使单独估计NPV为负。决策应比较遵守要求的可行方案，并考虑避免罚款、停业或失去许可证的价值。扩展现有业务和进入新业务通常由管理层自主选择，负NPV时一般不应实施。

A compliance investment may be mandatory even when its standalone estimated NPV is negative. Compare feasible compliant alternatives and the value of avoiding fines, shutdowns, or loss of licenses. Expansion and new-business projects are normally discretionary and generally rejected when NPV is negative.

相关知识点 / **Related concepts**

强制合规项目与自主增长项目的约束不同；仍需比较合规替代方案。

Mandatory compliance and discretionary growth face different constraints; compliant alternatives still require evaluation.

CI-LM05-EXAMPLE-501

例题 4 · 第 1 题：Gerhardt 公司的 NPV
Example 4 · 1 — Gerhardt Corporation NPV

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 156

题目与资料 / **Question and data**

例题 4

EXAMPLE 4

Gerhardt 公司的 NPV

Gerhardt Corporation NPV

1. 假设 Gerhardt 公司正在考虑今天投入5,000 万欧元进行一项资本投资，预计未来四年每年带来 1,600 万欧元税后现金流，第五年另带来 2,000 万欧元。若要求收益率为 10%，这项投资的 NPV 是多少？

1. Assume that Gerhardt Corporation is considering a capital investment of €50 million today that is expected to return after-tax cash flows of €16 million per year for the next four years plus another €20 million in Year 5. If the required rate of return is 10%, what is the NPV of this investment?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

使用公式 1，可按下式求出 NPV：

Using Equation 1, we may solve for the NPV as follows:

$$\text{NPV} = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_2}{(1+r)^2} + \ldots + \frac{CF_T}{(1+r)^T}.$$

$$\text{NPV} = -50 + \frac{16}{(1+0.10)^1} + \frac{16}{(1+0.10)^2} + \frac{16}{(1+0.10)^3} + \frac{16}{(1+0.10)^4} + \frac{20}{(1+0.10)^5}.$$

$$\text{NPV} = -50 + 63.136 = 13.136.$$

原 PDF 第 156 页 · 共享公式 · 300 dpi

公司今天可以用 5,000 万欧元取得这项投资，也就是说，用今天的 5,000 万欧元换取一项价值 6,313.6 万欧元的投资。

Since this investment may be acquired today at a cost of €50 million, the company exchanges €50 million today for an investment worth €63.136 million.

该投资使公司财富的现值净增加 1,313.6 万欧元。

The investment increases the present value of the firm's wealth by a net amount of €13.136 million.

也可以在 Microsoft Excel 或 Google Sheets 中使用 NPV 函数求解：

This can also be solved in Microsoft Excel or Google Sheets using the NPV function:

电子表格 NPV 函数的调用格式。

$$=\text{NPV(rate,value1,value2,…)}$$

原 PDF 第 156 页 · 共享公式 · 300 dpi

其中：

where

rate 表示要求收益率；value(s) 表示各笔税后现金流。

$$\begin{aligned} \textit{rate} &= \text{Required rate of return} \\ \textit{value(s)} &= \text{After-tax cash flows} \end{aligned}$$

原 PDF 第 156 页 · 共享公式 · 300 dpi

请注意，NPV 函数把第一笔现金流视为发生于 t = 1，而不是 t = 0，并假设现金流的时间间隔相等。

Note that the NPV function uses $t = 1$ for the first cash flow, not $t = 0$, and assumes cash flows are evenly spaced.

因此，t = 0 的现金流（本例为 –50）必须在函数之外单独相加或相减。

Therefore, cash flows at $t = 0$ (in this case, –50) need to be subtracted or added outside the function.

本例的正确输入为：

The proper argument here is

$$\begin{aligned} &= \text{NPV}(0.10, 16, 16, 16, 16, 20) - 50 \\ &= 13.136. \end{aligned}$$

原 PDF 第 156 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = $\Sigma CF_t/(1+r)^t$ − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

CI-LM05-EXAMPLE-601

例题 5 · 第 1 题：Gerhardt 公司的 NPV（二）
Example 5 · 1 — Gerhardt Corporation NPV II

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 157-158

题目与资料 / **Question and data**

例题 5

EXAMPLE 5

Gerhardt 公司的 NPV（二）

Gerhardt Corporation NPV II

假设 Gerhardt 公司考虑今天进行 5,000 万欧元资本投资，预计未来五年的现金流时间表如下，所有金额均以百万欧元计。

Assume that Gerhardt Corporation is considering a capital investment of €50 million today with the following estimated cash flow schedule over the next five years (all amounts in millions of euros).

现金流时间表：首行为时间，第二行为相应现金流；含非整数时点 1.5。

t	0	1	1.5	2	3	4	5
Cash flow	−50	10	-5	13	16	19	23

原 PDF 第 157 页 · 完整表格 · 300 dpi

1. 若要求收益率为 10%，这项投资的 NPV 是多少？Gerhardt 是否应该投资？

1. If the required rate of return is 10%, what is the NPV of this investment and should Gerhardt make the investment?

> 官方答案与解析 / **Official answer and explanation**

答案：

Solution:

使用公式 1，可按下式求出 NPV：

Using Equation 1, we may solve for the NPV as follows:

$$\text{NPV} = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_2}{(1+r)^2} + \ldots + \frac{CF_T}{(1+r)^T}.$$

$$\text{NPV} = -50 + \frac{10}{(1+0.10)^1} + \frac{-5}{(1+0.10)^{1.5}} + \frac{13}{(1+0.10)^2} + \frac{16}{(1+0.10)^3} + \frac{19}{(1+0.10)^4} + \frac{23}{(1+0.10)^5}.$$

$$\text{NPV} = 4.78.$$

原 PDF 第 158 页 · 共享公式 · 300 dpi

由于 NPV ≥ 0，Gerhardt 应当投资。

Since the NPV $\geq$ 0, Gerhardt should make the investment.

也可以在 Microsoft Excel 或 Google Sheets 中使用 XNPV 函数求解。

This problem can also be solved in Microsoft Excel or Google Sheets using the XNPV function.

XNPV 函数的语法如下：

The XNPV function syntax is as follows:

电子表格 XNPV 函数的调用格式。

```
=XNPV(rate,values,dates)
```

原 PDF 第 158 页 · 共享公式 · 300 dpi

其中：

where

rate 表示要求收益率；values 表示各日期的税后现金流；dates 表示各笔税后现金流的日期。若题目没有指定确切日期，可自行选定日期，但各日期之间的时间间隔必须准确。

rate = Required rate of return

values = After-tax cash flows at each date

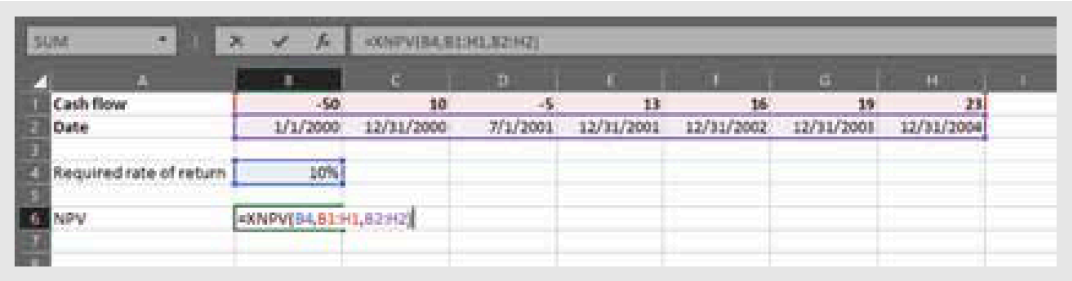

dates = Date of each after-tax cash flow (for a problem like this without exact dates, the dates are arbitrary; what matters is that they are accurately spaced)

原 PDF 第 158 页 · 共享公式 · 300 dpi

最清晰的函数输入方式，是引用电子表格中一一对应的现金流数组和日期数组，如下所示：

The function is most clearly specified by referencing cash flow and date arrays that are aligned on a spreadsheet, as shown here:

电子表格中的 XNPV 函数示例。行项目为现金流、日期、要求收益率及净现值；按照实际日期间隔，引用对应现金流和日期区域计算。函数及单元格引用见原截图。

原 PDF 第 158 页 · 完整图示 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = $\Sigma CF_t/(1+r)^t$ − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

CI-LM05-EXAMPLE-701

例题 6 · 第 1 题：Gerhardt 公司的 IRR
Example 6 · 1 — Gerhardt Corporation IRR

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 158-159

题目与资料 / **Question and data**

例题 6

EXAMPLE 6

Gerhardt 公司的 IRR

Gerhardt Corporation IRR

1. 假设 Gerhardt 公司正在考虑今天投入5,000 万欧元进行一项资本投资，预计未来四年每年产生 1,600 万欧元税后现金流，第五年另产生 2,000 万欧元。这项投资的 IRR 是多少？

1. Assume that Gerhardt Corporation is considering a capital investment of €50 million today that is expected to return after-tax cash flows of €16 million per year for the next four years plus another €20 million in Year 5. What is the IRR of this investment?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

回顾公式 1，NPV 为：

Recall from Equation 1 that the NPV is

$$\text{NPV} = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_2}{(1+r)^2} + \frac{CF_T}{(1+r)^T}$$

原 PDF 第 159 页 · 共享公式 · 300 dpi

IRR 就是使 NPV 等于零的折现率 r。

The IRR is the discount rate, r, that makes the NPV equal to zero.

换言之：

In other words,

$$\text{NPV} = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_2}{(1+r)^2} + \frac{CF_T}{(1+r)^T}$$

$$0 = -50 + \frac{16}{(1+\text{IRR})^1} + \frac{16}{(1+\text{IRR})^2} + \frac{16}{(1+\text{IRR})^3} + \frac{16}{(1+\text{IRR})^4} + \frac{20}{(1+\text{IRR})^5}$$

原 PDF 第 159 页 · 共享公式 · 300 dpi

除了试错法，Microsoft Excel 和 Google Sheets 的 IRR 函数也是一种直接的求解方法。

Besides trial and error, the IRR function in Microsoft Excel and Google Sheets is a straightforward approach to solving this problem.

IRR 函数语法为：

The IRR function syntax is

电子表格 IRR 函数的调用格式。

```
=IRR(values,[guess])
```

原 PDF 第 159 页 · 共享公式 · 300 dpi

其中：

where

values 表示税后现金流；[guess] 是使用者可选的 IRR 初始猜测值，默认值为 10%。

values = After-tax cash flows

[guess] = An optional user-specified guess for the IRR (the default is 10%)

原 PDF 第 159 页 · 共享公式 · 300 dpi

与 NPV 函数一样，IRR 函数假定现金流在每期期末收取或支付，且各期间等距。

Importantly, like the NPV function, the IRR function assumes that cash flows are received or paid at the end of period and that each period is evenly spaced.

但它与 NPV 函数不同，并不假定第一笔现金流发生在 t = 1，因此本例只需输入：

Unlike the NPV function, it does not assume that the first cash flow is at t = 1, so the argument here is simply

= IRR (–50, 16, 16, 16, 16, 20)

= 0.1952, or 19.52%.

原 PDF 第 159 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = $\Sigma CF_t/(1+r)^t$ − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

CI-LM05-EXAMPLE-801

例题 7 · 第 1 题：Gerhardt 公司的 IRR（三）
Example 7 · 1 — Gerhardt Corporation IRR III

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 160

题目与资料 / **Question and data**

例题 7

EXAMPLE 7

Gerhardt 公司的 IRR（三）

Gerhardt Corporation IRR III

1. 假设 Gerhardt 公司正在考虑今天投入5,000 万欧元进行一项资本投资，预计未来五年的现金流时间表如下，所有金额均以百万欧元计。

1. Assume that Gerhardt Corporation is considering a capital investment of €50 million today with the following estimated cash flow schedule over the next five years (all amounts in millions of euros).

Gerhardt 公司内部收益率 III 的现金流时间表，金额单位为百万欧元。首行为时间，第二行为现金流；包含第 2.5 年的非整数时点。

t	0	1	2	2.5	3	4	5
Cash flow	−50	0	1	3	16	20	25

原 PDF 第 160 页 · 完整表格 · 300 dpi

这项投资的 IRR 是多少？若 Gerhardt 的要求收益率为 10%，它是否应进行该项投资？

What is the IRR of this investment, and should Gerhardt make the investment if its required rate of return is 10%?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

可以使用 Microsoft Excel 或 Google Sheets 中的 XIRR 函数求解。

This problem can be solved in Microsoft Excel or Google Sheets using the XIRR function.

XIRR 函数的语法如下：

The XIRR function syntax is as follows:

XIRR 函数语法：按各笔现金流的实际日期计算内部收益率，参数顺序见下方共享公式。

$$=XIRR(values,dates,[guess])$$

原 PDF 第 160 页 · 共享公式 · 300 dpi

其中：

where

XIRR 参数说明。

values：各日期的税后现金流。

dates：每笔税后现金流的日期。对于本题这类未给出确切日期的问题，可以任意设定日期，但必须准确保持各日期之间的时间间隔。

[guess]：用户可选的内部收益率初始猜测值，默认值为 10%。

$$values = \text{After-tax cash flows at each date}$$

$$dates = \text{Date of each after-tax cash flow (for a problem like this without exact dates, the dates are arbitrary; what matters is that they are accurately spaced)}$$

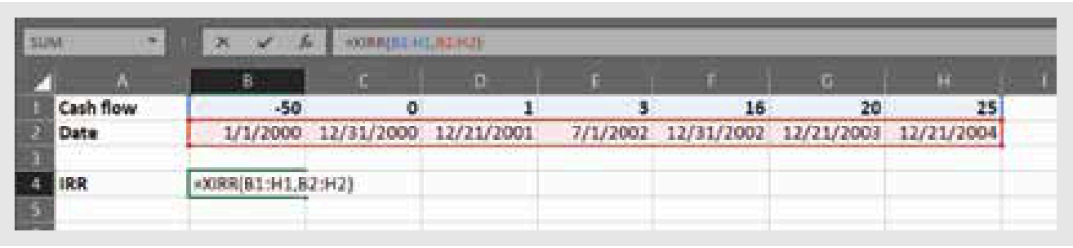

$$[guess] = \text{An optional user-specified guess for the IRR (the default is 10\%)}$$

原 PDF 第 160 页 · 共享公式 · 300 dpi

最清晰的函数输入方式，是引用电子表格中一一对应的现金流数组和日期数组，如下所示：

The function is most clearly specified by referencing cash flow and date arrays that are aligned on a spreadsheet, as shown here:

电子表格中的 XIRR 函数示例。行项目分别为现金流、日期及内部收益率；函数引用相互对应的现金流区域和日期区域，处理不等间隔的现金流。完整单元格引用见原截图。

原 PDF 第 160 页 · 完整图示 · 300 dpi

IRR 为 6.76%，低于 Gerhardt 的要求收益率 10%，因此不应投资该项目。

The IRR is 6.76%, which is below Gerhardt's required rate of return of 10%, so it should not invest in this project.

> 补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV $= \Sigma CF_t/(1+r)^t -$ initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

CI-LM05-EXAMPLE-901

例题 8 · 第 1 题：投入资本回报率
Example 8 · 1 — Return on Invested Capital

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 161-162

题目与资料 / **Question and data**

例题 8

EXAMPLE 8

投入资本回报率

Return on Invested Capital

假设一家发行人报告第二年税后经营利润为 24,395，并披露以下资产负债表信息。

Assume that a corporate issuer reported 24,395 in Year 2 after-tax operating profits and the following balance sheet information.

第 1 年末与第 2 年末的资产负债表。

资产项目：现金、短期资产、长期资产及资产总额。负债与权益项目：应付账款、短期债务、长期债务、股本、留存收益，以及负债和权益总额。

Assets:	End of Year 1	End of Year 2
Cash	4,364	6,802
Short-term assets	40,529	52,352
Long-term assets	287,857	279,769
Total assets	332,750	338,923

Liabilities and Equity:	End of Year 1	End of Year 2
Accounts payable	35,221	50,766
Short-term debt	21,142	5,877
Long-term debt	112,257	106,597
Share capital	15,688	15,688
Retained earnings	148,442	159,995
Total liabilities and equity	332,750	338,923

原 PDF 第 162 页 · 完整表格 · 300 dpi

1. 计算第二年的 ROIC。

1. Calculate ROIC for Year 2.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

第二年投入资本回报率的计算；税后经营利润除以前后两期长期负债和权益资本的平均金额。

$$\text{ROIC} = \frac{\text{After-tax operating profit}_t}{\text{Average LT liabilities and equity capital}_{t-1,t}}$$

$$\text{ROIC} = \frac{24,395}{\frac{(112,257 + 15,688 + 148,442) + (106,597 + 15,688 + 159,995)}{2}}$$

$$\text{ROIC} = 8.73\%.$$

原 PDF 第 162 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

CI-LM05-EXAMPLE-902

例题 8 · 第 2 题：投入资本回报率

2. 若投资者的要求收益率为 10%，该公司是否是有前景的投资对象？

2. If an investor has a required rate of return of 10%, is this company a promising investment candidate?

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

不是。虽然公司盈利，但其 ROIC 低于投资者的要求收益率，因此投资者应寻找其他投资。不过，这只是历史上的一个年度，投资者仍须考虑许多其他因素。

No. Although the company is profitable, the company's ROIC is below the investors' required rate of return, so the investor should look to invest elsewhere. However, this is only a single historical year, and myriad other factors will have to be considered by the investor.

补充解析 / **Supplementary explanation**

补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

QUESTION SET

1. 判断正误：在资本配置流程的规划与排序步骤中，管理层应接受所有估计 NPV 为正的投资项目。

1. True or false. During the planning and prioritization step in the capital allocation process, a firm's management should accept any investment project with an estimated positive NPV.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

错误。某些单独看有吸引力的项目，如果结合现有经营、其他拟议项目、ESG 因素或融资约束考虑，可能就不那么理想。

False. Some projects that appear attractive in isolation may be less desirable when considered in the context of existing operations, other proposed projects, ESG factors, or financing constraints.

补充解析 / **Supplementary explanation**

补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

QUESTION SET

2. 资本配置流程的哪一步最可能涉及 NPV 和 IRR 计算？

2. Which step in the capital allocation process most likely involves the calculation of NPV and IRR?

A. 产生创意

A. Idea generation

B. 投资分析

B. Investment analysis

C. 规划与排序。

C. Planning and prioritization

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

投资分析包括预测预期现金流的金额、时间、持续期限和波动性，然后利用 NPV 和 IRR 判断该投资是否属于明智的资本运用。

The investment analysis step involves forecasting the amount, timing, duration, and volatility of an investment's expected cash flows and subsequently using NPV and IRR to determine whether the investment will be a wise use of capital.

A 错误，因为产生创意阶段，管理层收集想法并选择最有前景的方案作进一步分析。

A is incorrect because during the idea generation step, management gathers ideas and chooses the most promising ones for further analysis.

在这一早期阶段，还没有进行涉及 NPV 或 IRR 的预测和盈利能力分析。

However, in this early phase, no forecasts or profitability analysis involving NPV or IRR is conducted.

C 错误，因为规划与排序阶段，管理层选择有利可图的投资机会并排定优先顺序，使它们合在一起在风险调整后回报的基础上最大程度增加价值。

C is incorrect because during the planning and prioritization step, management selects and prioritizes profitable investment opportunities that, when considered together, are the most value enhancing on a risk-adjusted return basis.

这一步发生在 NPV 和 IRR 分析之后。

This step occurs after NPV and IRR analysis.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

The official choice for this item is B. Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

其他条件相同时，将正现金流提前会提高现值，推迟会降低现值。比较 NPV 或 IRR 前，先将各期现金流放在同一时间轴，避免只看未折现总额。

Other things equal, earlier positive cash flows have higher present value and later ones lower value. Put all flows on one timeline before comparing NPV or IRR instead of relying on undiscounted totals.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV $= \Sigma CF_t/(1+r)^t -$ initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

题目与资料 / **Question and data**

练习题组

QUESTION SET

3. 以下哪项关系正确？

3. Which of the following relationships is true?

A. 若 IRR > 要求收益率，则 NPV < 0。

A. If IRR $>$ Required rate of return, then NPV $<$ 0.

B. 若 IRR = 要求收益率，则 NPV = 0。

B. If IRR $=$ Required rate of return, then NPV $=$ 0.

C. 要求收益率 = 无风险利率。

C. Required rate of return $=$ Risk-free rate.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

IRR 是使投资 NPV 等于零的要求收益率。

IRR is the required rate of return that makes an investment's NPV equal to zero.

A 错误，因为 IRR 是令 NPV = 0 的要求收益率。

A is incorrect because IRR is the required rate of return for which NPV $=$ 0.

若 IRR 高于要求收益率，则按要求收益率折现的现金流 NPV 将大于零，而非小于零。

If IRR is greater than the required rate of return, then NPV of cash flows discounted at the required rate of return will be greater than zero, not less than zero.

C 错误，因为计算 NPV 时，预期现金流应按要求收益率折现，以反映投资者在同等风险项目中的机会成本，而不应使用忽略风险的利率。

C is incorrect because when calculating NPV, expected cash flows should be discounted at the required rate of return to reflect investors' opportunity cost for similarly risky projects, not a rate that ignores risk.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

The official choice for this item is B. Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

4. 一家公司考虑实施一项新资本投资项目，预计成本为 3,300 万美元。未来四年的税后现金流预测如下。假设要求收益率为 7.5%，计算 NPV 和 IRR。

4. A company is considering undertaking a new capital investment project that is expected to cost $33 million. The after-tax cash-flow projection for the next four years is shown below. Calculate NPV and IRR assuming a required rate of return of 7.5%.

第 1—4 年现金流时间表。首行为年份，第二行为相应现金流。

Year	1	2	3	4
Cash flow	0	16	24	7

原 PDF 第 165 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

使用以下方程计算 NPV：

To calculate NPV, we use the following equation:

$$\text{NPV} = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_2}{(1+r)^2} + \ldots + \frac{CF_T}{(1+r)^T}.$$

$$\text{NPV} = -33 + \frac{0}{(1+0.075)^1} + \frac{16}{(1+0.075)^2} + \frac{24}{(1+0.075)^3} + \frac{7}{(1+0.075)^4}.$$

$$\text{NPV} = \$5.41 \text{ million}.$$

原 PDF 第 165 页 · 共享公式 · 300 dpi

使用同一方程，并令 NPV = 0，也可以求出 IRR。

Using the same equation, we can also solve for IRR by assuming that NPV = 0.

$$0 = -33 + \frac{0}{(1+\text{IRR})^1} + \frac{16}{(1+\text{IRR})^2} + \frac{24}{(1+\text{IRR})^3} + \frac{7}{(1+\text{IRR})^4}.$$

$$\text{IRR} = 13.57\%.$$

原 PDF 第 165 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

QUESTION SET

5. 根据以下信息计算 20X2 年的 ROIC。各列金额均为期末数。假设 20X2 年经营利润为 3,890，税率为 17%。

5. Based on the information below, calculate ROIC for year 20X2. Values in each column are as of the end of the period. Assume operating profit of 3,890 and a tax rate of 17% in Year 20X2.

20X1 年与 20X2 年资产负债表。

资产项目：现金、短期资产、长期资产及资产总额。负债与权益项目：应付账款、短期债务、长期债务、股本，以及负债和权益总额。

Balance Sheet		
Assets:	**20X1**	**20X2**
Cash	490	700
Short-term assets	10,520	11,790
Long-term assets	22,400	23,740
Total assets	33,410	36,230
Liabilities and equity:		
Accounts payable	5,970	6,620
Short-term debt	2,470	2,840
Long-term debt	9,880	10,550
Share capital	15,090	16,220
Total liabilities and equity	33,410	36,230

原 PDF 第 165 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

ROIC 可用以下公式计算：

ROIC can be calculated using the following formula:

使用税后经营利润及平均长期负债与权益，计算 20X2 年 ROIC。

$$\text{ROIC} = \frac{(1 - \text{Tax rate}) \times \text{Operating profit}_t}{\text{Average LT liabilities and equity}_{t-1,t}}.$$

$$\text{ROIC} = \frac{(1 - 0.17) \times 3,890}{(9,880 + 15,090 + 10,550 + 16,220)/2}.$$

$$\text{ROIC} = 12.48\%.$$

原 PDF 第 165 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

QUESTION SET

6. 使用以下词语填空，完成句子。

6. Complete the sentences by filling in the blanks using the following terms.

每个词语可以使用多次。

Note that each term can be used more than once.

权益利润率资产周转率长期负债平均投入资本

equity profit margin asset turnover long-term liabilities average invested capital

提高_____或_____可以提高 ROIC。

ROIC can be increased by increasing ____ or ____.

_____高的公司，若_____低，ROIC 也可能低；_____低的公司，若_____高，ROIC 也可能高。

A high-____company can earn a low ROIC if ____ is low, and a low-____ company can earn a high ROIC if ____ is high.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

提高利润率或资产周转率可以提高 ROIC。

ROIC can be increased by increasing profit margin or asset turnover.

利润率高的公司，若资产周转率低，ROIC 也可能低；利润率低的公司，若资产周转率高，ROIC 也可能高。

A high-profit margin company can earn a low ROIC if asset turnover is low, and a low-profit margin company can earn a high ROIC if asset turnover is high.

补充解析 / **Supplementary explanation**

补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

QUESTION SET

7. 解释为什么国有公司的要求收益率可能低于小型科技公司。

7. Explain why a government-owned company may have a low required rate of return compared to a small technology company.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

要求收益率是投资者根据项目或公司的风险，以及其他同等风险投资的可得回报而要求的折现率。

The required rate of return is the discount rate that investors require given the riskiness of the project or company and the rate of return available on other similarly risky investments.

比较两家公司的业务风险，国有公司可能被认为是风险低于小型科技公司的发行人。

Considering the business risk of both companies, a government-owned company can be perceived as a lower-risk issuer compared to a small technology company.

因此，投资者要求的风险补偿较少。

Consequently, investors would require less compensation for risk.

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = ΣCF$_t$/(1+r)^t−初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = ΣCF$_t$/(1 + r)^t − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

Question set · 1

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 169

题目与资料 / **Question and data**

练习题组

QUESTION SET

1. 判断正误：使用内部产生资金（如经营现金流）融资的投资项目，相比通过债务或发行股票融资的项目，应采用较低的要求收益率评估。

1. True or false: Investment projects funded using internally generated funds (e.g., cash flow from operations) should be evaluated using a lower required rate of return as compared to projects funded using debt or share issuance.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

错误。忽略内部融资成本是一种常见认知错误。经营现金流等内部资本属于权益融资，因为它可通过股利或股票回购返还股权投资者。尽管内部资本并非通过发行股票从投资者处募集，但公司留存了这些资金，因此仍产生投资者的机会成本。无论融资来源为何，管理层都应采用适当的风险调整后要求收益率评估资本投资。

False. Ignoring the cost of internal financing is a common cognitive error. Internally generated capital, such as cash flow from operations, is equity financing because it could be returned to equity investors as a dividend or share repurchase. While internally generated capital is not raised from equity investors by issuing shares, it is withheld from them, therefore incurring their opportunity cost. Regardless of financing source, management should use an appropriate risk-adjusted required rate of return to evaluate capital investments.

补充解析 / **Supplementary explanation**

补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

题目与资料 / **Question and data**

练习题组

QUESTION SET

2. 投资分析师 Alexandra Tolonen 为一家汽车电池厂的扩建作预测，希望考虑碳酸锂价格上涨的影响。她将未来税后现金流向下调整，以剔除预计碳酸锂价格上涨 5% 的影响，并采用实际折现率计算项目 NPV。项目第二年，碳酸锂价格实际上上涨了 10%。

2. Alexandra Tolonen, an investment analyst, prepares forecasts for expansion of a car battery plant and wants to consider the effect of rising lithium carbonate prices. Tolonen adjusts future after-tax cashflows downward to remove the effects of an expected lithium carbonate price increase of 5% and uses real discount rates to calculate the project's NPV. In the second year of the project, the actual lithium carbonate price increased by 10%.

判断正误：由于 Tolonen 已采用经通胀调整的现金流和折现率，碳酸锂价格上涨不会影响项目盈利能力。

True or false. Given that Tolonen has used inflation-adjusted cash flows and discount rates, the rise in lithium carbonate prices will not impact the project's profitability.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

错误。Tolonen 在预测时一致采用实际现金流和实际利率，但这并不意味着项目不受通胀变化影响。如果实际通胀偏离预期，税后现金流可能优于或劣于预测，取决于具体成本投入受到的影响。

False. Even though Tolonen was consistent in using real cash flows and real rates while preparing the forecast, this fact does not make the project immune to changes in inflation. If actual inflation differs from expected inflation, after-tax cash flows will be better or worse than expected, depending on how specific cost inputs are affected.

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = $\Sigma CF_t/(1+r)^t$ − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

QUESTION SET

3. 一位分析师研究 XYZ 公司，已收集其三个业务分部每年的资本投资及 ROIC 数据。

3. An analyst is analyzing company XYZ and has gathered annual invested capital and ROIC for each of the three XYZ business segments.

业务分部 A、B、C 的资本支出和投入资本回报率。各项分别列示 20X0、20X1 和 20X2 年数据；资本支出单位为百万美元。

	Capital Expenditures ($ m)			ROIC		
Segment	**20X0**	**20X1**	**20X2**	**20X0**	**20X1**	**20X2**
A	264	282	303	7.50%	7.10%	6.80%
B	297	318	340	10.00%	8.90%	7.10%
C	211	226	242	6.90%	7.80%	9.00%

原 PDF 第 170 页 · 完整表格 · 300 dpi

根据这些信息，XYZ 管理层最可能受到以下哪种偏差影响？

Based on the information provided, XYZ's management is most likely prone to which of the following biases?

A. 惯性

A. Inertia

B. 沉没成本

B. Sunk cost

C. 偏爱项目。

C. Pet project

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

可检查公司整体、分部或业务线已披露的资本投资水平，并与上年及投资回报比较，以识别惯性。

Inertia can be identified by examining the level of capital investment in total, by segment, or by business line, if disclosed, and comparing it to the prior year and the return on investment.

如果投资回报下降，而每年资本投资仍持平或增加，分析师应质疑投资依据，并判断管理层是否应考虑其他用途。

If capital investment each year is static or rising despite falling returns on investment, the analyst should question the issuer's justification for a capital investment and whether management should consider alternative uses.

XYZ 的 A、B 两个分部 ROIC 都在下降，却仍逐年获得更多资本配置。

In the case of XYZ, we can observe that for segments A and B, ROIC is decreasing, but both segments are getting a higher capital allocation each year.

B 错误，因为沉没成本问题涉及资本配置过程中对潜在项目盈利能力的判断。

B is incorrect because sunk cost is related to the capital allocation process in determining a potential project's profitability.

评估潜在项目时，应忽略已发生的沉没成本。

Sunk costs, or those expenses that have already been incurred, should be ignored when evaluating potential projects.

C 错误，因为题目没有提供 XYZ 管理层实施的各个投资项目的详细情况。

C is incorrect because a detailed view of individual investment projects undertaken by XYZ's management is not provided.

外部人员很难识别偏爱项目，因为财务报表是汇总信息，而且这类项目可能未达到重要性门槛。

Identifying pet projects from outside the firm is difficult, because financial statements are aggregated and such projects may not meet the threshold of materiality.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

The official choice for this item is A. Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

QUESTION SET

4. 财务分析师 Bradshaw 为一个投资项目预测未来预期税前总现金流，同时预测相关折旧，并假设要求收益率为 6%。根据给定信息和 18% 的税率，计算项目 NPV。在该司法管辖区，折旧不能在税前扣除。

4. Bradshaw, a financial analyst, prepares a forecast of future expected gross (pre-tax) cash flows for an investment project. Bradshaw also forecasts future depreciation related to that project and assumes a required rate of return 6%. Based on the information provided and a tax rate of 18%, calculate the NPV of the project. In this jurisdiction, depreciation is not deductible for taxes.

现金流与折旧预测。首行为时间，随后分别列示税前总现金流和折旧；负号表示现金流出或扣除。

Cash Flow and Depreciation Forecast

Time	0	1	2	3
Gross cash flow	−7.50	4.50	4.50	6.00
Depreciation	0.00	−1.00	−1.00	−1.00

原 PDF 第 171 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

计算项目 NPV 时，Bradshaw 应先计算税后现金流。由于折旧属于非现金项目，只有在可以税前扣除、从而降低税款时才应考虑。对未来各期收到的现金流应用以下公式，即可得到税后现金流。

To calculate NPV for this project, Bradshaw should first calculate after-tax cash flows and consider depreciation only to the extent that it is tax deductible and reduces taxes, because it is non-cash. After-tax cash flows can be calculated by applying the following formula to all cash flows to be received in the future.

t 期税后现金流的计算。Gross cash flow 表示税前总现金流；Tax rate 表示税率。

$$\text{After-tax cash flow}_t = \text{Gross cash flow}_t \times (1 - \text{Tax rate}).$$

原 PDF 第 171 页 · 共享公式 · 300 dpi

税后现金流预测。首行为时间，第二行为各期税后现金流。

After-Tax Cash Flow Forecast

Time	0	1	2	3
After-tax cash flow	−7.50	3.69	3.69	4.92

原 PDF 第 171 页 · 完整表格 · 300 dpi

NPV 的计算如下：

The calculation of NPV is follows:

$$\text{NPV} = -7.5 + \frac{3.69}{(1+0.06)^1} + \frac{3.69}{(1+0.06)^2} + \frac{4.92}{(1+0.06)^3}.$$

$$\text{NPV} = 3.396$$

原 PDF 第 171 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = $\Sigma CF_t/(1+r)^t$ − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

QUESTION SET

5. 解释为什么某些管理者可能拒绝显著增加股东价值、即 NPV 很高的项目。

5. Explain why some managers might reject projects that significantly increase shareholder value (i.e., have a high NPV).

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

管理者可能有动力提高每股收益、净利润或权益回报率等会计盈利指标。

Managers may have an incentive to increase accounting profitability measures, such as earnings per share, net income, or return on equity.

许多资本投资即使 NPV 很高，短期内也可能降低而非提高这些指标；相反，削减成本和股份回购可能改善它们。

Many capital investments, even those with high NPVs, can reduce rather than increase these measures in the near term, while cost cutting and share buybacks, in contrast, may have a positive effect on such measures.

如果这种激励足够强，管理层可能放弃高 NPV 项目，转而采取能够提高短期每股收益的行动。

If this incentive is strong enough, management may forgo high-NPV projects in favor of actions that increase near-term earnings per share.

补充解析 / **Supplementary explanation**

补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV $= \Sigma CF_t/(1+r)^t -$ initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

CI-LM05-EXAMPLE-1201

例题 9 · 第 1 题：Gerhardt 公司利用决策树进行资本配置
Example 9 · 1 — Gerhardt Corporation Capital Allocation Using a Decision Tree

例题 9

EXAMPLE 9

Gerhardt 公司利用决策树进行资本配置

Gerhardt Corporation Capital Allocation Using a Decision Tree

假设 Gerhardt 公司考虑投入 5 亿欧元建设一座生产新产品的设施。

Assume that Gerhardt Corporation is considering a €500 million outlay for a capital investment in a facility to produce a new product.

公司估计产品成功推出的概率为 60%，成功时预计一年后回收 7.5 亿欧元。

Gerhardt assigns a 60% probability to a successful product launch, which is expected to return €750 million in one year's time.

财务团队还分析了设施的其他用途，并在以下决策树中汇总了各项实物期权对应现金流的时间和概率。

Gerhardt's finance team has also conducted an analysis of alternative facility uses, summarizing the timing and probability of cash flows associated with each real option in the following decision tree.

Gerhardt 公司决策树

Gerhardt Corporation Decision Tree

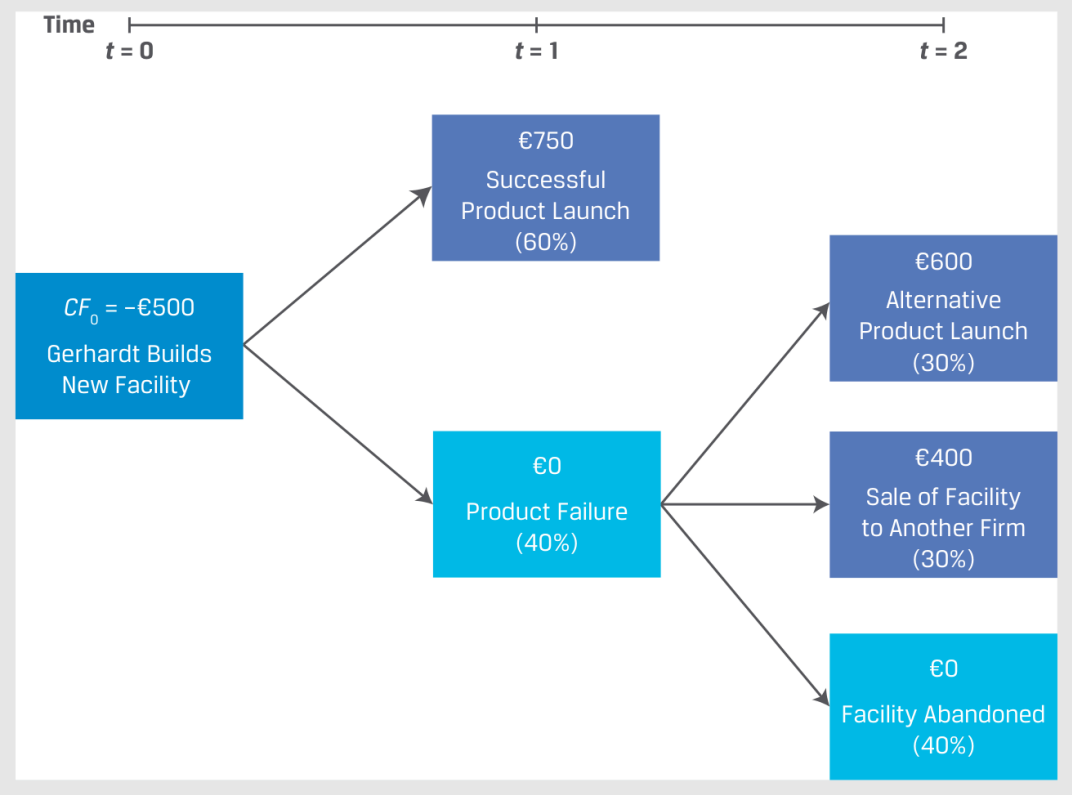

Gerhardt 新建设施的决策树，时间从第 0 期至第 2 期。

初始建设支出为 500 百万欧元。第 1 期：产品推出成功的概率为 60%，对应 750 百万欧元；失败概率为 40%，对应零现金流。

若产品失败，第 2 期的分支为：推出替代产品（30%，600 百万欧元）、将设施出售给其他公司（30%，400 百万欧元），或放弃设施（40%，零现金流）。

单位说明：图中金额均以百万欧元计。

Unit clarification: all amounts in this decision tree are in millions of euros.

原 PDF 第 173 页 · 完整图示 · 300 dpi

1. 按 10% 的要求收益率 r，计算不含实物期权时 Gerhardt 项目的 NPV。

1. Calculate the NPV of Gerhardt's project without real options using a 10% required rate of return (r).

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

不含实物期权时，使用公式 1，并按概率加权现金流：产品成功推出的概率为 60%，未来现金流入为零的概率为 40%。

The NPV without real options uses Equation 1 and a probability-weighted cash flow if the product is successfully launched (60%) and a 40% probability that future cash inflows are zero:

$$\text{NPV} = \text{CF}_0 + \frac{\text{CF}_1}{(1+r)^1} + \text{,or}$$

$$\text{NPV} = -500 + \frac{(0.6 \times 750)}{(1.10)}$$

原 PDF 第 174 页 · 共享公式 · 300 dpi

由于 NPV = –€90.91，根据 NPV 决策规则，Gerhardt 不应实施该项目。

Because NPV = –€90.91, Gerhardt should not pursue the project, based on the NPV decision rule.

补充解析 / **Supplementary explanation**

补充思路：静态 NPV 假定今天承诺固定行动路径，而实物期权允许未来根据新信息推迟、扩张、放弃或改变项目。计算决策树时，先在未来决策节点选择最有利行动，再按概率加权和折现，不能把未来可选择的所有分支都当成必须承担。灵活性通常增加价值，但取得灵活性的成本也必须扣除。

Additional reasoning: Static NPV assumes a fixed commitment; real options allow delay, expansion, abandonment, or adaptation after new information. At future decision nodes, choose the best available action before probability-weighting and discounting. Do not treat mutually exclusive future choices as obligations to undertake every branch. Flexibility generally adds value, but its acquisition cost must be deducted.

相关知识点 / **Related concepts**

实物期权与管理灵活性：实物期权不同于用于对冲商品价格的金融期权；复杂模型不自动带来更准确估值，关键输入仍可能不可观察。

Real options and managerial flexibility: Real options differ from financial derivatives used to hedge commodity prices. Greater model complexity does not guarantee accuracy when key inputs are unobservable.

原 PDF 第 173 页 · 完整图示 · 300 dpi

2. 在含实物期权、要求收益率为10% 的情况下，计算 Gerhardt 拟议项目的 NPV。

2. Calculate the NPV of Gerhardt's proposed project with real options and a 10% required rate of return.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

使用公式 1 和未来各期的概率加权现金流，计算含实物期权的 NPV：

Calculate NPV with real options using Equation 1 and probability-weighted cash flows in future periods:

$$\text{NPV} = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_2}{(1+r)^2}$$
$$= -500 + \frac{(0.6 \times 750)}{(1.10)^1} + \frac{[(0.4 \times 0.3) \times 600] + [(0.4 \times 0.3) \times 400]}{(1.10)^2}$$

原 PDF 第 174 页 · 共享公式 · 300 dpi

包含实物期权的 NPV 为 €8.26，因此根据 NPV 决策规则，若考虑未来的其他用途，Gerhardt 应投资新生产设施。请注意，第二期现金流的计算建立在特定结果的条件概率之上。在第一期产品失败（概率 40%）的条件下，推出替代产品与把设施出售给另一家公司这两个互斥结果的概率各为 30%，所以各分支事件的发生概率为〔下方计算式 1〕。

The NPV with real options equals €8.26, which implies based on the NPV decision rule that Gerhardt should invest in the new production facility if alternative uses in the future are considered. Note that the cash flow calculation for the second period is based on the conditional probabilities of specific outcomes. That is, in the case of both the possible alternative product launch and facility sale to another firm, the 30% probability of each of these mutually exclusive outcomes given a product failure in Period 1 (40%) makes the conditional probability of each event equal to〔calculation 1 below〕.

$$12\% \ (= 0.4 \times 0.3)$$

原 PDF 第 174 页 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：静态 NPV 假定今天承诺固定行动路径，而实物期权允许未来根据新信息推迟、扩张、放弃或改变项目。计算决策树时，先在未来决策节点选择最有利行动，再按概率加权和折现，不能把未来可选择的所有分支都当成必须承担。灵活性通常增加价值，但取得灵活性的成本也必须扣除。

Additional reasoning: Static NPV assumes a fixed commitment; real options allow delay, expansion, abandonment, or adaptation after new information. At future decision nodes, choose the best available action before probability-weighting and discounting. Do not treat mutually exclusive future choices as obligations to undertake every branch. Flexibility generally adds value, but its acquisition cost must be deducted.

相关知识点 / **Related concepts**

实物期权与管理灵活性：实物期权不同于用于对冲商品价格的金融期权；复杂模型不自动带来更准确估值，关键输入仍可能不可观察。

Real options and managerial flexibility: Real options differ from financial derivatives used to hedge commodity prices. Greater model complexity does not guarantee accuracy when key inputs are unobservable.

题目与资料 / **Question and data**

练习题组

QUESTION SET

1. 以下关于实物期权的说法，哪项正确？

1. Which of the following statements about real options is true?

A. 使用期权定价模型能够以最高精确度估计期权价值。

A. Using option pricing models estimates an option’s value with the highest accuracy.

B. 如果投资项目盈利表现较差，实物期权允许公司放弃项目。

B. Real options allow companies to abandon an investment project if its profitability is poor.

C. 实物期权允许炼油厂对生产所需原油的未来价格进行对冲。

C. Real options would allow a refinery to hedge future prices of crude oil needed for production.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

放弃期权是一种实物期权，允许公司在投资实施后放弃投资。

An abandonment option is a type of real option, which allows a company to abandon the investment after it is undertaken.

A 错误，因为虽然可以用期权定价模型为实物期权估值，但估计需要事件概率、发生时间等多个无法直接观察的输入。

A is incorrect because even though real options can be priced using option pricing models, the estimates require multiple unobservable inputs, such as probabilities of events and timing of their occurrence.

模型复杂并不必然提高准确度。

The complexity does not necessarily improve accuracy.

C 错误，因为实物期权给予公司未来决策的灵活性，却不能对冲商品价格。

C is incorrect because real options provide companies with flexibility with regard to future decisions; however, they do not allow the hedging of commodity prices.

原油价格变动风险可以用金融期权对冲，而非实物期权。

The risk of crude oil price changes can be hedged using financial options, not real options.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：静态 NPV 假定今天承诺固定行动路径，而实物期权允许未来根据新信息推迟、扩张、放弃或改变项目。计算决策树时，先在未来决策节点选择最有利行动，再按概率加权和折现，不能把未来可选择的所有分支都当成必须承担。灵活性通常增加价值，但取得灵活性的成本也必须扣除。

The official choice for this item is B. Additional reasoning: Static NPV assumes a fixed commitment; real options allow delay, expansion, abandonment, or adaptation after new information. At future decision nodes, choose the best available action before probability-weighting and discounting. Do not treat mutually exclusive future choices as obligations to undertake every branch. Flexibility generally adds value, but its acquisition cost must be deducted.

其他条件相同时，将正现金流提前会提高现值，推迟会降低现值。比较 NPV 或 IRR 前，先将各期现金流放在同一时间轴，避免只看未折现总额。

Other things equal, earlier positive cash flows have higher present value and later ones lower value. Put all flows on one timeline before comparing NPV or IRR instead of relying on undiscounted totals.

相关知识点 / **Related concepts**

实物期权与管理灵活性：实物期权不同于用于对冲商品价格的金融期权；复杂模型不自动带来更准确估值，关键输入仍可能不可观察。

Real options and managerial flexibility: Real options differ from financial derivatives used to hedge commodity prices. Greater model complexity does not guarantee accuracy when key inputs are unobservable.

QUESTION SET

2. ScolarCorp 计划开展市场调研，以衡量客户对一种新产品的兴趣。如果兴趣较高，公司必须升级现有工厂以生产该产品；如果兴趣较低，则将工厂以 9,000 万美元出售。项目要求收益率为 7.5%。公司分析师在以下决策树中汇总了不同用途的现金流时间和概率。

2. ScolarCorp is planning a market research campaign to gauge interest in a new type of product. If interest in the new product is high, the company will need to upgrade its existing production plant to allow for product manufacturing. Alternatively, if interest is low, ScolarCorp will sell the plant for $90 million. The required rate of return for the project is 7.5%. A ScolarCorp analyst summarized the timing and probability of cash flows associated with each alternative use in the following decision tree.

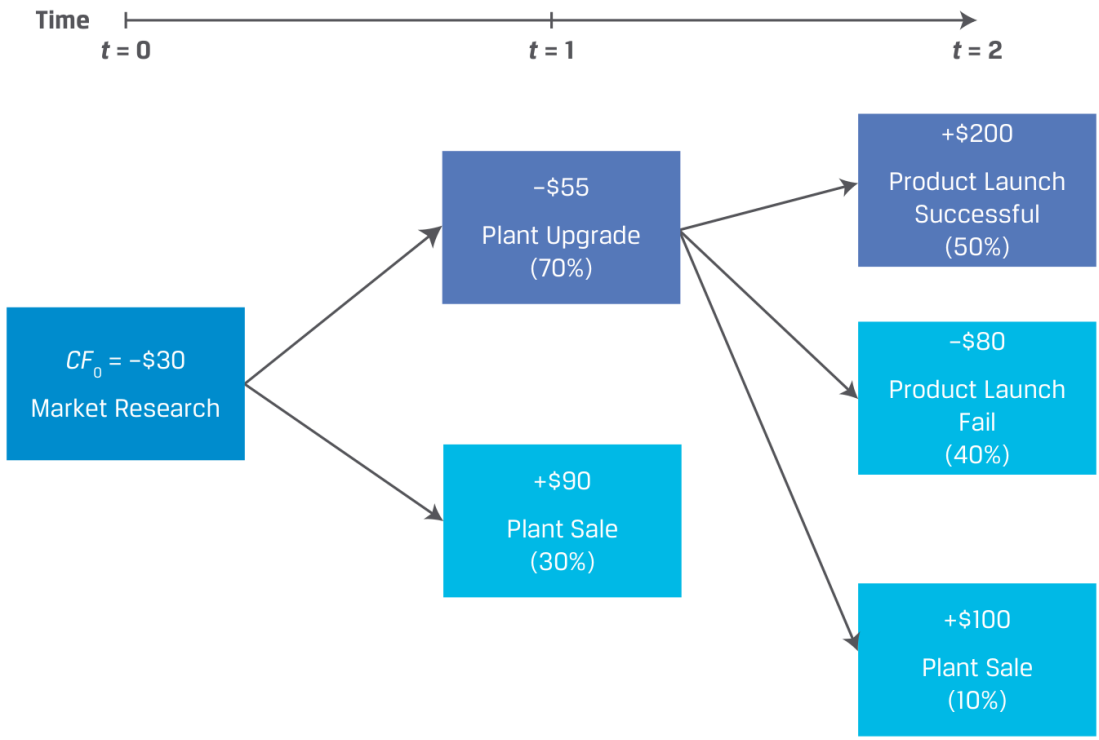

市场调研和工厂投资的决策树，时间从第 0 期至第 2 期。

初始市场调研支出为 30 百万美元。第 1 期：工厂升级的概率为 70%，支出 55 百万美元；出售工厂的概率为 30%，取得 90 百万美元。

若进行工厂升级，第 2 期的分支为：产品推出成功（50%，取得 200 百万美元）、产品推出失败（40%，支出 80 百万美元），或出售工厂（10%，取得 100 百万美元）。

单位说明：图中金额均以百万美元计。

Unit clarification: all amounts in this decision tree are in millions of US dollars.

原 PDF 第 175 页 · 完整图示 · 300 dpi

根据决策树，将以下因素与其对资本项目价值（期权价值）的影响配对：

Based on the decision tree, match the following factors with the impact on the capital project's value (option value):

市场调研成本增加

Increase in market research cost

市场调研成本减少

Decrease in market research cost

工厂出售价格提高

Increase in plant sale price

工厂出售价格降低

Decrease in plant sale price

要求收益率提高

Increasing required rate of return

要求收益率降低

Decreasing required rate of return

分类填写表：左栏为增加项目价值的因素，右栏为降低项目价值的因素。

Increases Project Value	Decreases Project Value

原 PDF 第 175 页 · 完整表格 · 300 dpi

> 官方答案与解析 / **Official answer and explanation**

答案：

Solution:

项目价值影响的分类答案。

增加项目价值：降低市场调研成本、提高工厂出售价格、降低要求收益率。

降低项目价值：提高市场调研成本、降低工厂出售价格、提高要求收益率。

Increases Project Value	Decreases Project Value
Decrease in market research cost	Increase in market research cost
Increase in plant sale price	Decrease in plant sale price
Decreasing required rate of return	Increasing required rate of return

原 PDF 第 175 页 · 完整表格 · 300 dpi

计入所有备选结果及其概率后，项目 NPV 可按下式计算：

The calculation of the NPV of the project, considering all alternatives and their probabilities, can be carried out as follows:

$$NPV = CF_0 + \frac{CF_1}{(1+r)^1} + \frac{CF_1}{(1+r)^2}.$$

$$NPV = -30 + \frac{(-55 \times 0.7 + 90 \times 0.3)}{(1+0.075)^1} + \frac{(200 \times (0.7 \times 0.5) - 80 \times (0.7 \times 0.4) + 100 \times (0.7 \times 0.1))}{(1+0.075)^2}.$$

$$NPV = \$6.549.$$

原 PDF 第 176 页 · 共享公式 · 300 dpi

市场调研成本增加的影响

Impact of increase in market research cost

若市场调研成本增加，例如增加 10 至 –40，整个项目的 NPV 将减少同样金额。

If the market research cost increases, for example, by 10 (to –40), the NPV of the entire project will decrease by the same amount.

由于初始支出发生于 t = 0，无须折现。

Given that initial outlay occurs at t = 0, it does not need to be discounted.

工厂出售价格提高的影响

Impact of increase in plant sale price

若第一年或第二年的工厂出售价格提高，整个项目 NPV 的增加额会小于售价增加额，因为相应现金流必须按概率调整，并折现至 T_0。

If the plant sale price increases (either in Year 1 or Year 2), the NPV of the entire project will increase by a smaller amount, given that corresponding cash flow needs to be probability adjusted and discounted to T0.

要求收益率提高的影响

Impact of increase in required rate of return

要求收益率用于折现未来现金流，因此要求收益率提高会降低整个项目 NPV。

An increase in the required rate of return will decrease the NPV of the entire project, given that it is used to discount future cash flows.

补充解析 / **Supplementary explanation**

补充思路：静态 NPV 假定今天承诺固定行动路径，而实物期权允许未来根据新信息推迟、扩张、放弃或改变项目。计算决策树时，先在未来决策节点选择最有利行动，再按概率加权和折现，不能把未来可选择的所有分支都当成必须承担。灵活性通常增加价值，但取得灵活性的成本也必须扣除。

Additional reasoning: Static NPV assumes a fixed commitment; real options allow delay, expansion, abandonment, or adaptation after new information. At future decision nodes, choose the best available action before probability-weighting and discounting. Do not treat mutually exclusive future choices as obligations to undertake every branch. Flexibility generally adds value, but its acquisition cost must be deducted.

其他条件相同时，将正现金流提前会提高现值，推迟会降低现值。比较 NPV 或 IRR 前，先将各期现金流放在同一时间轴，避免只看未折现总额。

Other things equal, earlier positive cash flows have higher present value and later ones lower value. Put all flows on one timeline before comparing NPV or IRR instead of relying on undiscounted totals.

相关知识点 / **Related concepts**

实物期权与管理灵活性：实物期权不同于用于对冲商品价格的金融期权；复杂模型不自动带来更准确估值，关键输入仍可能不可观察。

Real options and managerial flexibility: Real options differ from financial derivatives used to hedge commodity prices. Greater model complexity does not guarantee accuracy when key inputs are unobservable.

题目与资料 / **Question and data**

练习题组

QUESTION SET

3. XYZ 公司考虑扩建其在外国的配送中心。当地政府正在制定一项新环境法规，为可再生能源相关投资提供补贴和税收优惠。新法获批后，XYZ 可以以较低成本升级配送中心。如果等待新法规生效，公司须承担 180 万美元项目相关成本。财务团队估计，等待后项目 NPV 为 970 万美元，而当前价值为 890 万美元。计算期权价值。

3. Company XYZ is considering expanding its distribution center in a foreign country. The local government is working on a new environmental regulation that introduces subsidies and tax breaks for investments related to renewable energy. Once the new law is approved, XYZ could upgrade the distribution center at lower cost. If the company decides to wait for the new regulation to come into effect, it will have to bear project-related costs of $1.8 million. XYZ's finance team estimates that if the company waits, the NPV of the project will be $9.7 million, compared to a current value of $8.9 million. Calculate option value.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

确定期权价值，需要比较含期权与不含期权时的项目价值，并额外考虑期权成本。

To determine option value, we need to compare the project value with and without the option and additionally consider option cost.

含期权项目净现值、不含期权项目净现值和期权成本之间的比较，以及据此求得期权价值的完整计算。金额以百万美元计。

Project NPV (with option) = $9.7 million.

Project NPV (without option) = $8.9 million.

Option cost = $1.8 million.

Project NPV (with option)
= Project NPV (without option) – Option cost + Option value.

$9.7 million = $8.9 million – $1.8 million + Option value.

Option value = $2.6 million.

原 PDF 第 176 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：静态 NPV 假定今天承诺固定行动路径，而实物期权允许未来根据新信息推迟、扩张、放弃或改变项目。计算决策树时，先在未来决策节点选择最有利行动，再按概率加权和折现，不能把未来可选择的所有分支都当成必须承担。灵活性通常增加价值，但取得灵活性的成本也必须扣除。

Additional reasoning: Static NPV assumes a fixed commitment; real options allow delay, expansion, abandonment, or adaptation after new information. At future decision nodes, choose the best available action before probability-weighting and discounting. Do not treat mutually exclusive future choices as obligations to undertake every branch. Flexibility generally adds value, but its acquisition cost must be deducted.

相关知识点 / **Related concepts**

实物期权与管理灵活性：实物期权不同于用于对冲商品价格的金融期权；复杂模型不自动带来更准确估值，关键输入仍可能不可观察。

Real options and managerial flexibility: Real options differ from financial derivatives used to hedge commodity prices. Greater model complexity does not guarantee accuracy when key inputs are unobservable.

原 PDF 第 178 页 · 完整表格 · 300 dpi

ABC 管理层的 ROIC 目标至少为 9.2%，并要求 Soroka 对两个项目提出建议。

ABC's management has an ROIC objective of at least 9.2% and asks Soroka for her recommendation about the projects.

1. 编制两个项目的现金流预测时，Soroka 应纳入：

1. When preparing the cash-flow forecasts for both projects, Soroka should include:

A. 仅市场调研费用。

A. only the cost of the market research.

B. 仅现有产品的收入损失。

B. only the loss of revenue from existing products.

C. 市场调研费用和现有产品收入损失两者。

C. both the market research cost and the loss of revenue from existing products.

官方答案与解析 / **Official answer and explanation**

1. B 正确。资本配置分析应仅包括与新投资相关的增量现金流。现有产品的收入损失是增量负面影响，应计入分析。本例市场调研已经完成，其费用属于沉没成本，无论 ABC 实施任一项目或两个都不实施，都不影响现金流估计。

1. B is correct. Capital allocation analysis should include only incremental cash flows associated with a new investment. The loss of revenue from existing products is an incremental negative effect that should be included in the analysis. The market research costs in this case are a sunk cost because the research has already been completed and therefore does not affect cash-flow estimates, no matter whether ABC undertakes either of these projects or neither of them.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：项目分类取决于主要目的：满足监管要求属于合规投入，降低现有业务成本属于维护或效率改进，拓展现有业务与进入新产品或新市场的风险不同。分类先于估值，可以帮助确定现金流范围、风险和替代方案。合规项目的必要性不等于可跳过成本比较，应在满足要求的可行方案中评价。

The official choice for this item is B. Additional reasoning: Classify a project by its principal purpose. Regulatory requirements motivate compliance, efficiency spending improves existing operations, and expansion differs from entering a new product or market. Classification helps frame cash flows, risk, and alternatives before valuation. Mandatory compliance still permits cost comparison among feasible compliant approaches.

已经发生且不可收回的研究费用是沉没成本；新项目挤占现有产品收入则是增量机会成本。把前者排除、后者纳入，才能得到与决策有关的现金流。

Already-incurred, unrecoverable research is sunk; cannibalization of existing sales is an incremental opportunity cost. Exclude the former and include the latter to measure decision-relevant cash flows.

相关知识点 / **Related concepts**

资本项目的目的与分类：资本预算以增量现金流为基础；项目类型影响不确定性和替代方案，但不改变现金流应按风险和时间价值折现的原则。

Purpose and classification of capital projects: Capital budgeting uses incremental cash flows. Project type changes uncertainty and alternatives, not the need to discount for risk and time value.

原 PDF 第 178 页 · 完整表格 · 300 dpi

ABC 管理层的 ROIC 目标至少为 9.2%，并要求 Soroka 对两个项目提出建议。

ABC's management has an ROIC objective of at least 9.2% and asks Soroka for her recommendation about the projects.

2. 关于项目 A 和 B，以下哪项正确？

2. With regard to Project A and Project B, which of the following is true?

A. 根据 IRR 决策规则，两个项目都应投资。

A. Both projects should be invested in according to the IRR decision rule.

B. 根据 NPV 决策规则，两个项目都应投资。

B. Both projects should be invested in according to the NPV decision rule.

C. 根据 IRR 决策规则，只应投资项目 B。

C. Only Project B should be invested in according to the IRR decision rule.

官方答案与解析 / **Official answer and explanation**

2. C 正确。IRR 决策规则是：IRR 超过要求收益率或最低要求收益率时投资。项目 B 的 IRR 为 8.97%，高于 8%；项目 A 的 IRR 为 7.04%，低于 8%。两个项目的 NPV 可按下式计算：

2. C is correct. The IRR decision rule is to invest if the IRR exceeds the required rate of return or hurdle rate. Project B's IRR is 8.97%, which exceeds the required rate of return of 8%; however, Project A's IRR is 7.04%, which is below the required rate of return of 8%. The NPV of both projects can be calculated as follows:

$$\text{NPV}_A = -18.5 + \frac{4.5}{(1+0.08)^1} + \frac{6}{(1+0.08)^2} \frac{6}{(1+0.08)^3} \frac{5.5}{(1+0.08)^4} = -0.38.$$

$$\text{NPV}_B = -33.5 + \frac{-2.5}{(1+0.08)^1} + \frac{-2.5}{(1+0.08)^2} \frac{24}{(1+0.08)^3} \frac{25.5}{(1+0.08)^4} = 1.12.$$

原 PDF 第 179 页 · 共享公式 · 300 dpi

令 NPV = 0，使用同一方程即可求出两个项目的 IRR。

Using the same equation, we can solve for the IRRs by assuming that NPV = 0.

$$0 = -18.5 + \frac{4.5}{(1+\text{IRR}_\text{A})^1} + \frac{6}{(1+\text{IRR}_\text{A})^2} + \frac{6}{(1+\text{IRR}_\text{A})^3} + \frac{5.5}{(1+\text{IRR}_\text{A})^4}.$$

$$\text{IRR}_A = 7.04\%.$$

$$0 = -33.5 + \frac{-2.5}{(1+\text{IRR}_\text{B})^1} + \frac{-2.5}{(1+\text{IRR}_\text{B})^2} + \frac{24}{(1+\text{IRR}_\text{B})^3} + \frac{25.5}{(1+\text{IRR}_\text{B})^4}.$$

$$\text{IRR}_B = 8.97\%.$$

原 PDF 第 179 页 · 共享公式 · 300 dpi

A 错误，因为项目 B 的 IRR 为 8.97%，高于 8% 的要求收益率，而项目 A 的 IRR 为 7.04%，低于 8%，因此只有 B 符合 IRR 规则。B 错误，因为 NPV 规则要求 NPV 大于零。项目 B 的 NPV 为 112 万美元，项目 A 的 NPV 为 –0.38（百万美元），因此只有 B 符合 NPV 规则。

A is incorrect because Project B's IRR is 8.97%, which exceeds the required rate of return of 8%; however, Project A's IRR is 7.04%, which is below the required rate of return of 8%. Consequently, only Project B meets the IRR decision rule. B is incorrect because the NPV decision rule is to invest if the NPV is greater than 0. Project B's NPV is $1.12 million, while Project A's NPV is –$0.38. Consequently, only Project B meets the NPV decision rule.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

The official choice for this item is C. Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV $= \Sigma CF_t/(1+r)^t -$ initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

ABC 管理层的 ROIC 目标至少为 9.2%，并要求 Soroka 对两个项目提出建议。

ABC's management has an ROIC objective of at least 9.2% and asks Soroka for her recommendation about the projects.

3. Soroka 考虑的现金流时点变化最可能导致：

3. The most likely impact from the cash-flow timing considered by Soroka is that:

A. IRR 和 NPV 均下降。

A. both IRR and NPV would decrease.

B. IRR 和 NPV 均保持不变。

B. both IRR and NPV stay unchanged.

C. 只有 IRR 下降，而 NPV 上升。

C. only IRR would decrease but NPV would increase.

官方答案与解析 / **Official answer and explanation**

3. A 正确。现金流发生时间是影响两个项目 IRR 和 NPV 的重要因素。全部未来现金流延迟六个月，会使 IRR 和 NPV 均下降。现金流晚六个月收到，其现值降低，因此整个项目的 NPV 和 IRR 也下降。B 错误，因为延迟六个月后，两项目的 NPV 和 IRR 会下降，而非保持不变。C 错误，因为延迟六个月后，两项目的 NPV 和 IRR 均会下降。

3. A is correct. The forecasted timing of cash flow is an important factor affecting both projects' IRR and NPV. In the case of delaying all future cash flows from both projects by six months, the result would be a lower IRR and a lower NPV. Given that all future cash flows are to be received six months later, their present value decreases; hence, the NPV and IRR of an entire project also decrease. B is incorrect because when cash flows from the investment projects are delayed by six months, both projects' NPV and IRR would decrease, not stay unchanged. C is incorrect because when cash flows from the investment projects are delayed by six months, both project's NPV and IRR would decrease.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

The official choice for this item is A. Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

其他条件相同时，将正现金流提前会提高现值，推迟会降低现值。比较 NPV 或 IRR 前，先将各期现金流放在同一时间轴，避免只看未折现总额。

Other things equal, earlier positive cash flows have higher present value and later ones lower value. Put all flows on one timeline before comparing NPV or IRR instead of relying on undiscounted totals.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV = $\Sigma CF_t/(1+r)^t$ − initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

ABC 管理层的 ROIC 目标至少为 9.2%，并要求 Soroka 对两个项目提出建议。

ABC's management has an ROIC objective of at least 9.2% and asks Soroka for her recommendation about the projects.

4. 根据图表 2 的 ABC 资产负债表，Soroka 应计算得到：

4. Based on ABC's balance sheet presented in Exhibit 2, Soroka should calculate:

A. 平均投入资本 $72,510，ROIC 为 9.50%。

A. average invested capital of $72,510 and ROIC of 9.50%.

B. 平均投入资本 $80,720，ROIC 为 10.94%。

B. average invested capital of $80,720 and ROIC of 10.94%.

C. 平均投入资本 $92,995，ROIC 为 9.50%。

C. average invested capital of $92,995 and ROIC of 9.50%.

官方答案与解析 / **Official answer and explanation**

4. A 正确。ROIC 可用以下公式计算：

4. A is correct. To calculate ROIC, we can use the following formula:

ROIC 以税后经营利润为分子，以前后两期平均投入资本为分母。

$$\text{ROIC} = \frac{(1 - \text{Tax rate}) \times \text{Operating profit}_t}{\text{Average invested capital}_{t-1,t}},$$

原 PDF 第 179 页 · 共享公式 · 300 dpi

其中：

where

平均投入资本根据 20X1 和 20X2 两期债务与权益的金额计算，再代入 ROIC。

$$\text{Average invested capital}_{t-1,t} = \frac{(\text{Debt} + \text{Equity})_{20X1} + (\text{Debt} + \text{Equity})_{20X2})}{2}$$

$$\text{Average invested capital}_{t-1,t} = \frac{[(25,040 + 39,800 + 6,500) + (25,910 + 40,990 + 6,780)]}{2}$$

$$\text{Average invested capital}_{t-1,t} = 72,510.$$

$$\text{ROIC} = \frac{(1 - 0.22) \times 8,830}{72,510}.$$

$$\text{ROIC} = 9.50\%.$$

原 PDF 第 180 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：ROIC 同时考虑经营利润和为获得利润所占用的资本。盈利或利润率高并不必然创造价值：还要把 ROIC 与适当资本成本比较。单一历史年度 ROIC 也不能代替完整投资判断，因为会计政策、资产年龄、周期和未来增长都会影响它。分解为税后经营利润率与资本周转率，可以识别改善来自利润率还是资本利用效率。

The official choice for this item is A. Additional reasoning: ROIC considers operating profit and the capital required to earn it. Positive profit or a high margin does not by itself establish value creation; compare ROIC with the relevant capital cost. A single historical ROIC is not a complete investment conclusion because accounting, asset age, cyclicality, and growth matter. Margin and turnover decomposition identifies the source of performance.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

ROIC与资本配置：ROIC = 税后经营利润/平均投入资本 = 税后经营利润率×投入资本周转率；项目应按其风险采用合适的必要报酬率。

ROIC and capital allocation: ROIC = after-tax operating profit/average invested capital = after-tax operating margin × invested-capital turnover. Required returns should reflect project risk.

ABC 管理层要求 Soroka 在预测中考虑全部未来现金流延迟六个月的影响，并估计这一变化对 IRR 和 NPV 的影响。

ABC's management asks Soroka to consider in her forecast the impact of a six-month delay in all future cash flows and estimate the impact of that event on IRR and NPV.

审阅预测后，管理层又要求她估计 ABC 在 20X2 年的 ROIC。

After reviewing the forecast, ABC's management asks Soroka to estimate ABC's ROIC for 20X2.

ABC 的经营利润为 $8,830，有效税率为 22%，资产负债表见图表 2。

ABC earned operating profit of $8,830, had an effective tax rate of 22%, and reported the balance sheet in Exhibit 2.

图表 2：ABC 公司资产负债表，采用期末金额，比较 20X1 年与 20X2 年。

资产项目：现金、短期资产、长期资产及资产总额。负债与权益项目：应付账款、短期债务、长期债务及股本；续表列示剩余项目。

Exhibit 2

ABC Balance Sheet (end-of-period values)

Assets:	20X1	20X2
Cash	1,600	1,720
Short-term assets	30,450	29,910
Long-term assets	60,250	62,060
Total assets	92,300	93,690

Liabilities and equity:	20X1	20X2
Accounts payable	12,930	11,620
Short-term debt	8,030	8,390
Long-term debt	25,040	25,910
Share capital	39,800	40,990

原 PDF 第 177 页 · 完整表格 · 300 dpi

ABC 公司资产负债表（续），比较 20X1 年与 20X2 年。负债与权益部分的剩余项目为留存收益，以及负债和权益总额。

Liabilities and equity:	20X1	20X2
Retained earnings	6,500	6,780
Total liabilities and equity	92,300	93,690

原 PDF 第 178 页 · 完整表格 · 300 dpi

ABC 管理层的 ROIC 目标至少为 9.2%，并要求 Soroka 对两个项目提出建议。

ABC's management has an ROIC objective of at least 9.2% and asks Soroka for her recommendation about the projects.

5. 同时考虑管理层基于 ROIC 的投资标准，以及两个项目的 IRR 和 NPV，Soroka 应建议：

5. Considering ABC management's ROIC-based investment criterion and the IRR and NPV of both projects, Soroka should recommend to:

A. 拒绝项目 A 和 B。

A. reject both projects A and B.

B. 仅投资项目 B，因为其 NPV 更高。

B. invest only in Project B because it has a higher NPV.

C. 仅投资项目 A，因为其四年中的现金流均为正。

C. invest only in Project A because has positive cash flow during all four years.

官方答案与解析 / **Official answer and explanation**

5. A 正确。ABC 管理层希望 ROIC 至少高于 9.20%，但两个项目的 IRR 均未达到这一投资标准。虽然项目 B 的 NPV 为正，实施它仍会降低 ROIC。B 错误，因为项目 B 的 NPV 为 112 万美元，虽然增加了 ABC 的股东价值，但其 IRR 为 8.97%，低于 9.20% 的目标 ROIC，因此实施后会拉低 ABC 的 ROIC。C 错误，因为项目 A 的 IRR 低于管理层 9.2% 的目标，而且项目 A 的 NPV 为负，会减少 ABC 股东价值。

5. A is correct. ABC's management aims to achieve a minimum ROIC above 9.20%, but the IRR of both projects fails to meet this investment criterion. Even though Project B has a positive NPV, if it were undertaken, it would reduce ROIC. B is incorrect because even though Project B's NPV is $1.12 million (which increases ABC's value to shareholders), its IRR is 8.97%, which is below the target ROIC of 9.20%. Consequently, if Project B was undertaken, it would lower ABC's ROIC. C is incorrect because Project A's IRR is below ABC management's target ROIC of 9.2%. Additionally, Project A's NPV is negative, so it decreases ABC's shareholder value.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：评价项目应使用增量税后现金流，并把时间价值纳入。NPV 直接衡量按适当机会成本折现后的价值增加；IRR 是使 NPV 为零的折现率。独立且常规现金流项目通常两种方法一致，但互斥项目规模、时点不同或现金流多次变号时可能冲突，价值最大化应优先看合适折现率下的 NPV。沉没成本不进入增量现金流。

The official choice for this item is A. Additional reasoning: Use incremental after-tax cash flows. NPV measures added value after discounting at the appropriate opportunity cost; IRR makes NPV zero. They usually agree for independent conventional projects. Scale, timing, or multiple sign changes can create conflicts, particularly for mutually exclusive projects; value maximization prioritizes NPV at the appropriate required return. Sunk costs are excluded.

ROIC 的分母应与该期间创造利润所使用的资本相匹配，题目要求平均资本时不要只用期末数。ROIC 是会计回报指标，不能完全替代项目增量现金流 NPV。

Match ROIC's denominator to the capital used over the earnings period; use average capital when required. ROIC is an accounting return and does not fully replace incremental project NPV.

相关知识点 / **Related concepts**

NPV、IRR与股东价值：NPV = $\Sigma CF_t/(1+r)^t$–初始投资；机会成本、外部性与营运资本变化属于相关增量现金流。

NPV, IRR, and shareholder value: NPV $= \Sigma CF_t/(1+r)^t -$ initial investment. Opportunity costs, externalities, and working-capital changes are relevant incremental cash flows.

中文学习译文

1. 计算WACC时，权益成本高于债务成本，原因是：

A. 债务成本由管理层设定

B. 向股东的分配可以税前扣除

C. 债务投资者承担的风险低于权益投资者

官方英文题目 · PDF 第182页

1. In computing WACC, the cost of equity is higher than the cost of debt because the:

   A. cost of debt is set by management.

   B. distributions to shareholders are tax deductible.

   C. debt investors take less risk than equity investors.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

C正确。债务对公司现金流具有合同约定的优先索取权，因此风险低于权益；部分债务还以底层资产作担保。权益则是剩余索取权。

A不正确，因为发行人的债务成本和权益成本一样，由金融市场参与者决定。

B不正确，因为一般而言，股利等向股东的分配不可税前扣除，而很多司法管辖区允许利息费用税前扣除。

官方英文解析 · PDF 第182页

Solution:

C is correct. Debt is less risky than equity because it has a priority, contractual claim on the firm's cash flow. Additionally, some debt is secured with an underlying asset. In contrast, equity is a residual claim.

A is incorrect because an issuer's cost of debt, like its cost of equity, is determined by financial market participants.

B is incorrect because, generally, distributions to shareholders, such as dividends, are not tax deductible while interest expense is tax deductible in many jurisdictions.

官方英文解析 · PDF 第183页 · 续

补充解析 / **Supplementary explanation**

债权人的合同性优先索取权使其承受的风险通常低于普通股东，所以本题选C。资本成本是投资者要求的报酬，不是管理层任意设定的数字。股利通常不可税前扣除；许多法域允许利息扣税，使债务的税后成本进一步降低。

Debt's contractual senior claim generally makes it less risky than ordinary equity, so C is correct. Capital cost is investors' required return, not a number management can arbitrarily set. Dividends are generally nondeductible; interest deductibility in many jurisdictions further reduces after-tax debt cost.

相关知识点 / **Related concepts**

资本成本从资金提供者的要求收益出发；税盾需服从题设税制。

Capital costs reflect providers' required returns; tax shields depend on the stated tax regime.

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 183

题目与资料 / **Question and data**

中文学习译文

2. Nutry, Inc.的资本结构为30%债务和70%权益，利息费用可税前扣除。债务投资者要求税前回报率5%，权益投资者要求回报率10%。若边际公司税率为20%，WACC最接近：

A. 5.9%

B. 8.2%

C. 8.5%

官方英文题目 · PDF 第183页

2. Nutry, Inc., has a capital structure of 30% debt and 70% equity, and interest expense is tax deductible. Debt investors require a before-tax return of 5%, and equity investors' required return is 10%. If the marginal corporate tax rate is 20%, the WACC is closest to:

A. 5.9%.
B. 8.2%.
C. 8.5%.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。

WACC = 债务权重×债务成本 + 权益权重×权益成本

= 0.30×5%×(1–0.20) + 0.70×10% = 8.2%。

因此Nutry的WACC为8.2%。债务成本按税后口径计量，因为该公司所在司法管辖区允许利息费用税前扣除。

官方英文解析 · PDF 第183页

Solution:

B is correct. Nutry's WACC is calculated as follows:

WACC = (Weighting of debt × Cost of debt) + (Weighting of equity × Cost of equity)

= (0.3)(5%)(1 – 0.2) + (0.70)(10%) = 8.2%.

Thus, the WACC for Nutry is 8.2%. The cost of debt is stated on an after-tax basis because interest expense is tax deductible in Nutry's jurisdiction.

补充解析 / **Supplementary explanation**

先求债务税后成本5%×(1–20%)=4%；再分别乘市值权重：债务贡献30%×4%=1.2%，权益贡献70%×10%=7.0%，合计8.2%。8.5%忽略了利息税盾；不要对权益成本也乘(1–税率)。

After-tax debt cost is $5\% \times (1 - 20\%) = 4\%$. Weighted debt contributes $30\% \times 4\% = 1.2\%$, and equity contributes $70\% \times 10\% = 7.0\%$, totaling 8.2%. The 8.5% alternative omits the interest tax shield. Do not also tax-adjust the equity component.

相关知识点 / **Related concepts**

WACC=wd·rd·(1–T)+we·re；本题两权重之和为100%。

WACC = wd·rd·(1 − T) + we·re; the two weights sum to 100% here.

题目与资料 / Question and data

中文学习译文

3. 哪一理论认为，最优资本结构取决于债务税盾收益与财务困境成本的抵消关系？

A. 融资优序理论

B. 自由现金流假说

C. 资本结构静态权衡理论

官方英文题目 · PDF 第183页

> 3. The optimal capital structure is determined where the benefit of the debt tax shield is offset by the cost of financial distress under the:
>
> **A.** pecking order theory.
>
> **B.** free cash flow hypothesis.
>
> **C.** static trade-off theory of capital structure.

官方答案与解析 / Official answer and explanation

官方英文解析的中文学习译文

C正确。静态权衡理论同时考虑税盾提高价值的作用和财务困境成本降低价值的作用。官方原解表述为：在最优负债水平，财务困境成本等于债务税收收益。

融资优序理论认为，公司先使用内部产生的资金，因为没有发行成本或负面信号；需要更多资金时再发行债务，最后才发行权益。该理论不规定最优资本结构。

自由现金流假说认为，较高债务会迫使管理层提高经营效率、谨慎使用现金，以便偿付利息和本金，从而形成对管理层的约束。

官方英文解析 · PDF 第183页

> **Solution:**
>
> C is correct. The static trade-off theory of capital structure incorporates both the value-enhancing effect of the tax shield and the value-reducing impact of the costs of financial distress. At the optimal level of debt, the financial distress cost equals the tax benefit of debt.
>
> The pecking order theory states that firms use internally generated funds first because there are no floatation costs or negative signals. If more funds are needed, firms issue debt and only as a last resort will they issue equity. There is no optimal capital structure.
>
> The free cash flow hypothesis argues that higher debt levels discipline managers by forcing them to manage the company efficiently and use cash wisely so the company can make its interest and principal payments.

补充解析 / **Supplementary explanation**

静态权衡理论比较债务税盾与预期财务困境损失。官方原文把最优点表述为两种成本 / 收益相等；严谨地说，一般应比较继续增加负债带来的边际税盾收益与边际预期困境成本，而非要求两项总现值必然相等。融资优序侧重信息不对称下的融资顺序。

Static trade-off theory balances debt tax shields against expected distress losses. The official wording describes equality at the optimum; rigorously, the usual condition compares the marginal tax-shield benefit of additional debt with marginal expected distress cost, not necessarily equality of their total present values. Pecking order instead concerns financing preferences under information asymmetry.

相关知识点 / **Related concepts**

杠杆企业价值≈无杠杆价值+税盾现值–预期困境成本现值；最优条件是边际权衡。

Levered value ≈ unlevered value + PV(tax shields) − PV(expected distress costs); optimality is a marginal trade-off.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.
官方对最优债务水平的表述将税收收益与财务困境成本写为相等；一般最优条件应理解为边际收益与边际成本的权衡，而非两项总现值必然相等。 / The source equality at optimal debt should generally be interpreted as a marginal trade-off, not necessarily equality of total present values.

题目与资料 / **Question and data**

中文学习译文

4. 判断正误：管理层无法精确估计最优资本结构，但通常会设定目标资本结构。发行人的实际资本结构可能因经营和金融市场条件而偏离目标。

A. 正确

B. 错误

官方英文题目 · PDF 第183页

> 4. True or False: Managers cannot precisely estimate the optimal capital structure, but they often establish a target capital structure. An issuer's actual capital structure may differ from its target based on business and financial market conditions.
>
> **A.** True
> **B.** False

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。管理层在实践中不能精确估计最优资本结构，因此设定目标结构。实际结构可能由于多种原因偏离目标：第一，公司可能抓住以有利利率发行债务的机会；第二，债务和权益市场价值的变化会使实际结构偏离目标。交易成本使持续随着市值变化调整结构变得昂贵。

官方英文解析 · PDF 第183页

Solution:

A is correct. Since management cannot estimate the optimal capital structure in practice, it instead sets a target capital structure. The actual capital structure may deviate from the target for several reasons. First, the firm may be able to issue debt at a favorable rate, so management takes advantage of these opportunities. Second, changing market values of the firm's debt and equity may cause the firm's actual capital structure to differ from its target. Transaction costs make it costly to constantly adjust to the changing market values.

官方英文解析 · PDF 第184页 · 续

补充解析 / **Supplementary explanation**

目标资本结构是管理层计划采用的融资组合；实际市值权重会随股票价格、债务价格、新融资和偿还而变化。持续强制调回精确比例可能产生交易费用，因此现实中通常使用目标范围，并在融资机会或经营需求变化时调整。

A target is management's planned financing mix. Actual market-value weights move with equity and debt prices, new financing, and repayment. Constantly resetting an exact ratio creates transaction costs, so firms often use a target range and adjust as opportunities or operating needs change.

相关知识点 / **Related concepts**

计算实际权重使用相关市场价值；目标权重与当前权重可能不同。

Actual weights use relevant market values; target and current weights may differ.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

5. 所需融资的金额和类型，或WACC计算中的权重，取决于发行人的：

A. 商业模式

B. 财务杠杆

C. 固定成本占总成本的比例

官方英文题目 · PDF 第184页

5. The amount and type of financing needed or the weights in the WACC calculation depend on the issuer's:

   A. business model.

   B. financial leverage.

   C. proportion of fixed cost to total costs.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。融资需求的金额和类型以及WACC中的权重，取决于商业模式和企业生命周期阶段。有些商业模式需要大量资产，属于资本密集型；其他模式所需资产较少，属于轻资产型。

B和C不正确。官方原解将"固定资产占总成本的比例"称为经营杠杆，并将其与财务杠杆一同列为影响债务和权益各自成本的发行人特定因素；此处术语与题干不一致，见本题勘误说明。

官方英文解析 · PDF 第184页

Solution:

A is correct. The amount and type of financing needed or the weights in the WACC calculation depend on the business model and the stage in the company's life cycle. Some businesses require large amounts of assets and are capital intensive. Other business models require less assets and are capital light.

B and C are incorrect because the proportion of fixed assets to total costs (operating leverage) and financial leverage are issuer-specific factors that influence the component costs of debt and equity.

补充解析 / **Supplementary explanation**

资本密集型业务需要较多长期资产与融资，轻资产业务和生命周期阶段则可能对应不同融资需求，因此本题选商业模式。原解把"fixed assets to total costs"称为经营杠杆属于术语误写：经营杠杆联系固定经营成本占总经营成本的比例及利润对销售的敏感性。

Capital-intensive business models require substantial long-term assets and funding, while asset-light models and different life-cycle stages imply other needs, so A is correct. The official phrase fixed assets to total costs is a terminology error: operating leverage concerns fixed operating costs and operating-profit sensitivity to sales.

相关知识点 / **Related concepts**

经营杠杆来自固定经营成本；财务杠杆来自固定融资义务。固定资产占比不等同于经营杠杆。

Operating leverage arises from fixed operating costs; financial leverage from fixed financing obligations. Fixed-asset share is not operating leverage.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.
官方解析的"fixed assets to total costs (operating leverage)"存在术语误写；经营杠杆联系固定经营成本，而非固定资产 / 总成本。官方原文保留。 / The official phrase fixed assets to total costs (operating leverage) is a terminology error: operating leverage concerns fixed operating costs. The original is preserved.

题目与资料 / **Question and data**

中文学习译文

6. 在Modigliani和Miller（MM）的理论中，假设不存在税收、财务困境成本等限制条件下，公司价值：

A. 由资本结构决定

B. 仅由预期未来现金流决定

C. 使有杠杆公司的价值高于无杠杆公司

官方英文题目 · PDF 第184页

6. Under Modigliani and Miller (MM), if one assumes no taxes and no financial distress cost, among other assumptions, the value of the company is:

A. determined by its capital structure.
B. determined solely by its expected future cash flows.
C. set so the value of levered company is greater than that of the unlevered company.

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。MM表明，在包括零税收在内的一组严格假设下，公司价值不受融资组合或资本结构影响。公司的现金流才是价值的主要决定因素。如果公司市场价值不受融资组合影响，有杠杆公司与无杠杆公司的价值相等。

官方英文解析 · PDF 第184页

Solution:

B is correct. MM showed that under a set of restrictive assumptions, including zero taxes, the firm's value is unaffected by its financing mix or capital structure. It is the firm's cash flow that is the primary determinant of value. If the market value of the company is not affected by its financing mix, then the value of the levered firm is equal to the value of the unlevered firm.

补充解析 / **Supplementary explanation**

在MM无税等理想假设下，把同一组经营资产的现金流切分为债务与权益不会创造额外总价值，因此VL=VU。增加债务会使剩余权益承担更多风险并提高股东要求收益，抵消使用较便宜债务的表面好处。结论依赖题设假设，不能直接当作现实融资政策。

Under MM's idealized no-tax assumptions, splitting the same operating cash flows into debt and equity does not create total value: VL = VU. More debt increases residual equity risk and its required return, offsetting the apparent benefit of cheaper borrowing. The result depends on its assumptions.

相关知识点 / **Related concepts**

MM资本结构无关命题以给定经营资产及现金流为前提，融资方式本身不改变企业总价值。

MM irrelevance holds for given operating assets and cash flows; financing alone does not change total firm value.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 186

题目与资料 / **Question and data**

知识检查：计算 WACC

KNOWLEDGE CHECK: COMPUTING WACC

1. 假设 ABC 公司以 40% 债务和 60% 权益融资，且利息费用可以税前扣除。公司希望在筹集新资金时维持这一比例。

1. Assume that ABC Corporation is financed with 40% debt and 60% equity. Also assume that interest expense is tax deductible. ABC Corporation wishes to maintain these proportions as it raises new funds.

ABC 债权投资者的税前要求收益率为 4%，股权投资者的要求收益率为 10%。

ABC's debt investors' required rate of return, measured before taxes, is 4%, and its equity investors' required rate of return is 10%.

若公司边际税率为 23%，ABC 的加权平均资本成本是多少？

If the company’s marginal tax rate is 23%, what is ABC’s weighted-average cost of capital?

> 官方答案与解析 / **Official answer and explanation**

答案：

Solution:

ABC 的加权平均资本成本为 7.23%：

ABC’s weighted-average cost of capital is 7.23%:

WACC 的税后计算。Tax rate 表示税率；Pre-tax cost of debt 表示税前债务成本；Weighting of debt/equity 表示债务 / 权益权重；Cost of equity 表示权益成本。

$$\text{WACC} = [(1 - \text{Tax rate}) \times \text{Pre-tax cost of debt} \times \text{Weighting of debt}] + (\text{Cost of equity} \times \text{Weighting of equity}).$$

$$\text{WACC} = [0.04 \times (1 - 0.23) \times 0.40] + (0.10 \times 0.60).$$

$$\text{WACC} = 7.23\%.$$

原 PDF 第 186 页 · 共享公式 · 300 dpi

上一模块说明，资本投资回报高于要求收益率时，就能增加企业价值。

As demonstrated in the prior module, capital investments increase firm value if their returns exceed required rates of return.

当时重点讨论投资回报作为价值的主要驱动因素，但很明显，要求收益率降低也会提高 NPV，或至少降低创造价值投资所需达到的门槛。

The prior module focused on the return on investment as the main driver of value, but it is also clear that a lower required rate of return would increase NPV, too, or at least provide a lower threshold for value-creative investments.

这构成了管理者作资本结构决策、即选择债务与权益融资组合时最常见的目标之一：选择使 WACC 最低的组合。

This forms the basis for one of the most common objectives for managers in capital structure decisions, the mix of debt and equity financing: Choose whichever one leads to the lowest WACC.

不过，债务和权益成本并非管理层直接决定，而是由金融市场中的投资者决定，因此这是一项动态且复杂的工作。

However, the cost of debt and equity are not chosen by management but, rather, are determined in financial markets by investors, so it is a dynamic and non-trivial endeavor.

管理层选择资本结构的第二个目标，是在可行且经济的情况下，使融资的流动性或期限与资本投资相匹配。

The second objective of management in choosing a capital structure is, where possible and economical, matching the liquidity or time horizon with that of its capital investments.

补充解析 / **Supplementary explanation**

补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

Question set · 1

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 186-187

题目与资料 / **Question and data**

练习题组

QUESTION SET

1. XYZ 公司的资本结构为 30% 债务和 70% 权益，利息费用可以税前扣除。债权投资者要求的税前回报为 6%，股权投资者要求的回报为 12%。若公司边际税率从 20% 升至 25%，WACC 的变化最接近：

1. XYZ corporation has a capital structure of 30% debt and 70% equity, and interest expense is tax deductible. Debt investors require a before-tax return of 6%, and equity investors' required return is 12%. If the marginal corporate tax rate rises from 20% to 25%, the change in the WACC is closest to:

A. –0.09%。

A. –0.09%.

B. 0.09%。

B. 0.09%.

C. 0.30%。

C. 0.30%.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

税率为 20% 时，XYZ 的 WACC 计算如下：

XYZ's WACC at a tax rate of 20% is calculated as follows:

按 20% 税率计算 WACC，债务成本采用税后口径。

$$\text{WACC} = (\text{Weighting of debt} \times \text{Cost of debt}) + (\text{Weighting of equity} \times \text{Cost of equity})$$

$$= (0.3)(6\%)(1 - 0.2) + (0.70)(12\%) = 9.84\%.$$

原 PDF 第 186 页 · 共享公式 · 300 dpi

税率为 25% 时，XYZ 的 WACC 计算如下：

XYZ's WACC at a tax rate of 25% is calculated as follows:

$$\text{WACC} = (0.3)(6\%)(1 - 0.25) + (0.70)(12\%) = 9.75\%.$$

原 PDF 第 187 页 · 共享公式 · 300 dpi

因此，税后债务成本由 4.8% 降至 4.5%，WACC 下降 0.09 个百分点。

Thus, WACC declines by 0.09% as the after after-tax cost of debt declines from 4.8% to 4.5%.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is A. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

QUESTION SET

2. 判断正误：由于债务和权益成本由公司控制，管理层可以降低资本配置流程中使用的债务和权益成本，从而降低公司的资本成本。

2. True or False: Since the cost of debt and equity are controlled by the firm, managers can lower the cost of capital for the firm by reduce reducing the cost of debt and equity used in their capital allocation process.

A. 正确。

A. True

B. 错误。

B. False

官方答案与解析 / Official answer and explanation

答案：

Solution:

B 正确。

B is correct.

此说法错误，因为债务和权益成本虽然受管理层行为影响，但并非由管理层选择，而是由金融市场中的投资者决定。

This statement is false because the costs of debt and equity are not selected by management but are determined in financial markets by investors, though they are influenced by management's actions.

第 3、4 题使用以下信息：

Questions 3 and 4 relate to the following information:

X 公司的资产负债表右侧包含以下项目：

Company X has the following on the right-hand side of its balance sheet:

资本构成：债券、普通股（40,000 股），以及负债和权益总额。金额见原表。

Bonds $400,000

Common stock (40,000 shares) $600,000

Total liabilities and equity $1,000,000

原 PDF 第 187 页 · 完整表格 · 300 dpi

X 公司当前股价为每股 $20。

The price of Company X stock is currently $20 per share.

债务的税前要求收益率为 5%，权益的要求收益率为 10%。

The required return before tax on debt is 5%, and the required return on equity is 10%.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1−T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is B. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1−T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

题目与资料 / **Question and data**

练习题组

QUESTION SET

3. 计算 X 公司 WACC 时，按资产负债表项目账面价值计算的债务权重，很可能_____按市场价值计算的债务权重。

3. In calculating WACC for Company X, the weight for debt using book values for the balance sheet components is likely to be _____ than the weight for debt using market values for the balance sheet components.

A. 低于

A. lower

B. 等于

B. the same

C. 高于。

C. higher

> 官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

账面价值权重计算如下：

The book value weights are computed as follows:

w_d 为债务权重，w_e 为权益权重；此处采用账面价值。

$$W_d = \$400{,}000/\$1{,}000{,}000 = 0.40.$$

$$W_e = \$600{,}000/\$1{,}000{,}000 = 0.60.$$

原 PDF 第 187 页 · 共享公式 · 300 dpi

权益市场价值等于〔下方计算式 1〕。

The market value of equity is equal to〔calculation 1 below〕.

$$\$20 \times 40{,}000 \text{ shares} = \$800{,}000$$

原 PDF 第 187 页 · 300 dpi

市场价值权重计算如下：

The market value weights are computed as follows:

使用市场价值计算债务和权益权重。

$$W_d = \$400{,}000/\$1{,}200{,}000 = 0.33.$$

$$W_e = \$800{,}000/\$1{,}200{,}000 = 0.67.$$

因此，债务的账面价值权重 0.40 高于市场价值权重 0.33。

Thus, the book value weight for debt (0.40) is higher than the market value weight (0.33).

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is C. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

QUESTION SET

4. 若公司边际税率为 20%，股价上升至$25，X 公司的 WACC 最接近：

4. If the marginal corporate tax rate is 20% and the stock price increases to $25, the WACC for Company X is closest to:

A. 7.60%。

A. 7.60%.

B. 8.26%。

B. 8.26%.

C. 8.55%。

C. 8.55%.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

账面价值权重计算如下：

The book value weights are computed as follows:

使用账面价值计算债务和权益权重。

$$W_d = \$400{,}000/\$1{,}000{,}000 = 0.40.$$

$$W_e = \$600{,}000/\$1{,}000{,}000 = 0.60.$$

原 PDF 第 188 页 · 共享公式 · 300 dpi

权益市场价值等于〔下方计算式 1〕。

The market value of equity is equal to〔calculation 1 below〕.

$$\$25 \times 40{,}000 \text{ shares} = \$1{,}000{,}000$$

原 PDF 第 188 页 · 300 dpi

市场价值权重计算如下：

The market value weights are computed as follows:

股价变化后，使用市场价值重新计算债务和权益权重。

$$W_d = \$400{,}000/\$1{,}400{,}000 = 0.29.$$

$$W_e = \$1{,}000{,}000/\$1{,}400{,}000 = 0.71.$$

原 PDF 第 188 页 · 共享公式 · 300 dpi

计算 WACC 时，恰当的权重是市场价值权重。

The appropriate weights for the WACC calculation are the market weights

使用市场价值权重，X 公司的 WACC 计算如下：

Company X's WACC, using the market weights, is calculated as follows:

使用市场价值权重和税后债务成本，计算 X 公司的 WACC。

WACC = (weighting of debt * cost of debt) + (weighting of equity * cost of equity)

= (0.29) (5%)(1-0.2) +(0.71)(10%) = 8.26%

原 PDF 第 188 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1−T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is B. Additional reasoning: Weight required returns by market values. CI-LM06-WORKED_CASE-003

作为债务融资的租赁
Leases as Debt Financing

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 189-190

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

作为债务融资的租赁

Leases as Debt Financing

官方答案与解析 / **Official answer and explanation**

许多商业模式需要具有可替代性的有形资产，例如：

Many business models require fungible and tangible assets, such as

■ 办公场所；

■ office space,

■ 数据中心；

■ data centers,

■ 个人电脑、手机和平板电脑等信息技术设备；

■ IT devices, such as PCs, phones, and tablets,

■ 飞机；以及

■ aircraft, and

■ 汽车。

■ automobiles.

公司可以用现金购买这些资产，或借款购买，但更常见的做法是向银行或专业资产出租商租赁。例如，AerCap Holdings N.V. 向航空公司出租超过 1,000 架飞机。

While companies could buy these assets for cash or borrow cash and buy them, a more common approach is to lease them from a lessor, such as a bank or specialized asset lessor—for example, AerCap Holdings N.V., which leases over 1,000 aircraft to airlines.

租赁类似贷款，但借款人（承租人）不是以利息和本金支付换取现金，而是以租金支付换取资产使用。

A lease is like a loan, but rather than receiving cash in exchange for interest and principal payments, the borrower (lessee) receives an asset in exchange for lease payments.

租赁隐含的利率通常远低于承租人直接借入现金的利率，因为租赁资产充当担保品，而且出租人往往是能够低成本融资的大型公司。

Implicit in the lease is an interest rate that is often much lower than what the lessee would have been lent cash for, because the leased asset is collateral and because lessors are often large companies that can borrow cheaply.

为可替代性有形资产融资的另一种类似方式是担保债务。

Another similar approach to financing fungible and tangible assets is through secured debt.

发行人以资产为贷款或债券提供担保，可能获得远低于无担保融资的债务成本。

By using the asset as collateral for a loan or bond, the issuer may be able to obtain a far lower cost of debt than on an unsecured basis.

市中心办公楼适合这种做法；位于偏远地区的高度专业化工厂，或对投资者几乎没有担保价值的消耗性资产，则未必适合。

This is true of a downtown office building but probably not for a highly specialized factory in a remote location or a consumable asset that has little value to investors as collateral.

> 补充解析 / **Supplementary explanation**

补充思路：融资来源受现金流可预测性、抵押资产、经营历史和规模约束。早期企业通常依靠创始人、员工股权和风险资本，债务多依赖租赁或可转工具；现金流稳定且经营成熟后，更有条件获得无抵押债务。这里判断的是融资可得性和匹配性，而不是简单比较名义融资利率。

Additional reasoning: Funding depends on cash-flow predictability, collateral, operating history, and size. Early firms often rely on founders, employee equity, and venture capital, with debt limited to leases or convertibles. Mature firms with stable cash generation are more able to issue unsecured debt. The issue is funding access and suitability, not just nominal rates.

相关知识点 / **Related concepts**

生命周期与融资来源：融资结构应与资产期限和现金流风险匹配；有形抵押物和稳定偿债来源有助于支持债务融资。

Life cycle and financing sources: Match financing to asset duration and cash-flow risk. Tangible collateral and dependable debt-service cash flows support borrowing.

原教材为连贯讲解型案例，没有独立设问及答案分栏；保留官方案例与演示，未另造题目。

CI-LM06-KNOWLEDGE_CHECK-401

知识检查 · 第 1 题
Knowledge check · 1

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 193-194

题目与资料 / **Question and data**

知识检查：固定成本、可变成本与企业盈利能力

KNOWLEDGE CHECK: FIXED VS. VARIABLE COST AND FIRM PROFITABILITY

考虑两家完全由权益融资的公司。

Consider two companies fully financed by equity.

在某一时期，两家公司收入均为 100，费用均为 70。

Each firm has revenue of 100 over a particular period and expenses of 70.

■ 第一家公司（FirmFC+）的固定成本为 50，可变成本等于销售收入的 20%，即 20。

■ The first company (FirmFC+) has fixed costs (FC) of 50 and variable costs (VC) equal to 20% of sales, or 20.

■ 第二家公司（FirmFC–）的固定成本为 20，可变成本等于销售收入的 50%。

■ The second company (FirmFC–) has fixed costs of 20 and variable costs equal to 50% of sales.

1. 计算各公司的利润（收入减总成本），并比较权益回报率（利润 / 总权益）。

1. Calculate profit (revenue – total costs) for each firm, and compare their returns on equity (profit/total equity).

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

从收入中减去固定成本和可变成本，得到利润；再以利润除以总权益，计算单期权益回报率：

Solve for profit by subtracting fixed costs (FC) and variable costs from revenue and dividing the profit by total equity to calculate the one-period return on equity:

以固定成本为主的公司与以变动成本为主的公司比较。

两栏分别为高固定成本公司和高变动成本公司；各行依次为收入、减去固定成本、变动成本及其占收入比例、利润、权益总额及股东权益回报率。

$Firm_{FC+}$ (Primarily Fixed Cost)		**$Firm_{FC-}$ (Primarily Variable Cost)**	
Revenue	100	Revenue	100
Less: Fixed Costs	–50	Less: Fixed Costs	–20
Variable Cost (20%)	–20	Variable Cost (50%)	–50
Profit	30	Profit	30
Total Equity	100	Total Equity	100
Return on Equity	**30%**	**Return on Equity**	**30%**

原 PDF 第 194 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：先用收入减固定成本和变动成本求利润，再除以题中权益。销售改变时，变动成本随业务量变化，而固定成本在相关范围内保持不变，因此利润和 ROE 的百分比变化通常大于收入变化。高固定成本或更多债务会使权益回报对业务波动更敏感；资本密集企业还需要更多资产和融资。

Additional reasoning: Compute profit as revenue minus fixed and variable costs, then divide by the stated equity. When sales change, variable costs move with volume while fixed costs remain unchanged within the relevant range, so profit and ROE can move more than sales. Fixed costs and debt increase equity sensitivity; capital-intensive firms also require more assets and funding.

相关知识点 / **Related concepts**

固定成本、杠杆与ROE敏感性：ROE = 利润/权益；经营杠杆来自固定经营成本，财务杠杆来自固定融资承诺。两者不能混为一谈。

Fixed costs, leverage, and ROE sensitivity: ROE = profit/equity. Operating leverage arises from fixed operating costs; financial leverage from fixed financing commitments. They are distinct.

考虑两家完全由权益融资的公司。

Consider two companies fully financed by equity.

在某一时期，两家公司收入均为 100，费用均为 70。

Each firm has revenue of 100 over a particular period and expenses of 70.

■ 第一家公司（FirmFC+）的固定成本为 50，可变成本等于销售收入的 20%，即 20。

■ The first company (FirmFC+) has fixed costs (FC) of 50 and variable costs (VC) equal to 20% of sales, or 20.

■ 第二家公司（FirmFC–）的固定成本为 20，可变成本等于销售收入的 50%。

■ The second company (FirmFC–) has fixed costs of 20 and variable costs equal to 50% of sales.

4. 债权投资者可能愿意向哪家公司提供成本较低的信贷？解释原因。

4. Which firm might debt investors be willing to extend credit to at a lower cost of debt? Explain your answer.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

根据给定信息，债权投资者可能愿意以较低债务成本向 FirmFC– 提供信贷，因为其利润和盈利能力较稳定，尤其是在销售下降 25% 的不利情形下。

Based on the information provided, debt investors might be willing to extend credit at a lower cost of debt to FirmFC– because its profits and profitability are more stable, especially in the downside case of a 25% decline in sales.

即使销售减少，其稳定利润也使其比 FirmFC+ 更可能如约偿付利息和本金。

The firm's stability of profits makes it more likely than FirmFC+ to be able to make promised interest and principal payments even if sales decline.

利润稳定源于较高的可变成本占比，换言之，其经营杠杆较低。

The stability of profits results from a higher percentage of costs that are variable; in other words, it has lower operating leverage.

实践中，债权投资者还会评估两家公司的销售稳定性，并形成销售增长前景判断。

In practice, debt investors would, among other things, evaluate the stability of sales and develop an outlook for sales growth for both firms.

FirmFC– 虽然经营杠杆较低，但销售风险可能高于 FirmFC+。

While FirmFC– has lower operating leverage, it could have greater sales risk than FirmFC+.

财务杠杆和利息保障程度也是重要考量，因为已有大量债务的公司已经承诺支付利息和本金，承受新增债务的能力较弱。

Financial leverage and interest coverage are important considerations because a company with significant indebtedness already is less able to support incremental debt because it has already committed to interest and principal payments.

对股权投资者而言，高负债还意味着存在大量优先于自身的索偿权。

Additionally, for equity investors, high levels of indebtedness mean that there are significant priority claims ahead of them.

前面已介绍，财务杠杆通常用总债务或扣除现金及有价证券后的净债务，与经营利润等盈利指标或总权益的比率衡量。

Financial leverage, covered in a prior lesson, is often measured using a ratio of either total debt or debt net of cash and marketable securities to a profit measure, such as operating income, or to total equity.

利息保障程度衡量发行人用核心业务利润支付利息的能力：

Interest coverage measures an issuer's ability to make interest payments from its core business profits:

利息保障倍数：息税前利润与利息费用的比率。

$$\text{Interest coverage} = \text{Profit before interest and taxes}/\text{Interest expense}. \quad (3)$$

原 PDF 第 195 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

先用收入减固定成本和变动成本求利润，再除以题中权益。销售改变时，变动成本随业务量变化，而固定成本在相关范围内保持不变，因此利润和 ROE 的百分比变化通常大于收入变化。高固定成本或更多债务会使权益回报对业务波动更敏感；资本密集企业还需要更多资产和融资。

Compute profit as revenue minus fixed and variable costs, then divide by the stated equity. When sales change, variable costs move with volume while fixed costs remain unchanged within the relevant range, so profit and ROE can move more than sales. Fixed costs and debt increase equity sensitivity; capital-intensive firms also require more assets and funding.

相关知识点 / **Related concepts**

固定成本、杠杆与ROE敏感性：ROE = 利润/权益；经营杠杆来自固定经营成本，财务杠杆来自固定融资承诺。两者不能混为一谈。

Fixed costs, leverage, and ROE sensitivity: ROE = profit/equity. Operating leverage arises from fixed operating costs; financial leverage from fixed financing commitments. They are distinct.

知识检查 · 第 4 题
Knowledge check · 4

知识检查 / Knowledge check · 原版 PDF 页码 / Source PDF pages: 195-197

题目与资料 / Question and data

知识检查：财务杠杆与企业盈利能力

KNOWLEDGE CHECK: FINANCIAL LEVERAGE AND FIRM PROFITABILITY

考虑两家资产均为 100 的公司。

Consider two companies both with assets of 100.

■ A 公司由 80 权益和 20 债务融资；B 公司由 40 权益和 60 债务融资。

■ Firm A is financed with 80 in equity and 20 in debt, while Firm B is financed with 40 equity and 60 debt.

■ 在某一时期，两家公司收入均为 100，非利息费用均为 70。

■ Each firm has revenue of 100 over a particular period and non-interest expenses of 70.

A 公司利息费用为 2，B 公司为 9。

Firm A has interest expense of 2, while Firm B has interest expense of 9.

忽略所得税。

Ignore income taxes.

4. 投资者可能对哪家公司的债务和权益要求较低收益率？解释原因。

4. Which firm might investors require lower rates of return for on debt and equity? Explain your answer.

官方答案与解析 / Official answer and explanation

答案：

Solution:

A 公司，因为其主要以权益融资。

Firm A, which is primarily financed with equity.

虽然 B 公司在基准情形下 ROE 较高，经营利润增长时股权投资者的上行空间也更大，但其杠杆显著较高，导致可能结果的范围更宽。

While Firm B has greater profitability (ROE) in the base case and higher upside for equity investors if operating income increases, it has a much wider range of outcomes owing to its substantially higher leverage.

即使在不利情形下，A 公司的利息保障倍数仍超过 10；因此，经营利润下降超过 90% 后，其付息能力才会受到严重威胁。

Even in the downside case, Firm A's interest coverage ratio is over 10; therefore, it can withstand a >90% decline in operating income before its ability to make interest payments is seriously imperiled.

实践中，投资者还会评估两家公司的销售稳定性和经营杠杆，以形成前景判断。

In practice, investors would, among other things, evaluate the stability of sales and operating leverage in developing an outlook for both firms.

因此，A 公司虽财务杠杆较低、利息保障倍数较高，却可能比 B 公司具有更高经营杠杆和销售风险。

So while Firm A has lower financial leverage and higher interest coverage, it could have greater operating leverage and higher sales risk than Firm B.

最后，与商业模式相关的标的资产也是重要考量。

Finally, the underlying assets associated with a firm's business model are also an important consideration.

一般而言，能够支持更多债务的资产，包括优质担保品、能够产生现金的资产，或具有可替代性或流动性的资产，例如房地产、汽车、飞机，以及对信用良好客户的应收款。

In general, assets that support the greater use of debt include those that are considered strong collateral, generate cash, or are fungible or liquid, such as real estate, automobiles, aircraft, and receivables from creditworthy customers.

课程后文将详细介绍担保债务和租赁。

Secured debt and leases are covered in detail later in the curriculum.

补充解析 / **Supplementary explanation**

先用收入减固定成本和变动成本求利润，再除以题中权益。销售改变时，变动成本随业务量变化，而固定成本在相关范围内保持不变，因此利润和 ROE 的百分比变化通常大于收入变化。高固定成本或更多债务会使权益回报对业务波动更敏感；资本密集企业还需要更多资产和融资。

Compute profit as revenue minus fixed and variable costs, then divide by the stated equity. When sales change, variable costs move with volume while fixed costs remain unchanged within the relevant range, so profit and ROE can move more than sales. Fixed costs and debt increase equity sensitivity; capital-intensive firms also require more assets and funding.

相关知识点 / **Related concepts**

固定成本、杠杆与ROE敏感性：ROE = 利润/权益；经营杠杆来自固定经营成本，财务杠杆来自固定融资承诺。两者不能混为一谈。

Fixed costs, leverage, and ROE sensitivity: ROE = profit/equity. Operating leverage arises from fixed operating costs; financial leverage from fixed financing commitments. They are distinct.

题目与资料 / **Question and data**

练习题组

QUESTION SET

1. 将以下公司生命周期阶段与债务类型配对：

1. Match each of the following phases of the company life cycle with the debt type:

配对题：公司生命周期阶段与可能采用的债务类型。

生命周期阶段：A. 初创期；B. 成长期；C. 成熟期。债务类型：i. 无抵押债务；ii. 可转换债务；iii. 有抵押债务。

Phase of company life cycle	Likely debt type
A. Startup	i. Unsecured
B. Growth	ii. Convertible
C. Mature	iii. Secured

原 PDF 第 198 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A—ii，可转换债务：在公司生命周期早期，能够获得的债务通常只有租赁和可转换债务。

A. ii. Convertible: In the early stages of the corporate life cycle, the only types of debt available are leases and convertible debt.

B—iii，担保债务：成长期业务风险下降，自由现金流改善，但很可能仍为负，因此最可能使用担保债务融资。

B. iii. Secured: Business risk declines and free cash flow improves in the growth phase but is still likely negative, so secured debt financing is most likely.

C—i，无担保债务：此时自由现金流已为正且可预测，公司能够使用大量债务，包括无担保债务。

C. i. Unsecured: Free cash is now positive and predictable. The firm is able to use a significant amount of debt, including unsecured debt.

补充解析 / **Supplementary explanation**

补充思路：融资来源受现金流可预测性、抵押资产、经营历史和规模约束。早期企业通常依靠创始人、员工股权和风险资本，债务多依赖租赁或可转工具；现金流稳定且经营成熟后，更有条件获得无抵押债务。这里判断的是融资可得性和匹配性，而不是简单比较名义融资利率。

Additional reasoning: Funding depends on cash-flow predictability, collateral, operating history, and size. Early firms often rely on founders, employee equity, and venture capital, with debt limited to leases or convertibles. Mature firms with stable cash generation are more able to issue unsecured debt. The issue is funding access and suitability, not just nominal rates.

相关知识点 / **Related concepts**

生命周期与融资来源：融资结构应与资产期限和现金流风险匹配；有形抵押物和稳定偿债来源有助于支持债务融资。

Life cycle and financing sources: Match financing to asset duration and cash-flow risk. Tangible collateral and dependable debt-service cash flows support borrowing.

CI-LM06-QUESTION_SET-602

Question set · 2

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 198

题目与资料 / **Question and data**

练习题组

QUESTION SET

2. 具有以下哪种特征的公司，债务与权益成本可能更高？

2. The cost of debt and equity is likely to be higher for a firm with

A. 收入稳定增长。

A. stable revenue growth.

B. 经营杠杆较高。

B. high operating leverage.

C. 利息保障倍数较高。

C. high interest coverage.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

经营杠杆是固定成本占总成本的比例，用于衡量利润稳定性。

Operating leverage is the firm’s proportion of fixed costs to total costs and measures the stability of profits.

经营杠杆较高的公司，在收入发生同样幅度变化时，经营利润变化更大。

Firms with high operating leverage experience a greater change in operating profits for a given change in revenues.

因此，这类公司风险较高，债务与权益成本也可能较高。

Thus, firms with high operating margins are riskier and likely to have higher debt and equity costs.

A 和 C 错误。

A and C are incorrect.

稳定收入增长和较高利息保障倍数，意味着公司风险较低、债务与权益成本较低。

Stable revenue growth and high interest coverage suggest a lower risk profile for the firm and a lower cost of debt and equity.

较高利息保障倍数表明财务杠杆较低、风险较小。

A high interest coverage ratio indicates the firm has lower financial leverage and less risk.

财务分析师 Jason Jayman 正为两家公司编写报告。

Jason Jayman, a financial analyst, is preparing a report on two companies.

Newtech 处于早期阶段，经营成本主要是可变成本，资产主要为现金和无形资产。

Newtech is an early-stage company with a primarily variable operating cost structure, and its assets are largely cash and intangibles.

Oldtech 是成熟公司，固定成本高、资本周转率低、资本支出 / 销售收入比率高。

Oldtech is a mature company with high fixed costs, low capital turnover, and a high capital expenditure to sales ratio.

Jayman 预计未来一年 GDP 增长将放缓，两家公司的收入增长率都会下降。

Jayman expects GDP growth to slow over the next year, which will lower the growth rate of revenues for both companies.

补充解析 / **Supplementary explanation**

先用收入减固定成本和变动成本求利润，再除以题中权益。销售改变时，变动成本随业务量变化，而固定成本在相关范围内保持不变，因此利润和 ROE 的百分比变化通常大于收入变化。高固定成本或更多债务会使权益回报对业务波动更敏感；资本密集企业还需要更多资产和融资。

Compute profit as revenue minus fixed and variable costs, then divide by the stated equity. When sales change, variable costs move with volume while fixed costs remain unchanged within the relevant range, so profit and ROE can move more than sales. Fixed costs and debt increase equity sensitivity; capital-intensive firms also require more assets and funding.

相关知识点 / **Related concepts**

固定成本、杠杆与ROE敏感性：ROE = 利润/权益；经营杠杆来自固定经营成本，财务杠杆来自固定融资承诺。两者不能混为一谈。

Fixed costs, leverage, and ROE sensitivity: ROE = profit/equity. Operating leverage arises from fixed operating costs; financial leverage from fixed financing commitments. They are distinct.

习题组 · 第 3 题
Question set · 3

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 198

题目与资料 / **Question and data**

练习题组

QUESTION SET

3. Newtech 最可能通过发行以下哪项为经营活动融资？

3. Newtech will likely finance activity by issuing:

A. 无担保债务。

A. unsecured debt.

B. 通过 IPO 发行权益。

B. equity through an IPO.

C. 向创始人和员工募集权益。

C. equity sourced from founders and employees.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

Newtech 处于生命周期早期。

Newtech is in the early stages of its corporate life cycle.

早期企业的权益融资来自创始人、以股份薪酬形式参与的员工，以及风险投资。

Equity financing for early-stage firms is sourced from founders, employees through share-based compensation, and venture capital.

通常，这些企业只能获得租赁和可转换债务融资。

Generally, the only sources of debt financing available for these firms are leases and convertible debt.

大多数交易所要求最低规模和盈利水平，因此通过 IPO 获得权益融资的可能性较小。

Equity financing through an IPO is unlikely given that most stock exchanges have minimum size and profitability requirements.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：融资来源受现金流可预测性、抵押资产、经营历史和规模约束。早期企业通常依靠创始人、员工股权和风险资本，债务多依赖租赁或可转工具；现金流稳定且经营成熟后，更有条件获得无抵押债务。这里判断的是融资可得性和匹配性，而不是简单比较名义融资利率。

The official choice for this item is C. Additional reasoning: Funding depends on cash-flow predictability, collateral, operating history, and size. Early firms often rely on founders, employee equity, and venture capital, with debt limited to leases or convertibles. Mature firms with stable cash generation are more able to issue unsecured debt. The issue is funding access and suitability, not just nominal rates.

相关知识点 / **Related concepts**

生命周期与融资来源：融资结构应与资产期限和现金流风险匹配；有形抵押物和稳定偿债来源有助于支持债务融资。

Life cycle and financing sources: Match financing to asset duration and cash-flow risk. Tangible collateral and dependable debt-service cash flows support borrowing.

QUESTION SET

4. 考虑预期经营环境恶化，哪家公司的现金流和盈利能力变化更大？

4. Given the forecast of deteriorating business conditions, which company will experience a greater change in cash flow and profitability?

A. Newtech。

A. Newtech

B. 没有差别。

B. No difference

C. Oldtech。

C. Oldtech

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。随着收入增长放缓，Oldtech 的现金流和盈利能力变化可能更大。尽管成熟期通常意味着利润稳定，但 Oldtech 固定成本占比较高，经营杠杆高，因此相同收入变化会带来更大的利润变化。相比之下，Newtech 的成本主要可变，经营杠杆低。

C is correct. With revenue growth slowing, Oldtech is likely to experience a greater change in cash flow and profitability. Despite being in the mature phase of the corporate life cycle, during which one would expect stable profits, Oldtech has high operating leverage given its high degree of fixed cost. This will result in a greater change in profits for a given change in revenues. In contrast, Newtech's costs are variable, with low operating leverage.

补充解析 / **Supplementary explanation**

先用收入减固定成本和变动成本求利润，再除以题中权益。销售改变时，变动成本随业务量变化，而固定成本在相关范围内保持不变，因此利润和 ROE 的百分比变化通常大于收入变化。高固定成本或更多债务会使权益回报对业务波动更敏感；资本密集企业还需要更多资产和融资。

Compute profit as revenue minus fixed and variable costs, then divide by the stated equity. When sales change, variable costs move with volume while fixed costs remain unchanged within the relevant range, so profit and ROE can move more than sales. Fixed costs and debt increase equity sensitivity; capital-intensive firms also require more assets and funding.

相关知识点 / **Related concepts**

固定成本、杠杆与ROE敏感性：ROE = 利润/权益；经营杠杆来自固定经营成本，财务杠杆来自固定融资承诺。两者不能混为一谈。

Fixed costs, leverage, and ROE sensitivity: ROE = profit/equity. Operating leverage arises from fixed operating costs; financial leverage from fixed financing commitments. They are distinct.

5. The business model used by Oldtech can best be described as:

A. 轻资产型。

A. capital light.

B. 资本密集型。

B. capital intensive.

C. 以合同关系而非所有权关系为主。

C. contractual rather than ownership relationships.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

Oldtech 固定成本高、资本周转率低、资本支出 / 销售收入比率高，因此最适合描述为资本密集型。

Oldtech's business model can best be described as capital intensive given its high fixed costs, low capital turnover, and high capital-expenditure-to-sales ratio.

公司需要大量资产，融资需求较大。

The firm requires a lot of assets and has significant financing requirements.

Newtech 则是轻资产型，因为其大部分成本可变，资产主要是现金和无形资产。

Newtech is capital light since most of its costs are variable and its assets are largely cash and intangibles.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：先用收入减固定成本和变动成本求利润，再除以题中权益。销售改变时，变动成本随业务量变化，而固定成本在相关范围内保持不变，因此利润和 ROE 的百分比变化通常大于收入变化。高固定成本或更多债务会使权益回报对业务波动更敏感；资本密集企业还需要更多资产和融资。

The official choice for this item is B. Additional reasoning: Compute profit as revenue minus fixed and variable costs, then divide by the stated equity. When sales change, variable costs move with volume while fixed costs remain unchanged within the relevant range, so profit and ROE can move more than sales. Fixed costs and debt increase equity sensitivity; capital-intensive firms also require more assets and funding.

相关知识点 / **Related concepts**

固定成本、杠杆与ROE敏感性：ROE = 利润/权益；经营杠杆来自固定经营成本，财务杠杆来自固定融资承诺。两者不能混为一谈。

Fixed costs, leverage, and ROE sensitivity: ROE = profit/equity. Operating leverage arises from fixed operating costs; financial leverage from fixed financing commitments. They are distinct.

Gerhardt 公司的权益成本
Gerhardt Corporation Cost of Equity

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 202-203

题目与资料 / Question and data

例题 2

EXAMPLE 2

Gerhardt 公司的权益成本

Gerhardt Corporation Cost of Equity

官方答案与解析 / Official answer and explanation

假设 Gerhardt 公司完全由权益融资。

Assume that Gerhardt Corporation has an all-equity capital structure.

Gerhardt 预期每年现金流（CF_e）为 5,000 欧元，权益成本为 10%；由于权益是其唯一资本来源，这也等于 WACC。

Gerhardt has expected annual cash flows (or CFe) of EUR5,000 and a cost of equity of 10%, which is also its WACC since equity is the firm's only source of capital.

为简化分析，假设全部现金流都是永续的。

For simplicity, we assume that all cash flows are perpetual.

因此，Gerhardt 的价值等于：

Therefore, Gerhardt's value is equal to

$$V = \frac{CF_e}{r_{wacc}} = \frac{\text{EUR5,000}}{0.10} = \text{EUR50,000.}$$

原 PDF 第 202 页 · 共享公式 · 300 dpi

现在假设 Gerhardt 计划以 5% 的成本发行 15,000 欧元债务，并用所得资金回购股份，使流通权益减少 15,000 欧元。

Now suppose that Gerhardt plans to issue EUR15,000 in debt at a cost of 5% and use the proceeds to buy back and reduce its outstanding equity by EUR15,000.

此举使总投入资本维持 50,000 欧元不变。

This action leaves total invested capital unchanged at EUR50,000.

根据 MM 命题 I，V_L = V_U，因此改变资本结构后，Gerhardt 的价值必须仍为 50,000 欧元。

Under MM Proposition I, VL = VU, the value of Gerhardt must remain the same at EUR50,000 after the change in capital structure.

根据 MM 命题 II，资本结构调整后，Gerhardt 拥有 15,000 欧元债务资本和 35,000 欧元权益资本，其权益成本上升至 12.143%：

Under MM Proposition II, after the change in capital structure, the cost of equity for Gerhardt—now with EUR15,000 in debt capital and EUR35,000 in equity capital—increases to 12.143%:

12.143%.

$$r_e = 0.10 + (0.10 - 0.05)\frac{\text{EUR15,000}}{\text{EUR35,000}} \approx 0.12143 = 12.143\%.$$

原 PDF 第 202 页 · 共享公式 · 300 dpi

为证明 Gerhardt 在新资本结构下的企业价值不变，必须证明其 WACC 仍为 10%。

To prove that Gerhardt's firm value is unchanged under the new capital structure, we must show its WACC remains unchanged at 10%.

按新的权益成本，Gerhardt 的 WACC 计算如下：

With the new cost of equity, Gerhardt's WACC is now calculated as

$$r_{wacc} = \left(\frac{\text{EUR15,000}}{\text{EUR50,000}}\right)0.05 + \left(\frac{\text{EUR35,000}}{\text{EUR50,000}}\right)0.12143 = 0.10 = 10\%.$$

原 PDF 第 202 页 · 共享公式 · 300 dpi

Gerhardt 的 WACC 仍为 10%，因为转用成本较低的债务所带来的好处，被权益成本上升完全抵消。

Gerhardt's WACC is still 10%, because the move to lower-cost debt was perfectly offset by an increase in the cost of equity.

因此，与 MM 命题 I 一致，公司价值仍为 50,000 欧元。

Thus, consistent with MM Proposition I, the value of the firm remains unchanged, at EUR50,000.

此外，Gerhardt 的价值必须等于债权人现金流（CF_d）和股东现金流（CF_e）的现值之和。

Furthermore, the value of Gerhardt must equal the sum of the present values of cash flows to debtholders (CFd) and shareholders (CFe).

债务金额为 15,000 欧元，成本（r_d）为 5%，因此 Gerhardt 向债权人和股东支付的款项如下：

With EUR15,000 debt at a cost of 5% (rd), Gerhardt makes the following debtholder and shareholder payments:

$$CF_d = D \times r_d.$$

$$\text{EUR750} = \text{EUR15,000} \times 5\%.$$

原 PDF 第 203 页 · 共享公式 · 300 dpi

这样，留给股东的现金流（CF_e）为 〔下方计算式 1〕。因此，公司总价值也可以表示为：

This leaves 〔calculation 1 below〕 remaining for shareholders (CFe). Therefore, the total value of the company can also be expressed as

$$\text{EUR5,000} - \text{EUR750} = \text{EUR4,250}$$

原 PDF 第 203 页 · 300 dpi

$$V = D + E$$
$$V = \frac{CF_d}{r_d} + \frac{CF_e}{r_e}$$
$$V = \frac{\text{EUR750}}{0.05} + \frac{\text{EUR4,250}}{0.12143} = \text{EUR50,000}.$$

原 PDF 第 203 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

相关知识点 / **Related concepts**

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

Leverage and capital-structure theories: Business risk comes from operations; financial risk comes from fixed financing commitments. Optimal leverage varies with taxes, collateral, cash-flow stability, and information.

CI-LM06-WORKED_CASE-008

存在公司税时的 Gerhardt 公司
Gerhardt Corporation under Corporate Taxes

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 205-206

题目与资料 / **Question and data**

例题 3

EXAMPLE 3

存在公司税时的 Gerhardt 公司

Gerhardt Corporation under Corporate Taxes

官方答案与解析 / **Official answer and explanation**

回顾前例，Gerhardt 股东每年取得的现金流为 5,000 欧元，权益成本（也是 WACC）为 10%。

Recall from the previous example that annual cash flows to Gerhardt shareholders were EUR5,000 and the cost of equity (and WACC) was 10%.

与前例相同，Gerhardt 计划发行 15,000 欧元、利率为 5% 的债务，回购等额权益。

As before, Gerhardt is planning to issue EUR15,000 of 5% debt to buy back an equivalent amount of equity.

不过，现在假设 Gerhardt 按 25% 的税率缴纳公司税。

Now, however, assume that Gerhardt pays corporate taxes at a rate of 25%.

由于公司目前没有债务，税后现金流现在为〔下方计算式 1〕。由于假设现金流为永续，公司价值为〔下方计算式 2〕，明显低于无公司税时的 50,000 欧元。

Since the company does not currently have debt, the after-tax cash flows are now〔calculation 1 below〕. Because the cash flows are assumed to be perpetual, the value of the company is〔calculation 2 below〕, considerably less than the amount when there were no corporate taxes, EUR50,000.

$$\text{EUR5,000}(1 - 0.25), \text{ or EUR3,750}$$

原 PDF 第 205 页 · 300 dpi

$$\text{EUR37,500 (= EUR3,750/0.10)}$$

原 PDF 第 205 页 · 300 dpi

现在假设 Gerhardt 发行 15,000 欧元债务，并将所得资金用于回购权益。

Now, suppose Gerhardt proceeds to issue EUR15,000 of debt and uses the proceeds to repurchase equity.

根据存在公司税时的 MM 命题 II（即方程 5），公司价值为：

According to MM Proposition II with corporate taxes (i.e., Equation 5), the value of the company is

$$V_L = V_U + tD = \text{EUR37,500} + 0.25(\text{EUR15,000}) = \text{EUR41,250.}$$

原 PDF 第 206 页 · 共享公式 · 300 dpi

公司总价值现在为 41,250 欧元，包括 15,000 欧元债务和〔下方计算式 1〕的权益。

The total company value is now EUR41,250, consisting of debt of EUR15,000 and equity of〔calculation 1 below〕.

$$\text{EUR26,250 (= EUR41,250 – EUR15,000)}$$

原 PDF 第 206 页 · 300 dpi

根据存在公司税时的 MM 命题 II（方程 6），Gerhardt 新的权益成本为：

According to MM Proposition II with corporate taxes (Equation 6), the new cost of equity for Gerhardt is

$$r_e = 0.10 + (0.10 - 0.05)(1 - 0.25)\frac{\text{EUR15,000}}{\text{EUR26,250}} = 0.12143 = 12.143\%.$$

原 PDF 第 206 页 · 共享公式 · 300 dpi

使用新的权益成本，可以计算新的 WACC：

Using this new cost of equity, we can compute the new WACC:

$$r_{wacc} = \frac{\text{EUR15,000}}{\text{EUR41,250}}(0.05)(1 - 0.25) + \frac{\text{EUR26,250}}{\text{EUR41,250}}(0.12143)$$
$$= 0.09091 = 9.091\%.$$

原 PDF 第 206 页 · 共享公式 · 300 dpi

与前例中资本结构变化未改变 WACC 的结果不同，本例 Gerhardt 的 WACC 从 10% 降至 9.091%。

Unlike the previous example, where Gerhardt's WACC did not change with the change in capital structure, Gerhardt's WACC decreased in this example from 10% to 9.091%.

WACC 下降使公司价值提高至 41,250 欧元：

This reduction in WACC resulted in an increase in company value to EUR41,250:

$$V_L = \frac{CF_e(1 - t)}{\text{WACC}} = \frac{\text{EUR5,000}(1 - 0.25)}{0.09091} \approx \text{EUR41,250}.$$

原 PDF 第 206 页 · 共享公式 · 300 dpi

如前例所示，公司价值也必须等于债权人及股东现金流的现值：

As shown in the previous example, the value of the company must also equal the present value of cash flows to debtholders and shareholders:

$$V_L = D + E = \frac{r_d D}{r_d} + \frac{(CF_e - r_d D)(1 - t)}{r_e}$$
$$V = \frac{\text{EUR750}}{0.05} + \frac{(\text{EUR5,000} - \text{EUR750})(1 - 0.25)}{0.12143} \approx \text{EUR41,250}.$$

原 PDF 第 206 页 · 共享公式 · 300 dpi

当然，在现实中，税收并非影响有杠杆公司价值的唯一因素。

Of course, in the real world, taxes are not the only factor affecting the value of a levered company.

纳入财务困境成本及其他现实因素后，分析会更加复杂。

The analysis becomes more complex when we consider the costs of financial distress, among other real-world considerations.

补充解析 / **Supplementary explanation**

先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

财务困境的成本
The Costs of Financial Distress

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 207

题目与资料 / **Question and data**

例题 4

EXAMPLE 4

财务困境的成本

The Costs of Financial Distress

官方答案与解析 / **Official answer and explanation**

在纽约证券交易所上市的 Rite Aid Corporation，在美国经营超过 2,000 家零售药店。

Rite Aid Corporation, listed on the NYSE, operates over 2,000 retail pharmacies in the United States.

该公司资产负债表杠杆较高，多年来净债务与年度息税折旧摊销前利润的比率一直高于 5.0。

The company has a highly leveraged balance sheet, with a ratio of net debt to annual earnings before interest, taxes, depreciation, and amortization over 5.0 for many years.

新冠疫情期间，公司表现良好，主要由于检测和疫苗收入强劲，利润超过预期。

During the COVID-19 pandemic, the company performed well, exceeding profit expectations largely due to brisk COVID-19 testing and vaccine revenues.

然而，疫情进入第三年后，疫苗和检测收入开始下降，保险公司支付价格下降及工资压力等其他问题也加剧。

However, as the pandemic entered its third year, vaccine and testing revenue began to fall, and other issues, such as pricing declines from insurance companies and wage pressures, accelerated.

由于财务杠杆较高，分析师随后下调利润预测，导致 Rite Aid 债务和股票价格大幅下跌：2022 年前五个月，其 2027 年 2 月 15 日到期无抵押票据的价格从 94 跌至 60，股价从每股 15 美元跌至 6 美元。

Owing to its high financial leverage, the ensuing reduction in analysts' profit estimates resulted in large declines in the prices of Rite Aid debt and equity: Over the first five months of 2022, the price of its 02/15/2027 unsecured notes fell from 94 to 60 and its stock price fell from $15 to $6 per share.

到 2022 年 5 月，Rite Aid 的债务成本已超过 20%。

By May 2022, Rite Aid's cost of debt exceeded 20%.

2022 年 4 月，一名股票分析师将 Rite Aid 股票估计公允价值从 16 美元下调至 1 美元，并警告股票实际上可能一文不值。

In April 2022, one equity analyst lowered the estimated fair value of Rite Aid stock from $16 to $1 and warned that the stock may in fact be worthless.

该分析师指出，公司每年面临 2 亿美元利息费用，另有 2.25 亿美元维护性资本支出。

According to the analyst, the company faced $200 million per year in interest expenses and another $225 million per year in maintenance capital expenditures.

他预计下一财政年度公司的息税折旧摊销前利润仅为 3.7 亿美元，并警告公司要进一步增长面临重大挑战。

The analyst estimated that next fiscal year, the company would achieve only $370 million in earnings before interest, taxes, depreciation, and amortization, and the analyst warned that it faces considerable challenges in growing beyond that.

持续净亏损会使股票失去价值，并可能迫使公司与债券持有人重组债务义务。

Continued net losses would render the stock worthless and likely require the company to restructure its obligations with its bondholders.

在季度业绩电话会议上，管理层态度乐观，但计划关闭 145 家表现不佳的门店以降低费用，并进一步削减总部成本，提高盈利能力。

During its quarterly earnings call, management was upbeat, but it intends to close 145 underperforming stores to lower its expenses and further cut corporate costs to improve profitability.

补充解析 / **Supplementary explanation**

先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

相关知识点 / **Related concepts**

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

QUESTION SET

1. “债务融资极为有利，最优资本结构为 100% 债务”的观点，与以下哪种情形一致？

1. The view that debt financing is highly advantageous and the optimal capital structure is 100% debt is consistent with:

A. 无税情形下的 MM 理论。

A. MM without taxes.

B. 存在税收及财务困境成本的 MM 理论。

B. MM with taxes and financial distress costs.

C. 存在税收、但没有财务困境成本的 MM 理论。

C. MM with taxes and no financial distress cost.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

C 正确。

C is correct.

存在税收、但没有财务困境成本的 MM 理论，得出最优资本结构为 100% 债务的结论。

MM with taxes and no distress cost leads to the conclusion that the optimal capital structure is 100% debt.

这是因为债务利息可以税前扣除，使税法相较权益融资更有利于债务融资。

This is because tax law favors debt financing over equity financing since the interest expense on debt financing is tax deductible.

忽略财务困境成本，公司价值随债务水平提高而增加。

Ignoring financial distress costs, the value of the company increases with increasing levels of debt.

有杠杆企业价值（V_L）超过无杠杆企业价值（V_U）的部分，等于税率乘以债务金额（tD）。

The value of the levered firm (VL) is greater than that of the unlevered one (VU) by the amount equal to the tax rate multiplied by the level of debt (tD).

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

The official choice for this item is C. Additional reasoning: Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

无债务公司全部由权益融资时，WACC 等于权益成本；稳定永续现金流的价值等于现金流除以适用折现率。加入债务后还要单独考虑税盾及财务困境成本。

For an all-equity firm WACC equals the cost of equity; a level perpetuity is valued as cash flow divided by the applicable discount rate. Debt then adds tax-shield and financial-distress effects.

相关知识点 / **Related concepts**

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

QUESTION SET

2. 判断正误：MM 理论明确表明，企业价值的主要驱动因素是资本结构。

2. True or False: What is clear from MM is that the primary driver of firm value is capital structure.

A. 正确

A. True

B. 错误。

B. False

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。这一说法错误，因为企业价值的主要驱动因素是未来现金流。在一组严格假设下，MM 得出资本结构无关性的结论；放宽这些假设后，MM 证明资本结构确实影响价值，但相较未来现金流，其影响仅属有限。

B is correct. This statement is false since it is future cash flows that are the primary driver of value. Under a set of restrictive assumptions, MM's conclusion of capital structure irrelevance is obtained. Relaxing these assumptions, MM showed that capital structure does impact value, but it has only a modest impact compared to future cash flows.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

The official choice for this item is B. Additional reasoning: Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. QUESTION SET

3. 无税情形下的 MM 命题 II 与命题 I 不同，因为它得出以下结论：

3. MM Proposition II without taxes differs from MM Proposition I without taxes since it concludes that:

A. WACC 不受资本结构影响。

A. WACC is unaffected by capital structure.

B. 有杠杆企业价值等于无杠杆企业价值。

B. the value of the levered firm is equal to that of the unlevered firm.

C. 更高杠杆提高权益成本，并恰好抵消较低的债务成本。

C. higher leverage raises the cost of equity, which exactly offsets the lower cost of debt.

官方答案与解析 / Official answer and explanation

答案：

Solution:

C 正确。无税情形下的 MM 命题 II 与命题 I 的区别，在于它说明权益成本会随杠杆提高而上升，并完全抵消债务成本较低的好处。由于债权人对企业现金流具有优先索取权，债务成本低于权益成本，因此人们可能预期债务增加会降低 WACC。无税情形下的 MM 命题 II 认为，权益成本是债务权益比的线性函数。在资本结构中增加低成本债务，会提高债务权益比并增加权益成本，抵消较低债务成本的好处。因此，企业 WACC 不变。

C is correct. MM Proposition II without taxes differs from MM Proposition I without taxes in that the cost of equity will rise with leverage and completely offset the lower cost of debt. Debt has a lower cost relative to equity because debtholders have a priority claim on the cash flow of the firm. So, one would expect WACC to decline with more debt. MM Proposition II without taxes argues that the cost of equity is a linear function of the debt-to-equity ratio. The addition of more low-cost debt to the capital structure will increase the debt-to-equity ratio and raise the cost of equity, offsetting the lower debt cost. As a result, the firm's WACC is unchanged.

Y 公司无杠杆时的 WACC 为 10%，债务成本为 5.5%，债务权益比为 0.75，公司税率为 25%。

Company Y has an unlevered WACC of 10%. It has a cost of debt equal to 5.5% and a debt-to-equity ratio of 0.75. The corporate tax rate is 25%.

补充解析 / **Supplementary explanation**

本题官方选项为 C。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

The official choice for this item is C. Additional reasoning: Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

无债务公司全部由权益融资时，WACC 等于权益成本；稳定永续现金流的价值等于现金流除以适用折现率。加入债务后还要单独考虑税盾及财务困境成本。

For an all-equity firm WACC equals the cost of equity; a level perpetuity is valued as cash flow divided by the applicable discount rate. Debt then adds tax-shield and financial-distress effects.

4. Fill in the blanks: The cost of equity for Company Y will be _____ if it pays no corporate taxes and _____ if it pays corporate taxes.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

Y 公司不缴纳公司税时的权益成本为 13.37%，缴纳公司税时为 12.53%。

The cost of equity for Company Y will be 13.37% if it pays no corporate taxes and 12.53% if it pays corporate taxes.

权益成本是债务权益比的线性函数，无税情形下计算如下：

The cost of equity is a linear function of its debt-to-equity ratio and without taxes is calculated as follows:

$$r_e = r_0 + (r_0 - r_d)\frac{D}{E}$$

$$= 10\% + (10\% - 5.5\%)(0.75) = 13.37\%.$$

原 PDF 第 208 页 · 共享公式 · 300 dpi

有税情形下的权益成本计算如下：

The cost of equity with taxes is calculated as

$$r_e = r_0 + (r_0 - r_d)(1 - t)\frac{D}{E}$$

$$= 10\% + (10\% - 5.5\%)(1 - 0.25)(0.75) = 12.53\%.$$

原 PDF 第 208 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

相关知识点 / **Related concepts**

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

Leverage and capital-structure theories: Business risk comes from operations; financial risk comes from fixed financing commitments. Optimal leverage varies with taxes, collateral, cash-flow stability, and information.

QUESTION SET

5. 如果 Y 公司完全由权益融资，其权益成本将

5. If Company Y is an all-equity-financed firm, its cost of equity will be

_____ 其 WACC。

_____ its WACC.

A. 高于

A. greater than

B. 等于

B. equal to

C. 低于。

C. lower than

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

B 正确。

B is correct.

由于 Y 公司没有杠杆，资本结构中不存在债务，因此权益成本等于 WACC。

Since Company Y is an unlevered firm and has no debt in its capital structure, the cost of equity will be the same as WACC.

债务权重为零，WACC 公式简化为：

Since the weighting of debt is zero, the WACC formula is simply

无债务融资时的加权平均资本成本，由权益权重和权益成本决定。

$$\text{WACC} = \text{Weighting of equity} \times \text{Cost of equity.}$$

原 PDF 第 209 页 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is B. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

无债务公司全部由权益融资时，WACC 等于权益成本；稳定永续现金流的价值等于现金流除以适用折现率。加入债务后还要单独考虑税盾及财务困境成本。

For an all-equity firm WACC equals the cost of equity; a level perpetuity is valued as cash flow divided by the applicable discount rate. Debt then adds tax-shield and financial-distress effects.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

CI-LM06-EXAMPLE-1201

例题 5 · 第 1 题：代理成本、信息不对称与信号传递
Example 5 · 1 — Agency Costs, Asymmetric Information, and Signaling

正文例题 / 案例 / Worked example / case · 原版 PDF 页码 / Source PDF pages: 213

题目与资料 / **Question and data**

例题 5

EXAMPLE 5

代理成本、信息不对称与信号传递

Agency Costs, Asymmetric Information, and Signaling

CLP AG 是一家小型上市生物制药公司，正在对一款已获批治疗某种自身免疫疾病的药物进行临床试验，研究其原定用途之外的新适应症——治疗某种病毒感染。

CLP AG, a small, listed biopharmaceutical company, is conducting a clinical trial of its drug, which is already approved for treatment of an autoimmune disorder, to be used in a new application for which it was not originally intended: treatment of a type of viral infection.

管理层希望新用途能大幅提高销售和公司价值。

Management hopes this new application for the drug will result in a big increase in sales and the value of the company.

该公司一直保持盈利，且没有债务。

The company has been consistently profitable and debt free.

随后发生以下事件：

The following events occur:

■ 7 月，管理层收到临床试验研究人员的通知，表示结果看起来很有希望。

■ In July, management receives notice from the clinical trial investigators that results look promising.

预计可能需要迅速扩大生产，公司协商并宣布大幅提高授信额度。

Anticipating that it might have to scale up production quickly, the company negotiates and announces a large increase in its credit line.

■ 8 月，CLP 通过公开新闻稿宣布试验成功，股价上涨 35%。

■ In August, CLP announces successful test results by public press release. CLP shares increase by 35%.

说明此例如何体现信息不对称及信号传递。

Explain how asymmetric information and signaling are represented here.

1. 信息不对称

1. Asymmetric information

官方答案与解析 / **Official answer and explanation**

答案

Solution

信息不对称体现在：管理层 7 月已知道积极的试验结果，而结果直到 8 月才公开宣布。

Asymmetric information is represented by management's knowledge of the positive trial results in July, before they were publicly announced in August.

信号传递体现在公司 7 月宣布提高授信额度。

Signaling is represented by the company's announcement in July that it was increasing its credit line.

这项公告可以被合理解读为：管理层对试验将取得积极结果有信心，并认为公司需要扩大产能。

The announcement could reasonably be taken as a signal of management's confidence that the trial results will be positive and that the company will need to expand production capacity.

无论信号传递是否出于有意，这一解释都成立。

This is true whether or not the signaling is intentional.

补充解析 / **Supplementary explanation**

补充思路：管理层比外部投资者更早掌握经营信息，融资决定就可能携带信号。临床结果尚未公开时扩大信贷额度，可被理解为管理层预期未来需要扩大产能，但信号只是外部推断，不能等同于结果已经公开确认。融资优序理论据此解释企业为何可能偏好内部资金、再债务、最后股权。

Additional reasoning: Managers may know operating information before outsiders, allowing financing decisions to convey signals. Increasing a credit line before trial results are public may suggest confidence in future capacity needs, but this remains an inference rather than public confirmation. Information asymmetry helps explain the pecking order of internal funds, debt, then equity.

相关知识点 / **Related concepts**

信息不对称与融资信号：信息不对称说明不同主体掌握的信息不同；信号的可信度取决于其成本和可观察性，不能只看管理层说法。

Asymmetric information and financing signals: Asymmetry means parties possess different information. Signal credibility depends on costs and observability, not merely managerial statements.

QUESTION SET

1. 判断正误：融资优序理论认为，企业没有最优资本结构，其资本结构反映过去对外部融资的需求。

1. True or False: Under the pecking order theory, the firm has no optimal capital structure and a firm's capital structure reflects its historic need for external financing.

A. 正确

A. True

B. 错误。

B. False

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。融资优序理论以投资者和发行人之间的信息不对称，以及管理人员会考虑自身行为向投资者传递何种信号为基础。信号模型认为公司融资方式具有优先次序：先使用内部资金，再使用债务，最后才不情愿地使用权益融资。这一理论没有最优资本结构；企业资本结构反映其过去对外部融资的需求。

A is correct. The pecking order theory is based on asymmetric information held by investors and issuers and the idea that managers consider what their actions may signal to investors. The signaling model suggests a hierarchy in methods in financing the firm. Internal funds are used first, then debt is used, and finally, reluctantly, firms use equity. There is no optimal capital structure, and a firm's capital structure reflects its historic need for external financing.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

The official choice for this item is A. Additional reasoning: Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

相关知识点 / **Related concepts**

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

Leverage and capital-structure theories: Business risk comes from operations; financial risk comes from fixed financing commitments. Optimal leverage varies with taxes, collateral, cash-flow stability, and information.

题目与资料 / Question and data

练习题组

QUESTION SET

2. Z 公司宣布，债务权益比 1.2 符合其目标资本结构。根据这一数值，WACC 计算中的权益权重为：

2. Company Z announces that a debt-to-equity ratio of 1.2 is consistent with its target capital structure. Given this value, the weight for equity in the WACC calculation is:

A. 45%。

A. 45%.

B. 55%。

B. 55%.

C. 83%。

C. 83%.

官方答案与解析 / Official answer and explanation

答案：

Solution:

A 正确。将债务权益比 D/E 转换为债务权重 D/(D + E) 的简单方法，是用 D/E 除以 1 + D/E。因此，债务权益比 1.2 对应债务权重〔下方计算式 1〕，即〔下方计算式 2〕。所以 WACC 计算中的权益权重为 45%。

A is correct. A simple way of transforming a debt-to-equity ratio (D/E) into a weight—that is, D/(D + E)—is to divide D/E by 1 + D/E. Therefore, a debt-to-equity ratio of 1.2 represents a weight on debt of 〔calculation 1 below〕, so 〔calculation 2 below〕. Thus, the weight for equity in the WACC calculation is 45%.

$$1.2/2.2 = 0.5455$$

原 PDF 第 214 页 · 300 dpi

$$w_d = 0.5455 \text{ and } w_e = 1 - 0.5455 = 0.4545$$

原 PDF 第 214 页 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is A. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

QUESTION SET

4. 如果公司具有以下哪种特征，财务困境或破产对价值的负面影响会更大？

4. The value-reducing impact of financial distress or bankruptcy increases if the firm has:

A. 较高的业务风险。

A. higher business risk.

B. 较低的经营杠杆和财务杠杆。

B. lower operating and financial leverage.

C. 资产拥有现成的二级市场。

C. assets with a ready secondary market.

官方答案与解析 / **Official answer and explanation**

答案：

Solution:

A 正确。

A is correct.

业务风险更高、资本结构中债务更多的公司，发生财务困境的概率和成本都会上升。

The probability and cost of financial distress rise for firms with higher business risk and more debt in the capital structure.

相反，经营杠杆和财务杠杆较低，或资产具有二级市场、容易出售的公司，财务困境成本较低。

In contrast, the cost of financial distress is lower for firms with lower operating and financial leverage and for firms with assets that have a secondary market and can be easily sold.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

B 正确。

B is correct.

目标资本结构通常根据账面价值估计，因为市场价值可能显著波动，却不太可能改变借款能力。

Target capital structure is often estimated using book values because market values can fluctuate significantly and are unlikely to impact borrowing capacity.

发行人通常以某一信用评级（如投资级）为目标，而评级很大程度取决于发行人的债务账面金额相对于现金流的水平。

Issuers will often aim for a certain credit rating, such as investment grade, which is strongly influenced by the issuer's (book value) level of indebtedness relative to cash flows.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1−T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is B. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

章末习题 1
Practice problem 1

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 216, 218

题目与资料 / **Question and data**

以下资料适用于第 1—4 题。

The following information relates to questions 1-4

一名金融分析师正在评估 Boulder, Inc. 的资本结构。

A financial analyst is evaluating the capital structure for Boulder, Inc. Boulder, Inc., is a US-based unleveraged firm with a constant (perpetual) cash flow of $6 million per year before taxes.

Boulder 是一家美国公司，没有债务，每年产生固定、永续的税前现金流 600 万美元。

The firm has a market value of $45 million and a corporate tax rate of 30%.

公司市场价值为 4,500 万美元，公司税率为 30%。

Boulder plans to issue $15 million in debt to retire an equivalent amount of equity.

Boulder 计划发行 1,500 万美元债务，回购并注销等额权益，债务成本为 5.5%。

The debt will have a cost of 5.5%.

分析师注意到，债务税盾的好处会被财务困境风险抵消。

The financial analyst notes that the tax shield advantage of debt is offset due to the risk of financial distress.

他估计不同债务水平下财务困境成本的现值如下：

He estimates the present value of the cost of financial distress at various debt levels as follows:

不同债务水平下的财务困境成本现值。左列为债务价值，右列为财务困境成本现值，金额以百万美元表示。

Value of Debt	Present Value of Cost of Distress
$5 million	$0.1 million
$10 million	$0.2 million
$15 million	$0.5 million
$20 million	$1.5 million
$25 million	$6.0 million
$30 million	$12.0 million

原 PDF 第 216 页 · 完整表格 · 300 dpi

1. 发债前，无杠杆公司的 WACC 最接近：

1. The WACC of the unleveraged firm, prior to the debt issue, is closest to:

A. 4.00%。

A. 4.00%.

B. 9.33%。

B. 9.33%.

C. 13.33%。

C. 13.33%.

官方答案与解析 / Official answer and explanation

1. B 正确。公司的税后现金流为〔下方计算式 1〕。

1. B is correct. The after-tax cash flows for the company are〔calculation 1 below〕.

$$\$6 \text{ million} \times (1 - 0.30) = \$4.2 \text{ million}$$

原 PDF 第 218 页 · 300 dpi

由于假设现金流为永续，WACC 计算如下：

Since the cash flows are assumed to be perpetual, WACC is calculated as follows:

$$r_{WACC} = CF(1 - t)/V = \$4.2/\$45 = 9.33\%.$$

原 PDF 第 218 页 · 共享公式 · 300 dpi

由于公司完全采用权益融资，权益成本等于 WACC。

Since this is an all-equity firm, the cost of equity is equal to WACC.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is B. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

无债务公司全部由权益融资时，WACC 等于权益成本；稳定永续现金流的价值等于现金流除以适用折现率。加入债务后还要单独考虑税盾及财务困境成本。

For an all-equity firm WACC equals the cost of equity; a level perpetuity is valued as cash flow divided by the applicable discount rate. Debt then adds tax-shield and financial-distress effects.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

章末习题 **2**
Practice problem 2

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 216, 218

题目与资料 / **Question and data**

以下资料适用于第 1—4 题。

The following information relates to questions 1-4

一名金融分析师正在评估 Boulder, Inc. 的资本结构。

A financial analyst is evaluating the capital structure for Boulder, Inc. Boulder, Inc., is a US-based unleveraged firm with a constant (perpetual) cash flow of $6 million per year before taxes.

Boulder 是一家美国公司，没有债务，每年产生固定、永续的税前现金流 600 万美元。

The firm has a market value of $45 million and a corporate tax rate of 30%.

公司市场价值为 4,500 万美元，公司税率为 30%。

Boulder plans to issue $15 million in debt to retire an equivalent amount of equity.

Boulder 计划发行 1,500 万美元债务，回购并注销等额权益，债务成本为 5.5%。

The debt will have a cost of 5.5%.

分析师注意到，债务税盾的好处会被财务困境风险抵消。

The financial analyst notes that the tax shield advantage of debt is offset due to the risk of financial distress.

他估计不同债务水平下财务困境成本的现值如下：

He estimates the present value of the cost of financial distress at various debt levels as follows:

不同债务水平下的财务困境成本现值。左列为债务价值，右列为财务困境成本现值，金额以百万美元表示。

Value of Debt	Present Value of Cost of Distress
$5 million	$0.1 million
$10 million	$0.2 million
$15 million	$0.5 million
$20 million	$1.5 million
$25 million	$6.0 million
$30 million	$12.0 million

原 PDF 第 216 页 · 完整表格 · 300 dpi

2. 使用 1,500 万美元债务融资，使 Boulder 的价值比无杠杆时提高_____。忽略财务困境成本。

2. The use of the $15 million of debt financing increases the value of Boulder by _____ over its unlevered value. Ignore the costs of financial distress.

A. 450 万美元

A. $4.5 million

B. 1,050 万美元

B. $10.5 million

C. 1,500 万美元

C. $15 million

官方答案与解析 / **Official answer and explanation**

2. A 正确。根据存在公司税时的 MM 命题 I，有杠杆公司的价值高于无杠杆公司，差额等于税率乘以债务价值（tD），即债务税盾的现值。

2. A is correct. According to MM Proposition I with corporate taxes, the value of the levered company is greater than that of the unlevered company by an amount equal to the tax rate multiplied by the value of the debt (tD), defined as the present value of the debt tax shield.

$$V_L = V_U + tD = \$45 \text{ million} + 0.30(\$15\text{million}) = \$49.5 \text{ million}.$$

原 PDF 第 218 页 · 共享公式 · 300 dpi

因此，使用债务融资会使 Boulder 的价值比无杠杆时提高 450 万美元。

Thus, the use of debt financing will increase the value of Boulder by $4.5 million over the unlevered firm.

注意，随着资本结构中不断增加债务，公司价值持续上升，最优资本结构为 100% 债务。

Note that the firm's value increases continuously as additional debt is added to the capital structure, and the optimal capital structure is 100% debt.

补充解析 / **Supplementary explanation**

本题官方选项为 A。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

The official choice for this item is A. Additional reasoning: Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

按题设分别计算无杠杆价值、税盾现值和困境成本现值，再相加减；最优负债水平来自边际税盾收益与边际困境成本之间的权衡。

Calculate unlevered value, the tax-shield present value, and distress-cost present value separately, then combine them. Optimal debt balances marginal tax benefits against marginal distress costs.

相关知识点 / **Related concepts**

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

Leverage and capital-structure theories: Business risk comes from operations; financial risk comes from fixed financing commitments. Optimal leverage varies with taxes, collateral, cash-flow stability, and information.

The following information relates to questions 1-4

一名金融分析师正在评估 Boulder, Inc. 的资本结构。

A financial analyst is evaluating the capital structure for Boulder, Inc. Boulder, Inc., is a US-based unleveraged firm with a constant (perpetual) cash flow of $6 million per year before taxes.

Boulder 是一家美国公司，没有债务，每年产生固定、永续的税前现金流 600 万美元。

The firm has a market value of $45 million and a corporate tax rate of 30%.

公司市场价值为 4,500 万美元，公司税率为 30%。

Boulder plans to issue $15 million in debt to retire an equivalent amount of equity.

Boulder 计划发行 1,500 万美元债务，回购并注销等额权益，债务成本为 5.5%。

The debt will have a cost of 5.5%.

分析师注意到，债务税盾的好处会被财务困境风险抵消。

The financial analyst notes that the tax shield advantage of debt is offset due to the risk of financial distress.

他估计不同债务水平下财务困境成本的现值如下：

He estimates the present value of the cost of financial distress at various debt levels as follows:

不同债务水平下的财务困境成本现值。左列为债务价值，右列为财务困境成本现值，金额以百万美元表示。

Value of Debt	Present Value of Cost of Distress
$5 million	$0.1 million
$10 million	$0.2 million
$15 million	$0.5 million
$20 million	$1.5 million
$25 million	$6.0 million
$30 million	$12.0 million

原 PDF 第 216 页 · 完整表格 · 300 dpi

4. 使 Boulder, Inc. 价值最大化的债务水平最接近：

4. The level of debt that will maximize the value of Boulder Inc. is closest to:

A. 1,500 万美元。

A. $15 million.

B. 2,000 万美元。

B. $20 million.

C. 3,000 万美元。

C. $30 million.

官方答案与解析 / **Official answer and explanation**

4. B 正确。纳入财务困境后，当资本结构增加债务时，有杠杆企业价值为：

4. B is correct. With financial distress included, as debt is added to the capital structure, the levered value of the firm is given by:

在企业价值公式中同时考虑税盾和财务困境成本。

$$V_L = V_U + tD - PV(\text{Costs of financial distress}).$$

原 PDF 第 218 页 · 共享公式 · 300 dpi

下表计算 Boulder 在不同债务水平下的有杠杆企业价值，单位为百万美元。

The following shows calculations of the levered value of Boulder at various debt levels, in $millions.

不同债务水平下的企业价值计算。

各列依次为债务金额、财务困境成本现值，以及有杠杆企业价值的计算。计算将无杠杆企业价值加上债务税盾，再减去财务困境成本现值；完整数值及计算式只保留在原表中。

D	*PV*(Costs of financial distress)	$V_L = V_U + tD - PV$(Costs of financial distress).
5	0.1	$V_L = 45 + 0.3(5) - 0.1$ $V_L = 46.4$
10	0.2	$V_L = 45 + 0.3(10) - 0.2$ $V_L = 47.8$
15	0.5	$V_L = 45 + 0.3(15) - 0.5$ $V_L = 49$
20	1.5	$V_L = 45 + 0.3(20) - 1.5$ $V_L = 49.5$
25	6.0	$V_L = 45 + 0.3(25) - 6.0$ $V_L = 46.5$
30	12.0	$V_L = 45 + 0.3(30) - 12.0$ $V_L = 42$

原 PDF 第 218 页 · 完整表格 · 300 dpi

因此，最优债务金额为 2,000 万美元，使 Boulder 的价值达到最大值 4,950 万美元。

Thus, the optimal amount of debt is $20 million, which maximizes the value of Boulder at a level of $49.5 million.

债务超过 2,000 万美元后，继续提高杠杆会降低企业价值，因为财务困境成本现值超过相应的税收好处。

Beyond $20 million in debt, greater leverage reduces the firm value because the present value of financial distress costs more than the offsetting tax benefit.

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：先识别模型假设。无税且资本市场完美时，单纯改变债务权益比例不创造总价值，较高杠杆会提高权益风险与权益成本。引入利息税盾后，债务可能增加价值；再加入财务困境和代理成本，最优杠杆由边际收益与边际成本权衡。融资优序理论则侧重信息不对称下内部资金、债务与新股的融资偏好。

The official choice for this item is B. Additional reasoning: Identify assumptions first. With no taxes and perfect markets, changing the debt/equity mix does not create total value; greater leverage raises equity risk and cost. Interest tax shields can add value, while distress and agency costs create a tradeoff. Pecking-order theory instead explains preferences for internal funds, debt, and equity under information asymmetry.

杠杆、税盾与资本结构理论：经营风险来自业务现金流，财务风险来自固定融资承诺。最优结构随税率、资产抵押性、现金流稳定性和信息环境变化。

Leverage and capital-structure theories: Business risk comes from operations; financial risk comes from fixed financing commitments. Optimal leverage varies with taxes, collateral, cash-flow stability, and information.

CI-LM06-PRACTICE-005

章末习题 5
Practice problem 5

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 217, 219

题目与资料 / **Question and data**

5. 一名金融分析师正在评估 Plover, Inc. 的资本结构。该公司是一家位于欧洲的无杠杆企业，每年产生固定、永续的税前现金流 1,000 万欧元。公司市场价值为 1 亿欧元，公司税率为 20%。Plover 计划发行 3,500 万欧元债务，回购并注销等额权益，因此公司规模保持不变。债务成本为 4.5%。假设财务困境成本接近零。发债并调整资本结构后，Plover 的 WACC 最接近：

5. A financial analyst is evaluating the capital structure for Plover, Inc., a European-based unleveraged firm with a constant (perpetual) cash flow of EUR10.0 million per year before taxes. The firm has a market value of EUR100.0 million and a corporate tax rate of 20%. Plover plans to issue EUR35.0 million in debt to retire an equivalent amount of equity, so the size of the firm will remain unchanged. The debt will have a cost of 4.5%. Assume the cost of financial distress is close to zero. After the debt issuance and change in the capital structure, Plover's WACC is closest to:

A. 5.47%。

A. 5.47%.

B. 7.48%。

B. 7.48%.

C. 8.82%。

C. 8.82%.

官方答案与解析 / **Official answer and explanation**

5. B 正确。WACC 的计算过程如下：

5. B is correct. The calculations to determine the WACC are as follows:

公司的税后现金流为〔下方计算式 1〕。由于假设现金流为永续，无杠杆公司的 WACC 计算为：

The after-tax cash flows for the company are〔calculation 1 below〕. Since the cash flows are assumed to be perpetual, WACC for the unlevered firm is calculated as

$$\text{EUR10.0 million } (1 - 0.20) = \text{EUR8.0 million}$$

原 PDF 第 219 页 · 300 dpi

$$r_{WACC} = CF(1 - t)/V = \text{EUR8.0 million/EUR100.0 million} = 8.0\%.$$

原 PDF 第 219 页 · 共享公式 · 300 dpi

采用债务融资后，Plover 的市场价值为 1.07 亿欧元：

The market value of Plover with the debt financing is EUR107 million:

$$V_L = V_U + tD = \text{EUR100.0 million} + 0.20(\text{EUR35.0 million}) = \text{EUR107.0 million}.$$

原 PDF 第 219 页 · 共享公式 · 300 dpi

为求权益成本，首先需要计算权益市场价值：

To find the cost of equity, we first need to find the market value of equity:

D 和 E 分别表示债务与权益的市场价值；从有杠杆企业总价值中扣除债务价值，求得权益价值。

$$V_L = D + E, \text{ where } D \text{ and } E \text{ are market values of debt and equity, respectively.}$$

$$E = \text{EUR107.0 million} - \text{EUR35.0 million} = \text{EUR72.0 million}.$$

原 PDF 第 219 页 · 共享公式 · 300 dpi

权益成本为：

The cost of equity is given by

$$r_e = r_0 + (r_0 - r_d)(1 - t)\frac{D}{E}$$

$$= 8.0\% + (8.0\% - 4.5\%)(0.80)(\text{EUR35.0 million/EUR72.0 million}) = 9.36\%.$$

原 PDF 第 219 页 · 共享公式 · 300 dpi

Plover 的 WACC 计算如下：

Plover’s WACC is calculated as follows:

按债务、权益市场价值加权，并将债务成本调整为税后成本，计算 WACC。所得结果低于无杠杆企业的 8.0%。

$$\text{WACC} = (\text{Weighting of debt} \times \text{Cost of debt}) + (\text{Weighting of equity} \times \text{Cost of equity})$$

$$= (\text{EUR35 million}/\text{EUR107.0 million})(4.5\%)(1 - 0.2) + (\text{EUR72.0 million}/\text{EUR107.0 million})(9.36\%)$$

$$= 7.48\%, \text{ which is lower than the } 8.0\% \text{ for the unlevered firm.}$$

原 PDF 第 219 页 · 共享公式 · 300 dpi

补充解析 / **Supplementary explanation**

本题官方选项为 B。补充思路：资本成本要把融资来源的要求收益按市场价值权重加总。债务利息通常可抵税，因此在符合题设的税收条件下使用 r_d(1–T)，权益成本不作同样扣减。债券票面利率不等于当前边际债务成本；账面权重也不自动等于投资者当前的资本配置。若已知 WACC 反求某项成本，先确定正确权重和其他成本后再代数求解。

The official choice for this item is B. Additional reasoning: Weight required returns by market values. Tax-deductible debt interest gives an after-tax debt cost r_d(1 − T) under the stated assumptions; equity receives no analogous deduction. A bond coupon is not the current marginal borrowing cost, and book weights need not represent today's financing mix. When solving backward from WACC, establish the weights and known costs before rearranging.

无债务公司全部由权益融资时，WACC 等于权益成本；稳定永续现金流的价值等于现金流除以适用折现率。加入债务后还要单独考虑税盾及财务困境成本。

For an all-equity firm WACC equals the cost of equity; a level perpetuity is valued as cash flow divided by the applicable discount rate. Debt then adds tax-shield and financial-distress effects.

相关知识点 / **Related concepts**

WACC的权重与税盾：WACC = $w_e r_e$ + w_dr_d(1–T)，必要时加入优先股；各权重之和为 1。

WACC weights and tax shield: WACC = $w_e r_e$ + w_dr_d(1 − T), with preferred shares added when relevant. Weights sum to one.

中文学习译文

1. _____是指依据地理、人口特征、行为、偏好、收入、对技术的接受程度以及自我形象等属性，对公司可能服务的客户类型进行划分。

A. 渠道安排

B. 客户细分

C. 直接销售

官方英文题目 · PDF 第222页

1. _____ refers to characterizing types of customers a firm may serve according to attributes such as geography, demographics, behavior, preferences, income, affinity for technology, and self-image.

   A. Channeling
   B. Segmenting
   C. Direct selling

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。公司通常依据对销售、营销和产品设计有用的属性，识别潜在或现有客户，并将其划分为不同群体。

官方英文解析 · PDF 第222页

Solution:

B is correct. Companies often identify and group prospective or current customers into segments based on attributes useful for sales, marketing, and product design.

补充解析 / **Supplementary explanation**

题干列举的是“客户是谁”的分类属性，所以选细分。渠道安排回答“如何把产品送到客户”，直接销售则是一种接触客户的方式，均不等同于按收入、行为或偏好划分客户。细分结果可用于产品设计、定位和定价。

The listed attributes classify who the customers are, so segmenting is correct. Channeling addresses how offerings reach customers; direct selling is a route to market. Neither is the grouping of customers by income, behavior, or preferences. Segmentation informs product design, positioning, and pricing.

相关知识点 / **Related concepts**

客户细分识别具有相似需求或行为的群体；渠道选择决定交付方式。

Segmentation identifies groups with similar needs or behavior; channels determine delivery.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / **Question and data**

中文学习译文

2. 当不同客户的支付意愿或支付能力不同时，_____的目标是实现利润最大化。

A. 单位经济效益

B. 价格歧视

C. 职能分离

官方英文题目 · PDF 第222页

2. The objective of _____ is to maximize profit in situations where different customers have different willingness or ability to pay.

   A. unit economics

   B. price discrimination

   C. functional separation

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。公司可以依据所感知的客户偏好，对相同或相似的产品和服务，按照客户群体、购买数量、季节、时段、渠道等采用不同价格，从而扩大其可服务市场。

Solution:

B is correct. Firms can price the same or similar products and services differently by customer segment, volume purchased, season, time of day, channel, and so on, based on perceived customer preferences to expand their addressable market.

补充解析 / **Supplementary explanation**

价格歧视通过不同价格捕捉不同客户的支付意愿，例如按购买量或时段区分。单位经济效益分析每件产品或每名客户的收入与成本，并不是差异定价本身；职能分离涉及组织安排。能否持续差异定价还取决于识别群体和限制转售等条件。

Price discrimination captures differences in willingness to pay through different prices, for example by quantity or timing. Unit economics analyzes revenue and cost per unit or customer; it is not itself differential pricing. Functional separation concerns organization. Sustainable discrimination also depends on identifying groups and limiting arbitrage.

相关知识点 / **Related concepts**

价格歧视不是价格随成本不同而必然变化；核心在对支付意愿差异进行定价。

Price discrimination is based on willingness-to-pay differences, beyond simple cost differences.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

题目与资料 / **Question and data**

中文学习译文

3. 在竞争者众多、产品差异化很小或没有差异的市场中销售的公司，通常是_____；相反，销售差异化产品且竞争者较少的公司，往往具有_____。

A. 众包；捆绑定价

B. 价格接受者；定价能力

C. 全渠道；直接销售

官方英文题目 · PDF 第222页

3. Companies selling in markets with many competitors and little or no product differentiation are often _____; in contrast, companies selling differentiated products with few competitors tend to have _____.

A. crowdsourcing; bundling
B. price takers; pricing power
C. omnichannel; direct sales

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。竞争者众多、产品同质的市场，具有完全竞争或接近完全竞争的市场结构特征，价格由市场供给与需求决定。

官方英文解析 · PDF 第222页

Solution:

B is correct. Markets with many competitors and homogeneous products are characterized by having perfect or near-perfect competition market structures, with prices determined by market supply and demand.

补充解析 / **Supplementary explanation**

同质产品有大量替代者时，单个企业抬价容易失去客户，因而更接近价格接受者。差异化减少直接可替代性，在竞争者较少时通常增强定价能力，但这种能力仍受需求弹性和替代品约束。其他选项描述商业模式或销售渠道，并不对应市场结构。

With homogeneous products and many substitutes, a unilateral price increase loses customers, making firms price takers. Differentiation reduces substitutability and may strengthen pricing power when rivals are few, although elasticity and alternatives still constrain it. Other options describe business models or channels, not market structure.

相关知识点 / **Related concepts**

市场结构、替代性与需求弹性共同影响定价权。

Market structure, substitutability, and demand elasticity shape pricing power.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM07-SELF_ASSESSMENT-004

模块自测 · 第4题
Learning Module Self-Assessment · 4

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 222-223

题目与资料 / **Question and data**

中文学习译文

4. 复杂产品的两种定价模式包括_____，即鼓励或要求购买多个产品或服务；以及_____，即以较低价格出售首次购买的耐用品，并对相关耗材采用高毛利定价。

A. 捆绑定价；剃须刀—刀片模式

B. 部分所有权；订阅模式

C. 横向整合；网络效应

官方英文题目 · PDF 第222页

4. Two examples of pricing models for complex products are _____, which refers to incentivizing or requiring the purchase of multiple products or services, and _____, which combines a low price on an initial purchase of a durable good with high-margin prices on associated consumables.

A. bundling; razor, razorblade

官方英文题目 · PDF 第223页 · 续

B. fractional ownership; subscriptions

C. horizontal integration; network effects

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

A正确。公司经常把互补产品和服务捆绑销售，使组合购买价格低于各项单独价格的总和，例如产品与维修 / 维护套餐。

“剃须刀—刀片”模式得名于吉列出售剃须刀及一次性刀片的商业模式：耐用品以接近成本的价格出售，而使用该耐用品所必需的耗材具有较高毛利，这些耗材也可能是专用的。其他例子包括Nespresso和Keurig咖啡机、打印机与碳粉 / 墨水，以及诊断仪器与试剂。

官方英文解析 · PDF 第223页

Solution:

A is correct. Companies often bundle complementary products and services by offering a discount for their combined purchase versus the sum of the individual prices, such as a product and a repair/maintenance package. A razor, razorblade model, named for Gillette's business model of selling a razor with disposable razorblades, combines a durable good sold at near cost with high-margin, possibly proprietary consumables needed to use the durable good. Other examples include Nespresso and Keurig coffee machines, printers and toner/ink, and diagnostic instruments and reagents.

补充解析 / **Supplementary explanation**

捆绑把多个产品组合出售，重点是组合购买；剃须刀—刀片模式把利润重点放在耐用品之后的重复耗材购买。分析后一模式时，首次硬件销售毛利低不必然表示整体客户关系亏损，还要考虑后续耗材毛利、购买频率、留存和替代耗材竞争。

Bundling emphasizes joint purchase of several products. The razor–razorblade model emphasizes repeated high-margin consumables after a low-margin durable purchase. Low initial hardware margin need not imply an unprofitable customer relationship; consider future margins, purchase frequency, retention, and compatible alternatives.

相关知识点 / **Related concepts**

商业模式分析应覆盖客户生命周期的现金流，不能只观察首次交易利润。

Analyze cash flows over the customer relationship, not merely the first-transaction margin.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

模块自测 · 第5题
Learning Module Self-Assessment · 5

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 223

题目与资料 / **Question and data**

中文学习译文

5. _____是指随着更多用户加入，网络对其用户的价值增加。

A. 价值链

B. 网络效应

C. 价值主张

官方英文题目 · PDF 第223页

5. _____ refers to the increase in the value of a network to its users as more users join.

A. "Value chain"
B. "Network effects"
C. "Value proposition"

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。当参与者彼此互动或交易时，更多参与者加入会增加网络的价值。具有网络效应的公司或服务例子包括金融工具交易所、支付网络、社交媒体，以及电话和其他通信网络。网络效应可能对行业新进入者形成强大的壁垒。

官方英文解析 · PDF 第223页

Solution:

B is correct. A network in which participants interact or transact with one another increases in value as more participants join. Examples of companies or services with network effects include financial instrument exchanges, payment networks, social media, and phone and other communication networks. Network effects can be a strong barrier to new industry entrants.

补充解析 / **Supplementary explanation**

网络效应要求“更多用户让现有或其他用户得到更多价值”，例如交易对手增加。规模经济则指产量或业务规模增大降低单位成本，两者不能混同。价值链描述活动之间的组织关系，价值主张描述提供给客户的利益，均不是本题定义。

Network effects require additional users to create value for existing or other users, for example through more counterparties. Economies of scale concern lower unit cost as output grows. A value chain organizes activities; a value proposition describes customer benefits. Neither matches the definition here.

相关知识点 / **Related concepts**

直接网络效应来自同侧用户增加；双边平台也可能具有跨边网络效应。

Direct effects come from additional same-side users; two-sided platforms can also have cross-side effects.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM07-SELF_ASSESSMENT-006

模块自测 · 第6题
Learning Module Self-Assessment · 6

课前自测 / Pre-test / self-assessment · 原版 PDF 页码 / Source PDF pages: 223

题目与资料 / **Question and data**

中文学习译文

6. _____涉及用户社区，使某一产品的用户能够自愿协作，通常只需要社区主办方或运营方进行少量审核与监督。

A. 特许经营

B. 众包

C. 忠诚度计划

官方英文题目 · PDF 第223页

6. _____ involves user communities that enable voluntary collaboration between users of a product with generally a small amount of moderation and oversight by the community host or operator.

A. Franchising
B. Crowdsourcing
C. A loyalty program

官方答案与解析 / **Official answer and explanation**

官方英文解析的中文学习译文

B正确。广义上，众包指从多个参与方获得贡献。许多数字化商业模式把众包作为核心特征或加以利用：公司创建一项由用户共同建设的服务，公司本身主要制定规则并审核用户贡献。常见例子包括社交媒体、产品评论、开源软件和维基。

官方英文解析 · PDF 第223页

Solution:
B is correct. Generically, crowdsourcing means obtaining contributions from multiple parties. Many digital business models incorporate or utilize crowdsourcing as their defining feature, whereby the company creates a service that users build, while the company simply creates rules and moderates user contributions. Common examples include social media, product reviews, open source software, and Wikis.

补充解析 / **Supplementary explanation**

众包把部分内容、知识或产品建设交给分散参与者自愿贡献，平台主要提供规则和审核。特许经营依据合同授权经营并通常收取费用；忠诚度计划用奖励鼓励重复购买。用户共同创作是本题与后两者的区分点。

Crowdsourcing draws content, knowledge, or development from distributed contributors, with the platform supplying rules and moderation. Franchising licenses business operations under contract, often for fees; loyalty programs reward repeat purchases. Collaborative user contribution is the distinguishing feature here.

相关知识点 / **Related concepts**

众包带来分布式贡献，也需要质量控制、激励设计与社区治理。

Crowdsourcing combines distributed contribution with quality control, incentives, and community governance.

本组开篇自测未载于双语EPUB的原文参考部分，现按用户提供的官方PDF恢复。中文为本次新增学习译文，非CFA Institute官方中文。 / Restored from the supplied official PDF because the bilingual EPUB's original-reference stream omitted this opening self-assessment. Chinese is a new study translation, not an official CFA Institute translation.

CI-LM07-WORKED_CASE-001

特斯拉管理层对其业务的描述
Tesla Management's Description of its Business

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 225

题目与资料 / **Question and data**

例题 1

EXAMPLE 1

特斯拉管理层对其业务的描述

Tesla Management's Description of its Business

官方答案与解析 / **Official answer and explanation**

“我们设计、开发、制造、销售和出租高性能纯电动汽车，以及能源生产和储存系统，并提供与产品相关的服务。

“We design, develop, manufacture, sell and lease high-performance fully electric vehicles and energy generation and storage systems, and offer services related to our products.

我们通常直接向客户销售产品，包括通过公司网站和零售网点销售。

We generally sell our products directly to customers, including through our website and retail locations.

我们还持续扩展面向客户的基础设施，通过全球车辆服务中心、移动服务技术人员、车身维修厂、超级充电站和目的地充电设施网络，加快产品的广泛普及。

We also continue to grow our customer-facing infrastructure through a global network of vehicle service centers, Mobile Service technicians, body shops, Supercharger stations and Destination Chargers to accelerate the widespread adoption of our products.

在产品的设计和制造中，我们强调性能、富有吸引力的造型，以及用户和员工的安全，并持续开发完全自动驾驶技术以提高安全性。

We emphasize performance, attractive styling and the safety of our users and workforce in the design and manufacture of our products and are continuing to develop full self-driving technology for improved safety.

我们还通过不断降低制造成本，以及提供适合本公司产品的金融和其他服务，努力降低客户的总拥有成本。

We also strive to lower the cost of ownership for our customers through continuous efforts to reduce manufacturing costs and by offering financial and other services tailored to our products.

我们加速全球向可持续能源转型的使命、工程专业能力、纵向整合的商业模式，以及对用户体验的关注，使我们区别于其他企业。”

Our mission to accelerate the world's transition to sustainable energy, engineering expertise, vertically integrated business model and focus on user experience differentiate us from other companies."

从这段文字中，我们可以识别出商业模式的两个要素。

We can identify two business model elements from this paragraph.

提供什么：“高性能纯电动汽车，以及能源生产和储存系统，并提供与产品相关的服务”，以及“强调性能、富有吸引力的造型和……安全……并持续开发完全自动驾驶技术”。

What: "high-performance fully electric vehicles and energy generation and storage systems, and offer services related to our products" and "emphasize performance, attractive styling and . . . safety . . . and are continuing to develop full self-driving technology."

在哪里销售：“直接向客户销售产品，包括通过公司网站和零售网点销售。

Where: “sell our products directly to customers, including through our website and retail locations.

我们还持续扩展面向客户的基础设施，通过全球车辆服务中心、移动服务技术人员、车身维修厂、超级充电站和目的地充电设施网络”。

We also continue to grow our customer-facing infrastructure through a global network of vehicle service centers, Mobile Service technicians, body shops, Supercharger stations and Destination Chargers.”

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

原教材为连贯讲解型案例，没有独立设问及答案分栏；保留官方案例与演示，未另造题目。

CI-LM07-WORKED_CASE-002

客户细分
Segmenting Customers

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 226

题目与资料 / **Question and data**

例题 2

EXAMPLE 2

客户细分

Segmenting Customers

官方答案与解析 / **Official answer and explanation**

客户可以按多种方式分类或细分，包括地理位置、人口特征、季节或生命周期阶段，以及行为。

Customers can be classified or segmented in numerous ways, including by their geography, demographics, seasonal or life-cycle timing, and behavior.

复杂的市场分析可以进一步将市场划分为规模更小、内部更同质的群体。

Sophisticated market analytics can be used in segmenting to further break out smaller, homogeneous markets.

这类分析帮助特斯拉等公司开发产品并进行有效营销。

Such analyses help such companies as Tesla to develop products and market them effectively.

特斯拉将产品定位为“清洁能源新技术”，从一家只生产昂贵、高端电动跑车的企业，转变为一家重新定义实用且具有吸引力的电动汽车的企业。特斯拉瞄准有向上追求的中产及上层消费者：他们不仅追求社会地位，还希望被视为环保、在社会和环境议题上具有进步意识，并且注重成本。通过锁定这些消费者，特斯拉扩大了客户市场。

Tesla positioned its products as the “new technology for clean energy” and moved away from being a company that solely produced expensive, premium electric sports cars to a company that defined what a practical, attractive, electric vehicle could look like. By targeting aspirational middle- and upper-class consumers who not only thrive on status-seeking behavior but also seek to be perceived to be environmentally friendly, socially and environmentally progressive, and cost conscious, Tesla expanded its customer markets.

特斯拉及其他公司可以将客户分析细化到邮政编码层面，并根据社会群体、生命周期阶段和财富进行客户细分。

Tesla and other companies can drill down to the postal code level for their customers and segment customers based on their social group, life-cycle stage, and wealth.

这使企业能够识别不同地理区域中具有共同特征的客户群，将他们合并成更大的同质市场，再利用有针对性的数字广告，更容易地触达并渗透这些市场。

This allows companies to identify customer cohorts across geographies and combine them into larger homogeneous markets that are easier to access and penetrate using targeted digital advertising.

补充解析 / **Supplementary explanation**

题干列举的是“客户是谁”的分类属性，所以选细分。渠道安排回答“如何把产品送到客户”，直接销售则是一种接触客户的方式，均不等同于按收入、行为或偏好划分客户。细分结果可用于产品设计、定位和定价。

The listed attributes classify who the customers are, so segmenting is correct. Channeling addresses how offerings reach customers; direct selling is a route to market. Neither is the grouping of customers by income, behavior, or preferences. Segmentation informs product design, positioning, and pricing.

相关知识点 / **Related concepts**

客户细分识别具有相似需求或行为的群体；渠道选择决定交付方式。

Segmentation identifies groups with similar needs or behavior; channels determine delivery.

原教材为连贯讲解型案例，没有独立设问及答案分栏；保留官方案例与演示，未另造题目。

CI-LM07-WORKED_CASE-003

商业模式的演变：**Netflix**
Business Model Evolution: Netflix

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 227

题目与资料 / **Question and data**

例题 3

EXAMPLE 3

商业模式的演变：Netflix

Business Model Evolution: Netflix

官方答案与解析 / **Official answer and explanation**

Netflix 自 1997 年成立以来的发展，是企业“提供什么”随时间演变的典型例子。公司于 1998 年开展邮寄 DVD 租赁业务。当时，家庭影片租赁市场由实体租赁门店主导，仅有 2% 的美国家庭拥有 DVD 播放机。Netflix 建立并运营一个网站，让客户选择要租借的 DVD，再通过邮寄方式送达。随后，公司推出订阅模式：客户每月支付固定费用，可以同时租借多张 DVD。这项新服务颠覆了整个影片租赁行业。

Netflix’s evolution since its start in 1997 is a prime example of how the “what” evolves over time. It started as a DVD rental by mail business in 1998, when the home movie rental business was dominated by brick-and-mortar rental stores and only 2% of the US households owned a DVD player. Netflix created and operated a website for customers to select DVDs to rent and delivered them through the mail. Subsequently, the company introduced a subscription model, where customers could rent several DVDs at one time for a fixed monthly fee. This new service disrupted the entire video rental industry.

Netflix 当时的直接竞争对手是 Blockbuster，但后者花了数年才提供同类服务。

Netflix’s direct rival at the time was Blockbuster, but it took Blockbuster years to offer the same service as Netflix.

到那时，Netflix 已推出新的商业模式——按订阅收费的在线视频流媒体平台，并开始降低 DVD 租赁业务的重要性。

By that time, Netflix had launched a new business model: a subscription-based, online-streaming video platform, and began to de-emphasize its DVD rental business.

通过大量投资视频内容和改善流媒体技术，Netflix 的每月订阅用户增长至数百万人。

Through substantial investment in video content and improving streaming technology, Netflix grew to millions of monthly subscribers.

虽然 Netflix 后来多次大幅提价，但其月费仍明显低于有线电视月费。

The monthly subscription fee is substantially lower than monthly cable service fees, though Netflix has increased prices significantly over time.

Netflix 通过制作独家内容，使自身平台形成差异化。

Netflix has differentiated its platform by producing exclusive content.

Blockbuster 于 2010 年申请破产，并于 2014 年停止经营。

Blockbuster filed for bankruptcy in 2010 and ceased operations in 2014.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

阿迪达斯
Adidas

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 229

题目与资料 / **Question and data**

例题 4

EXAMPLE 4

阿迪达斯

Adidas

官方答案与解析 / **Official answer and explanation**

阿迪达斯是全球第二大运动服饰品牌，通过四种渠道组合分销产品：零售门店、特许经营门店、批发业务，以及自营电子商务。

Adidas is the world’s second largest sportswear brand and combines four channels to distribute its products: retail shops, franchise outlets, wholesale business, and its own e-commerce.

其年报的以下节选概括了公司的渠道策略：

The following excerpt from its annual report summarizes its channel strategy:

“我们拥有超过 2,500 家自营零售门店、超过 15,000 家单一品牌特许经营门店，以及超过 150,000 个批发销售网点，在本行业拥有无可比拟的消费者接触网络。

“With more than 2,500 own-retail stores, more than 15,000 mono-branded franchise stores and more than 150,000 wholesale doors, we have an unrivaled network of consumer touchpoints within our industry.

此外，通过自营电子商务渠道——我们面向 40 多个国家消费者的最大单一商店——我们采用统一的全球经营框架。”

In addition, through our own e-commerce channel, our single biggest store available to consumers in over 40 countries, we are leveraging a consistent global framework.”

资料来源：阿迪达斯股份公司《2019 年年报》。https://report.adidas-group.com/2019/en/group-management-report-our-company/corporate-strategy/sales-and-distribution-strategy.html

CI-LM07-WORKED_CASE-005

HD Tools 的商业模式
HD Tools Business Model

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 232-233

题目与资料 / **Question and data**

例题 5

EXAMPLE 5

HD Tools 的商业模式

HD Tools Business Model

官方答案与解析 / **Official answer and explanation**

虚构企业 HD Tools 销售工具，目前正在考虑商业模式 A 和 B。下表列示了两种模式的要素。

The fictional firm HD Tools sells tools. It is considering two business models, A and B. Elements of each are presented in the following table.

HD Tools 商业模式比较（第一部分）。
客户群体：模式 A 面向公寓住户和新房主；模式 B 面向自行维修者及专业技术工种人员。
产品：模式 A 提供简单、低价的工具套装；模式 B 提供种类齐全、可供单件购买的高质量工具。

	Business Model A	Business Model B
Customer segment	▪ Apartment dwellers and new homeowners	▪ Do-it-yourself/professional trades
Products	▪ Simple, low-priced kit of tools	▪ A full assortment of high-quality tools for individual purchase

原 PDF 第 232 页 · 完整表格 · 300 dpi

HD Tools 商业模式比较（续）。
渠道：模式 A 的客户不去家居建材商店，更可能在网上或大型综合零售商处购买工具套装；模式 B 的客户经常光顾大型家居建材商店及专业行业分销商。
客户特征与需求：模式 A 的客户可能不知道需要哪些工具，原本也可能没有工具，只偶尔进行日常维修。模式 B 的客户时间宝贵，了解并能够区分工具和品牌，使用频繁，对质量要求高。
相对定价：模式 A 采用低廉、负担得起的价位；模式 B 的工具价格较高。
客户价值：模式 A 用一个套装提供多种可能需要的工具，并考虑有限储存空间，采用简单、紧凑的工具箱。模式 B 的客户愿意为确信耐用、性能可靠的工具支付溢价。
服务期望：模式 A 的售后支持并不关键，但必须有可以接受的退货政策。模式 B 的售后支持也不是关键，不过客户希望与专业知识丰富的员工交流，并重视产品供应充足。

	Business Model A	Business Model B
Channel	▪ They do not shop at home improvement stores and are likely to buy a kit online or from a mass retailer.	▪ They frequent large home improvement stores and specialty trade distributers.
Customer profile, need	▪ They may not know what tools they need and may have none to start with. ▪ Occasional use to do everyday repairs	▪ Their time is valuable. ▪ They know and can differentiate between tools and brands. ▪ Heavy-use, high-quality requirement
Relative pricing	▪ Low and affordable price point	▪ Premium priced tools
Customer value	▪ A single kit contains several tools they are likely to need. ▪ A simple and compact toolbox given limited storage space	▪ Will pay a premium for a tool that they are confident will be durable and will perform
Service expectations	▪ After-sales support is not critical, provided there is an acceptable return policy	▪ After-sales support not critical, but prefers interacting with knowledgeable staff ▪ Product availability important

原 PDF 第 233 页 · 完整表格 · 300 dpi

这两种商业模式对各自的客户群体都成立，都需要将产品分销给分散的客户群。然而，模式 A 的低价工具套装可能以较小规模开展，例如在线销售，或取得少数大型零售商的货架位置。

Each of these business models is valid for its respective customer segment. Both require distribution to disparate customer bases. However, Model A (low- priced kits) could potentially be established at a smaller scale online or by gaining shelf space at a handful of large retailers.

模式 A 的挑战在于，产品成本必须足够低，才能获得可以接受的利润率。企业也可能通过更好的网络客户评价、产品外观、更合理的工具组合，或竞争对手尚未提供的附加功能，与其他套装供应商形成差异。例如，附送一组常用紧固件，在维持低价的同时，尽可能提高客户使用便利性。

With Model A, the challenge will be to have a low-enough product cost to generate an acceptable margin for the business. Differentiation against other kit providers might be also achievable through better online customer reviews, product aesthetics, a better selection of tools, or perhaps an extra feature not offered by competitors—for example, by bundling with a selection of common fasteners, aimed at maximizing customer convenience at a low price point.

对于模式 B，更关键的因素可能是产品质量、价格和分销。

With Model B, the more critical factor is likely to be product quality, price, and distribution.

专业市场需要能够证明具有高质量的工具，才能使熟悉产品的客户选择这些工具，而非已有的竞争品牌。

The professional market requires tools that are of demonstrably high quality so that their customers, who are knowledgeable, will choose them over established rival brands.

HD 这样的新品牌可能很难做到。

This might be difficult for a new brand, such as HD.

不过，HD 可以通过客观说明工具所用材料的质量、强度和耐用性，提供终身保修与宽松退货政策，开展面向专业人员的营销，并与专业零售商合作推广产品，来克服这一困难。

However, HD might be able to overcome this, with objective statements about the quality of materials used in making the tools, their strength and durability, a lifetime warranty and generous return policy, marketing aimed at professionals, and working with specialist retailers to promote the product.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

题目与资料 / **Question and data**

例题 6

EXAMPLE 6

既是主要供应商，也是竞争对手

Both a Key Supplier and Competitor

官方答案与解析 / **Official answer and explanation**

数字娱乐公司 Netflix 通过网站和移动应用销售流媒体视频服务。

Netflix, the digital entertainment company, sells a streaming video service through its website and mobile applications.

虽然它制作和取得内容许可，但仍依赖互联网服务提供商，例如宽带和无线通信公司，才能触达客户。

While it produces and licenses content, it relies on the services provided by internet service providers, such as broadband and wireless telecom companies, to reach its customers.

此外，Netflix 还依赖数字基础设施公司，使全球超过 2 亿订阅用户能够随时随地接收内容。

Additionally, Netflix relies on digital infrastructure companies to enable the delivery of content to its more than 200 million subscribers globally whenever and wherever they want.

其中一家数字基础设施公司是亚马逊；亚马逊通过旗下 Prime Video 流媒体服务，同时也是 Netflix 的重要竞争对手。

One digital infrastructure company is Amazon, which, through its Prime Video streaming service, is also a significant competitor for Netflix.

Netflix 在年报的风险因素部分指出：

In its annual report, Netflix noted the following under its risk factors:

“亚马逊云科技（AWS）为企业运营提供分布式计算基础设施平台，即通常所称的‘云’计算服务。

“Amazon Web Services (“AWS”) provides a distributed computing infrastructure platform for business operations, or what is commonly referred to as a “cloud” computing service.

我们的软件和计算机系统以使用 AWS 提供的数据处理、存储能力和其他服务为基础进行设计。

We have architected our software and computer systems to utilize data processing, storage capabilities and other services provided by AWS.

目前，我们绝大多数计算任务都在 AWS 上运行。

Currently, we run the vast majority of our computing on AWS.

鉴于这一情况，以及我们无法轻易将 AWS 上的业务迁移至其他云服务提供商，任何对我们使用 AWS 的中断或干扰都会影响运营，并对业务造成不利影响。

Given this, along with the fact that we cannot easily switch our AWS operations to another cloud provider, any disruption of or interference with our use of AWS would impact our operations and our business would be adversely impacted.

虽然亚马逊的零售业务与我们竞争，但我们认为，亚马逊不会利用 AWS 业务来取得相对于本公司服务的竞争优势；不过，如果其这样做，可能损害我们的业务。”

While the retail side of Amazon competes with us, we do not believe that Amazon will use the AWS operation in such a manner as to gain competitive advantage against our service, although if it were to do so, it could harm our business.”

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

QUESTION SET

一位分析师正在评估两家自行车制造公司：Winston Bikes 和 Carbondash。

An analyst is evaluating two bicycle manufacturing companies: Winston Bikes and Carbondash.

Winston Bikes 生产面向大众市场的低价自行车，并通过多种实体零售商销售。

Winston Bikes manufactures inexpensive, mass-market bicycles and sells them through a variety of physical retailers.

公司使用最新机器人技术制造产品，并通过租赁安排取得机器人设备；该安排允许其轻松增加或减少设备使用量。

It uses the latest in robotic technology to do its manufacturing, and it leases the robotic equipment under an arrangement where it can easily increase or decrease the amount of equipment it uses.

公司采用成熟、常见且简单的传统设计，使用价格低廉、供应广泛的材料。

It uses conventional, established, common, and simple designs and uses materials that are inexpensive and widely available.

Carbondash 手工生产高端、高质量且结构复杂的自行车。

Carbondash produces premium, high-quality, complex bicycles by hand.

其技术人员经过长期专业培训，并签订长期雇佣合同。

Its technicians are highly trained over long periods of time and are under long-term employment contracts.

公司采用非传统、复杂且高度精密的设计。

It uses unconventional, sophisticated, highly precise designs.

车架使用一种专有且高度专门化的碳纤维变体制造，材料中加入了稀土金属，而该金属仅来自全球唯一的一座矿山。

It manufactures its frames with a proprietary and highly specialized variant of carbon fiber that is infused with a rare earth metal that is available from only one mine in the world.

所有部件均由受过高度专业训练的销售人员，为骑行者量身测量和定制；零售门店位于租金昂贵、声望较高的地段。

Everything is custom measured and custom fit to the rider by highly trained salespeople in retail outlets located in expensive, prestigious physical locations.

公司的客户忠诚度高，对价格相对不敏感。

It serves a loyal customer base that is relatively insensitive to price.

1. 如果市场需求突然变化，哪家公司更能够应对？

1. If a sudden change in market demand happens, which company will be better able to handle it?

官方答案与解析 / **Official answer and explanation**

参考答案：

Guideline solution:

无论需求突然增加还是减少，Winston Bikes 都很可能比 Carbondash 更能应对。Winston Bikes 对生产机器人的租赁安排灵活，因此能够随市场需求变化，轻松扩大或缩小生产规模。Carbondash 则高度依赖熟练人力；由于技术人员需要长期培训，公司无法迅速扩产，而长期劳动合同又使其难以轻易缩减规模。

If there is a sudden change in market demand, whether an increase or a decrease in demand, Winston Bikes will most likely be able to handle it better than Carbondash. Because of Winston Bikes' flexible lease arrangements with its manufacturing robots, it can easily scale its manufacturing up or down in response to changes in market demand. Carbondash, however, has a heavy dependence on skilled human labor. It can't scale up quickly because its technicians require long periods of training, and it can't scale down easily because of its long-term labor contracts.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

QUESTION SET

一位分析师正在评估两家自行车制造公司：Winston Bikes 和 Carbondash。

An analyst is evaluating two bicycle manufacturing companies: Winston Bikes and Carbondash.

Winston Bikes 生产面向大众市场的低价自行车，并通过多种实体零售商销售。

Winston Bikes manufactures inexpensive, mass-market bicycles and sells them through a variety of physical retailers.

公司使用最新机器人技术制造产品，并通过租赁安排取得机器人设备；该安排允许其轻松增加或减少设备使用量。

It uses the latest in robotic technology to do its manufacturing, and it leases the robotic equipment under an arrangement where it can easily increase or decrease the amount of equipment it uses.

公司采用成熟、常见且简单的传统设计，使用价格低廉、供应广泛的材料。

It uses conventional, established, common, and simple designs and uses materials that are inexpensive and widely available.

Carbondash 手工生产高端、高质量且结构复杂的自行车。

Carbondash produces premium, high-quality, complex bicycles by hand.

其技术人员经过长期专业培训，并签订长期雇佣合同。

Its technicians are highly trained over long periods of time and are under long-term employment contracts.

公司采用非传统、复杂且高度精密的设计。

It uses unconventional, sophisticated, highly precise designs.

车架使用一种专有且高度专门化的碳纤维变体制造，材料中加入了稀土金属，而该金属仅来自全球唯一的一座矿山。

It manufactures its frames with a proprietary and highly specialized variant of carbon fiber that is infused with a rare earth metal that is available from only one mine in the world.

所有部件均由受过高度专业训练的销售人员，为骑行者量身测量和定制；零售门店位于租金昂贵、声望较高的地段。

Everything is custom measured and custom fit to the rider by highly trained salespeople in retail outlets located in expensive, prestigious physical locations.

公司的客户忠诚度高，对价格相对不敏感。

It serves a loyal customer base that is relatively insensitive to price.

2. 为什么 Winston Bikes 的供应商中断风险可能低于 Carbondash？

2. Why might the risks of supplier disruption be lower for Winston Bikes than for Carbondash?

> 官方答案与解析 / **Official answer and explanation**

参考答案：

Guideline solution:

Carbondash 面临较高的供应商中断风险，因为其材料来自单一公司，专有设计需要专门制造技术，而且一种特殊原料在全球只有一个来源。

Carbondash faces higher risk of supplier disruption because it single-sources its materials from one company, uses a proprietary design that requires specialized manufacturing techniques, and uses a special ingredient that is available from only one source in the world.

相反，Winston Bikes 使用多家供应商，设计简单，材料供应广泛，也有多家供应商能够使用这些材料生产。

Winston Bikes, in contrast, uses many suppliers and has simple designs and widely available materials that can be used by many suppliers.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

一位分析师正在评估两家自行车制造公司：Winston Bikes 和 Carbondash。

An analyst is evaluating two bicycle manufacturing companies: Winston Bikes and Carbondash.

Winston Bikes 生产面向大众市场的低价自行车，并通过多种实体零售商销售。

Winston Bikes manufactures inexpensive, mass-market bicycles and sells them through a variety of physical retailers.

公司使用最新机器人技术制造产品，并通过租赁安排取得机器人设备；该安排允许其轻松增加或减少设备使用量。

It uses the latest in robotic technology to do its manufacturing, and it leases the robotic equipment under an arrangement where it can easily increase or decrease the amount of equipment it uses.

公司采用成熟、常见且简单的传统设计，使用价格低廉、供应广泛的材料。

It uses conventional, established, common, and simple designs and uses materials that are inexpensive and widely available.

Carbondash 手工生产高端、高质量且结构复杂的自行车。

Carbondash produces premium, high-quality, complex bicycles by hand.

其技术人员经过长期专业培训，并签订长期雇佣合同。

Its technicians are highly trained over long periods of time and are under long-term employment contracts.

公司采用非传统、复杂且高度精密的设计。

It uses unconventional, sophisticated, highly precise designs.

车架使用一种专有且高度专门化的碳纤维变体制造，材料中加入了稀土金属，而该金属仅来自全球唯一的一座矿山。

It manufactures its frames with a proprietary and highly specialized variant of carbon fiber that is infused with a rare earth metal that is available from only one mine in the world.

所有部件均由受过高度专业训练的销售人员，为骑行者量身测量和定制；零售门店位于租金昂贵、声望较高的地段。

Everything is custom measured and custom fit to the rider by highly trained salespeople in retail outlets located in expensive, prestigious physical locations.

公司的客户忠诚度高，对价格相对不敏感。

It serves a loyal customer base that is relatively insensitive to price.

3. 为什么 Carbondash 面临的材料成本上升风险可能低于 Winston Bikes？

3. Why might the risks of increases in material costs be lower for Carbondash than for Winston Bikes?

> 官方答案与解析 / **Official answer and explanation**

参考答案：

Guideline solution:

Winston Bikes 是依靠价格竞争、利润率很低的低成本企业。

Winston Bikes is a low-cost business that competes on price and has thin margins.

它是价格接受者，无法在不损失销量的情况下提价。

It is a price taker and so is unable to raise its prices without suffering a decrease in sales.

由于利润率很薄，公司无法在吸收成本上涨的同时继续保持盈利。

Its thin margins mean that it can’t absorb cost increases and remain profitable.

相比之下，Carbondash 依靠产品差异化，并拥有对价格不太敏感的忠诚客户群。

Carbondash, in contrast, relies on differentiation of its products and has a loyal customer base that is less sensitive to price.

较高的利润率使其更能承受材料成本上涨；同时，忠诚且价格敏感度较低的客户群，使公司能够提价，而不会显著损害销量。

Because its margins are higher, it is better able to absorb an increase in the cost of its materials, and because its customer base is loyal and less sensitive to price, it is able to raise its prices without a significant adverse impact on its sales.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

QUESTION SET

一位分析师正在评估两家自行车制造公司：Winston Bikes 和 Carbondash。

An analyst is evaluating two bicycle manufacturing companies: Winston Bikes and Carbondash.

Winston Bikes 生产面向大众市场的低价自行车，并通过多种实体零售商销售。

Winston Bikes manufactures inexpensive, mass-market bicycles and sells them through a variety of physical retailers.

公司使用最新机器人技术制造产品，并通过租赁安排取得机器人设备；该安排允许其轻松增加或减少设备使用量。

It uses the latest in robotic technology to do its manufacturing, and it leases the robotic equipment under an arrangement where it can easily increase or decrease the amount of equipment it uses.

公司采用成熟、常见且简单的传统设计，使用价格低廉、供应广泛的材料。

It uses conventional, established, common, and simple designs and uses materials that are inexpensive and widely available.

Carbondash 手工生产高端、高质量且结构复杂的自行车。

Carbondash produces premium, high-quality, complex bicycles by hand.

其技术人员经过长期专业培训，并签订长期雇佣合同。

Its technicians are highly trained over long periods of time and are under long-term employment contracts.

公司采用非传统、复杂且高度精密的设计。

It uses unconventional, sophisticated, highly precise designs.

车架使用一种专有且高度专门化的碳纤维变体制造，材料中加入了稀土金属，而该金属仅来自全球唯一的一座矿山。

It manufactures its frames with a proprietary and highly specialized variant of carbon fiber that is infused with a rare earth metal that is available from only one mine in the world.

所有部件均由受过高度专业训练的销售人员，为骑行者量身测量和定制；零售门店位于租金昂贵、声望较高的地段。

Everything is custom measured and custom fit to the rider by highly trained salespeople in retail outlets located in expensive, prestigious physical locations.

公司的客户忠诚度高，对价格相对不敏感。

It serves a loyal customer base that is relatively insensitive to price.

4. 哪家公司更可能：

4. Which company will most likely:

a. 规模更大？

a. be larger?

b. 价格更高？

b. have higher prices?

c. 成本更高？

c. have higher costs?

> 官方答案与解析 / **Official answer and explanation**

a 项参考答案：

Guideline solution to a:

Winston Bikes 的规模很可能大于 Carbondash，至少以销量衡量是如此。

Winston Bikes will most likely be larger than Carbondash, at least in terms of units sold.

Winston Bikes 利润率很低，因此必须依靠较高销量，才能获得足以维持生存的利润。

Winston Bikes operates on thin margins and so must have a high volume in order to generate sufficient profitability to survive.

Carbondash 则更可能是一家高价格、低销量的制造商。

Carbondash, in contrast, is likely a high-price, low-volume manufacturer.

Winston Bikes 采用全渠道分销，使更多客户能够接触其产品。

Winston Bikes has omnichannel distribution, which puts its products in front of more customers.

Carbondash 则在实体门店通过销售人员建立客户关系，开展直接销售。

Carbondash uses direct sales in physical stores using salespeople to create relationships.

b 项参考答案：

Guideline solution to b:

Carbondash 的价格很可能更高，因为它采取产品差异化策略，面向对价格相对不敏感的客户。Winston Bikes 依靠价格竞争，因此必须维持较低价格。

Carbondash will most likely have higher prices. It pursues a product differentiation strategy, and it targets a customer base that is relatively price insensitive. Winston Bikes competes on price and so must have low prices.

c 项参考答案：

Guideline solution to c:

Carbondash 在制造和销售的整个过程中大量使用人力，因此单位成本很可能更高。

Carbondash most likely has higher costs per unit because of all the human labor involved throughout the manufacturing and sales process.

其自行车手工组装，并通过自有门店和销售人员直接销售。

The bikes are assembled by hand and are sold using direct sales in its own stores with its own sales staff.

Winston Bikes 则利用最新的软件和机器人制造技术，尽可能降低成本；同时使用无需自行承担门店和销售人员费用的分销渠道。

Winston Bikes uses the latest in software and robot manufacturing technology in order to keep costs as low as possible, and it uses distribution channels whereby it doesn't need to pay for stores or sales staff.

> 补充解析 / **Supplementary explanation**

补充思路：商业模式必须说清为哪些客户解决什么问题、如何交付以及怎样获得收入。高价只有在客户认可差异化且愿意支付时才可持续；低成本战略也要有真实的成本来源。分析定价要区分销售数量、单价、重复购买和收费基础，例如按次、订阅、许可或佣金，它们的收入敏感性与成本结构并不相同。

Additional reasoning: A business model must identify target customers, the problem solved, delivery, and revenue capture. Premium pricing requires valued differentiation and willingness to pay; cost leadership needs a genuine cost advantage. Separate volume, unit price, repeat purchases, and charging basis—transaction, subscription, license, or commission—because their sensitivities differ.

相关知识点 / **Related concepts**

价值主张与定价模式：价值主张连接客户需要与企业能力；收入驱动因素和成本驱动因素共同决定利润率与可扩张性。

Value proposition and pricing: The value proposition links customer needs with capabilities. Revenue and cost drivers jointly determine margins and scalability.

QUESTION SET

一位分析师正在评估两家自行车制造公司：Winston Bikes 和 Carbondash。

An analyst is evaluating two bicycle manufacturing companies: Winston Bikes and Carbondash.

Winston Bikes 生产面向大众市场的低价自行车，并通过多种实体零售商销售。

Winston Bikes manufactures inexpensive, mass-market bicycles and sells them through a variety of physical retailers.

公司使用最新机器人技术制造产品，并通过租赁安排取得机器人设备；该安排允许其轻松增加或减少设备使用量。

It uses the latest in robotic technology to do its manufacturing, and it leases the robotic equipment under an arrangement where it can easily increase or decrease the amount of equipment it uses.

公司采用成熟、常见且简单的传统设计，使用价格低廉、供应广泛的材料。

It uses conventional, established, common, and simple designs and uses materials that are inexpensive and widely available.

Carbondash 手工生产高端、高质量且结构复杂的自行车。

Carbondash produces premium, high-quality, complex bicycles by hand.

其技术人员经过长期专业培训，并签订长期雇佣合同。

Its technicians are highly trained over long periods of time and are under long-term employment contracts.

公司采用非传统、复杂且高度精密的设计。

It uses unconventional, sophisticated, highly precise designs.

车架使用一种专有且高度专门化的碳纤维变体制造，材料中加入了稀土金属，而该金属仅来自全球唯一的一座矿山。

It manufactures its frames with a proprietary and highly specialized variant of carbon fiber that is infused with a rare earth metal that is available from only one mine in the world.

所有部件均由受过高度专业训练的销售人员，为骑行者量身测量和定制；零售门店位于租金昂贵、声望较高的地段。

Everything is custom measured and custom fit to the rider by highly trained salespeople in retail outlets located in expensive, prestigious physical locations.

公司的客户忠诚度高，对价格相对不敏感。

It serves a loyal customer base that is relatively insensitive to price.

5. 一位分析师与 Luggo公司的管理层开会，听取其对业务的描述。首席执行官作出以下陈述：

5. An analyst sits down for a meeting with the management team of Luggo Corporation, who is describing their business. The CEO makes the following statement:

Luggo 生产用于将车轮固定在汽车和卡车上的高端零件。

Luggo makes premium parts to secure wheels onto cars and trucks.

我们采用高端设计，并使用最优质的钛制造产品，以确保强度和轻量化，从而与竞争对手区分开来。

We differentiate ourselves from our competitors by using premium designs and building our products from the finest titanium to ensure strength and light weight.

我们通过向实体零售店供货的批发商分销产品，定价与市场水平持平。

We distribute our products through wholesalers that supply physical retail stores, and we price at parity with the market.

首席执行官没有描述商业模式中的哪些部分？

What parts of the business model did the CEO not describe?

> 官方答案与解析 / **Official answer and explanation**

参考答案：

Guideline solution:

首席执行官没有描述公司的客户。

The CEO did not describe the firm’s customers.

客户是商业模式的主要特征之一，说明企业如何细分客户群，以及产品面向哪些细分群体。

This is one of the key attributes of a business model and describes how the firm segments its customer base and which segments it is targeting with its products.

客户可以按多种方式细分，包括地理位置、人口特征、季节或生命周期阶段、行为、社会群体和财富。

Customers can be segmented in numerous ways, including by their geography, demographics, seasonal or life-cycle timing, behavior, social group, and wealth.

细分能够帮助企业识别不同地区具有共同特征的客户，并将其整合为更大的同质市场，从而更容易通过定向营销触达并渗透这些市场。

Segmenting allows companies to identify customer cohorts across geographies and combine them into larger homogeneous markets that are easier to access and penetrate using targeted marketing.

商业机会往往源于现有企业未能有效服务某些客户群体，甚至没有意识到这些群体的存在。

Business opportunities often arise because established firms may not effectively serve—or even recognize—customer segments.

补充解析 / **Supplementary explanation**

补充思路：商业模式必须说清为哪些客户解决什么问题、如何交付以及怎样获得收入。高价只有在客户认可差异化且愿意支付时才可持续；低成本战略也要有真实的成本来源。分析定价要区分销售数量、单价、重复购买和收费基础，例如按次、订阅、许可或佣金，它们的收入敏感性与成本结构并不相同。

Additional reasoning: A business model must identify target customers, the problem solved, delivery, and revenue capture. Premium pricing requires valued differentiation and willingness to pay; cost leadership needs a genuine cost advantage. Separate volume, unit price, repeat purchases, and charging basis—transaction, subscription, license, or commission—because their sensitivities differ.

相关知识点 / **Related concepts**

价值主张与定价模式：价值主张连接客户需要与企业能力；收入驱动因素和成本驱动因素共同决定利润率与可扩张性。

Value proposition and pricing: The value proposition links customer needs with capabilities. Revenue and cost drivers jointly determine margins and scalability.

酒店与旅游行业商业模式的演变
Business Model Evolution in the Hotel and Travel Industry

正文讲解案例 / Narrated worked case · 原版 PDF 页码 / Source PDF pages: 243-244

题目与资料 / **Question and data**

例题 7

EXAMPLE 7

酒店与旅游行业商业模式的演变

Business Model Evolution in the Hotel and Travel Industry

官方答案与解析 / **Official answer and explanation**

酒店业很好地展示了商业模式随时间演变，以及具有不同财务特征的多种商业模式出现的过程。

The hotel industry provides a good illustration of business model evolution over time and the emergence of different business models, with varying financial characteristics.

20 世纪以前，商业模式演变缓慢。

Until the 20th century, business model evolution was slow.

为了满足市场增长带来的规模扩大和专业化需求，酒店规模和数量不断增加，但基本商业模式变化不大。

In response to increasing scale and specialization demanded by a growing market, hotels became larger and more numerous but with little change in the basic business model.

20 世纪，行业商业模式发生了重大变化。

The 20th century brought major changes to business models in the industry.

由于某些酒店物业本身具有独特性，单一物业酒店仍然是一种有意义的商业模式。

The single-property hotel business remained a relevant business model, due to the inherent uniqueness of certain hotel properties.

但随着客户群体显著扩大、流动性提高，酒店经营者看到了机会：满足不断增长的商务旅行市场，扩大经营规模和覆盖范围，并为客户提供便利和一致性，从而提升运营效率。

However, with a much larger and highly mobile customer base, hotel operators saw an opportunity, with the need to serve a growing corporate travel market, increase the scale and footprint of their businesses, and provide convenience and consistency to customers, thereby increasing operating efficiency.

以下列出一些具体例子。

Some specific examples are outlined below.

酒店业商业模式演变：影响与例子。
规模：大型全球连锁酒店及品牌在多个地点经营，服务不同市场中流动性高的客户。例子：洲际酒店及度假村在约 6,000 个地点拥有超过 15 个品牌，涵盖基础、奢华和长住型住宿。
专业化：专业住宿企业服务特定细分市场。例子包括度假酒店、机票 + 住宿 + 餐饮套餐、赌场，以及为外地高管提供的按周或按月住宿。
特许经营：将加盟方式用于酒店。多数希尔顿物业并非由希尔顿持有或租赁，而由支付费用的特许经营商运营。
职能分离：品牌与营销、物业持有、管理、开发等职能由不同专业企业承担。大型酒店公司很少拥有全部酒店，有些不拥有任何酒店。全球最大的酒店 REIT——Host Hotels & Resorts——持有近 100 处酒店物业，也是万豪与凯悦酒店最大的第三方业主。
分割所有权：以分时度假方式分割产权，创造介于酒店与度假住宅之间的住宿类别。Wyndham Destinations 是最大的度假所有权公司，透过多个度假所有权俱乐部开发、销售和管理分时度假物业。
忠诚度计划：提高高价值、高频旅行者的品牌忠诚度。假日酒店与万豪于 1983 年率先推出酒店忠诚度计划。

Impact		Example
Scale	Large, global hotel chains and brands with multiple locations that serve highly mobile customers in numerous market segments.	Intercontinental Hotels & Resorts has more than 15 brands in approximately 6,000 locations. Brands range from basic to luxury and extended stay.
Specialization	Specialized lodging businesses to serve specific market segments	Resort hotels, vacation packages (bundled flights + lodging + meals), casinos, weekly/monthly accommodation (for out-of-town executives)
Franchising	Applying the franchise approach to the hotel business	Most Hilton Hotels properties are not owned or leased by Hilton but are operated by franchisees who pay fees.
Functional separation	Specialized businesses handling such functions as branding and marketing, property ownership, management, and development	REITs and property ownership: The largest hotel companies seldom own all their hotels; some own none. Host Hotels & Resorts, the world's largest hotel REIT, owns close to 100 hotel properties and is the largest third-party owner of Marriott and Hyatt hotels.
Fractionalized ownership	Fractionalized ownership in the form of time-sharing, creating a new lodging category between the hotel and the vacation home	Wyndham Destinations is the largest vacation ownership company. The company develops, sells, and manages time-share properties under various vacation ownership clubs.
Loyalty programs	The introduction of programs to increase brand loyalty among high-value, frequent travelers	Hotel loyalty programs first introduced by Holiday Inn and Marriott in 1983

原 PDF 第 243 页 · 完整表格 · 300 dpi

商业模式的数字化转型也影响了酒店业。

The digital transformation of business models has also impacted the hotel business.

为了提高酒店和旅游相关服务的营销及分销效率，在线旅行社（OTA）降低了旅行规划与预订的复杂性。

To increase the efficiency in marketing and distribution of hotel and travel-related services, Online Travel Agency (OTA) reducedthe complexities of travel planning and bookings.

无论传统形式还是在线形式，旅行社业务都属于双边网络。

In both its traditional and online forms, the travel agency business is a two-sided network.

与传统旅行代理商一样，OTA 协助旅客进行资料搜集和行程规划、比较价格、预订及安排交通等事项。

Like a traditional travel agent, OTA assists travelers with research and planning, price comparisons, bookings, and logistics.

对酒店而言，OTA 提供曝光、潜在客户、预订、客户资料、反馈和竞争情报。

For hotels, it provides exposure, leads, bookings, customer information, feedback, and competitive intelligence.

将这些职能自动化并通过网络提供服务，大幅改善了便利性、速度与效率，因而改变了商业模式，并使旅行代理商与酒店客户之间的关系及议价力量重新分配。

Automating these functions and delivering them as a web-based service so greatly improved their convenience, speed, and efficiency that the business model was transformed, shifting the relationship and the balance of power between agencies and their hotel customers.

实际上，通过网络效应，OTA 替代了传统旅行社模式中的中介环节，并迫使仍然存在的旅行社走向专业化。

Effectively, through network effects, OTA disintermediated the traditional travel agency model and forced the remaining agencies to specialize.

下表列举不同的 OTA 商业模式。

Examples of differing OTA business models are shown below.

在线旅行社（OTA）的不同商业模式。
比价聚合平台：以网络为基础，为酒店和旅游领域的买卖双方提供价格比较及预订服务。例子：Booking.com、Expedia、携程、eDreams。
众包：通过平台汇集用户提供的酒店及其他旅游服务评价和信息。例子：TripAdvisor.com。
房屋共享 / 短期租赁：提供多种临时住宿，且住宿往往独具特色，从而挑战和颠覆传统酒店模式。例子：Airbnb；Vrbo（2006 年被 HomeAway 收购，HomeAway 又于 2015 年被 Expedia 收购）。

OTA Business Model	Description	Examples
Price-comparison "aggregators"	These network-based businesses offer buyers and sellers in the hotel and travel community travel-related price comparison services and bookings.	Booking.com, Expedia, Ctrip, eDreams
Crowdsourcing	These platform businesses provide crowd-sourced reviews and information on hotels and other travel services.	TripAdvisor.com
Home sharing/short-term rental service	These platform businesses have challenged and disrupted the traditional hotel model by supplying a variety of temporary, often unique, accommodations.	Airbnb; Vrbo (acquired in 2006 by HomeAway, which in turn was acquired by Expedia in 2015)

原 PDF 第 244 页 · 完整表格 · 300 dpi

酒店经营者通过投资自身网站、客户数据和直接预订能力，或直接向不同网站销售，回应这些挑战。

Hotel operators have responded to these challenges by investing in their own websites, customer data, and direct booking capabilities or selling directly to various sites.

一些传统连锁酒店过去强调一致性与标准化，如今推出所谓"软品牌"：酒店以自身名称经营，并赋予当地经营者更大的自主权。

Some traditional hotel chains, which have historically emphasized consistency and uniformity, have launched so-called soft brands, which are hotels that operate under their own name but with a greater degree of local operator autonomy.

此外，它们还推出混合式酒店方案，例如公寓式产权酒店：酒店中的公寓由业主自行使用，未使用时由酒店对外出租。

Moreover, they have created hybrid hotel solutions, such as condo-hotels (condos in a hotel that are at the disposal of the owner but are rented out otherwise by the hotel).

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

QUESTION SET

Bynta 是服装零售业的新进入者，正在与已有行业企业 Ocean Hill Inc. 竞争；后者采用传统商业模式。

Bynta is a new entrant in the retail clothing industry. It is competing against Ocean Hill Inc., an established industry incumbent that uses a conventional business model.

1. 在传统零售商业模式中，Bynta 与Ocean Hill Inc. 很可能具有哪些共同特征？

1. What attributes of a conventional retail business model will Bynta and Ocean Hill Inc. likely share?

官方答案与解析 / **Official answer and explanation**

答案解析：

Solution:

商业模式框架的四个主要组成部分是客户、产品、渠道和定价。

The four major components of a business model framework are customers, products, channels, and pricing.

Bynta 与 Ocean Hill Inc. 很可能都以产品最终使用者为客户，销售制成品，并以在商品成本上加价的方式定价。

Bynta and Ocean Hill Inc. will likely be similar in that their customers will be end users of the products, their products will be finished goods, and their pricing will be based on markup on products sold.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

Question set · 2

正文习题组 / Question set · 原版 PDF 页码 / Source PDF pages: 244-245

题目与资料 / **Question and data**

练习题组

QUESTION SET

Bynta 是服装零售业的新进入者，正在与已有行业企业 Ocean Hill Inc. 竞争；后者采用传统商业模式。

Bynta is a new entrant in the retail clothing industry. It is competing against Ocean Hill Inc., an established industry incumbent that uses a conventional business model.

2. 哪些因素最可能使 Bynta 与 Ocean Hill Inc. 区别开来？

2. What most likely would distinguish Bynta from Ocean Hill Inc.?

官方答案与解析 / **Official answer and explanation**

答案解析：

Solution:

Bynta 可以利用数字技术降低沟通、信息交换和资金交易的成本，从而与 Ocean Hill Inc. 区分开来。

Bynta can distinguish itself from Ocean Hill Inc. by using digital technology to reduce the cost of communicating, exchanging information, and financially transacting.

数字技术使地点的重要性下降，因为电子商务无需实体店面，也能实现浏览和购买。

With digital technology, location matters less because e-commerce allows for shopping and purchasing without the need for a physical storefront.

数字技术也使向贴牌生产商或合同制造商外包更容易，让 Bynta 更专注于产品设计、销售和营销。

Outsourcing to private label or contract manufacturers is also made easier with digital technology and will allow Bynta to focus more on product design, sales, and marketing.

数字技术还能改善客户细分，使细分群体更狭窄，并具有 Bynta 产品类别的独特性。利用数字营销，Bynta 可以更容易、更低成本地触达特定客户群体，不受地点限制，并实现比传统广告更深入的互动。先进的市场分析可以划分出较小的同质市场，使 Bynta 识别跨地区的相似客户，将其组合成更大的同质市场，再通过定向数字广告更容易地触达和渗透。

Improved customer segmentation is also enabled by digital technology, allowing for segments that are narrower and unique to Bynta's product categories. Digital technology in marketing will make it easier and more cost effective for Bynta to reach very specific customer segments, regardless of location, and to engage more deeply with them than is possible with traditional advertising. Sophisticated market analytics can be used to break out smaller, homogeneous markets. This will allow Bynta to identify customer cohorts across geographies and combine them into larger homogeneous markets that are easier to access and penetrate using targeted digital advertising.

Bynta 还可以建立用户社区，促进客户之间自愿协作，从网络效应和众包中受益。

Bynta can also benefit from network effects and crowdsourcing by facilitating user communities that enable voluntary collaboration between its customers.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

题目与资料 / **Question and data**

练习题组

QUESTION SET

Bynta 是服装零售业的新进入者，正在与已有行业企业 Ocean Hill Inc. 竞争；后者采用传统商业模式。

Bynta is a new entrant in the retail clothing industry. It is competing against Ocean Hill Inc., an established industry incumbent that uses a conventional business model.

3. 当原材料或大宗商品价格上涨时，对资源生产商、制造商，以及分销商和零售商的收入与利润影响有何不同？

3. Given an increase in the price of raw materials/commodities, what is the difference in revenue/profit impact for producers versus manufacturers versus distributors and retailers?

官方答案与解析 / **Official answer and explanation**

答案解析：

Solution:

供应链包括生产实物产品并将其交付最终客户的所有步骤，无论这些步骤是否由同一家企业完成。

A supply chain includes all the steps involved in producing and delivering a physical product to the end customer, regardless of whether those steps are performed by a single firm.

位于供应链不同环节的企业，可能以不同方式降低原材料或大宗商品涨价的影响。

Different firms at different points in the supply chain may attempt to mitigate the impact of raw materials/ commodity price increases in different ways.

有些企业会通过签订长期客户合同或对冲合约，尝试稳定收入。

Some firms may try to stabilize revenues by entering long-term customer or hedging contracts.

在供应链上游，原材料合约市场较为成熟，企业往往可以采用这些方式；但越接近下游，适用性越低。

While these are often available for firms at the beginning of the supply chain, where there are established markets for contracts on raw materials, it is less possible further down the chain.

例如，销售自然资源或大宗商品的生产商，以及购买这些商品的制造商，可以在远期市场订立衍生品合约，锁定较稳定的销售价格或关键投入品价格。

For example, producers that sell natural resources or commodities and manufacturers that buy them can enter derivative contracts in the forward markets to secure more stable pricing for the products they sell or the key inputs that they need.

在供应链下游，分销商和零售商也可通过长期合同稳定价格，但通常难以使用结构成熟、流动性很高的衍生品合约。

Further down the supply chain, distributors and retailers may secure long- term contracts to ensure stabilized prices, though they are unlikely to have access to structured and highly liquid derivative contracts.

制造环节产生的产品差异化程度太高，难以形成像大宗商品那样广泛的衍生品市场。

The manufacturing stage of the supply chain creates products that are too differentiated to support broad derivative markets as there are with commodities.

一种风险是：企业锁定了产品售价，却没有锁定关键原材料的采购价格；如果原材料现货成本上涨，企业可能遭受重大损失。

One risk is that if a firm locks in a sale price for its products while not locking in a purchase price for its raw material key inputs, it faces the risk of substantial loss if the cost of raw materials increases in the spot market.

有些企业会尽量降低固定经营成本，例如采用外包，或与员工及供应商签订灵活合同。

Some firms may attempt to minimize fixed operating costs—for example, through outsourcing or flexible contracts with workers and suppliers.

收入或利润容易受到材料价格波动影响的企业，也可能采取较保守的资本结构政策，使用相对较少的债务；与对这些波动不敏感的企业相比，它们承担的固定融资义务因此较小。

Firms whose revenue/profit may be impacted by fluctuations in materials prices may also use more conservative capital structure policies, with relatively little debt and therefore smaller fixed financing obligations compared with firms that are less sensitive to such fluctuations.

问题 4 和 5 进一步延伸前文酒店与旅游行业商业模式演变的例子。

Questions 4 and 5 expand on the earlier example of business model evolution in the hotel and travel industry.

补充解析 / **Supplementary explanation**

补充思路：商业模式必须说清为哪些客户解决什么问题、如何交付以及怎样获得收入。高价只有在客户认可差异化且愿意支付时才可持续；低成本战略也要有真实的成本来源。分析定价要区分销售数量、单价、重复购买和收费基础，例如按次、订阅、许可或佣金，它们的收入敏感性与成本结构并不相同。

Additional reasoning: A business model must identify target customers, the problem solved, delivery, and revenue capture. Premium pricing requires valued differentiation and willingness to pay; cost leadership needs a genuine cost advantage. Separate volume, unit price, repeat purchases, and charging basis—transaction, subscription, license, or commission—because their sensitivities differ.

相关知识点 / **Related concepts**

价值主张与定价模式：价值主张连接客户需要与企业能力；收入驱动因素和成本驱动因素共同决定利润率与可扩张性。

Value proposition and pricing: The value proposition links customer needs with capabilities. Revenue and cost drivers jointly determine margins and scalability.

QUESTION SET

Bynta 是服装零售业的新进入者，正在与已有行业企业 Ocean Hill Inc. 竞争；后者采用传统商业模式。

Bynta is a new entrant in the retail clothing industry. It is competing against Ocean Hill Inc., an established industry incumbent that uses a conventional business model.

4. 描述酒店商业模式与房屋共享商业模式在特征上的差异。

4. Describe the differences in features between the hotel business model and the home-sharing business model.

官方答案与解析 / **Official answer and explanation**

答案解析：

Solution:

许多酒店采用特许经营模式。被特许人与特许人之间具有明确且排他的关系，在特定品牌下，使用专有产品和流程经营。特许人按被特许人的销售额收取特许权使用费。

Many hotels use a franchise model in which franchisees have a tightly defined and exclusive relationship with a franchisor to operate under a specific brand with proprietary products and processes. The franchisor earns a royalty on the franchisee's sales.

房屋共享采用在线旅行社（OTA）商业模式，使房主和房东能够提供多种临时住宿，且住宿往往具有独特性，从而挑战并颠覆传统酒店模式。

Homesharing follows an Online Travel Agency (OTA) business model and has challenged and disrupted the traditional hotel model by enabling homeowners and hosts to supply a variety of temporary, often unique, accommodations.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

QUESTION SET

Bynta 是服装零售业的新进入者，正在与已有行业企业 Ocean Hill Inc. 竞争；后者采用传统商业模式。

Bynta is a new entrant in the retail clothing industry. It is competing against Ocean Hill Inc., an established industry incumbent that uses a conventional business model.

5. 解释为什么 OTA 公司的数量可能远少于酒店公司。

5. Explain why there might be so many fewer OTA companies than hotel companies.

官方答案与解析 / **Official answer and explanation**

答案解析：

Solution:

其中一个原因是，OTA 属于聚合平台，从网络效应中受益的程度远高于酒店公司。

One reason why there might be so many fewer OTA companies than hotel companies is that OTA companies are aggregators that benefit much more from network effects than hotel companies.

“网络效应”是指随着用户数量增长，网络对用户的价值呈指数式提高。

“Network effects” refers to the exponential increase in value to a network’s users as the number of its users grows.

大型网络之所以对用户有价值，很大程度上正是因为使用者众多。

A large network is valuable to its users in large part because it is used by so many people.

更多用户加入会吸引更多商户，而更多商户又吸引更多用户。

As more users join the network, more merchants are attracted to the network, which in turn attracts more users.

因此，OTA 公司数量较少，但每家公司能够吸引大量用户。

Hence, there are fewer OTA companies and each one attracts many users.

网络商业模式也经常包含众包，即用户直接参与产品或服务的建设。

Network business models also often include crowdsourcing, where users contribute directly to a product or service.

这些企业促进“用户社区”形成，用户通过客户评价与反馈自愿协作，而公司只需进行少量内容管理和监督。

These businesses facilitate “user communities” that enable voluntary collaboration between users of a product via customer reviews and feedback and require only a small amount of moderation and oversight by the company.

补充解析 / **Supplementary explanation**

在线旅游代理可聚合许多酒店，并通过更广的选择、用户流量与平台规模吸引更多参与者。这些网络与规模优势使少数代理能服务大量独立酒店，从而解释企业数量差异；酒店端则受实体地点与物业分散性影响。

Online travel agencies aggregate many hotels, drawing participants through choice, user traffic, and platform scale. These network and scale advantages let fewer intermediaries serve many independent properties, while hotels remain dispersed across physical locations.

网络效应要求“更多用户让现有或其他用户得到更多价值”，例如交易对手增加。规模经济则指产量或业务规模增大降低单位成本，两者不能混同。价值链描述活动之间的组织关系，价值主张描述提供给客户的利益，均不是本题定义。

Network effects require additional users to create value for existing or other users, for example through more counterparties. Economies of scale concern lower unit cost as output grows. A value chain organizes activities; a value proposition describes customer benefits. Neither matches the definition here.

相关知识点 / **Related concepts**

直接网络效应来自同侧用户增加；双边平台也可能具有跨边网络效应。

Direct effects come from additional same-side users; two-sided platforms can also have cross-side effects.

CI-LM07-PRACTICE-001

章末习题 1
Practice problem 1

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 247, 249

题目与资料 / **Question and data**

1. 在企业内部与外部，为创造一种产品而进行的一系列过程，包括生产实物产品并将其交付最终客户的全部步骤，无论这些步骤是否由同一家企业完成，称为：

1. The sequence of processes involved in the creation of a product, both within and external to a firm, including all the steps involved in producing a physical product and delivering it to the end customer, regardless of whether those steps are performed by a single firm, is referred to as the:

A. 价值链。

A. value chain.

B. 供应链。

B. supply chain.

C. 商业模式。

C. business model.

官方答案与解析 / **Official answer and explanation**

1. B 正确。公司的供应链是企业内部与外部参与生产产品或服务，并将其交付最终用户的网络或系统。A 错误，因为价值链是企业内部为客户创造价值的系统和流程，属于商业模式的“如何实现”部分。C 错误，因为商业模式描述企业如何运作，包括核心客户群、企业提供的产品或服务、使用的关键资源与资产，以及主要合作伙伴和供应商。

1. B is correct. A company's supply chain is the network or system inside and outside the company involved in producing a product or service and delivering it to an end user. A is incorrect because value chain refers to the systems and processes within a firm that create value for its customers. It is the "how" aspect of a business model. C is incorrect because the business model is a description of how a business works. It includes descriptions of the core customer base, the product or service that the business offers, the key resources and assets the business uses, and the main partners and suppliers of the business.

补充解析 / **Supplementary explanation**

价值链覆盖产品创造过程中企业内部和外部相互衔接的活动。分析时要识别谁完成研发、采购、生产、分销和服务，以及各环节如何贡献价值和成本。它不同于客户获得的价值主张，也不同于随着用户增长而增强的网络效应。

The value chain comprises linked internal and external activities in creating a product. Identify who performs R&D, sourcing, production, distribution, and service, and how each contributes value and cost. It differs from the customer value proposition and from user-driven network effects.

相关知识点 / **Related concepts**

价值链描述价值创造活动及其联系。

The value chain describes value-creating activities and their links.

章末习题 2
Practice problem 2

章末练习 / Practice problem · 原版 PDF 页码 / Source PDF pages: 247-249

题目与资料 / **Question and data**

以下资料适用于问题 2—5。

The following information relates to questions 2-5

一位分析师正在审阅 HealthyPet 和 DiaSera 两家公司管理层的投资者演示资料。两家公司都采用非传统商业模式。

HealthyPet 是一家宠物医疗保险公司，在由既有财产及意外伤害保险公司主导的行业中采取差异化方式。对这些既有保险公司而言，相比商业、住宅和汽车保险，宠物保险只是小众业务。HealthyPet 瞄准收入高、年轻、居住在城市、工作繁忙的专业人士宠物主人。公司为拥有多只宠物的客户捆绑提供保险，包括既有保险公司通常不愿承保的异宠。传统保险公司出售的保单，会在规定条件和限额内，按一定比例向宠物主人报销兽医及其他医疗费用。HealthyPet 则直接向兽医支付宠物医疗费用。公司推荐其优选兽医网络，并协商较低收费，但对投保人的限制相对较少。公司通过兽医推荐和精品宠物店销售，以维持独特、高端的形象，同时开设网上店面，方便客户。为维护品牌形象，公司避开大众零售渠道。由于产品更优，其每月保费高于竞争对手。迄今，这种定价行之有效，因为 HealthyPet 具有强大品牌和客户重视的独特性。

DiaSera 设计、制造并销售一种向胰岛素依赖型糖尿病患者输送胰岛素的医疗器械，即胰岛素泵。其产品的设计和操作方式与竞争对手不同，体积明显更小，外观也更美观。产品是一件贴附在用户皮肤上的小型一体设备；竞争对手的产品则由独立手持控制器和贴附在皮肤上的输送装置组成，并以导管连接。胰岛素泵主要供 1 型糖尿病患者使用。该市场规模较小，医疗需求复杂，包括对胰岛素进行严格管理。胰岛素泵市场也较复杂，存在多家竞争对手、胰岛素监测设备等互补产品，以及一种成本较低的替代方式：每日多次注射胰岛素。DiaSera 希望将客户群扩大到每天多次注射胰岛素的 2 型糖尿病患者；这一市场规模是 1 型糖尿病市场的数倍。DiaSera 的胰岛素泵售价略高于竞争对手。管理层表示，由于制造存在显著规模经济，随着客户群扩大，单位成本将大幅下降，而且，即使价格保持不变，利润率也会显著提高。除了差异化设计，公司还在售前和售后，由经过高度专业培训的护士提供大量客户服务。客户可全天候、每周七天取得服务，无需额外付费。DiaSera 直接向客户销售，并同时向客户和医生推广，因为客户购买胰岛素泵前必须获得医生处方。产品直接配送到客户家中。

An analyst is reviewing investor presentations from the management teams of two companies with unconventional business models: HealthyPet and DiaSera. HealthyPet is a pet medical insurer that has a differentiated approach in a business dominated by incumbent property & casualty insurers, for which pet insurance is a niche business relative to business, home, and auto insurance lines. HealthyPet targets the high-income, young, urban, busy professional pet owner segment. It bundles coverage for owners of multiple pets, including exotic pets that incumbents are typically reluctant to insure. The industry incumbents sell insurance policies that reimburse pet owners for a percentage of veterinarian and other medical costs incurred, subject to restrictions and limits. HealthyPet, however, pays veterinarians directly for pet medical costs. It has a preferred network of veterinarians it recommends and for which it negotiates lower prices, but policyholders face relatively few restrictions. It sells through veterinarian referrals and boutique pet stores to maintain an image of exclusivity and prestige and maintains an online storefront for customer convenience. It avoids mass market retail to protect its image. It charges more than its competitors for monthly insurance premiums because it is a better product. The pricing has worked so far because HealthyPet has a strong brand and a distinctiveness that its customers value. DiaSera designs, makes, and sells a medical device that delivers insulin to people with insulin-dependent diabetes known as an insulin pump. DiaSera's pump is differentiated from those of its competitors in its design and operation; it is far smaller and more aesthetically pleasing than competitors' pumps. It is a single, small device adhered to a user's skin, while competitors' pumps consist of separate handheld controllers attached to a delivery device on a user's skin with tubing. Insulin pumps are used primarily by people with Type 1 diabetes, which is a smaller market that has complex medical needs, including close management of insulin. The insulin pump market is complex, with several competitors; complement products, such as insulin monitoring devices; and an inexpensive substitute: using multiple daily injections of insulin. DiaSera is looking to expand its customer reach to include Type 2 diabetics who are on multiple daily insulin injections, which is a market several times the size of the Type 1 diabetics market. DiaSera's pump product is priced at a small premium to competitors. Management says that given significant economies of scale in manufacturing, unit costs will fall substantially as the customer base grows and, even with unchanged pricing, margins will rise significantly. Besides the differentiated product design, the company also offers substantial customer service from highly trained nurses both before and after the sale. Access to customer service is available 24/7 and does not have any additional cost to the customer. DiaSera makes direct sales to customers and markets to both customers and physicians, because customers must receive a prescription for the pump from a physician before purchase. Products are shipped directly to customers' homes.

2. 完成 HealthyPet 的商业模式特征表。

2. Complete the grid of business model features for HealthyPet.

HealthyPet 商业模式特征填写表：客户；产品；渠道；定价策略。请根据题目资料填写各栏。

Customers
Products
Channels
Pricing strategy

原 PDF 第 248 页 · 完整表格 · 300 dpi

官方答案与解析 / **Official answer and explanation**

2.

2.

第 2 题答案：HealthyPet 的商业模式。
客户：高收入、年轻、居住在城市、工作繁忙的专业人士宠物主人；拥有多只宠物及异宠。
产品：为生病或受伤的宠物提供保险，使客户安心，并直接与兽医结算费用。
渠道：兽医推荐、精品宠物店和网上店面。
定价策略：由于产品高端，采用溢价定价；按月收取保费，类似订阅制。

Customers	• High-income, young, urban, busy professional pet owners • Own multiple pets and exotic pets
Products	• Insurance policy for pets that are sick or injured • Provides peace of mind to customers • Handles billing directly with veterinarians
Channels	• Veterinarian referrals • Boutique pet stores, online storefront
Pricing strategy	• Premium pricing because it is a premium product • Monthly premiums, similar to subscription

原 PDF 第 249 页 · 完整表格 · 300 dpi

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

相关知识点 / **Related concepts**

商业模式的运营约束与可扩张性：经营杠杆源于固定成本；网络效应需要新增用户为其他用户创造价值，不能仅凭线上平台名称推断。

Operating constraints and scalability of business models: Operating leverage arises from fixed costs. Network effects require each additional user to create value for others; an online-platform label alone is insufficient.

题目与资料 / **Question and data**

以下资料适用于问题 2—5。

The following information relates to questions 2-5

一位分析师正在审阅 HealthyPet 和 DiaSera 两家公司管理层的投资者演示资料。两家公司都采用非传统商业模式。

HealthyPet 是一家宠物医疗保险公司，在由既有财产及意外伤害保险公司主导的行业中采取差异化方式。对这些既有保险公司而言，相比商业、住宅和汽车保险，宠物保险只是小众业务。HealthyPet 瞄准收入高、年轻、居住在城市、工作繁忙的专业人士宠物主人。公司为拥有多只宠物的客户捆绑提供保险，包括既有保险公司通常不愿承保的异宠。传统保险公司出售的保单，会在规定条件和限额内，按一定比例向宠物主人报销兽医及其他医疗费用。HealthyPet 则直接向兽医支付宠物医疗费用。公司推荐其优选兽医网络，并协商较低收费，但对投保人的限制相对较少。公司通过兽医推荐和精品宠物店销售，以维持独特、高端的形象，同时开设网上店面，方便客户。为维护品牌形象，公司避开大众零售渠道。由于产品更优，其每月保费高于竞争对手。迄今，这种定价行之有效，因为 HealthyPet 具有强大品牌和客户重视的独特性。

DiaSera 设计、制造并销售一种向胰岛素依赖型糖尿病患者输送胰岛素的医疗器械，即胰岛素泵。其产品的设计和操作方式与竞争对手不同，体积明显更小，外观也更美观。产品是一件贴附在用户皮肤上的小型一体设备；竞争对手的产品则由独立手持控制器和贴附在皮肤上的输送装置组成，并以导管连接。胰岛素泵主要供 1 型糖尿病患者使用。该市场规模较小，医疗需求复杂，包括对胰岛素进行严格管理。胰岛素泵市场也较复杂，存在多家竞争对手、胰岛素监测设备等互补产品，以及一种成本较低的替代方式：每日多次注射胰岛素。DiaSera 希望将客户群扩大到每天多次注射胰岛素的 2 型糖尿病患者；这一市场规模是 1 型糖尿病市场的数倍。DiaSera 的胰岛素泵售价略高于竞争对手。管理层表示，由于制造存在显著规模经济，随着客户群扩大，单位成本将大幅下降，而且，即使价格保持不变，利润率也会显著提高。除了差异化设计，公司还在售前和售后，由经过高度专业培训的护士提供大量客户服务。客户可全天候、每周七天取得服务，无需额外付费。DiaSera 直接向客户销售，并同时向客户和医生推广，因为客户购买胰岛素泵前必须获得医生处方。产品直接配送到客户家中。

An analyst is reviewing investor presentations from the management teams of two companies with unconventional business models: HealthyPet and DiaSera. HealthyPet is a pet medical insurer that has a differentiated approach in a business dominated by incumbent property & casualty insurers, for which pet insurance is a niche business relative to business, home, and auto insurance lines. HealthyPet targets the high-income, young, urban, busy professional pet owner segment. It bundles coverage for owners of multiple pets, including exotic pets that incumbents are typically reluctant to insure. The industry incumbents sell insurance policies that reimburse pet owners for a percentage of veterinarian and other medical costs incurred, subject to restrictions and limits. HealthyPet, however, pays veterinarians directly for pet medical costs. It has a preferred network of veterinarians it recommends and for which it negotiates lower prices, but policyholders face relatively few restrictions. It sells through veterinarian referrals and boutique pet stores to maintain an image of exclusivity and prestige and maintains an online storefront for customer convenience. It avoids mass market retail to protect its image. It charges more than its competitors for monthly insurance premiums because it is a better product. The pricing has worked so far because HealthyPet has a strong brand and a distinctiveness that its customers value. DiaSera designs, makes, and sells a medical device that delivers insulin to people with insulin-dependent diabetes known as an insulin pump. DiaSera's pump is differentiated from those of its competitors in its design and operation; it is far smaller and more aesthetically pleasing than competitors' pumps. It is a single, small device adhered to a user's skin, while competitors' pumps consist of separate handheld controllers attached to a delivery device on a user's skin with tubing. Insulin pumps are used primarily by people with Type 1 diabetes, which is a smaller market that has complex medical needs, including close management of insulin. The insulin pump market is complex, with several competitors; complement products, such as insulin monitoring devices; and an inexpensive substitute: using multiple daily injections of insulin. DiaSera is looking to expand its customer reach to include Type 2 diabetics who are on multiple daily insulin injections, which is a market several times the size of the Type 1 diabetics market. DiaSera's pump product is priced at a small premium to competitors. Management says that given significant economies of scale in manufacturing, unit costs will fall substantially as the customer base grows and, even with unchanged pricing, margins will rise significantly. Besides the differentiated product design, the company also offers substantial customer service from highly trained nurses both before and after the sale. Access to customer service is available 24/7 and does not have any additional cost to the customer. DiaSera makes direct sales to customers and markets to both customers and physicians, because customers must receive a prescription for the pump from a physician before purchase. Products are shipped directly to customers' homes.

3. 完成 DiaSera 的商业模式特征表。

3. Complete the table of business model features for DiaSera.

DiaSera 商业模式特征填写表：客户；产品；渠道；定价策略。请根据题目资料填写各栏。

Products are shipped directly to customers' homes.

4. 讨论 HealthyPet 商业模式的主要风险、机会和需要探究的问题。

4. Discuss key risks, opportunities, and questions regarding the HealthyPet business model.

官方答案与解析 / **Official answer and explanation**

4. HealthyPet 的商业模式存在几项明显风险。其产品是否足够差异化，以建立规模充足的客户群，从而实现保险公司所依赖的风险分散，仍不明确。保险业务需要足够大的投保人群体，使保费足以覆盖损失。承保异宠还可能引发逆向选择：既有公司不愿承保，可能正说明这类宠物的承保经济性不佳。最后，如果其模式成功，很可能出现模仿者，甚至来自现有保险公司，因为直接向兽医付款的方式可能容易复制。

HealthyPet 的机会在于建立忠诚的客户群和兽医群体。高端形象、优质服务，以及宠物生病时无需担心的安心感，可能吸引许多宠物主人。需要研究的问题包括：其他保险公司复制该商业模式有多难？HealthyPet 计划如何与兽医建立关系，已拥有多少合作兽医，还需要多少？兽医合作关系能否具有排他性？此外，兽医推荐和精品宠物店能否带来足够的新客户以支持业务，也值得怀疑；HealthyPet 是否最终仍需投入大规模、直接面向消费者的广告活动？

4. There are several apparent risks to HealthyPet's business model. It is not clear that their offering is sufficiently differentiated to build a large-enough customer base to provide the diversification that an insurance company depends on (insurance requires a large pool of policyholders such that there is enough premiums to cover losses). It may incur an adverse selection problem in covering exotic pets because they may be uneconomical to insure as evidenced by the reluctance of established companies to insure them. Finally, if its model is successful, it will likely face competition in the form of imitators, possibly from the incumbent insurers because it is probably possible for them to copy the model of pay veterinarians directly. HealthyPet could see opportunity in building a loyal base of customers and a loyal base of veterinarians. Its image of prestige, premium service, and not needing to worry when a pet gets sick could appeal to many pet owners. Questions include how difficult it would be for other insurers to copy the business model, how HealthyPet plans to establish relationships with veterinarians and how many it has and needs, and whether relationships with veterinarians can be exclusive. It is also questionable whether referrals and boutique pet stores will deliver a sufficient flow of new customers to support the business or whether HealthyPet will instead need to invest in large advertising campaigns directly to consumers.

补充解析 / **Supplementary explanation**

补充思路：不要只根据收入增长判断可扩张性。先找生产能力、专门人力、供应链集中、渠道和客户关系中最难随需求调整的环节。可伸缩租赁与标准化投入提高调整速度；长期技能培养、专用原料或固定承诺可能限制扩张和缩减。若题目要求识别描述遗漏，应逐项核对客户、产品、渠道、定价和竞争优势。

Additional reasoning: Growth alone does not establish scalability. Identify the hardest-to-adjust constraint in capacity, specialized labor, suppliers, channels, or customer relationships. Flexible leases and standardized inputs improve adjustment speed; long training, specialized materials, and fixed commitments limit scaling up or down. For missing-model-element questions, check customers, products, channels, pricing, and advantage explicitly.

DiaSera's pump product is priced at a small premium to competitors. Management says that given significant economies of scale in manufacturing, unit costs will fall substantially as the customer base grows and, even with unchanged pricing, margins will rise significantly. Besides the differentiated product design, the company also offers substantial customer service from highly trained nurses both before and after the sale. Access to customer service is available 24/7 and does not have any additional cost to the customer. DiaSera makes direct sales to customers and markets to both customers and physicians, because customers must receive a prescription for the pump from a physician before purchase. Products are shipped directly to customers' homes.

5. 讨论 DiaSera 商业模式的主要风险、机会和需要探究的问题。

5. Discuss key risks, opportunities, and questions regarding DiaSera's business model.

> 官方答案与解析 / **Official answer and explanation**

5. 一项主要风险是，DiaSera 的定价策略可能与其对客户服务的重视不相容。其售价仅略高于竞争对手，却计划使用高度训练的专业人员，提供明显更好的客户服务。如果客户增长和销量不及预期，或增长所需时间比预期更长，制造规模经济也会延迟实现，可能威胁盈利能力，或迫使管理层提价。

第二项主要风险是，公司瞄准的 2 型糖尿病患者，以往通常不使用胰岛素泵。虽然 DiaSera 的产品似乎比每日多次注射胰岛素更方便，但价格更高，而且客户必须经历可能较复杂的处方、采购和服务流程。管理层应说明支持其战略信心的关键因素，例如 2 型糖尿病市场中曾经试用过胰岛素泵的客户群，或更年轻、更愿意尝试新产品的患者；公司也应与能够向患者推荐产品的重要医生建立关系。

明显的主要机会包括：在 1 型糖尿病市场，凭借优于竞争对手的产品扩大市场份额；以及进入需要每日多次注射胰岛素的 2 型糖尿病新市场。如果竞争对手尚未明确细分并锁定这一群体，DiaSera 就可能取得竞争优势。

关键问题包括制造战略的细节，例如不同销量下的单位成本或毛利率估计、生产管理层和员工在这种经营环境中的经验、公司拥有多少制造资源，以及是否依赖关键供应商。此外，分析师需要根据客户细分、历史数据、以往产品上市情况，以及客户在当前价位下需求的现实预期，判断市场渗透率和销量。最后，为建立经营成本模型，还必须了解每一定数量客户需要多少服务专业人员，以及相应成本。

5. A major risk is the possible incompatibility between DiaSera's pricing strategy and its emphasis on customer service. It is priced only slightly higher than parity with competitors but aims to provide substantially better customer service by using highly trained experts. If customer growth and sales disappoint or take longer than expected, the economies of scale in manufacturing will as well, potentially imperiling profitability or forcing management to raise prices. A second major risk is targeting Type 2 diabetics who have historically not used insulin pumps. While DiaSera's insulin pump seems more convenient than multiple daily injections of insulin, it is more expensive and requires customers to navigate a potentially complicated prescription, purchasing, and service scenario. DiaSera management should discuss key factors that give it confidence in the strategy— such as a segment of customers in the Type 2 market who have tried a pump before, patients who are younger and more likely to try a new product—and establish relationships with key physicians who can recommend the product to patients. The clear major opportunities are market share gains in Type 1 diabetes from inferior competitor products and the new market opportunity of Type 2 diabetics who require multiple daily injections. If competitors have not segmented the market to explicitly target this cohort, DiaSera could realize a competitive advantage. Key questions include details on its manufacturing strategy, such as estimating unit costs or gross margins at different levels of volume, how experienced the manufacturing management and staff are in this setting, to what extent the company owns the manufacturing resources, and whether there are key suppliers it relies on. Additionally, an analyst will have to develop an outlook for market penetration and sales based on customer segmenting, historical data, precedent product launches, and realistic expectations for customer demand at the current price point. Finally, additional details on how many service professionals are needed per number of customers and at what cost will be essential to modeling operating costs.

> 补充解析 / **Supplementary explanation**

补充思路：商业模式必须说清为哪些客户解决什么问题、如何交付以及怎样获得收入。高价只有在客户认可差异化且愿意支付时才可持续；低成本战略也要有真实的成本来源。分析定价要区分销售数量、单价、重复购买和收费基础，例如按次、订阅、许可或佣金，它们的收入敏感性与成本结构并不相同。

Additional reasoning: A business model must identify target customers, the problem solved, delivery, and revenue capture. Premium pricing requires valued differentiation and willingness to pay; cost leadership needs a genuine cost advantage. Separate volume, unit price, repeat purchases, and charging basis—transaction, subscription, license, or commission—because their sensitivities differ.

相关知识点 / **Related concepts**

价值主张与定价模式：价值主张连接客户需要与企业能力；收入驱动因素和成本驱动因素共同决定利润率与可扩张性。

Value proposition and pricing: The value proposition links customer needs with capabilities. Revenue and cost drivers jointly determine margins and scalability.
